NOTIFICATION.

The 31st August 1887.—The following correspondence regarding the imposition of quarantine at Aden and Perim against arrivals from Bombay, received from the Government of Bombay, dated the 24th August 1887, is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

QUARANTINE RULES.

No. 2497B, dated Bombay Castle, the 24th August 1887.

From—J. D&C. ATKINS, Esq., c.s., Under-Secretary to the Government of Bombay, General Department,

To—The Secretary to the Government of Bengal, Calcutta.

In continuation of my telegram of the 19th instant, I am directed to forward herewith, for the information of the Government of Bengal, copy of a Resolution of the Government of Bombay, No. 2497, dated 24th idem, and of the Notification issued thereunder, regarding the enforcement of the B Quarantine Rules at Aden and Perim against arrivals from Bombay.

*Quarantine: Imposition of—*at Aden and Perim against vessels arriving from Bombay.

No. 2497.

GENERAL DEPARTMENT.

Bombay Castle, 24th August 1887.

Telegram from the Government of India, Home Department, dated 23rd August 1887 :—

"Your telegram 19th. Imposition quarantine Aden and Perim against Bombay sanctioned."

RESOLUTION.—A notification should be published in the *Bombay Government Gazette* bringing B Quarantine Rules into operation at Aden and Perim against arrivals from Bombay.

2. Copies of the notification should be forwarded to the Political Resident, Aden, and the other officers and departments concerned for information, with reference to Government Resolution No. 2448, dated 19th instant. Copies should also be forwarded to the Governments of India, Bengal, Madras and Ceylon, and the Chief Commissioner of Burma.

J. D&C. ATKINS.

Under-Secretary to Government.

GENERAL DEPARTMENT.

Bombay Castle, 24th August 1887.

No. 2497.—In exercise of the power conferred by Act I of 1870, the following Rules for Quarantine against Cholera have been made by the Government of Bombay, with the previous sanction of the Governor-General in Council: they will take effect from the 18th instant in the Port of Aden and at Perim as a temporary measure :—

- I.—The Commander of every vessel, including buggalows or other native craft, arriving from Bombay shall, before entering the harbour, indicate by signal the port from which such vessel has come.
- II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the harbour.
- III.—Immediately on arrival the Commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vessel shall anchor at such place as may be pointed out by the Port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival, or for the shorter period prescribed in Rule IV, and undergo disinfection, which should apply as well to crew, passengers, effects, and susceptible goods.
- IV.—If the Health Officer of the Port has sufficient evidence that no cases of a suspicious nature have taken place on board during the voyage, and if the vessel is besides in good hygienic condition, the duration of the quarantine will be diminished according to the following scale :—

After eight days of voyage	six days of quarantine
Do. nine do.	five do.
Do. ten do.	four do.
Do. eleven do.	three do.
Do. twelve do.	two do.
Do. thirteen do. and upwards	twenty-four hours of quarantine.

- V.—If during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule III.
- VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.
- VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.
- VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.
- IX.—All vessels arriving at Aden and Perim which may have communicated with vessels coming from Bombay shall be subjected to the same quarantine as vessels arriving at Aden and Perim from that Port.
- X.—All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their Bills of Health.

By order of His Excellency the Right Honourable the Governor in Council,

T. D. MACKENZIE,

Acting Chief Secretary to Government.

NOTIFICATION.

The 6th September 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 53).

BAY OF BENGAL.

INDIA—EAST COAST.

COAST OF ORISSA.

DHAMRA RIVER.

SOUTH CHANNEL BUOY.

The following information has been received from the Port Officer of Chandbally:—

The G. buoy in the South Channel, entrance to the Brahmini or Dhamra river, being damaged by the cyclone of May 1887, has been changed, and a fairway buoy, painted black and white, with spire and basket, substituted.

The best track over the outer bar at present is to keep the O. buoy nearly on with this fairway buoy, or a little open to the northward of it.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, Captain, I.M.,
Port Officer of Calcutta.

POST OFFICE, Calcutta, the 5th September 1887.

NOTICE TO MARINERS—(No. 52).

EASTERN ARCHIPELAGO.

SINGAPORE STRAITS.

Intended discontinuance of the Horsburgh light.

The following information has been received from Commander Alfred Carpenter, R.N., in charge of the Marine Survey of India:—

The Rear Admiral Commanding the Naval Forces in Netherland India has given notice, dated Batavia, 14th July, that, according to Notice to Mariners, Singapore, 29th June

1887, after the 5th August next, the revolving light on the Horsburgh lighthouse will be discontinued during alterations.

Until the new light is exhibited, the light-ship *Formosa* will be moored on the North-East end of the reef, one cable's length from the base of the light-tower.

The light-ship will exhibit a bright revolving light in all respects similar to the Horsburgh light, but visible at a distance of only 10 miles.

In addition, there will be two bright lights shown from the balcony of the light-house tower, N. and S., at an elevation of 85 feet and visible about 15 miles.

By direction of the Government of Bengal,

ARTHUR W. STIEFF, Captain, R.M.,

Port Officer of Calcutta.

Port Office, Calcutta, the 26th August 1887.

NOTIFICATION.

The 23rd August 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,

Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 51).

RED SEA.

(1). *Reported sunken rocks Northward of Jebel Zukur island.*

With reference to Notice to Mariners No. 47, of 22nd July 1887, on the reported sunken rocks northward of Jebel Zukur island, the Admiralty has notified that a close examination has been made on two occasions by H. M. S. *Griffon* of the area in which the dangers reported by the steam-vessels *Avocat* and *Teddington* are said to lie, without the discovery of any sign of shoaling of the water.

Pending the report of the inquiry into the loss of the latter vessel, and the receipt of evidence as to her position, no further search will be made, but vessels are warned to pass to the westward of a line joining Centre Peak island, Zebayir islands, and High island, Jebel Zukur.

(2). *Dahalak Bank—Position of wreck Northward of Seghalah island.*

Information has been received from Commander Hon'ble H. Lambton, H. M. S. *Dolphin*, through the Admiralty, that the steam-vessel *Graville* lies stranded about two miles northward of Seghalah island, Dahalak Bank.

The vessel, the mast and funnel of which were still standing, lies in a depth of three fathoms, with the following bearings and distance:—

North-east point of Seghalah island	... S.S.E., distant nearly two miles.
South-east point of Bilhah island	... N.W. by W. 4 W.

—Position.—Latitude $15^{\circ} 47' 15''$ N.; longitude $40^{\circ} 44' 0''$ E.

Note.—It does not appear likely that the *Graville* will break up for some time.

The bearings are Magnetic. Variation 4° westerly in 1887.

By direction of the Government of Bengal,

ARTHUR W. STIEFF, Captain, R.M.,

Port Officer of Calcutta.

Port Office, Calcutta, the 19th August 1887.

JUDICIAL DEPARTMENT.

No. 4104A.

The 31st August 1887.—The services of Baboo Jiban Kristo Chatterjee, First Subordinate Judge of Chittagong, are placed at the disposal of the Chief Commissioner of Assam.

By order of the High Court,

J. H. BELCHAMBERS,

Deputy Registrar, for Registrar.

HIGH COURT, FORT WILLIAM, the 2nd September 1887.

EDUCATION DEPARTMENT, BENGAL.

Subordinate Educational Service.

The 23rd August 1887.—Babu Sital Chandra Chatterjee, Sub-Inspector of Schools, Manbhoom (officiating in class VII), was on leave of absence for one month, under section 72, chapter V of the Civil Leave Code, with effect from the 17th June 1887.

The orders of the 4th July last, granting Moulavi Abdul Rahim, Deputy Inspector of Schools, Bhagulpore (class IV), leave of absence for one month, under section 72, chapter V of the Civil Leave Code, with effect from that date, are cancelled.

The 25th August 1887.—Moulavi Syud Reazat Hossein, Third Master of the Patna Normal School (class VI), is appointed to be Fifth Master of the Mozufferpore Zillah School, vice Babu Saligram Tewari, transferred.

Babu Jagat Bandhu Bhadra, Head Master of the Jessore Zillah School (class IV), having returned to duty on the afternoon of the 23rd July last, the unexpired portion of the leave granted to him under the orders of the 9th idem is cancelled.

The 26th August 1887.—In supersession of the orders of the 2nd August 1887, Babu Debendra Nath Bhattacharjee, M.A., Second Master of the Rungpore Zillah School and Officiating Second Master of the Furruckpore Zillah School (officiating in class VI),

is appointed to be Lecturer in the Ravenshaw College, Cuttack, with effect from the 11th idem, and confirmed in that class, with effect from the 1st September 1887, vice Babu Hara Nath Mitra, retired.

The 27th August 1887.—Babu Radha Lal, Deputy Inspector of Schools, Gya (class V), on leave, is appointed to act as Deputy Inspector of Schools, Ohamparan, during the absence, on deputation, of Babu Sajiwan Lal, B.A., or until further orders.

CHARLES H. TAWNEY,
Offg. Director of Public Instruction.

Junior Scholarships for 1888.

It is hereby notified that in accordance with the Government Resolution, dated the 18th January 1887, published in the *Calcutta Gazette* of the 19th idem, seven junior scholarships of the second grade and 13 of the third grade have been allotted to the Presidency Division, to be awarded at the Entrance Examination to be held in April 1888.

2. The second grade scholarships will be awarded to those candidates who take the highest places in the divisional list, irrespective of districts.

3. The third grade scholarships will be distributed among the different districts of the Presidency Division as follows:—

24. Pergunnahs	4
Nuddea	3
Jessore	2
Khulna	2
Moorshedabad	2
Total					13

A. N. BHATTACHARJEE,
Personal Assistant, for Commissioner.

NOTIFICATION.

It is hereby notified for general information that upon the result of the Entrance Examination of April 1888 being known, the three second grade junior scholarships allotted to the Bhagulpore Division will be awarded to the three best boys who stand first in order of merit in the divisional list, irrespective of the districts they come from, and the nine third grade scholarships will be distributed as follows:—

Monghyr	2
Bhagulpore	3
Purneah	1
Maldah	1
Southal Pergunnahs	2

C. N. SINGH, for Commissioner.

NOTIFICATION.

In accordance with the Government of Bengal Notification of the 23rd July 1887, notice is hereby given, to those whom it may concern, that the next half-yearly examination of Compounders will be held at 11 A.M. on Wednesday, the 12th October 1887, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce one of the following certificates:—

- From the Superintendent of a Vernacular Medical School that he has attended regularly for one year the compounder class of the school.
- From the legally-qualified medical manager of a chemist's and druggist's establishment recognised by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment.
- From a Civil Surgeon that he has assisted in the dispensing of drugs at the Sudder dispensary of a civil station for a period of five years.

3. Applicants must register their names and submit their certificates, together with a fee of Rs. 3, at least one week before the 12th October 1887, at the office of the undersigned.

Note.—The students belonging to the compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

N. B.—The attention of candidates is drawn to Rule 5, section (b) of the Government notification of the 23rd July 1887, from which they will observe that the chemists' and druggists' establishments from the legally-qualified medical managers of which they obtain their certificates will have to be recognised by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

S. C. MACKENZIE, M.D.,
Superintendent, Campbell Medical School.

CAMPBELL MEDICAL SCHOOL, CALCUTTA, the 17th August 1887.

NOTICE is hereby given that the next Half-yearly Departmental Examination of Assistants and others commencing on Monday, the 7th November 1887, three Local Committees will be formed in the Chittagong Division, viz., one at Chittagong for examinees employed in the districts of Chittagong and Chittagong Hill Tracts, one at Noakhally for examinees employed in that district, and the third at Tipperah for those employed there.

D. R. LYALL, *Offg. Commissioner.*

COMMR.'s OFFICE, CHITTAGONG, the 24th August 1887.

NOTICE

Is hereby given that the next Half-yearly Departmental Examination of Assistant Magistrates, Deputy Magistrates, and others serving in the districts of this division will be held at Bhagulpore, on Monday, the 7th November 1887, and following days.

The examination will be held in the Commissioner's Office.

C. N. SINGH, *for Commissioner.*

BHAGULPORE COMMISSIONER'S OFFICE, the 1st September 1887.

NOTIFICATION OF THE BOARD OF REVENUE.

No. 1121B.

NOTICE is hereby given that the Tenth Sale of Opium, the provision of 1885-86, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Thursday, the 6th October 1887, at 11 A.M., and will comprise 4,750 chests, viz. :—

The Calcutta Gazette.

WEDNESDAY, SEPTEMBER 7, 1887.

PART I A.

Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following orders, issued by the Government of India in the Home Department, are republished for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATIONS.—PUBLIC.

Simla, the 2nd September 1887.

No. 1964.—Under section 18, sub-section (2), of the Indian Explosives Act, 1884, the Governor-General in Council is pleased to prescribe that drafts of proposed rules under the Act shall be published—

- (a) when the authority making the rules is a Local Government, in one issue of the local official Gazette in English and in such other language or languages as the Local Government may direct; and
- (b) when the authority making the rules is the Governor-General in Council, in one issue of the *Gazette of India* in English, and in one issue of the local official Gazette (if any) of every Local Government in British India in English and in such other language or languages as the Local Government may direct.

This Notification supersedes Home Department Notification No. 1437, dated the 14th August 1885.

ESTABLISHMENTS.

The 2nd September 1887.

No. 268.—Mr. R. H. Wilson is permitted to resign Her Majesty's Bengal Civil Service with effect from the 26th August 1887.

JUDICIAL.

The 2nd September 1887.

No. 1470.—Under section 26, sub-section (2), of the Petroleum Act, 1886, the Governor-General in Council is pleased to prescribe that drafts of proposed rules under the Act shall be published—

- (a) when the authority making the rules is a Local Government, in one issue of the local official Gazette in English and in such other language or languages as the Local Government may direct; and
- (b) when the authority making the rules is the Governor-General in Council, in one issue of the *Gazette of India* in English, and in one issue of the local official Gazette (if any) of every Local Government in British India in English and in such other language or languages as the Local Government may direct.

This Notification supersedes Home Department Notification No. 187, dated the 1st February 1887.

A. P. MACDONNELL,
Secretary to the Govt. of India.

The following order, issued by the Government of India in the Foreign Department, is republished for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 29th August 1887.

No. 1779E.—The following notification, which was published in the *London Gazette* of the 8th July 1887, is republished for general information :

Foreign Office, the 6th July 1887.

WARNING TO TRAVELLERS IN ITALY.

All persons travelling in Italy are hereby warned that, under regulations issued by the Italian Government, no weapons whatever, whether revolvers, sporting guns, long-knives, or sword-sticks, may be carried in Italy without a license.

H. M. DURAND,
Secretary to the Govt. of India.

The following order, issued by the Government of India in the Department of Finance and Commerce, is republished for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

SEPARATE REVENUE, &c.

ASSESSED TAXES.

Income Tax.

The 31st August 1887.

No. 4678.—In exercise of the powers conferred by section 38 of Act II of 1886, the Governor-General in Council is pleased to direct that the following rule be substituted for Rule 4 of the Notification of the Government of India, Department of Finance and Commerce, No. 593, dated the 6th February 1886 :—

A deduction made from the amount of salary, pension, or annuity liable to assessment on account of a payment made to a Life Insurance Company must be supported either—

- (1) by the original receipt of the Insurance Company ; or
- (2) (in the case of a deduction claimed by a servant of the Government or of a local authority) by a copy of the same, presented along with the original to the officer who pays the salary, and attested by that officer, who should, after such attestation, return the original ; or
- (3) by a duplicate receipt given by the Insurance Company ; or
- (4) by a certificate of payment given by the Insurance Company.

In cases (1), (3), and (4) the receipt or certificate should be returned as soon as the fact of payment is admitted in the due course of audit.

Where the Collector is satisfied that none of the above prescribed documents can be produced without an amount of delay, expense, or inconvenience which, under the circumstances of the case, would be unreasonable, he may accept such other proof of payment of the premium as he may deem sufficient.

E. T. ATKINSON,
Offg. Secretary to the Govt. of India.

The following order, issued by the Government of India in the Military Department, is republished for general information.

J. WARE EDGAR,

Khoolna Collectorate, the 25th July 1887.

W. CLAY, Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate in the district of Nuddea will be put up to sale at the Nuddea Collectorate on Wednesday, the 14th September 1887, corresponding with 20th of Bhadra 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

Conditions of sale.

1st—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the estate to be again put up to sale at the risk of the defuncting purchaser, after issue of advertisement as in the case of original sale.

24 Pergunnahs Collectorate, the 31st August 1887.

G. K. LEON, for Collector.

Notice.

THE following draft of rules which the District Board of Pooree has framed at its meeting held on the 6th August 1887, under section 22 of the Bengal Local Self-Government Act of 1885, is published for general information, under section 143 of the Act; and notice is hereby given that they will be taken into consideration on or after the 30th day of September 1887, when any objections or suggestions which may be made by any person, and received before that date, will also be considered.

H. SARAO, Chairman.

POOREE DISTRICT BOARD'S OFFICE,
The 8th August 1887.

CLAUSE (a)—Meetings.

RULE 1.—If the Chairman is temporarily absent from his duties, or if the office of Chairman is temporarily vacant, the duties of the Chairman under these rules shall be performed by the Vice-Chairman.

RULE 2.—Meetings shall be either ordinary or special.

RULE 3.—An ordinary meeting of the District Board shall be held on the first Thursday of every month, provided that if the first Thursday of any month falls on a gazetted holiday, or if for any other reason it is deemed inconvenient, the Chairman may fix another day for the ordinary meeting of the Board.

RULE 4.—A special meeting of the District Board may be called at any time by the Chairman. The Chairman shall be bound to call a special meeting on a requisition signed by one-fourth of the total number of members.

RULE 5.—The subjects referred to in Rule 65 of Part IV of the General Rules, and in section 29 of the Act, shall be dealt with at special meetings only.

RULE 6.—All other subjects which come within the province of the District Board may be dealt with at either ordinary or special meetings.

RULE 7.—Meetings shall be held at the office of the District Board, or at such place as the Chairman may from time to time determine.

RULE 8.—The notices under Rule 87 of the General Rules shall be sent by post or by such other method as may be convenient; provided that if a local newspaper be published at the head-quarters of the District Board, the Board, by a resolution duly passed, may decide that the publication of such notice in the newspaper in question shall be sufficient.

RULE 9.—Notices of motions accompanied by *verbatim* drafts must be sent to the Chairman, or in the case of there being a Secretary, to the Secretary, in time to be included in the list of business for the next meeting. Notices received too late shall be inserted in the list of business of the next succeeding meeting.

RULE 10.—A notice book shall be kept by the Vice-Chairman of the Board, in which all notices of motions shall be entered. All such notices shall be dated and numbered as received.

Adjourned Meetings.

RULE 11.—An adjourned meeting is not competent to transact any business save that which the original meeting left unfinished.

RULE 12.—An adjourned meeting, being merely a continuation of the original meeting, does not require any fresh notice.

CONDUCT OF PROCEEDINGS AT MEETINGS, &c.

CLAUSE (b).

Order of business.

RULE 13.—At ordinary meetings the business shall be conducted in the following order:—

(a)—The minutes of the last ordinary meeting and of any special meeting held since shall be read, and, if approved as correctly entered, shall be signed by the Chairman of such meeting.

(b)—Business postponed from the last ordinary meeting shall be considered.

(c)—A progress report of works shall be laid before the Board.

(d)—Letters and reports of Committees shall be read, and account and statements shall be considered and passed.

(e)—Motions of which due notice has been given to be discussed.

RULE 14.—At a special meeting only the business for which the meeting was called shall be considered; provided that with the consent of the majority of the members present any other business may be considered.

RULE 15.—In the event of any objection being raised to the manner in which any resolution has been recorded, the Chairman shall decide the question after reference to the original draft of the resolution, and if he finds the minute to be inaccurate, shall make the necessary correction in the minute book.

RULE 16.—Unless by permission of the majority of the meeting, all subjects shall be discussed in the order in which they appear in the notice paper.

Of motions and amendments.

RULE 17.—Every motion and amendment duly moved must be seconded, and until seconded no debate thereon can take place.

RULE 18.—Every amendment shall be so worded as to be capable of making an intelligible sentence either alone or in its proper place in an original motion, as the case may be; provided that no amendment can merely negative the original motion.

RULE 19.—The President of the meeting may, for reasons to be recorded in writing and entered in the minutes of the proceedings:—

(a)—Rule that a motion or amendment is illegal or out of order; and

(b)—Make such alterations in a motion or amendment as shall in his opinion render it legal and in order; and may in case (a) refuse to put the motion or amendment to the meeting; and in case (b) refuse to put the motion or amendment to the meeting unless and until the proposer and seconder accept and sign the alterations so made.

And the decision of the President shall be final.

RULE 20.—After a motion has been moved and seconded, an amendment may be moved at any stage of the debate thereon.

RULE 21.—On the discussion being concluded, in the event of several amendments having been proposed, the President shall put the last amendment to the vote first; if it is negative, he shall put the last preceding amendment; and, lastly, the first amendment; and if all the amendments are lost, the original proposition shall be put to the vote.

RULE 22.—When a motion or an amendment has been put from the chair and been declared by the President to be duly carried, no further proposals for amending the motion or amendment can be entertained.

Of the right to speak.

RULE 23.—The President may require members to stand when they address the meeting.

RULE 24.—The member who first addresses the meeting shall be entitled to be heard first, and should more than one member rise to address the meeting at the same time, the order of precedence shall be determined by the President.

RULE 26.—Any member shall be at liberty to call the attention of the President to a point of order, even when a member is speaking. On a point of order being raised, the member addressing the meeting shall resume his seat until the question has been decided by the President. After the decision of the President, the same point of order cannot be raised again. Except as provided by this rule, no member shall interrupt a speaker in possession of the meeting.

RULE 26.—Except as provided in the last preceding rule, no member shall speak except to move or second a motion or amendment, or to support or oppose a motion or amendment which has been duly moved and seconded.

RULE 27.—A speaker who has exhausted his right to speak on an original motion, may speak on any amendment being moved as that raises a new question.

RULE 28.—The mover of a motion or amendment shall in all cases have a right of reply, but otherwise no member shall speak more than once on the same motion or amendment, unless in explanation of some part of his original speech.

Miscellaneous.

RULE 29.—Unless not less than two-thirds of the members of the Board consent by signing a requisition, no subject once finally disposed of can be reconsidered within six months.

RULE 30.—When any business, of which notice has not been given, is considered at a meeting, the decision recorded or resolution adopted at such meeting shall be of no effect unless and until it is confirmed at the next succeeding ordinary meeting, or at a special meeting called expressly for the purpose.

RULE 31.—For the purpose of taking into consideration business involving many details, the meeting may resolve itself into a Committee of the whole body. When thus has been determined on, the rule prohibiting any person from speaking more than once on the same question shall be deemed suspended until the meeting resumes.

RULE 32.—When a motion or amendment is put to the vote, the President or Secretary shall record against it, first, the names of members voting for it, and then the names of those voting against it.

RULE 33.—Voting by proxy is prohibited; and no member may vote upon any motion or amendment unless he be present in person at the time when it is put to the vote.

RULE 34.—The minutes shall contain a brief abstract of the discussion preceding each resolution.

Of protests or dissents

RULE 35.—Protest must be limited to a concise and definite statement of the motives which prompted the votes of members who voted in the minority on a given question.

RULE 36.—Protests must be handed to the Chairman before the conclusion of the meeting at which the resolution protested against was passed.

RULE 37.—Protests duly made shall be appended to and published with the minutes.

Of Adjournments

RULE 38.—It shall be competent to any member to move the adjournment of the debate or of the meeting in a speech not exceeding five minutes in duration.

RULE 39.—When a motion for the adjournment of the meeting or of a debate is made, it shall be seconded without a speech, and put by the Chairman to the vote without debate or amendment.

RULE 40.—No motion for the adjournment of the meeting or of a debate shall be admissible which proposes an adjournment beyond the next ordinary meeting.

CLAUSE (c).

The custody of the common seal, and the purposes for which it shall be used.

RULE 41.—The common seal shall remain in the custody of the Chairman; provided that if a Secretary has been appointed, the Chairman may by written order delegate the custody of the seal to the Secretary.

RULE 42.—The common seal shall be affixed to the following documents:—

- (a)—All deeds of sale or purchase executed by or on behalf of the District Board, and whether relating to moveable or immoveable property.
- (b)—All written contracts entered into by the District Board.
- (c)—The minutes of the proceedings of the Board.
- (d)—The notices of meetings of the Board.
- (e)—All receipts for money granted under the authority of the Board.
- (f)—All notices to the public issued under the Act or the General Orders.

CLAUSE (d).

Division of duties among the Members of the District Board.

RULE 43.—The District Board may from time to time appoint out of its members such and so many Committees either of general or special nature, and consisting of such number of persons as they think fit, for any purposes which, in the opinion of the Board, can be conveniently regulated and managed by means of such Committees, but the acts of every such Committee shall be submitted to the Board for their approval.

RULE 44.—There shall be for the present only one general Committee of the District Board, viz., the Finance Committee, but other Committees will be appointed as found necessary, viz.—

- (1)—The Finance Committee.
- (2)—The Public Works and Ferries Committee.
- (3)—The Education Committee.
- (4)—The Medical and Sanitary Committee.
- (5)—The

RULE 45.—The duties of the Finance Committee shall be as defined in section 54 of Act III of 1895.

RULE 46.—The members of the General Committee shall hold office for one year only, but shall be eligible for re-appointment.

RULE 47.—Save in the case of illness, a member of a General Committee who, without the previous permission of the District Board, shall fail to attend six consecutive meetings of such Committee, shall thereby cease to be a member, and the Committee shall apply to the Board to appoint another member in his place.

RULE 48.—The District Board may from time to time delegate to one or more of its members the duty of inspecting any work which is being carried out under its orders, or any institution under its control and management.

Proceedings of Committees.

RULE 49.—A Committee may meet and adjourn as it thinks proper.

RULE 50.—The quorum of a Committee shall be three members.

RULE 51.—A Committee may elect a Chairman of its meetings.

RULE 52.—If no Chairman is elected, or if the Chairman elected is not present at the time for holding any meeting, the members present shall choose one of their number to be Chairman.

RULE 53.—Every question at a meeting shall be determined by a majority of the votes of the members present and voting on that question.

RULE 54.—In case of an equal division of votes, the Chairman shall have a second or casting vote.

DISTRICT CHARITABLE SOCIETY.

Abstract of Accounts for the month of August 1887.

J. W. Stocks, Esq. ...	
A. A. Stokes, Esq. ...	
William Reinde, Esq. ...	
Mrs. Alice Reinde ...	

Mr. F. G. Davison having been requested to take the Chair, and the advertisement calling the Meeting having been read, the Managing Agents' Report was taken as read, and it was—

Proposed by F. G. Davison, Esq.,

Seconded by J. Skinner, Esq.—

- 1—That the Managing Agents' Report be adopted, and that the Accounts be passed as correct.
Carried unanimously.

Proposed by W. H. B. Lyall, Esq., by his Attorney A. A. Lyall, Esq.,

Seconded by J. Skinner, Esq.—

- 2—That a dividend of 5 per cent. on the capital of the Company be declared for the half-year ended 30th June 1887 (making with the *ad-interim* dividend declared at last meeting, 7 per cent. for the year), payable immediately after this meeting, and that the sum of Rs. 9,864-7-4 be carried forward to next half-year.
Carried unanimously.

Proposed by S. J. Kilby, Esq.,

Seconded by F. G. Davison, Esq.—

- 3—That Messrs. Browne, Lovelock and Lowe be elected Auditors of the Company on a salary of Rs. 200 per audit.
Carried unanimously.

Proposed by J. Skinner, Esq.,

Seconded by H. M. Webster, Esq.—

- 4—That this meeting hereby approves of the scheme for the Poyayan Steam Tramway Company, Limited, as placed before the Shareholders in Carew and Company, Limited, per Prospectus dated April 1887, and confirms the action of the Managing Agents in connexion therewith; further, that realising the very great importance and value of this scheme to the future prosperity of Carew and Company, Limited, this meeting instructs the Managing Agents to make a further urgent appeal to the Shareholders in Carew and Company, Limited, by special circular, handing them a copy of this Resolution, and again soliciting and urging them to come forward and support the Tramway scheme by contributing the small amount still required to enable the construction of the line to be put in hand.
Carried unanimously.

The Managing Agents laid on the table several letters from Native Shareholders in Carew and Company, Limited, requesting that their dividends may be invested in Poyayan Tramway Shares.

The Meeting closed with a vote of thanks to the Chair.

F. G. DAVISON,

Chairman.

LYALL, MARSHALL & Co.

Managing Agents.

Calcutta, the 22nd August 1887.

which, unless purchased, are destined to form the nucleus of the fleet of "The Indian Planters Steam Navigation and Flotilla Company, Limited," and to pass such resolutions with reference to such offer as may be determined on at such meeting.

By order of the Directors,
SCHOONER, KILBOURNE & Co.,

(577—2) Managing Agents, I. G. S. N. Co., Ltd.

No. 9.

Commissariat Advertisement for Tea for the Madras Presidency.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office, Madras) will be received by the Commissariat Storekeeper-General, Madras, until 1 o'clock on Monday, the 17th October 1887 (and opened by him at the same time and place in presence of those interested), for the supply, by contract, of Indian black tea not exceeding in quantity 139,745lbs., to be delivered at the Commissariat Stores at Madras to the Commissariat Storekeeper-General on or before the 30th day of April 1888 free of all charges whatsoever. No payment will be made on account of such supply prior to the 1st April 1888. The above quantity is subject to a possible deduction of 117,000lbs. or less, if favourable tenders for out-stations (as per paragraph 3) are received.

2. *Earnest Deposits.*—Each tender must be accompanied by a receipt from the Secretary of the Bank of Madras acknowledging the payment of earnest-money equal to the amount shown in the table in paragraph 3 according to the number of stations tendered for, or by Government promissory notes to the same amount duly endorsed over to the Commissariat Storekeeper-General, Madras. If such earnest-money is not lodged, the tender will be rejected. Tenders to be sealed and superscribed "Tender for Tea."

3. Tenderers have the option of tendering for the supply of the whole quantity of tea at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given opposite each station. In the latter case the amount inserted opposite each station is the earnest-money to accompany such tenders in the manner set forth in the preceding paragraph:—

	Tea.	Earnest-money.
	lbs.	Rs.
Bangalore	24,000	240
Belgaum	12,000	120
Bellary	12,000	120
Cannanore	7,000	70
Kanpet	12,000	120
Madras	22,745	227
Secunderabad	38,000	380
Wellington	13,000	130
Total	139,745	1,750

4. *Security Deposits.*—The earnest-moneys of successful competitors will be retained until they lodge with the Commissariat Storekeeper-General at Madras (or with the Executive Commissariat Officers in case separate tenders are accepted for each station) a security deposit of 10 per cent. on the value of the quantity or quantities of tea tendered by them. The security deposit may be lodged either in cash or in Government promissory notes. If the contractor desires to lodge the deposit in cash, he should pay the same to the Secretary of the Bank of Madras, or to the nearest Government treasury; and forward to the Storekeeper-General the Bank or treasury receipt for the same. If Government promissory notes are deposited, they are to be endorsed over to the Commissariat Storekeeper-General, Madras, for the time being as security for the due fulfilment of the contract. The earnest-moneys deposited with the successful tenders will then be returned to the tenderers.

5. The earnest-moneys of all unsuccessful competitors will be returned on the decision of Government as to the acceptance of any tender being received.

6. *Contract Default.*—The successful competitors will be required to sign contracts on the basis of their tenders containing the usual provisions in the form used in the Commissariat Department (form whereof can be seen on application to the Commissariat Storekeeper-General at Madras), and to furnish the requisite security deposit within eight days from the date on which the acceptance of their tenders is notified to them. Should the successful competitors fail to sign the contracts or to furnish the security deposits within the time specified, so much of their earnest moneys will be forfeited as will reasonably compensate Government for such breach of contract, and their tenders will be considered as having been rejected. It is, however, to be clearly understood that the forfeiture of the total amount (if necessary) of such earnest-moneys for such default shall in no way preclude Government from recovering from the defaulting competitors all such damages as Government may sustain by reason of such defaults, and that the amount of such earnest-moneys is not to be taken as the total amount of compensation payable to Government for such defaults.

7. *Size and Weight of Chests.*—The chests containing the tea must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches long by 16 inches wide and 12½ inches deep (outside measurement), and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead lining. No chests of other dimensions than those specified above will be received. No broken or damaged chests will be received.

Each chest should contain 50lbs. of Indian tea and should be marked "50lbs. net." A certain number of the chests will be opened and examined by a Committee to ascertain that they contain not less than the weight represented, dependent on which examination the remainder will be taken to contain the net weight marked thereon.

8. *Quality of tea.*—The quality of tea will be subject to the approval of, or rejection by, a Committee to be appointed, at the request of the Commissary-General, by the Officer Commanding the District, and payment will be made for such quantity of tea only as may be approved of by the said Committee.

9. *Samples.*—Samples of tea can be had free of charge on application at the Commissariat Storekeeper-General's Office at Madras.

10. Each tender must be accompanied by a sample chest containing 50lbs. of the tea it is proposed to supply, which will be paid for at the rates tendered if of good quality.

11. *Defaults.*—If the contractors make default in delivering the whole or any part of the tea on or before the 30th April 1888, so much of the security deposited by them as will reasonably compensate Government for such breach of contract will be liable to be realized by Government, and, should such security be insufficient to compensate Government for such breach of contract, the contractors will be liable to pay to Government the difference between the amount of such security and such compensation, and any such compensation may, at the option of the Government, be deducted either from the moneys payable to the contractors for the tea delivered by them or from the securities deposited by them.

General Stipulations.

12. All further information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

13. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest-money shall be forfeited to Government.
16. No offers by telegram will be accepted.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

NO. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 26th October 1887, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 19,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat Stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1888 to 30th September 1888. The above quantity is subject to a possible deduction of 10,000 Imperial gallons of matured rum and 10,860 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 3, are received.

2. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

3. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

DESCRIPTION OF ARTICLE.	PROBABLE QUANTITY.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes or Government promissory notes.	Compensation to be paid to Government for each breach of contract.
	Matured rum.	New rum.					
MADRAS.	Im. GALS.	Im. GALS.					
Best superannate matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	19,824	The whole quantity must be delivered between 1st April and 30th September 1888 in such quantities and by such dates as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in to the vessel at the General Atack Depot, Commissariat Storekeeper-General's Office, Madras.	Rupees 500 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced as voucher of payment, or Government promissory notes to the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding Rs. 2 per gallon rejected or not delivered.
Best superannate new rum of Indian manufacture, 5 degrees over London proof.	11,612					
RANGOON.							
Best superannate new rum of Indian manufacture, 5 degrees over London proof.	10,860	Letter to the Store and Shipping Officer, Rangoon.	Ditto Rangoon ...	Rupees 450 ditto		
Best superannate matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,000					
Total Imperial gallons	19,824	21,971			Total Rs. 1,550		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the samples not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he purposes supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

PUNNA CHANDRA BOSE, Accountant,
for Executive Engineer, Nuddsa Rivers Division.
Berhampur, the 5th September 1887.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 30 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 a.m. observations of the day is distributed by post in Calcutta after 4 p.m. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 a.m. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. FORTER,
Offg. Meteorological Reporter to the Govt. of Bengal.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1886, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
" each of the Madras, Bombay, and Allahabad Series ...	" 6 0	" 7 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	"	2 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	"	1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

" Thacker & Co., Bombay.

" Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

" Director of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1886 should be at once remitted.

PART VI.

Bills introduced into the Council of the Governor General for making
Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 24th August, 1887:

No. 10 OF 1887.

A Bill to make better provision for recovering certain public demands.

WHEREAS it is expedient to make better provision for recovering certain public demands; It is hereby enacted as follows:—

1. (1) This Act may be called the Revenue Recovery Act, 1887.
Title, extent and commencement.

(2) It extends to the whole of British India; and

(3) It shall come into force at once.

2. In this Act, unless there is something repugnant in the subject or context,—
Definitions.

[Act XXIII, 1854.] (1) "district" includes a presidency-town:

[Act XXII, 1861; Hon. Act II of 1876.] (2) "Collector" means the chief officer in charge of the land-revenue administration of a district: and

(3) "defaulter" means a person from whom an arrear of land-revenue, or a sum recoverable as an arrear of land-revenue, is due, and includes a person who is responsible as surety for the payment of any such arrear or sum.

3. (1) Where an arrear of land-revenue, or a sum recoverable as an arrear of land-revenue, is payable to a Collector by a defaulter being or having property in a district other than that in which the arrear accrued

or the sum is payable, the Collector may send to the Collector of that other district a certificate in the form as nearly as may be of the schedule, stating—

(a) the name of the defaulter and such other particulars as may be necessary for his identification, and

(b) the amount payable by him and the account on which it is due.

(2) The certificate shall be signed by the Collector making it, and, save as otherwise provided by this Act, shall be conclusive proof of the matters therein stated. [Cr. Act X 1873, s. 1 & Act XVI 1881, s. 22]

(3) On receiving the certificate the Collector of the other district shall proceed to recover the amount stated therein as if it were an arrear of land-revenue which had accrued in his own district.

4. (1) When proceedings are taken against a person under the last foregoing section for the recovery of an amount stated in a certificate, that person may, if he denies his liability to pay the amount or any part thereof and pays the same under protest made in writing at the time of payment and signed by him or his agent, institute a suit for the re-payment of the amount or the part thereof so paid. [Coxs. Land-rev. Bill No. 1 78.]

(2) A suit under sub-section (1) must be instituted in a Civil Court having jurisdiction

in the place where the office of the Collector who made the certificate is situate, and the suit shall be determined in accordance with the law in force at that place as if the payment under protest had been made thereat.

(Act XIX, 1878, s. 189.) (3) In the suit the plaintiff may, notwithstanding anything in the last foregoing section, give evidence with respect to any matter stated in the certificate.

(Gen. Act VII, 1880, s. 9.) 5. Where any sum is recoverable as an arrear of land-revenue by any public officer other than a Collector or by any local authority, the Collector of the district in which the office of that officer or authority is situate shall, on the request of the officer or authority, proceed to recover the sum as if it were an arrear of land-revenue which had accrued in his own district, and may send a certificate of the amount to be recovered to the Collector of another district under the foregoing provisions of this Act as if the sum were payable to himself.

(Sec. 8, sub-section (1), of this Bill.)

(Cf. Punjab Land-revenue Bill, No. II, s. 77: Act XIX, 1878, s. 168: and Act XIX, 1883, s. 7, sub-section (1), clause (d).) 6. (1) When the Collector of a district receives a certificate under this Act, he may issue a proclamation prohibiting the transfer or charging of any immovable property belonging to the defaulter in the district.

(2) The Collector may at any time, by order in writing, withdraw the proclamation, and it shall be deemed to be withdrawn when either the amount stated in the certificate has been recovered or the property has been sold for the recovery of that amount.

(3) Any private alienation of the property or of any interest of the defaulter therein, whether by sale, gift, mortgage or otherwise, made after the issue of the proclamation and before the withdrawal thereof shall be void.

(4) Subject to the foregoing provisions of this section, when proceedings are taken against any immovable property under this Act for the

recovery of an amount stated in a certificate, the interests of the defaulter alone therein shall be so proceeded against, and no incumbrances created, grants made or contracts entered into by him in good faith shall be rendered invalid by reason only of proceedings being taken against those interests.

7. Nothing in the foregoing sections shall be construed to impair any remedy relating to revenue, exceptly provided by any other enactment for the time being in force for the recovery of land-revenue or of sums recoverable as arrears of land-revenue.

(Cf. Mad. Act II, 1864, s. 57: Bom. Act V, 1879, ss. 137, 140 and 187: Bom. Act VII, 1880, s. 10: and Act XVII, 1881, s. 84.)

THE SCHEDULE.

CERTIFICATE.

(See section 3, sub-section (1).)

From
The Collector
of
To
The Collector
of
Dated the of 18 .
The sum of Rs. is payable on
account of by
 , son of , resident
of , who is believed (to be
at) (to have property consisting
of at) in your
district.

Subject to the provisions of the Revenue Recovery Act, 1887, the said sum is recoverable by you as if it were an arrear of land-revenue which had accrued in your own district, and you are hereby desired so to recover it and to remit it to my office at

A. B.,
Collector of .

STATEMENT OF OBJECTS AND REASONS.

The principal object of this Bill (sections 3 and 4) is to provide for the recovery of arrears of revenue in districts other than those in which the arrears have accrued. The necessity of making provision in this behalf arises from the fact that most of the enactments relating to the recovery of revenue are local in their operation. Thus, the North-Western Provinces Land-revenue Act, 1873, extends only to the territories for the time being under the government of the Lieutenant-Governor of those Provinces, and the Oudh Land-revenue Act, 1876, only to the territories under the administration of the Chief Commissioner of that Province. The consequence is that a process for the recovery of an arrear which has accrued in Oudh cannot be enforced in an adjoining district of the North-Western Provinces. Similarly, a process for the recovery of an arrear which has accrued in the North-Western Provinces cannot be enforced in Madras, Bombay, Bengal, the Punjab or the Central Provinces. It has even been doubted whether, in the absence of such a clause as is to be found in section 94 of the Central Provinces Land-revenue Act, 1881, a process issued for the recovery of an arrear which has accrued in one district of the North-Western Provinces can be enforced in another district of those Provinces. The very great inconvenience arising from such a state of the law has been represented to the Government of India by the Governments of the North-Western Provinces and Oudh and the Punjab, and legislation on the lines of this Bill has been urged by those Governments and approved by all other Local Governments.

2. The minor object of the Bill (section 5) is to provide, as in section 61, sub-section (3), of the Punjab Municipal Act, 1884, a machinery for the recovery of sums which are recoverable by officers other than Collectors and by public bodies as if the same were arrears of land-revenue. Such sums are those mentioned in section 4, Act XII of 1850, section 3, Act XVII of 1878, and section 77, Act XV of 1879, which are recoverable as arrears of land-revenue by the head of the office, the District Magistrate and the Rangoon Port Commissioners, respectively.

3. Section 6, sub-section (4), of the Bill lays down a rule which has been law in the Bengal Presidency since the year 1822 and has since been enacted for most other parts of British India.

The 24th August, 1887.

J. W. QUINTON.

S. HARVEY JAMES,

Offg. Secretary to the Government of India.

CURTAILMENT OF ANNUAL REPORTS.

No. 4417, dated Simla, the 23rd August 1887.

RESOLUTION—By the Government of India, Dept. of Finance and Commerce.

Read the undermentioned papers:—

From the Government of the Punjab, No. 3943., dated the 22nd June 1885, and enclosures.

Resolution in the Home Department, No. ^{37A} 1255/80, dated the 12th August 1885.

Circular letter to all Local Governments (except the Punjab), No. 2650, dated the 28th August 1885.

From the Chief Commissioner of Assam, No. 5908, dated the 25th September 1885, and enclosure.

From the Chief Commissioner of Coorg, No. ¹¹⁶⁰ 1127, dated the 29th September 1885, and enclosure.

From the Chief Commissioner of British Burma, No. 687-148N., dated the 30th September 1885, and enclosures.

From the Chief Commissioner of the Central Provinces, No. ^{3481A} 1451, dated the 18th September 1885, and enclosure.

From the Resident at Hyderabad, No. 21G., dated the 28th January 1886, and enclosures.

From the Government of the North-Western Provinces and Oudh, No. ⁷⁸¹ 11778, dated the 15th February 1886, and enclosures.

From the Government of Bombay, No. 803, dated the 18th March 1886.

From the Government of Madras, No. 462B., dated the 14th June 1886, and enclosure.

From the Government of Madras, No. 1455, dated the 12th July 1886, and enclosure.

From the Government of Bengal, No. 1534T.—R., dated the 3rd November 1886, and enclosure.

From the Government of Bengal, No. 2798, dated the 30th December 1886.

Resolution in the Home Department, No. ²⁸ 1091-85, dated the 15th July 1887.

→ of
attaches.

RESOLUTION.—The remarks and orders contained in the Resolution of the Home Department of 15th July above quoted, which are confined to reports furnished to that Department, seem to apply equally to the annual* reports upon subjects administered in this Department. The general opinion of the Local Governments who were consulted on the subject is opposed to any considerable curtailment of reports bearing on revenue matters.

* Opium.	Customs.
Salt.	Mints.
Stamps.	Trade.
Excise.	Joint-Stock Companies.
Assessed taxes.	Post Office.

The administration of Provincial revenues is left so much in the hands of Local Governments, and they are also financially so greatly interested therein, that it is not, in the opinion of the Government of India, expedient to restrict the Provincial authorities with respect to the information they may consider it desirable to collect and to place on record regarding them.

2. In the case of Opium and Salt Administration Reports, the fiscal interests involved are of such great importance that, even if the fullest information were not necessary for the purposes of the Local Governments, annual reports would be required by the Government of India in order to enable it to watch the administration of the revenue. These reports should therefore be as full as possible without being prolix, and should be furnished to the Government of India annually, as at present.

3. As regards the reports on Stamps, the Governor-General in Council has no objection to their being prepared and submitted triennially by any Local Government which considers this sufficient. Statistical information only would in this case be submitted in the intermediate years. The reports on the External Land Trade may also be submitted triennially in the same way, the monthly statistics of the trade being transmitted to this Department as at present.

4. The remarks contained in paragraph 5 of the Home Department's Resolution on the necessity of methodical arrangement are specially applicable to the reports submitted to this Department. In reports bearing on revenue matters and trade, comparisons with past years are of special value; but these are rendered difficult unless a systematic arrangement is observed in the subjects dealt with.

5. The Excise reports should in all cases be prefixed by a concise description (which may be repeated from year to year) of the various systems on which the excise is administered in the province concerned, and the extent to which each system applies. There is necessarily in such matters much diversity of practice, and the value of the reports is occasionally diminished by the use of technical terms, whose precise signification is little known beyond the limits of the province, and is often different in different provinces.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations, and to the Heads of Departments under the Department of Finance and Commerce, for information.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 3rd September 1887.

No.	District and date of report.	Rainfall at Sudder station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
Eastern Districts—contd.			
CENTRAL DIV.	32 Chittagong, Sept. 6, '87	0.84	Weather—hot. <i>Lux</i> harvested; outturn good. <i>Amra</i> still being transplanted. Prices high. Cholera reported; public health otherwise good.
	33 Nookhally	Report not received.
	34 Tipperah " 1, '87	3.05	Weather—seasonable; but hotter than it ought to be owing to scanty rainfall. Some rain has fallen, but a great deal more is much wanted.
	Hukumbariah	1.52	
	Chandpur	1.50	
CENTRAL DIV.	35 Chittagong Hill Tracts, Aug. 30, '87	1.84	Weather—cloudy and sunny throughout the week. A shower of rain on the 25th. Early <i>joon</i> paddy ripening. Cotton doing well. Transplanting in low lands still continues, but nearly complete.
	Hill Tipperah " 31, "	3.10	Weather—rainy. Transplantation of <i>amra</i> paddy yet continues. Sugarcane and <i>jam</i> crops doing well. Public health good.
BEHAR.			
PACIFIC DIV.	36 Patna, Sept. 3, '87	0.67	Weather—hot and cloudy. Rain urgently wanted in many parts for trans-plantation of rice seedlings; those already transplanted are withering. Har-vesting of <i>khados</i> crops going on. Cholera still reported from Behar and Dinapore, but is decreasing.
	Behar	0.09	
	Barh	2.00	
	37 Gaya	Report not received.
	38 Bhagalpur " 3 "	1.05	Weather—fair in the beginning of the week, but rainy in the latter part. Paddy transplantation going on actively, and with the recent rain the opera-tion will be more vigorously pushed on. <i>Khados</i> crops are being harvested, and prospects are satisfactory except in Bhahua. Cholera is fast abating, but still lingers here and there. Fever reported from Bhuxar and Sasaram. Prices stationary.
	Buxar	0.52	
	Sasaram	NH	
	Bhahua	0.40	
	39 Darbhanga " 8 "	2.00	Weather—cloudy. Prospects of <i>khados</i> continue very favourable. Harvesting of <i>makai</i> and <i>marua</i> in progress. Transplantation of rice still going on. Indigo manufacture not yet over. Price of common rice averages 18 <i>seers</i> per <i>rupai</i> . Public health generally good.
	40 Masariffur " 3, '87	1.18	Weather—mostly hot and rainless; now cloudy and rainy. Harvesting of <i>khados</i> crops commenced. Cholera still occurs in places.
PACIFIC DIV.	Hajipur	0.40	
	Sitamarhi	1.30	
	41 Saran " 3 "	0.08	Weather—bright and clear. A smart shower this morning (3rd). Prospects of crops continue good. Cholera abating.
	Bawan	0.54	
	Gopalgunge	0.50	
	42 Chhapra " 3 "	7.35	Weather—rainy with heavy showers. Prospects of crops much improved by the rainfall of the week. Transplantation of <i>agkhai</i> still going on in some parts of the district, where there had been lack of rain. Harvesting of early <i>khados</i> has begun. Public health fair. Prices stationary.
	Bettiah	2.54	
	43 Monghyr, Sept. 3, '87	0.48	Weather—very hot and sultry. Reaping of <i>khados</i> crops going on briskly. Winter rice growing well, but rain much wanted. The Ganges rising again. A little cholera in the Monghyr town, Kharakpore and Begusarai; otherwise general health good.
	Begusarai	0.30	
	Jamui	1.10	
PACIFIC DIV.	44 Bagaulpur " 8 "	0.82	Weather—sultry in south, seasonable in north. <i>Khados</i> harvest yielding fairly in the north of the Ganges, and late rice there also doing well. In the centre of the district want of rain felt, but good rain falling at the time of report.
	Bansgaol	5.55	
	Bauka	2.50	
	45 Patna " 8 "	4.58	Weather—early in the week clear and hot; latterly cool, rainy and cloudy. All crops doing well. <i>Khados</i> giving fair outturn. Transplantation of <i>agkhai</i> nearly completed.
	Kishangunge	4.12	
	46 Mada " 8 "	0.42	Weather—fine, and too dry up to last instant; since then heavy rain. Upwards of 7 inches fallen to-day (3rd), not accounted in this return. <i>Khados</i> harvest going on with good outturn. Rain has done good to winter paddy, the prospects of which are favourable. Common rice 21 <i>seers</i> per <i>rupai</i> . Public health generally good.
	Chanchal	1.45	
	Sahgunge	2.05	
	Gajda	0.40	
	47 Santhal Pargna, " 3 "	2.32	Weather—hot and dry. More rain wanted for transplanting paddy crops. Rain on 2nd has done much good. General health good.
PACIFIC DIV.	Dumkhar	0.75	
	Golda	2.44	
	Jamtara	0.22	
	Pakpur	5.07	
	Rajmahal	1.02	
ORISSA.			
CENTRAL DIV.	48 Cuttack	Report not received.
	49 Poonah, Sept. 1, '87	2.26	Weather—cloudy with very little rain. Weeding and transplanting of <i>seer</i> crop going on except in the Chilka Tracts. Common rice 28 <i>seers</i> 8 <i>chittacks</i> per <i>rupai</i> in the Sudder sub-division and 20 <i>seers</i> 8 <i>chittacks</i> in the Khurda sub-division. Cases of cholera still reported.
	Khurda	1.78	
CENTRAL DIV.	50 Balasore " 2, "	2.57	Weather—cloudy and seasonable. <i>Seer</i> crop ripening. Weeding of <i>seer</i> crop advancing. Prospects of crops good. Rain wanted in parts of Balasore Gann. Public health generally good.
	Balasore	
CHOTA NAAGPORE.			
South-West Frontier Agency.			
CENTRAL DIV.	51 Hazaribagh, Sept. 2, '87	0.77	Weather—bright; occasionally cloudy. Rain very much wanted over most of the district. Indian-corn, <i>goesuli</i> and <i>marua</i> being harvested. Other crops doing well. General health fair.
	52 Lohardugga " 3 "	2.83	Weather—hot. More rain wanted. Prospects of crops continue good. No change in prices. Cholera abating.
	Palamu	0.51	
	53 Singhbhum " 2 "	2.09	Weather—fairly cool. Prospects of crops fair, but in many parts more rain required. Lands for <i>rubber</i> crops being prepared. Indian-corn being cut. General health good.
CENTRAL DIV.	54 Manbhum " 3 "	1.75	Weather—clear and cloudy. More rain much wanted in almost all parts of the district. Autumn crops being harvested; outturn about 12 <i>seers</i> . Fever prevalent in Manbhum.

Calcutta, the 6th September 1867.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
2ND OF SEPTEMBER 1887.**

At the close of the previous week a feeble area of low pressure had formed over South-East and South Bengal, which was accompanied by a distinct, though feeble, cyclonic circulation of winds, and thus conditions had become distinctly more favourable for rainfall in the south of the province, than they had previously been. On the 27th the very feeble depression had moved in a westerly direction and was in South-West Bengal, and moving towards Chutia Nagpur, and it was again accompanied by the distinct though feeble wind circulation. In connection with this feeble whirl, heavy rain was falling at many of the southern stations, and amounts of two inches and upwards were reported at Saugor Island, Diamond Harbour, Jehanabad, Burdwan, Raipur in the Bankoora district (5·65 inches) and Bongong; and in Chutia Nagpur at Rauchi, Ghatsila, Barrabhoom and Jhalda, while in the north of the province the following stations also received very heavy rain:—Matabhanga, Kissengunge, Soopool, Mahua, Patna, Banks and Nanihat. On Sunday, the 28th, the depression had disappeared in a westerly direction, and a moderate south-easterly and southerly monsoon current set in from the Bay of Bengal, but rainfall on this day was usually confined to a few light showers, and there was no general rain in any district. These conditions continued practically unaltered on the following day, and though during the whole of this time a fairly strong monsoon current was blowing at the head of the Bay and in Ceylon, as shown by wind velocities at Saugor Island and Galle, yet rainfall over almost the whole of Bengal was comparatively light. On Tuesday, the 30th, however, though the general conditions had scarcely altered, heavy and rather general rain commenced in the northern districts of the province, and on this day Protapgunge, in the North Bhagulpore district, received 7·35 inches and Bura 4·21 inches, and over the southern districts moderate showers were rather numerous. This heavy rain in the north of Bengal on the 30th set up a slight cyclonic circulation of winds, which was distinctly noticeable on the 31st, and pressure also became slightly low over the central and northern parts of the province, and with these favourable conditions for rainfall, particularly heavy rain was received over a considerable part of North Bengal. On this day Julpigoree reported the excessive fall of 11·47 inches, Mickligunge one of 7·75 inches, Fallacotta 7·61 inches, Protapgunge 5·11 inches and Kaliagunge 4 inches, while moderately heavy showers became pretty numerous over the whole province. On the 1st of September the meteorological conditions had scarcely changed, except that the rainfall rather decreased in quantity in the northern districts, but the area of rainfall extended, and rain was more general than on the previous day, and on the last day of the week the area of rainfall again extended, and the great majority of the stations in the province received moderate rain. The only other noticeable feature in the meteorology of the 2nd was that a westerly element had appeared in some of the wind directions, and this was the only occasion during the week when the influence of the Bombay current was at all felt in Bengal.

Pressure.—During the previous week the mean pressure over the province had been very nearly normal. At the commencement of the present week, the changes were governed by the movement of the very slight depression, but with its disappearance from the province on the 28th, pressure commenced to rise steadily up till the 1st of September, when a slight reaction set in, which was, however, again followed by a rise on the 2nd. It will thus be seen that the mean pressure for the week has been above the normal over the greater part of the province, and taking only those stations into consideration from which observations have been received for several years, and which therefore afford reliable averages, the mean pressure of the whole province of Bengal for the week has been 0·022 inch in excess of the normal. In Orissa, however, pressure has been very slightly below the normal, while in the north of the province, at Patna, there has been an excess of 0·044" and at Durbhanga one of 0·035". In Assam, at Sibsagar, the mean pressure has been 0·016" in defect of the normal, at Silchar it has been 0·025" in excess, and at Dhubri 0·026" in excess.

Temperature.—The variations of temperature during the week have again not been very large, and the mean temperature in no case differs from the normal by as much as one degree. Generally temperature has been in excess of the normal, and the mean average temperature for the whole of Bengal is only about 0·4° in excess of the normal. In Assam, on the other hand, the mean temperature has been in defect of the normal by 0·5°.

Rainfall.—The general distribution of the rainfall as to time and district has already been referred to under the meteorological summary, and it will have been seen that the northern districts have received very heavy rain, while the remainder of the province has received only moderate general rain. Thus North Bengal has received an average fall of nearly four inches of rain, and North Behar an average of a little more than three inches. South-West and East Bengal and Chutia Nagpur have received between one-and-a-half and two inches, and Orissa and South Behar between one and one-and-a-half inches. Compared with the normal falls, and expressed as a percentage of this amount, the falls in the various districts during the week have been in Orissa 78 per cent., in South-West Bengal 76 per cent., in East Bengal 56 per cent., in North Bengal 105 per cent., in North Behar 111 per cent., in South Behar 51 per cent., and in Chutia Nagpur 72 per cent.

Taking these districts as having an equal value in the calculation, the rainfalls of the whole province may be said to have been equal to 78 per cent. of the normal.

As before indicated, the rainfall in the following districts has been very largely in excess of the normal:—Jalpigoree, Purneah, and Chumperon; while the following districts have received falls largely in defect of the normal:—Bankoorah, Farreedpore, Dacca, Comilla, Mymensingh, Pubna, Maldah, Moanfferpore, Sarun, Shahabad, South Bhagulpore, Monghyr, and Southal Pergunnahs.

The following table gives the summary of the temperature and rainfall data of each of the eight meteorological divisions of the province for the week ending Friday, the 2nd of September 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.

METEOROLOGICAL OFFICE, BENGAL:

The 6th September 1887.

A. PEDLER,

Offy. Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1887.

	Inches.	Date.	Hour.
The mean pressure of the month ...	29.628		
The average pressure of August from 24 years' registers ...	29.598		
The highest pressure in the month ...	29.780	31st	10h.
The lowest pressure in the month ...	29.488	1st	16h.
The range of pressure ...	0.847		
The total number of hours of bright sunshine during the month	161.9		
The maximum possible number of hours of sunshine	398.4		
	°		
The mean temperature of the month ...	82.9		
The average temperature of August from 24 years' registers...	83.1		
The highest temperature in the month ...	90.9	17th	
The lowest temperature in the month ...	75.9	2nd	
The range of temperature during the month ...	15.0		
The mean daily range of temperature ...	9.5		
The greatest range of temperature in one day ...	12.5	17th	
	Per cent.		
The mean humidity of the month ...	86		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month ...	0.964		
The average vapour tension of August from 9 years' registers ...	1.002		
The mean cloud proportion of the month ...	7.44		
The average cloud proportion of August from 10 years' registers	8.14		
	Inches.		
The total rainfall of the month ...	10.28		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	10.15		
The average fall of August from 48 years' registers ...	13.94		
The greatest fall in 24 hours ...	1.97	1st	
	Days.		
The number of rainy days in the month ...	28		
The average number of rainy days in August from 24 years' registers ...	26		
	°		
The mean maximum equilibrium temperature of solar radiation during the month ...	147.3		
The mean difference of sun and air temperatures ...	59.8		
The greatest sun temperature ...	156.7	27th	
The greatest excess of sun over air temperature ...	69.2	27th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth ...	75.4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground ...	2.6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature ...	4.6	17th	
	Miles.		
The mean movement of the wind per day ...	122.2		
The greatest movement of the wind in one day ...	218.0	2nd	
The greatest movement of the wind in one hour ...	14.0	2nd 11 to noon 11th 10 to 11 A.M. 17th 2 to 3 P.M.	

The number of hours with winds from each of the 8 points—

N. 1, NE. 12, E. 53, SE. 161, S. 260, SW. 175, W. 48, NW. 4, Calm 20.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .008 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

METEOROLOGICAL OFFICE, INDIA:

The mean pressure, temperature, &c., are deduced from the traces of the barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, t thunder, Δ dew.

A. PEBLER,

for Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, LHMIA;
Calcutta, the 5th September 1887.

Abstract of the results of the Thermometric Observations taken at the Meteorological Office, Chowringhee, in the month of August 1887.

The mean temperature during the month	82.3	°
The highest temperature during the month	93.2	17th
The lowest temperature during the month	78.3	2nd
The range of temperature during the month	16.9	
The mean daily range of temperature during the month	1.5	
The greatest range of temperature in one day during the month	15.0	13th
The mean humidity during the month	88	%
The mean vapour tension during the month	970	inches.
The total rainfall of the month	10.68	
The greatest fall in 24 hours	2.54	1st
The number of rainy days in the month	25	days

A. PEDLER,

for Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;

Calcutta, the 5th September 1887.

Results of the Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 28th August to 3rd September 1887.

Month.	Date.	TEMPERATURE.				Mean wet bulb.	BAROMETER.			Rain.
		Mean.	Maximum.	Range.	Minimum.		Vapour tension.	Dew point.	Humidity.	
1887.							Inches.		%	Inches.
August	28th	82.9	91.0	14.3	76.0	79.8	.977	78.5	87	0.33
"	29th	81.0	90.0	12.0	78.0	80.1	1.016	79.7	85	0.04
"	30th	81.4	85.9	7.1	78.8	79.7	.989	78.4	81	0.24
"	31st	81.7	89.5	13.1	77.4	79.2	.988	78.2	88	0.04
September	1st	81.7	89.4	4.1	79.3	79.1	.981	78.0	89	...
"	2nd	80.5	89.0	10.8	78.2	79.4	.991	79.0	95	0.42
"	3rd	80.8	88.5	10.7	77.8	78.9	.989	78.0	91	0.06

The mean temperature of the seven days	81.5	°
The extreme variation of temperature	14.3	
The maximum temperature	91.0	
The mean relative humidity	91	%

The total fall of rain from 28th August to 3rd September 1887 ... 1.06

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;

The 5th September 1887.

A. PEDLER,

for Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal for the week ending 20th August 1887 disclose the following results :—

1. That births were registered at the rate of 18·9 per 1,000 of population, and deaths at 29·1 per 1,000. The ratios of the preceding week ending 13th August being 16·7 and 28·6 per 1,000, respectively, a fair advance in birth registration is indicated.

2. That the following Municipalities furnished the highest proportions of births and deaths :—

<i>Births.</i>				<i>Deaths.</i>			
			Ratio per mille.				Ratio per mille.
Arrah	43·1	Arrah	149·5
Bhagulpore	31·7	Gya	62·8
Beaulah	31·6	Beaulah	42·0
Serampore	29·4	Serampore	39·2
Durbhanga	29·1	Bhagulpore	32·6
Gya	28·7	Monghyr	32·5
				Burdwan	32·0
				Puri	31·5
				Suburbs of Calcutta	30·2

3. That the mortality from the specific death-causes stood as follows in contrast with similar information for the preceding week :—

				Ratio per mille during the weeks ending—	
				20th August 1887.	13th August 1887.
Cholera	5·5	5·4
Small-pox	2	...
Fever	11·8	10·4
Bowel-complaints	3·6	5·6
Injury	·6	·3
Other causes	7·5	7·0

The comparison indicates, chiefly, much increase in the death-rate from fever, and a sensible diminution in that from bowel-complaints.

4. That in local incidence of the diseases above named, while no Municipality presented noticeably high mortality from small-pox and injury, Puri suffered pre-eminently from bowel-complaints, which carried off 14·7 per 1,000 of its population, and the following Municipalities from cholera, fever and "other causes," which exhibited the death-rates noted opposite them :—

<i>Cholera.</i>			<i>Fever.</i>			<i>Other Causes.</i>		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Arrah	...	33·7	Beaulah	...	34·1	Arrah	...	25·1
Burdwan	...	12·2	Arrah	...	32·3	Gya	...	21·8
Gya	...	10·2				Serampore	...	13·7
Serampore	...	7·8				Bhagulpore	...	11·8
Patna	...	6·5						

It will be seen from the above figures that cholera prevailed with marked fatality in the Arrah town.

5. That the death-rates in relation to Sex, Class and Age, stood as follows :—

<i>According to Sex.</i>			<i>According to Class.</i>			<i>According to Age.</i>		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Males	...	27·7	Christians	...	13·0	Under 1 year	...	210·0
Females	...	30·6	Hindus	...	31·5	1 and under 5 years	...	60·7
Ratio of male deaths to every 100 female deaths	102		Mahomedans	...	24·0	5 " " 10 " "	...	17·9
						10 " " 15 " "	...	16·8
						15 " " 20 " "	...	23·6
						20 " " 30 " "	...	15·9
						30 " " 40 " "	...	19·1
						40 " " 50 " "	...	22·4
						50 " " 60 " "	...	25·7
						60 years and upwards	...	60·5

R. LIDDERDALE, M.D., Deputy Surgeon-General,

The 5th September 1887.

Sanitary Commissioner for Bengal.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 30th August 1887.

INCREASE.

Tons.

Coal

290

This increase is due partly to steamer service and partly to the silk factories being worked by steam-power to greater extent.

Railway plant and rolling-stock

57

This increase is due to greater railway materials carried during this month.

Oil-seeds—

(6).—Others

13

The increase in this head is due to greater demand in the local market.

Sugar—

(1).—Drained

16

The increase in this commodity is due to demands of the locality.

All other articles of merchandise

88

There was increase in this commodity in both upwards and downwards, and this may be ascribed to local and foreign demands.

DECREASE.

Grain—

(2).—Rice

183

The decrease in this staple is due to low rate of the market.

(5).—Others

28

The decrease in this staple is due to low rate of the market.

Salt

20

This decrease is due to less demand in the intermediate stations.

Oil-seeds—

Mustard and rape

36

This decrease is due to low prices at Asansunge this year.

Sugar—

(3).—Undrained

16

The decrease in this staple is due to less demand.

NALHATI, the 3rd September 1887.

R. G. MOOKERJEE, Manager.

Weekly Return of Traffic Receipts on Indian Railways.

Thursday, " 15th ...	Darjeeling ...	By rail.

No. 4310A.

GENERAL.—The 6th September 1887.—Baboo Kash Behary Datt, Sub-Deputy Collector, on special duty as a Sub-Manager of the Majumuta and Jellamuta estates, in the district of Midnapore, is allowed privilege leave for two months and two days, with effect from the date on which he avails himself of it.

The 7th September 1887.—The special leave for six months granted to Mr. J. A. Hopkins, c.s., under the order of the 11th February last, has been commuted by Her Majesty's Secretary of State for India into furlough on medical certificate for seven and a half months.

The 10th September 1887.—Mr. A. L. Clay, c.s., has been granted by Her Majesty's Secretary of State for India an extension of furlough for one year.

The 13th September 1887.—Mr. G. K. Lyon, c.s., is appointed to act as Secretary to the Central Examination Committee, Calcutta, during the absence, on leave, of Mr. C. A. Samuels, or until further orders.

Mr. F. M. Halliday, Officiating Member of the Board of Revenue, is allowed leave for thirteen days, under section 72, chapter V of the Civil Leave Code, with effect from the 3rd proximo.

Baboo Kasi Kinker Sen, Deputy Magistrate and Deputy Collector, Moorahadabad, is allowed leave for one month, under section 72, chapter V of the Civil Leave Code, with effect from the 20th instant.

Mr. H. Thompson, Deputy Magistrate and Deputy Collector, Dinagore, is allowed leave for three months, under section 72 of the Civil Leave Code, with effect from the date on which he may avail himself of it.

The order of the 1st July last, granting Moulvie Mokumed-ul-Nobi, Temporary Deputy Magistrate and Deputy Collector, Shahabad, privilege leave for three months, is cancelled.

The order of the 4th July last, granting Moulvie Gowhar Ally, Deputy Magistrate and Deputy Collector, Darbhanga, privilege leave for three months, is cancelled.

Mr. N. Warde-Jones, Deputy Magistrate and Deputy Collector, Nelpamari, Rungpore, is allowed leave for one week under section 72 of the Civil Leave Code, in extension of the leave granted to him under the order of the 9th August last.

POLICE.—*The 10th September 1887.*—Mr. J. Lambert, D.I.C., Deputy Commissioner of Police, Calcutta, has been granted by Her Majesty's Secretary of State for India an extension of furlough for five days.

Mr. A. S. Judge, Assistant Superintendent of Police, has been granted by Her Majesty's Secretary of State for India an extension of sick leave for two months.

The 13th September 1887.—Mr. H. B. St. Leger, Officiating Assistant Superintendent of Police, Barrackpore, 24-Pergunnahs, is allowed leave for one month, under section 138—2 of the Civil Leave Code, with effect from the 1st proximo.

Mr. F. L. Halliday, Officiating Assistant Superintendent of Police, 24-Pergunnahs, is transferred to Barrackpore in that district, during the absence, on leave, of Mr. H. B. St. Leger, or until further orders.

REGISTRATION.—*The 13th September 1887.*—Baboo Nilrutton Mookerjee, Special Sub-Registrar of Mymensingh, is allowed leave for six weeks, under section 72 of the Civil Leave Code, with effect from the 16th instant, or from such subsequent date as he may avail himself of it.

Baboo Pran Krishna Chatterjee is appointed to act as Special Sub-Registrar of Mymensingh during the absence, on leave, of Baboo Nilrutton Mookerjee, or until further orders.

MEDICAL.—*The 13th September 1887.*—The late Surgeon-Major H. Whitwell acted as Civil Surgeon of Patna and Superintendent of the Temple Medical School in addition to his own duties as Principal Assistant to the Opium Agent, Behar, from the afternoon of the 24th to the forenoon of the 28th February last.

VACCINATION.—*The 13th September 1887.*—Assistant Surgeon Bejoy Coommar Chuckerbutty, a Supernumerary at Outtack, is appointed to be Deputy Superintendent of Vaccination, Behar Circle.

The following are republished from the *Assam Gazette* :—

No. 91.—*The 31st August 1887.*—Under the provisions of section 12 of the Criminal Procedure Code (Act X of 1882), the Chief Commissioner is pleased to invest Mr. G. Gordon, c.s., Assistant Commissioner, with the powers of a Magistrate of the first class.

No. 92.—In exercise of the power conferred on him by section 22 of the Criminal Procedure Code (Act X of 1882), the Chief Commissioner is pleased to appoint Mr. G. Gordon, c.s., Assistant Commissioner, to be a Justice of the Peace within the province of Assam.

No. 93.—Maulavi Mohabat Ali, Munsif of Karimganj, in the district of Sylhet, has been granted leave of absence for two months and twenty-two days under section 73, rule 1, chapter V of the Civil Leave Code, with effect from the 17th proximo.

J. WARE ELLIAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 14th September 1887.—The following telegram regarding the imposition of quarantine at Goa and Marmagaon within the Portuguese Territory of Goa against arrivals from Bombay, received from the Government of Bombay, dated the 6th instant, is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

Telegram, dated 6th September 1887.

From—Bombay,
From—Chief Secretary.

To—Calcutta,
To—Bengal.

ASSISTANT BRITISH DELEGATE, Anglo-Portuguese Treaty, telegraphs on 3rd instant :—
"Bombay considered infected with cholera. All other ports of the Bombay Presidency suspected. Vessels and passengers from Bombay bound for any port in Goa territory must undergo quarantine at Goa or Marmagaon port for such number of days as may be fixed by Health Officer at either place before discharging cargo or landing at destination. Passengers may remain on board such vessels or go to lazaretto during quarantine. Cargo and baggage to be disinfected in boats provided before being landed. Vessels from other ports of Bombay Presidency must similarly first call at either Goa or Marmagaon. If Health Officer is satisfied of no suspicion of cholera during voyage, he will grant free pratique in writing; otherwise vessels and passengers must undergo quarantine at Goa and Marmagaon similar to arrivals from Bombay. No land quarantine arrangements yet made; they are under consideration."

NOTIFICATION.

The 7th September 1887.—It is hereby notified that the following gentlemen have been elected, under section 3 of Act IV (B.C.) of 1887, to be Commissioners of the Port of Chittagong:—

1. Baboo Nityshanda Roy, of Messrs. Kristo Das Kundu and Company.
2. " Durgadas Das, Vakil.
3. Hajee Nasoo Maloom, of Messrs. Nasoo Maloom and Company.

2. The Lieutenant-Governor is pleased to appoint the following gentlemen, under section 5 of the Act, to be Commissioners of the said Port:—

1. Mr. D. R. Lyall, Commissioner.
2. " F. Sille, C.E., Executive Engineer.
3. " W. Warden, Collector of Customs.
4. " C. Gairdner, of Messrs. Bulloch Brothers and Company.
5. " J. L. Willook, of Messrs. M. David and Company.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 7th September 1887.—It is hereby notified that the Lieutenant-Governor is pleased, under section 10, Act IV (B.C.) of 1887, to appoint Mr. D. R. Lyall, Commissioner of the Chittagong Division, to be Chairman of the Commissioners of the Port of Chittagong.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 9th September 1887.—Baboo Rajendra Nath Ghosh, Deputy Magistrate and Deputy Collector, in charge of the Excise and Income-tax Departments in the district of Noakhally, is vested, under section 40 of Act II of 1886, with the powers of a Collector under that Act.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ERRATUM.

The 12th September 1887.—In Government notification of the 26th July 1887, in last line, for "estate No. 3626" read "estate No. 5626," Pavarti Obaran Sen, pergunnah Bikrampur, district Furruckpore.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 12th September 1887.—Baboo Okhoy Oomart Bose, Deputy Collector, Mymensingh, is appointed, under Rule I, Chapter VI of the Rules made by the Local Government under the Bengal Tenancy Act, to be a Settlement Officer in respect of all lands in mouzah Shunai, with its para Nizpara, para Nathur Kanda, para Dash Bhagia, Bhur Bhuria, para Shampur, Chashapara, Para Kandi, included in zemindary No. 76, pergunnah Mymensingh, in the district of Mymensingh.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 12th September 1887.—Mr. J. Mendies, Assistant Conservator of Forests, is appointed to be a member of the Branch Committee of Public Instruction, Palamow, in the district of Lohardugga, vice Munshi Adit Prasad.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th September 1887.—It is hereby notified for general information that the Lieutenant-Governor, in exercise of the powers conferred by section 143 of the Inland Emigration Act I of 1882, is pleased to prescribe, in lieu of the scale of disinfectants published under notification dated the 22nd December 1883 at page 1353 of Part I of the *Calcutta Gazette* of the 26th December 1883, the following amended scale:—

Disinfectants.

Disinfecting powder (Calvert's or McDougal's), or Jeye's	
Sanitary Powder	10 lb.
Common Carbolic Acid or Coal-tar, or Jeye's Perfect Purifier	1 gallon.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 6th September 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 53).

BAY OF BENGAL.
INDIA—EAST COAST.
COAST OF ORISSA.
DHAMRA RIVER.
SOUTH CHANNEL BUOY.

The following information has been received from the Port Officer of Chandbally:—

The G. buoy in the South Channel, entrance to the Brahmini or Dhamra river, being damaged by the cyclone of May 1887, has been changed, and a fairway buoy, painted black and white, with spire and basket, substituted.

The best track over the outer bar at present is to keep the G. buoy nearly on with this fairway buoy, or a little open to the northward of it.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, *Captain, I.M.,*
Port Officer of Calcutta.

Port Office, Calcutta, the 5th September 1887.

[Third Publication.]

NOTIFICATION.

The 30th August 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 52).

EASTERN ARCHIPELAGO.
SINGAPORE STRAITS.

Intended discontinuance of the Horsburgh light.

The following information has been received from Commander Alfred Carpenter, R.N., in charge of the Marine Survey of India:—

The Rear Admiral Commanding the Naval Forces in Netherland India has given notice, dated Batavia, 14th July, that, according to Notice to Mariners, Singapore, 29th June 1887, after the 5th August next, the revolving light on the Horsburgh lighthouse will be discontinued during alterations.

Until the new light is exhibited, the light-ship *Formosa* will be moored on the North-East end of the reef, one cable's length from the base of the light-tower.

The light-ship will exhibit a bright revolving light in all respects similar to the Horsburgh light, but visible at a distance of only 10 miles.

In addition, there will be two bright lights shown from the balcony of the light-house tower, N. and S., at an elevation of 85 feet and visible about 15 miles.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, *Captain, I.M.,*
Port Officer of Calcutta.

Port Office, Calcutta, the 26th August 1887.

JUDICIAL DEPARTMENT.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 13th September 1887.—It is hereby ordered, under the provisions of section 193 Criminal Procedure Code, that the Additional Sessions Judge of the 24-Pergunnahs and Hooghly is empowered to try all Sessions cases arising within the jurisdiction of the Magistrates of the 24-Pergunnahs and Howrah without their being made over to him for trial by the Sessions Judges of the 24-Pergunnahs and Hooghly respectively.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

GENERAL.

The 13th September 1887.

No. 310.—*Notification.*—The following Resolution of the Government of India, Public Works Department, is republished for information.

No. 1703G., dated the 31st August 1887.

CIVIL ENGINEERS' PROVIDENT FUND.

Read again—

Public Works Department Resolution No. 195G., dated 4th February 1885.

Letter No. 567G., dated 21st April 1885, from the Government of India, Public Works Department, to the Government of the North-Western Provinces and Oudh.

Resolution.—In the Resolution which is now read again, officers who were in the Department on the 4th February 1885, wishing to join the Civil Engineers' Provident Fund, were informed that they might pay up arrears, within the authorized limits, from the commencement of service, or for any shorter time in one sum. The Government of India is now pleased to rule that this privilege shall continue in force till the 31st December 1887, and shall then cease absolutely, except as regards officers now on leave out of India, who may return at a date subsequent to the 30th September 1887; in such cases the period for payment may be extended to a date not exceeding three months after the date of their return from leave.

2. Officers who have already joined the Fund are also permitted to pay up arrears in one sum at any time prior to the 31st December, subject to the same condition as to officers on leave out of India. Except as above permitted, no future payments on account of salary drawn prior to admission to the Fund can be made either by officers who are already in the Fund or by new subscribers.

3. All payments of arrears should be supported by a certificate from the Examiner or Accountant-General holding the subscriber's leave and service register, who will be responsible for seeing that such payments do not exceed the maximum limits admissible.

ORDER.—Ordered that this Resolution be forwarded to all Local Governments and Administrations

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.

The Chief Commissioners of the Central Provinces, Burma, ^{Upper} Assam, and Coorg.

The Resident in Hyderabad.

The Agents to the Governor-General for Central India, Rajputana, and Baluchistan.

The Accountant-General, Public Works Department.

The Inspector-General of Military Works.

The Director-General of Railways.

The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division and

Lucknow.

The Director-General of Telegraphs in India.

The Superintendent of Works, India Imperial Cloths.

and officers noted in the margin, and to the Department of Finance and Commerce; also that it be notified in Part I of the Gazette of India and in all Local Gazettes.

No. 311.—*Notification*.—Mr. E. B. Gardiner, Assistant Engineer, passed the Lower Standard Examination in Hindustani on the 4th July 1887, and the Departmental Standard Examination on the 22nd August 1887.

O. M. BROWNE, Col., R.M.,
Offg. Secy. to the Govt. of Bengal, P. W. Dept.

TREASURY NOTICE.

ASSISTANT COLLECTOR Mr. L. PALIT has been temporarily placed in charge of the Rajshahye Treasury, and authorized to draw bills on other treasuries.

By order,

H. M. CHANDRA, *Personal Assistant*.

COMM'R.'s OFFICE, RAJSHAHYE DIVISION, RAMPUR BRAHMAN, the 10th September 1887.

EDUCATION DEPARTMENT, BENGAL.

NOTIFICATION.

It is hereby notified that the two second grade Junior Scholarships attached to the Chota Nagpore Division be awarded to the candidates who may stand highest in order of merit in the divisional list irrespective of districts.

2. The five third grade scholarships will be distributed as follows:—

Lohardugga district	2
Manbhoom "	1
Singbhoom "	1
Hazaribagh "	1
Total					5

C. C. STEVENS, *Commissioner of Chota Nagpore*.

NOTICE

Is hereby given that for the next half-yearly Departmental Examination of Assistants and others, commencing on Monday, the 7th November 1887, one Local Committee will be formed at Dacca for the examinees employed in all the four districts of the Dacca Division.

W. R. LARMINTIE, *Commissioner*.

Dacca Commissioner's Office, Camp Mymensingh, the 2nd September 1887.

NOTIFICATION.

IN accordance with the Government of Bengal Notification of the 23rd July 1887, notice is hereby given, to those whom it may concern, that the next half-yearly examination of Compounders will be held at 11 A.M. on Wednesday, the 12th October 1887, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce one of the following certificates:—

- (a) From the Superintendent of a Vernacular Medical School that he has attended regularly for one year the compounder class of the school.
- (b) From the legally-qualified medical manager of a chemist's and druggist's establishment recognised by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment.
- (c) From a Civil Surgeon that he has assisted in the dispensing of drugs at the Sudder dispensary of a civil station for a period of five years.

3. Applicants must register their names and submit their certificates, together with a fee of Rs. 3, at least one week before the 12th October 1887, at the office of the undersigned.

Note.—The students belonging to the compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

N. B.—The attention of candidates is drawn to Rule 5, section (b) of the Government notification of the 23rd July 1887, from which they will observe that the chemists' and druggists' establishments from the legally-qualified medical managers of which they obtain their certificates will have to be recognised by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

S. C. MACKENZIE, M.D.,
Superintendent, Campbell Medical School.

CAMPBELL MEDICAL SCHOOL, CALCUTTA, the 17th August 1887.

Junior Scholarships for 1888.

It is hereby notified that in accordance with the Government Resolution, dated the 10th January 1887, published in the *Calcutta Gazette* of the 19th idem, seven junior scholarships of the second grade and 13 of the third grade have been allotted to the Presidency Division, to be awarded at the Entrance Examination to be held in April 1888.

2. The second grade scholarships will be awarded to those candidates who take the highest places in the divisional list, irrespective of districts.

3. The third grade scholarships will be distributed among the different districts of the Presidency Division as follows :—

24. Pergunnahs	4
Nudda	3
Jessore	2
Khulna	2
Moorshedabad	2
Total					13

A. N. BHATTACHARJEE,
Personal Assistant, for Commissioner.

NOTIFICATION OF THE BOARD OF REVENUE.

No. 1121B.

NOTICE is hereby given that the Tenth Sale of Opium, the provision of 1885-86, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Thursday, the 6th October 1887, at 11 A.M., and will comprise 4,750 chests, viz. :—

	Chests.
Opium manufactured at the Patna Factory	2,375

PART I A.

Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Simla, the 9th September 1887.

HIS EXCELLENCY THE VICEROY AND GOVERNOR-GENERAL will hold a Levée at Government House, Calcutta, on Tuesday, the 20th December 1887, at 9-30 P.M.

All Civil and Military Officers and the Native Officers of the Native Regiments of the Garrison are invited to attend.

Gentlemen purposing to attend the Levée are requested to send their cards to the Aide-de-Camp in waiting not later than Saturday, the 17th December 1887, after which "No Cards" will be received, and to bring with them to the Levée two cards, with their names legibly written on them—one to be given on entering Government House, and the other to the Aide-de-Camp in waiting at the time of presentation.

Gentlemen who have not already been presented at the Court of St. James or at Government House will be good enough to add the names of gentlemen who will present them.

Gentlemen wearing uniform will appear in full dress.

Gentlemen not wearing uniform will appear in evening dress.

The carriages of gentlemen (except such as have the private entrée) attending the Levée will enter by the north-east gate, set down under the Grand Staircase, and pass out by the north-west gate.

Their Excellencies the Viceroy and Countess of Dufferin will hold a drawing room at Government House, Calcutta, on Friday, the 23rd December 1887, at 9-30 P.M.

Ladies purposing to attend the drawing room are requested to send their cards and addresses to the Aide-de-Camp in waiting not later than Tuesday, the 20th December 1887, after which "No Cards" will be received, and to bring with them to the drawing room two cards, with their names legibly written on them—one to be given on entering Government House, and the other to the Aide-de-Camp in waiting at the time of presentation.

Ladies who have not already been presented at the Court of St. James or at Government House are requested to send their cards, with their addresses and the name of the lady by whom they are to be presented to the Aide-de-Camp in waiting as soon as possible.

Ladies who present others should themselves attend the drawing room.

Ladies attending the drawing room will be expected to appear in full dress, but without trains.

The carriages of those who have the private entrée will enter by the south-west gate, and set down at the south entrance of Government House.

All other carriages will enter by the north-east gate, set down under the Grand Stairs, and pass out by the north-west gate.

By Command,

WILLIAM BERNARD, Major,
Military Secretary to the Viceroy.

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 12th September 1887.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Shibendra Kumar Chouduri to be a Commissioner of the Sheropore Municipality, in the district of Mymensingh, vice Baboo Harish Chandra Chakravarti, who has ceased to be a Commissioner under section 20 of the Act.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 12th September 1887.—Whereas a notification, dated the 9th June 1887, was published at page 166, Part IB of the *Calcutta Gazette* of the 15th idem, declaring the Lieutenant-Governor's intention to sanction, under section 86 of the Bengal Municipal Act III (B.C.) of 1884, the levy by the Commissioners of the Jugdispore Municipality, in the district of Shahabad, of a fee under section 143 on the registration of carts kept or habitually used within the Municipality, and whereas no reasons have been shown to the contrary, it is notified for general information that the Lieutenant-Governor hereby sanctions the levy by the Commissioners of the said Municipality of a fee on the registration of carts at the rates not exceeding those mentioned in section 143 of the Act.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Purulia Municipality for a public purpose, viz., for the site of a building to contain the Purulia Municipal and Road Cess Offices, together with a public hall, in the village of Purulia, pergunnah Chusra, district Manbhoom, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 13 bigrahs of standard measurement, is required. The land is bounded on the north by South Lake Road (road along south bank of Sahabbandh); on the east by the road leading from Cutcherry buildings to the Sahabbandh; on the south by a line joining two boundary pillars lying in the north-east and north-west corners of the compound of Mrs. Brown's bungalow (late Colonel Oake's bungalow); and on the west by berm of road leading from the circuit-house towards Sahabbandh.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for connecting Panchanuttollah with Arpooley Lane, it is hereby declared that for the above purpose pieces of land, Nos. 5, 6 and 7, Arpooley Lane, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 14 chittacks and 18 square feet only, are required. The boundaries of the lands are as follow:—On the north Arpooley Lane; on the south a portion of the premises of No. 4, Arpooley Lane; on the east a public passage; and on the west partly the premises of No. 5, partly the premises of No. 6, and partly the premises of No. 7, Arpooley Lane.

A plan and specification of the lands to be acquired have been filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for widening bye-lane of Moulvie Golam Sovan's Lane, it is hereby declared that for the above purpose pieces of land Nos. 10 and 15, Moulvie Golam Sovan's Lane, and Nos. 7, 8, and 9, Godai Khansama's Lane, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 2 cottahs 12 chittacks and 20 square feet only, are required.

The boundaries of the lands are as follow:—

Portion marked A on plan.—On the north, south, and east Moulvie Golam Sovan's Lane; and on the west, a portion of the premises of No. 10, Moulvie Golam Sovan's Lane.

Portion marked B on plan.—On the north partly the premises of No. 15, Moulvie Golam Sovan's Lane, and partly the premises Nos. 7, 8, and 9, Godai Khansama's Lane; on the south and east Godai Khansama's Lane; and on the west Moulvie Golam Sovan's Lane.

A plan and specifications of the lands to be acquired have been filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for widening Mooktaram Baboo's Lane, it is hereby declared that for the above purpose pieces of land Nos. 38 and 39, Mooktaram Baboo's Street, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 1 cottah 13 chittacks and 5 square feet only, are required. The boundaries of the land are as follow:—On the north partly a portion of the premises of Nos. 37 and 39, Mooktaram Baboo's Street, and partly the premises of No. 38, Mooktaram Baboo's Street; on the south partly Mooktaram Baboo's Lane, and partly a public passage; on the east partly a portion of the premises of No. 38, Mooktaram Baboo's Street, and partly a portion of the premises of No. 39, Mooktaram Baboo's Street; and on the west Mooktaram Baboo's Lane.

A plan and specification of the lands to be acquired have been filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road A in Putcootolla, it is hereby declared that for the above purpose pieces of land, Nos. 7 and 6-4, Roma Nath Mozumdar's Street, 6 and 12, Banestolla Lane, 49, 48, 34, 33, and 32-4, Putcootolla Lane, and 85, Seetaram Ghose's Street, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 1 biggah 7 cottahs and 10 square feet only, are required.

The boundaries of the land are as follow:—

Portion marked A on plan.—On the north portions of Nos. 7 and 6-4, Roma Nath Mozumdar's Street, and 6, Banestolla Lane; on the south Nos. 6, 5, 4, 3, and 6-1, Roma Nath Mozumdar's Street, and a portion of No. 6, Banestolla Lane; on the east No. 7, Banestolla Lane; and on the west Roma Nath Mozumdar's Street.

Portion marked B on plan.—On the north portions of No. 12 and No. 11, Banestolla Lane; on the south portions of Nos. 49 and 48 and No. 47, Putcootolla Lane, and a portion of No. 12, Banestolla Lane; on the east a portion of No. 12, Banestolla Lane; and on the west Nos. 7 and 11, Banestolla Lane, and portion of No. 48, Putcootolla Lane.

Portion marked C on plan.—On the north portions of Nos. 34, 33, and 32-4, Putcootolla Lane, and No. 85, Seetaram Ghose's Street; on the south portions of Nos. 34, 33, and 32-4, and premises No. 32, Putcootolla Lane; on the east Seetaram Ghose's Street; and on the west portions of No. 85, Seetaram Ghose's Street, and 12, Banestolla Lane.

A plan and specifications of the land to be acquired have been filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road C in Putcootolla, it is hereby declared that for the above purpose pieces of land Nos. 40, 34, and 34-2 Putcootolla Lane, 12 and 13, Banestolla Lane, and 75, Seetaram Ghose's Street, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 8 cottahs 10 chittacks and 15 square feet only, are required.

The boundaries of the land are as follow:—On the north Seetaram Ghose's Street and a portion of the premises of No. 40, Putcootolla Lane; on the south Putcootolla Lane; on the east portions of the premises of No. 75, Seetaram Ghose's Street, 34, Putcootolla Lane, 12 and 13, Banestolla Lane, and 40, Putcootolla Lane; and on the west the premises of No. 22, Banestolla Lane, portions of the premises of No. 75, Seetaram Ghose's Street, 13 and 12, Banestolla Lane, and 34-2, Putcootolla Lane, and the premises of No. 41, Putcootolla Lane.

A plan and specifications of the lands to be acquired have been filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road D in Putcoatolla, it is hereby declared that for the above purpose pieces of land Nos. 18 and 9, Banecatolla Lane, and 75 and 81, Sectaram Ghose's Street, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 5 cottahs and 15 square feet only, are required.

The boundaries of the land are as follow:—

Portion marked A on plan.—On the north portions of Nos. 75 and 81, Sectaram Ghose's Street, and of No. 18, Banecatolla Lane; on the south a portion of No. 75, Sectaram Ghose's Street, and a public passage; on the east Sectaram Ghose's Street and a public passage; and on the west a portion of the premises of No. 18, Banecatolla Lane.

Portion marked B on plan.—On the north, south, and east portions of No. 18, Banecatolla Lane; and on the west partly a portion of No. 18, Banecatolla Lane and partly Banecatolla Lane.

Portion marked C on plan.—On the north and east Banecatolla Lane; and on the south and west a portion of No. 9, Banecatolla Lane.

A plan and specifications of the lands to be acquired have been filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 11th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road B in Putcoatolla, it is hereby declared that for the above purpose pieces of land Nos. 1, Roma Nath Mozumdar's Street, 50, Putcoatolla Lane, and 7, 7-3, and 14, Banecatolla Lane, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 16 cottahs and 22½ square feet only, are required.

The boundaries of the lands are as follow:—

Portion marked A on plan.—On the north and west a portion of No. 1, Roma Nath Mozumdar's Street; on the south Roma Nath Mozumdar's Street and on the east partly a public passage and partly a portion of No. 1, Roma Nath Mozumdar's Street.

Portion marked B on plan.—On the north Banecatolla Lane and portions of Nos. 7-2, 7-3, and 8, Banecatolla Lane; on the south portion of No. 1, Roma Nath Mozumdar's Street, and 51 and portion of No. 50, Putcoatolla Lane, and a public passage; on the east Banecatolla Lane, Nos. 8 and 11, Banecatolla Lane, and 49 and portion of No. 50, Putcoatolla Lane; and on the west Nos. 7-2, portions of Nos. 7-3 and 6, Banecatolla Lane, and a public passage.

Portion marked C on plan.—On the north and west Banecatolla Lane; on the south a portion of No. 14, Banecatolla Lane and Banecatolla Lane; and on the east a portion of No. 14, Banecatolla Lane.

A plan and specifications of the lands to be acquired are filed in the Office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 12th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Burrisal Municipality for a public purpose, viz., for the construction of a public latrine near Baboo Kali Krishna Tagore's premises in the town of Burrisal, pergunnah Girdh Bondor, zillah Backergunge, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 cottah 7 chittacks of standard measurement, is required. It is bounded on the south by Baboo Kali Krishna Tagore's premises, and on the east, west, and north partly by Bhim Shaha's land and partly by Hadon's hotel land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 12th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Baduria Municipality for a public purpose, viz., for the completion and improvement of the Goyalapara and Baikara roads in that town, mouzah Arhalica, pergunnah Balaya, zillah 24-Pergunnahs, it is hereby declared that for the above purpose three parcels of land measuring, more or less, 1 bighah 9 cottaks and 8 chittacks, are required.

The boundaries of the land are as follow :—

S. J. DOUGLAS, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate in the district of Nuddea will be put up to sale at the Nuddea Collectorate on Wednesday, the 14th September 1887, corresponding with 29th of Bhadra 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

Conditions of sale.

1st—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Number in statement of Government estates.	Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Government revenue assessed.	Upset price.	REMARKS.

Pubma Collectorate, the 18th August 1857.

Решено СЛУШАШИ СУПРА, за Collector.

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated along the main line and Hajipore Extension of the Tirhoot State Railway, in the district of Moorshpore, will be put up to sale at the Moorshpore Collectorate on the 7th October 1887, and at Hajipore on 10th October 1887.

The purchasers of the several plots of land will be subject to the following conditions:—

- (1).—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough the land closer than 3 feet from its foundation.
- (2).—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
- (3).—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday then by the noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to the Government and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement in the case of original sale.
- (4).—The balance of purchase-money due under 3rd condition may be paid either to the Deputy Collector in charge, or into the Government Treasury at Moorshpore.
- (5).—The plot of land will be sold revenue free to the highest bidder.
- (6).—The purchaser shall be put in possession on receipt of the order of the District Collector approving the sales, but such possessions will be liable to be disturbed in case the final confirmation of the Board of Revenue shall not be accorded to the proceedings.

Moorsheadabad Collectorate, Berhampore, the 2nd August 1887.

J. ANDERSON, Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

1st.—The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as the proprietors of these estates, and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Number in the statement of Government estates.	Number on the district roll.	Name of the estate and pergunnah.	Government revenue.	Area in acres.	Upset price.	REMARKS.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest-money shall be forfeited to Government.

16. No offers by telegram will be accepted.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

No. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 25th October 1887, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 19,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat Stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1888 to 30th September 1888. The above quantity is subject to a possible deduction of 10,000 Imperial gallons of matured rum and 10,350 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 8, are received.

2. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

3. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

DESCRIPTION OF ARTICLE.	PROPOSED QUANTITY.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes or Government promissory notes.	Compensation to be paid to Government for each branch of contract.
	Matured rum.	New rum.					
MADRAS.	Im. Gall.	Im. Gall.					
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	0,735	...	The whole quantity must be delivered between 1st April and 30th September 1888 in such quantities and by such dates as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in to the care of the General Arrears Depot, Commissariat Storekeeper-General's Office, Madras.	Rupees 500 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced as a voucher of payment, or Government promissory notes to the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding Rs. 2 per gallon rejected or not delivered.
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	...	11,912					
RANGOON.							
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	...	10,350	Date to the Store and Shipping Office, Rangoon.	[Ditto Rangoon ...]	Rupees 250 [Ditto]		
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,000	...					
Total Imperial gallons	19,824	21,971			Total Rs. 1,750		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the samples not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he proposes supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of all beams and scantlings supplied from this depot will be as follows:—

Beams.—31 feet length, at Rs. 2-10 per cubic foot.

33	"	"	2-13	"
38	"	"	3-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

Scantlings.—From 12 to 20 feet, at Rs. 2-8 per s. ft.
Under 12 and over 7, at " 2-4 "

Destroyed.

THE Government Promissory Note No. 160770 of the 4 per cent. of 1885 for Rs. 500, originally standing in the name of Debnath Srimany, and last endorsed to Kailas Chandra Sircar, the proprietor, by whom it was never endorsed to any other person. Payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of the proprietor.

KAILAS CHANDRA SIRCAR,

(580—3)

Sharapul, Sub-division Baseerhut.

IT is hereby notified that, under section 46 of the Local Self-Government Act III (B.C.) of 1885, the District Board of Dacca have determined, at a meeting held on the 20th August 1887, to levy road cess for the ensuing cess year 1888-89 in the district at the maximum rate of one-half anna or six pies in the rupee on the annual value of lands.

KHAJAH MOHAMED ASGAR,

Vice-Chairman.

Dacca District Board's Office, the 31st August 1887.

(593—3)

THE public are hereby informed that the well-known Kartick Baroni Fair, which is held every year on the banks of the Dhalowari river, near Monasheegunge, in the district of Dacca, will commence on the 31st October 1887 A.D., corresponding to the 15th Kartick 1294 B.S. and continue up to 14th December 1887. Tradesmen, dealers and others may buy and sell there during these six weeks.

L. HARR, Chairman.

NARENDRA NATH SIRCAR, M.A., B.L., Pleader, Outrack, will apply to be enrolled as a Vakil of the High Court, Calcutta.

(576—4)

Estate Katherine Smith, deceased.

ALL persons claiming to be next-of-kin, according to the Statutes for the distribution of intestate estates, of the said Katherine Smith, deceased (widow of Colonel Edward Fleetwood Smith, formerly of the 2nd Regiment, Bengal Native Infantry), late of 22, St. Mary's Road, Westbourne Park, Middlesex, England, living at the time of her death on the 4th day of October 1883, or to be the legal personal representatives of such of the said next-of-kin as are now dead, are, on or before the 31st day of December next, to come in and prove their claims at the Office of the Administrator-General of Bengal, Calcutta.

F. J. MARSDEN,

Offg. Administrator-General, Bengal.

1, Council House Street, Calcutta, the 5th September 1887. (601—3)

Notification.

PURNA CHANDRA BOSE, Accountant,
for Executive Engineer, Nudda Rivers Division,
Berhampur, the 12th September 1887.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 87 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, this 17th March 1886.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
" each of the Madras, Bombay, and Allahabad Series ...	" 6 0	" 7 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	" 2 0	
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	" 1 0	

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

" Thacker & Co., Bombay.

" Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

" Curator of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

Notification.

In modification of the Notice, dated the 7th November 1882, published in Part II, page 1686 of the *Calcutta Gazette*, the following notice is published for information:—

Notice is hereby given, that the terms for the purchase of publications from, and for all work done in, the Bengal Secretariat Press for other than Government offices, or offices under the control of Government Officers, are strictly cash.

In future no publication will be supplied, or advertisement notices, &c., inserted in either of the *Gazettes*, except for the offices mentioned above, unless the cost thereof has been remitted to the Accountant, Bengal Secretariat. In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil

parts of offices, and for those forwarded by the Official Assignee, cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

R. H. WILSON,

Offg. Secy. to the Govt. of Bengal.

The 24th February 1886.

NOTE.—Rate for advertisements in the *Calcutta Gazette*:—

	Rs.
Full page, per issue	...
Half "	...
Casual advertisements, 4 annas per line.	...

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, office of the Legislative Department, Government of Bengal, situated at No. 5 on the top floor of the Government Offices, Writers' Buildings, Calcutta.

Copies are available for purchase at MESSRS. THACKER, SPINK AND CO., Government Place, Calcutta.

Notice

The 29th March 1886.—The subscription to, and postage for, the *Calcutta Gazette* will henceforth be at the following rates, payable in advance:—

	For the Mofussil.	Per annum.	Rs.	A.	P.

RESOLUTION ON THE REPORT ON THE LEGAL AFFAIRS OF THE GOVERNMENT OF BENGAL FOR THE YEAR 1886-87.

RESOLUTION.

JUDICIAL.

Calcutta, the 5th September 1887.

READ—

The Report on the Legal Affairs of the Government of Bengal for the year 1886-87.

Read also—

The Reports for the two preceding years, and the orders of Government thereon.

The following statement shows the result of Government litigation in all the Civil Courts of Bengal during the year 1886-87 as compared with the two previous years:—

	1884-85.	1885-86.	1886-87.
Decided in favour of Government ...	448	576	742
Decided against Government ...	148	92	167
Compromised, remanded or withdrawn	102	340	142
Percentage in favour of Government ...	75	86½	81½

The increase is due to a large number of land acquisition cases in connection with the Kidderpore Wet-dock.

2. The result of Government litigation in the High Court only was as follows:—

	1884-85.	1885-86.	1886-87.
Decided in favour of Government ...	24	28	80
Decided against Government ..	1	4	77
Compromised, remanded or withdrawn	4	305	2
Percentage in favour of Government ...	96	87½	28

The Legal Remembrancer points out that the low percentage of cases decided in favour of Government is due to the fact that 68 enhancement of rent-suits from Malinaggar, in the district of Mozufferpore, were decided by the High Court against the Government in two special appellate decisions, each governing a number of cases. Even if the 68 cases be treated as two cases, the percentage of decisions in favour of Government would still be far from good. The Lieutenant-Governor is satisfied that in many of the cases noticed in the Report, the Government had no reasonable grounds to go upon, and such cases should not have been taken into or defended in Court. The Legal Remembrancer will be asked to report specially on this point, and to state whether he can suggest any means whereby a more careful examination of the probabilities of success may be made in the first instance, and a stricter watch kept over the progress of cases afterwards. The attention of the Revenue Department will also be called to this matter.

3. Sir Stuart Bayley does not deem it necessary to discuss the details of the various cases which have been decided against Government. With reference to the case under Act XI of 1859 mentioned by Mr. Allen in paragraph 12 of his Report, the suggestion made by him will be considered in the Revenue Department. On the data now before him, the Lieutenant-Governor is certainly of opinion that the Commissioner or the Board of Revenue would have done well to cancel the sale.

4. Perhaps the most important case during the year was the Dears Survey case, in the district of Furroedpore, in which a quantity of land was resumed as new accretions, and assessed under the provisions of Act IX of 1847. The plaintiffs instituted a suit against Government claiming the land as a re-formation on the site of their permanently-settled mouzah. The Government urged that the lands being liable to assessment under Act IX of 1847, the Civil Court had no jurisdiction to entertain the suit. This contention was disallowed by the Court of first instance, but allowed by the District Judge on appeal. On a second appeal to the High Court, the question of jurisdiction was referred to a Full Bench and decided against the Government. The Legal Remembrancer has made the following remarks regarding this case: "The question whether the land is liable to assessment, or already covered by an existing settlement, appears to have been always reserved for the decision of the Revenue authorities, and section 6 of Act IX of 1847 declares the Board's decision final in such a case. This judgment of the Full Bench, ignoring this principle, and overruling previous decisions of the High Court itself, has been appealed to Her Majesty in Council."

5. The result of Government litigation in the lower appellate Courts was as follows:—

		1884-85.	1885-86.	1886-87.
Decided in favour of Government	...	111	29	25
Decided against Government	...	8	17	7
Compromised, remanded, or withdrawn	...	8	...	17
Percentage in favour of Government	...	93	63	78

As regards the seven suits decided against Government, Sir Stuart Bayley would only remark that the suits mentioned in paragraphs 20 and 21, which were brought for the cancellation of certificates issued under Act VII (B.C.) of 1880, show the necessity for the exercise of caution and supervision in the application of the certificate procedure.

6. The following was the result of Government litigation in the Courts of first instance:—

		1884-85.	1885-86.	1886-87.
Decided in favour of Government	...	313	519	687
Decided against Government	...	139	71	83
Compromised, or withdrawn	...	90	36	123
Percentage in favour of Government	...	69	88	89

The increase in the number of cases is due to there having been an unusually large number of land acquisition cases in the districts of the 24-Pergannahs, Patna, and Dacca. Of the 83 cases decided against

Government, 21 were cases under the Land Acquisition Act, in which the Judge awarded larger amounts of compensation than had been offered by the Collector. Of the remaining cases, 35 were brought by the tenants of Bokalis, in the district of Chittagour, for a reduction in the rent assessed on them under Act VIII (B.C.) of 1879. In these cases appeals have been instituted in the District Judge's Court against the decisions of the Munsif. The result of the appeal filed in the case arising out of an alleged encroachment on a public road mentioned in paragraph 31 of the Report, should be specially reported. The suit, brought by the Maharajah of Durbhunga against the Chairman of the Durbhunga Municipality, for the recovery of a piece of land which had been acquired by Government, is one of great importance, as affecting the powers of a Manager under the Court of Wards. The Legal Remembrancer should see that the case on behalf of Government is properly and thoroughly placed before the High Court on appeal. This remark also applies to the case mentioned in paragraph 38, as the question as to the existence of any transferable right is one of great importance. As remarked by the Collector, the judgment, if not upset on appeal, will certainly form a most inconvenient precedent.

7. The figures below show the result of the litigation in which the Court of Wards were concerned for the year under report as compared with the two preceding years:—

	1884-85	1885-86	1886-87
Decided in favour of Court of Wards ...	700	1,113	1,034
Decided against Court of Wards ...	121	158	310
Compromised, remanded or withdrawn ...	50	44	91
Percentage in favour of Court of Wards	85½	87½	77

The low percentage is said to be due to the fact that 210 cases instituted by the Manager of the Dighapatia Estate for recovery of arrears of rent were decided against the Court of Wards during the year. Appeals have been preferred in these cases.

8. The following table shows the amount of Government decrees recovered during 1886-87, as compared with the amounts recovered during the two previous years:—

	1884-85.	1885-86.	1886-87
	Rs.	Rs.	Rs.
Amount under realization ...	6,42,647	6,26,182	50,449
Realized during the year ..	20,407	12,338	13,367
Percentage of recovery	3½	2	26½

Omitting the Canning decrees which were remitted in the previous year, the amount under realization in 1885-86 was only Rs. 44,903, or less than in the present year. The percentage of recovery on that amount was Rs. 27½, so that the percentage has dropped by 1 per cent. during the year under report.

9. The amount of Wards' decrees recovered during 1886-87, as compared with the realizations of the two preceding years, was as follows:—

	1884-85	1885-86.	1886-87
	Rs.	Rs.	Rs.
Amount under realization ...	5,72,757	9,57,524	11,07,570
Realized during the year ...	1,02,253	1,69,179	1,63,100
Percentage of recovery	19½	18	14½

The Lieutenant-Governor is of opinion that the percentage of recovery, both on Government decrees and Wards' decrees, is exceedingly bad. The most unsatisfactory feature of Government litigation in Bengal is that Government must of course make good to the uttermost farthing all adverse decrees, while it experiences the greatest difficulty in realizing the decrees in its favour, some of them being wholly infructuous. The Board of Revenue are of opinion that what is necessary to improve realization is greater energy on the part of the officers in the Execution Department. This remark of course applies only

to Wards' decrees. As regards Government decrees, Sir Stuart Bayley agrees with the opinion of his predecessor that small collections are due in a great measure to the facility for concealing property, to the joint family system, and to the prevalence of *benam* transactions, which offer almost insuperable obstacles to the realization of decrees, even by private persons. Sir Stuart Bayley has no doubt that the offences of fraudulent concealment, removal, or transfer of property are of frequent occurrence in Bengal. Collectors, however, have some remedy in their own hands, as they might apply to the Magistrate in any fitting case to issue process under section 424 of the Penal Code, an offence, for the prosecution of which no sanction is required. The Lieutenant-Governor is not aware whether a commission upon realizations is now paid to Nazirs and their subordinates. If not, he thinks that the experiment might be tried. The Legal Remembrancer will be asked to report on this point. Statement E appended to the Report shows that the amount expended in litigation by Government during the year was Rs. 48,868, while the receipts amounted to only Rs. 13,367.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Superintendent and Remembrancer of Legal Affairs for information and submission of the report called for in paragraphs 2, 6 and 9.

Ordered also that a copy of this Resolution, with a copy of the Report, be forwarded to the Revenue Department of this Office with special reference to the remarks contained in paragraph 2.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Offg. Chief Secretary to the Govt. of Bengal.

DONATION BY MAHARANI SARNAMAYEE FOR THE PROMOTION OF TECHNICAL EDUCATION.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 9th September 1887.

RESOLUTION.

READ—

- An endorsement from the Commissioner of the Presidency Division, No. 69MG, dated the 7th March 1887, forwarding a copy of a letter No. 46, dated the 14th February 1887, from Maharani Sarnamayee of Cossimbazar, Member of the Imperial Order of the Crown of India.
- An endorsement from the Commissioner of the Presidency Division, No. 39JNG, dated the 2nd August 1887, forwarding a copy of a further communication No. 197, dated the 1st July 1887, from Maharani Sarnamayee.
- A letter from the Director of Public Instruction No. 5616, dated the 18th August 1887.

In commemoration of the Jubilee year of the reign of Her Majesty the Queen-Empress of India, the Maharani Sarnamayee of Cossimbazar, Member of the Imperial Order of the Crown of India, has offered to make an endowment of Rs. 20,000 for the promotion of technical education in the Moorshedabad district, and with this view has proposed the following scheme. Of the sum of Rs. 20,000, Rs. 5,000 will be appropriated for the purpose of obtaining the necessary apparatus and instruments, and the income accruing from the

investment of the remainder will be expended, in concert with the Municipal Commissioners of Berhampore, on (1) the endowment of a class at the Berhampore Collegiate School to which the present technical school under the charge of the Municipal Commissioners will, together with its apparatus and materials, be transferred; and (2) the establishment of classes in connection with this technical class at some of the elementary schools maintained by, and situated within, the municipality.

The Lieutenant-Governor has pleasure in accepting Maharani Sarnamayee's munificent gift, and desires to communicate to her his approval of the scheme which she proposes, and to tender his thanks for her great liberality.

ORDER.—Ordered that a copy of this Resolution be published in the *Calcutta Gazette*, and that a copy of it be forwarded to the Commissioner of the Presidency Division for information and communication to the Maharani Sarnamayee of Cossimbazar, Member of the Imperial Order of the Crown of India.

Ordered also that a copy be sent to the Director of Public Instruction for information.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE RAJSHAHYE DIVISION FOR 1886-87.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 18th September, 1887.

RESOLUTION.

READ—

The Annual Administration Report of the Rajshahye Division for 1886-87.

The Rajshahye Division was in the charge of Lord H. Ulick Browne until the 1st October 1886, when, on his retirement from the Bengal Civil Service after nearly 10 years successful administration of the Division, he was succeeded by Mr. Lewis. The Report is submitted by Mr. Lewis, who held charge of the Division for the remainder of the year under review.

2. *Tours.*—Mr. Lewis was on tour in the Division for 138 days, and did a large amount of inspection work, including inspection of all the district offices and six of the sub-divisional offices. All the district and sub-divisional officers spent the prescribed period in touring, and appear to have made good use of their time in camp; the longest tours were made by Messrs. Oldham and Paul in Darjeeling (119 days), Mr. Sunder in Alipore (159 days), and Mr. O'Donnell in Kurseong (147 days). The time spent in the interior by Joint and Assistant Magistrates, other than those in charge of sub-divisions, was insufficient, and the attention of the Commissioner is called to the Resolution on the Report for 1883-84, in which it was urged that an effort should be made to arrange for the Joint-Magistrates to spend at least a month in camp.

3. *Weather and crops.*—The rainfall of the year was copious and well distributed, and the outturn of the crops was generally good, that of the aman dhan, which is the chief food crop of the division, being an unusually full crop. Indigo, which is now grown only to a limited extent in three districts of the division, was damaged by the heavy rains of July and August, and jute and tobacco, which were not such good crops as in the preceding year, suffered, the former from the excessive rainfall and the latter from hail. The year was favourable to the cultivation of ganja, and the outturn of this crop was very satisfactory.

The following estimate of the outturn of the different crops, in which the average harvest is taken at 16 annas, is taken from the Commissioner's report:—

NAME OF CROP.	DINAPORE.		RAJSHAHY.		PURNIA.		BOGRA.		RANGPORE.		JULPIGORE.		TILJERING.		DUTT-DOWAL.		REMARKS.
	Average outturn in annas.		Average outturn in annas.		Average outturn in annas.		Average outturn in annas.		Average outturn in annas.		Average outturn in annas.		Average outturn in annas.		Average outturn in annas.		
	1885-86.	1886-87.	1885-86.	1886-87.	1885-86.	1886-87.	1885-86.	1886-87.	1885-86.	1886-87.	1885-86.	1886-87.	1885-86.	1886-87.	1885-86.	1886-87.	
1. Rice—																	
(a) Boro	12	12	8½	8½	11	11	12	12	...	Little grown.	Not grown.	(d)	(d)	(a)	12½	12½	(a) Little is grown. (b) Very little grown in the hills only.

11. Silk	Not grown	
12. Tea	Not grown	
13. Mistle	

4. *Public Health and Vaccination.*—The mortality statistics of the year show an increase in the number of deaths in all the districts of the division except Rajshahye and Bogra. This increase is to some extent attributed to improved registration, but the year appears to have been generally unhealthy in this division and especially so in Dinagepore, where the public health is reported to have been extremely bad and the season is compared with the memorably unhealthy year, 1877. Cholera was epidemic in Pubna in the hot weather and in Julpigoree after the rains, and was also prevalent in the Darjeeling Terai and in Rungpore. In the last named district the prevalence of fever and cholera resulted in the highest annual figures of mortality ever recorded for the district, viz., 32·22 per mille. The highest death-rate, viz., 35·27, was recorded in Julpigoree.

Vaccination operations generally appear to have been very much on the same scale as last year, except in Rungpore and Julpigoree. In Rungpore there was an increase of 6,000 vaccinations, which is balanced by a falling off of about the same number in Julpigoree; the decrease in the latter case was due to the insufficiency of vaccinators. In Pubna it is said that vaccination is still regarded with distrust in backward villages; but on the whole and especially in the Darjeeling hills it seems that the system is gaining popularity.

5. *Material Condition of the people, &c.*—The Commissioner considers that the material condition of the people of the Rajshahye Division is at present good, owing to the favourable harvests of recent years, and the District Officers give satisfactory accounts of the general prosperity in ordinary years, and of the increased comfort of the cultivators and labouring classes in the present times of plenty. The Officiating Collector of Dinagepore, whose estimate is the lowest with regard to the material condition of the people, places the mass of the cultivating classes in his district half way in the scale of comfort between the same classes in Eastern Bengal and Behar, and remarks that, while there appears to him to be a great difference between the standard of comfort maintained by the ryots of Dinagepore and that of the Mymensingh ryots, there is, on the other hand, an absence of any appearance of actual squalor and want such as may be met with in the interior of a Behar district. The Commissioner, however, who has served in Dinagepore, takes a more cheerful view of the condition of the district, and writes as follows:—

"Rents in Dinagepore are low, land is still plentiful, though much waste and jungle has been reclaimed of late years, and the cultivator has a ready market for his produce.

These are not conditions that tell against the welfare of the agricultural community, and the fact that the villagers can afford to import labour to carry on agricultural operations proves that their condition is good. I have always considered Dinagore as pre-eminently a district where the ryots hold their own acres not liable to rack-renting, where, though the zamindars are poor, there are a large number of substantial ryots, mundols, jotedars, and others, through whose influence a system of village government prevailed; where generally the peasantry live in ease and content. It is true that some years have elapsed since I was Magistrate of Dinagore; but I cannot think that the mere fact of the district having been since then opened out to trade can have had any evil effect on the condition of the people at large."

A proof of the general agricultural prosperity is found in the fact that while there is no emigration from the division, immigrant labourers come every year into all its seven districts to take part in the harvesting and field work, and in road-making and tank-digging. In the year under review, the Assam-Bihar Railway works also attracted large numbers of up-country labourers to Dinagore. A falling off in the number of immigrant labourers who came to work in the Julpigoree tea-gardens is ascribed to the fact that unfair and illegal means were largely used by Assam recruiters both in the Chota Nagpore recruiting grounds and *en route* to divert the labourers to Assam. These accusations ought to have been enquired into at the time. If Assam recruiters offer higher terms than the Julpigoree recruiters and by fair means are able to persuade labourers to go to Assam in preference to the Julpigoree gardens no grievance is established; but, it is the duty of the local officers to ensure that no fraud or compulsion is used to intending emigrants.

No general change occurred in the wages of agricultural labour except in the Rajshahye district where a rise is attributed to the good crops. The price of food fell everywhere as compared with the average prices of the last five years, common rice ranging in the plains districts from 20½ seers a rupee in Rungpore to 24½ seers in Dinagore. The price of food has fallen. Compared with the average quantity sold per rupee during the five preceding years, the average quantity of common rice and wheat increased in all districts, and of pulses everywhere, except in Rajshahye, and there further appears to have been an improvement in 1886-87 over the year 1885-86.

6. *Manufactures and Trade.*—Jute, tea, silk, molasses, and tobacco are the most important manufactures of the division. The outturn of tea in Darjeeling increased from 9,090,298 lbs. in 1885 to 9,416,031 lbs. in 1886, and in Julpigoree tea cultivation continued to expand, and there was an advance of little short of two million pounds in the outturn (5,571,404 lbs.) as compared with that of the preceding year. The continued decline in the silk industry of the Lower Provinces has occupied the attention of Government, and steps have been taken under the supervision of the Agricultural Department with a view to investigate and combat disease among silk-worms.

The Commissioner gives a very interesting review of the trade of the division registered in the calendar year 1886. His figures represent the trade carried by the Northern Bengal State Railway, the Darjeeling-Himalayan Railway, the Eastern Bengal State Railway, and the Serajgunge steamer service, the total value of which is estimated approximately at 10 crores of rupees. The figures show a net excess of exports over imports to the value of about one-and-a-half crores of rupees. It is to be observed that the exports to Calcutta, Assam, and Eastern Bengal were more than double those of 1885. The expansion of the Serajgunge steamer trade is especially noticeable. External trade is carried on with Bhutan, Sikkim, Nepaul, and Thibet. There was a very considerable increase in the trade with Sikkim, Nepaul, and Thibet during the earlier months of 1886, but towards the end of the year a strict blockade was maintained, and trade in consequence was brought to a standstill. Trade with Bhutan also fell off. On the general trade aspects of the division the Commissioner writes:—

"The opening out of lines of railway and their attendant feeder roads have given a great impetus to the extension of trade and commerce in the division, and this has reacted favourably in improving the condition of the people. The cultivators have a readier market for their produce and can obtain better prices, and as a consequence cultivation has extended. It is not so long ago since Rajshahye, Dinagore, Rungpore, and Bogra were covered with jungle famous for the shikar to be had in them, immense tracts of which have now been cleared for cultivation. During even the nine years that have intervened since I was personally acquainted with some of the above districts, a great change has taken place, and the effect of the impetus given to trade on the material condition and well-being of the people is very marked."

7. *State of public feeling.*—The District Officers state that public feeling on general subjects is as yet almost unknown, but they are unanimous

in their reports regarding the unprecedented enthusiasm and loyalty evinced, by all classes on the occasion of the celebration of the Queen-Empress's Jubilee. The imposition of the income-tax does not appear to have been followed by any pronounced feeling of discontent, and it is said to be considered more equitable than its predecessor, the license-tax, the incidence of which was on one section of the community only. The provisions of the Tenancy Act are gradually becoming better understood, and the excitement attendant on its introduction has, according to the Collectors of Rungpore and Rajshahye, subsided. Local Self-Government in Pubna is said to have been greatly appreciated as a mark of confidence in the people.

8. *Employment of Muhammadans.*—A comparison between the tabulated statement prepared by the Commissioner under this head and that submitted last year shows no change in the number of Muhammadan gazetted officers, but a very large increase in the numbers of Muhammadan officers employed by Government in superior and inferior service; as, however, last year's returns were admittedly incorrect, and did not include certain departments taken into account this year, it is impossible to draw conclusions on the subject at present. The statement for 1886 is reproduced below:—

Districts.	Proportion of Muhammadans to district population.	Proportion of educated Muhammadans in the district as compared with educated Hindus.	NUMBER OF PERSONS IN GOVERNMENT SERVICE.						REMARKS.
			Gazetted.		Superior service.		Inferior service.		
			Total officers.	Muhammadan officers.	Total officers.	Muhammadan officers.	Total officers.	Muhammadan officers.	
Dinagpore	1 to 10	1 to 9	20	1	211	31	640	230	Excluding officers and men serving under the Municipality and the District Board Cess Committee.
Rajshahye	1 to 12	1 to 9	42	0	373	92	854	413	
Pubna	1 to 33	1 to 13	19	1	317	87	639	340	
Bogra	1 to 12	1 to 7	10	1	396	172	383	215	
Rungpore	1 to 16	1 to 110	60	4	695	216	413	218	
Julpigoree	1 to 27	1 to 10	15	213	34	113	175	
Jarjeelaw	1 to 147	1 to 105	22	140	24	481	68	
Total	1 to 14	1 to 11	157	13	2,314	634	2,997	1,607	

9. *Police and Crime.*—There was a slight decrease in cognizable crime in the division, the number of cognizable offences reported falling from 13,225 to 12,891, but this decrease occurred in Dinagpore and Rajshahye only, the returns of the other districts showing a small increase. Non-cognizable cases rose from 8,503 to 9,376, the increase having been common to all the districts of the division except Dinagpore. A considerable amount of work continues to be disposed of by the Magisterial Benches. With regard to the conduct of the regular police, the Lieutenant-Governor observes that the figures showing the percentage of police officers and men punished judicially and departmentally exhibit very far from satisfactory results as regards every district except Dinagpore, and there the conduct of the force is expressly reported by the Magistrate to have been most unsatisfactory.

10. *Civil Justice.*—From the statement of civil suits, it appears that the total number of suits instituted in 1886 was 45,199 as against 44,407 in 1885. Rent suits increased in number in Rajshahye and Pubna, but fewer were instituted in all the other districts of the division; suits for title and for money and moveable property increased generally. The explanation of the fluctuations appears to be that in a season of plenty tenants have been in a better position to pay their rents; while, on the other hand, creditors have for the same reason been eager to seize the opportunity to sue their debtors. It is also possible that, owing to doubts being entertained as to the effects of certain provisions of the Tenancy Act, suits are being withheld pending the decision of test cases.

11. *Land Revenue and Settlements.*—The total land revenue demand of the division for the year was Rs. 51,21,620 from 5,447 estates, and the collections reached the percentage of 96.48 against 96.04 in 1885-86. The remissions granted amounted to Rs. 18,311 only as against Rs. 32,600 during the preceding year, and the balance outstanding at the close of the year was also smaller than that with which it opened. Under the head of settlements the grant of leases of waste land in Julpigoree, amounting to 22,394 acres, and the Mircha Dears Settlement in Rajshahye, were the most important operations. In Pubna, Bogra, and Rungpore a re-valuation under the Cess Act of 282 estates was completed with the result of a net increase of Rs. 48,779 in valuation and Rs. 918 in both the cesses.

12. *Relations between Landlord and Tenant.*—The relations existing between landlords and tenants in the Rajshahye Division appear to be on the whole satisfactory, but in Pubna they are reported to be in many instances strained. The circular orders issued by the Board of Revenue are said to have to a great extent settled the disputes, which were at first frequent, regarding the filling up of the printed form of rent receipt. The work done under the Tenancy Act during the year in the Collectors' offices relates principally to the issue of notices under the different sections and the payment of landlords' fees on the transfer of tenures. The Commissioner expresses only the general opinion that "the Act has worked on the whole satisfactorily," and adds that all the District Officers have not reported fully on the matter. The Lieutenant-Governor hopes that a fuller notice of the working of the Act will be given in next year's report. It is noticed that landlords in many cases do not appreciate the provisions of section 12 of the Act, which were inserted especially for their benefit, and refuse to accept fees sent to them with notices of transfer under the impression that acceptance will bind them to acknowledge such transfer.

13. *Excise and Stamps.*—The Excise revenue rose from Rs. 6,02,106 to Rs. 6,51,713, in the year under review, the increase being shared in by all the districts. This general improvement was obviously due to the prosperous condition of the people caused by good harvests, and the consequent advantageous settlement of shops. In the stamp revenue there was an increase in three districts, and a decrease in four, resulting in a net increase of Rs. 30,508 for the division.

14. *Monetary arrangements.*—The value of notes received from, and issued to, the public in payment of Government dues increased in five of the seven districts, the divisional result being a decrease in the receipt, and an increase on the issue side. Stock-notes continue to be unpopular, only one sale and one renewal being reported for the whole division. There was a large increase in the amount of money deposited in Savings Banks, no doubt due to the great convenience to the people of post offices as banks for deposits. As regards money-orders, there has been a steady increase in transactions since their transfer to the Postal Department.

15. *Education.*—Three thousand four hundred and thirty-eight schools and 87,556 pupils were under the cognizance of the Education Department in this Division at the end of the year. There was a rather large decrease under lower primary schools and pupils on account of further exclusion from the system of rewards, and therefore from the returns of very small and inefficient schools; the decrease is especially marked in Bogra, Pubna, and Rajshahye. The Lieutenant-Governor has again to notice with regret the decrease in the number of girls' schools and of pupils attending them, attributed to the stricter working of the reward system. In Rajshahye, in spite of the fact that for the first time some girls were successful in the Lower Primary Scholarship examination, there was a discouraging decrease from 27 schools and 482 pupils to 20 schools and 330 pupils, and in Pubna the decrease was still greater. The attention of the Director of Public Instruction will be called to this portion of the Commissioner's report.

16. *Communications, Road Cess Committees.*—Rupees 3,63,000 were spent during the year by the District Road Cess Committees in original works and repairs. The Commissioner especially insists on the necessity of improving communications in the Dooars in order to encourage the taking up of waste lands.

The members of the Road Cess Committees in Rajshahye and Rangpore are said to have taken much interest in their work. Before the close of the year District Boards had been constituted in Rajshahye and Pubna.

17. The Commissioner's remarks on the conduct of officers will be noted in the Appointment Department.

18. The Lieutenant-Governor observes that this report is 73 pages long without appendices, against reports of 63 pages and 46 pages for the years 1885-86 and 1884-85. The Commissioner has too often quoted at length the opinions of his District Officers, instead of summarising the results of the year for the Division as a whole. Sir Stuart Bayley requests therefore that the Commissioner's future reports may be more concise.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR 1886-87.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 13th September 1887.

RESOLUTION.

READ—

The General Administration Report of the Dacca Division for 1886-87.

MR. W. R. LARMINIE was Commissioner of this division throughout the year under review. The report is submitted by Mr. C. F. Worsley, who subsequently officiated as Commissioner.

2. *Annual Tours*.—The Commissioner set a good example to the officers of the division in spending 128 days on tour, visiting the head-quarters of each district twice or oftener, and all of the sub-divisions, except Jamalpore, once. The Collectors' tours were all of sufficient length, except in Dacca. Mr. Fasson was especially energetic in visiting all parts of the Backergunge district. In explanation of the deficiency of 11 days in the case of the Dacca district, it is said that the use of a steamer during the rainy season rendered it possible for the Collector to see more of the interior in less time than usual; but this is not a sufficient reason for curtailing the prescribed number of days. The Sub-divisional Officers, with one exception, spent 120 days or more in camp. The exception is in the case of Baboo Mahendra Chundra Mozumdar, Sub-divisional Officer of Kishoregunge, whose tour was in the preceding year also short by 35 days, and whose repeated shortcomings in this respect call for an expression of the Lieutenant-Governor's displeasure. It is impossible for a Sub-divisional Officer to be efficient in his work unless he moves about actively in his sub-division, and it is noticed that this officer's executive work has fallen under the censure of the Commissioner.

3. *Weather and Crops*.—The rainfall of the year was in excess of the average of the last four years, except in Backergunge, where the total for the year was deficient, although in the same district damage was done by excessive rain in the transplanting season. The rainy season was marked by very high floods, especially in Dacca, but notwithstanding these the agricultural results are said to have been generally good. The tables appended to the Report show, however, that the *amra* rice, which is the most important crop in the division, was a full crop only in the Furreedpore district, and below the average in the other three districts. *Aus* rice and jute also suffered from excessive flooding; but judging from the trade returns, the latter crop was abundant. The yield of winter crops, *i.e.*, mustard, linseed and pulses, is said to have been good, but this is not generally borne out by the figures of outturn.

4. *Material condition of the people and prices of food and labour*.—No change in the material condition of the people is reported, the agricultural classes continuing to be well-to-do and prosperous, and the literate classes, including office-seekers, to struggle with straitened circumstances and limited prospects. The deterioration in the condition of landed proprietors, remarked by the Collector of Dacca, is, it is to be feared, the consequence of constant litigation and improvidence, and not of a depreciation in the value of landed property. That the year was a favourable one is shown by increased trade and by better collections of revenue under all heads. The price of common rice fell in every district, and wages of labour continued to maintain a high rate.

5. *Public health*.—The total number of deaths registered was 188,994 against 184,359 in 1885-86. The increase may to some extent be due to improved registration; but it is believed that the year was unhealthy except in Furreedpore. Cholera of a virulent type was generally prevalent but fever and small-pox were less fatal in every district except Backergunge. The practice of steeping jute indiscriminately in stagnant khals and bheels is noted as decidedly injurious to health, and steps should be taken to prevent the pollution of drinking-water by instituting prosecutions for nuisance.

6. *Trade and Commerce*.—The main lines of traffic with Calcutta and western districts continue unchanged. Trade is most brisk in the rainy season when

boat communication is easy and cheap, but is greatly impeded at other times by the want of roads. In Dacca the jute and rice trade increased, and both the import and export trade flourished in Mymensingh; but the low price of rice, which diminished the purchasing power of the cultivators, had a depreciating effect on trade in Backergunge. The value of the trade of the Naraingunge port rose from 66½ lakhs of rupees in 1885-86 to 88½ lakhs in 1886-87. For the most important trade staple of this division is jute, the export of which from Naraingunge were valued at 80½ lakhs of rupees, or 91 per cents. of the trade of the port.

7. *Public feeling and Administrative arrangements.*—The Lieutenant-Governor has again, in the case of this Division, to notice the universal and spontaneous display of feeling called forth on the occasion of Her Majesty's Jubilee. Much interest is reported to have been taken by the educated classes in the enquiries of the Public Service Commission, and some enthusiasm was displayed in the districts of Dacca and Furreedpore on the occasion of elections to the Local Boards under the Local Self-Government Act. The working of the Tenancy Act is noticed later in this review.

The following table shows the extent to which Muhammadans are employed in Government service in this Division—

District.	A			B			C			Grand Total.	REMARKS.
	Gazetted Officers.			Officers in superior service.			Officers in inferior service, including medical servants.				
	Muhammadans.	Hindus.	Total.	Muhammadans.	Hindus.	Total.	Muhammadans.	Hindus.	Total.		
Dacca	22	86	54	147	748	532	1,028	1,884	2,781	2,167	} Figures of 1885-86.
Furzedpore	18	81	44	80	464	324	467	448	594	1,308	
Backergunge	1	44	38	174	377	1,423	897	372	539	1,876	
Mymensingh	6	37	46	171	187	288	414	561	1,017	8,081	
Total	53	194	187	552	2,856	2,594	2,343	2,865	4,778	8,348	

* Do not include Rural Sub-Registrars and Registrars of Muhammadan marriages. The figures of other districts include them.

Sixty-four per cent. of the total male population are Muhammadans; but for every Muhammedan able to read and write three Hindus were returned at the last census. It will be seen therefore that in superior service the Muhammedans do not hold their own in this division, while in inferior service they do much more than hold their own. Some thing may be done to redress this balance by proper supervision on the part of heads of offices when vacancies are filled; but it lies with the Muhammedans themselves to make good their position by improvement in education.

8. *Police and Crime.*—The conduct of the regular police is, on the whole, favourably reported upon, but the standard of merit does not appear to be high, and the success of the force in bringing offenders to justice is not satisfactory. In every district of this division the town police are said to be overworked and underpaid. The improvement in the payment of chowkidars' wages throughout the division is very satisfactory, and to this is naturally in a large measure attributable the good service reported to have been done by their agency. The returns, as compared with those for 1886, show an increase in both cognizable and non-cognizable crime; but the figures are below the average of recent years. The results of the prosecution of false cases were slightly better than formerly. The extraordinary want of uniformity shown in the extent to which, in the different districts of the division, the power of refusing enquiry is exercised by the police is unsatisfactory, and suggests the conclusion that section 157 of the Criminal Procedure Code is nowhere duly appreciated or judiciously utilised.

9. *Civil Justice.*—The fluctuations in the number of civil suits were slight, and all that need be observed is that the Tenancy Act has not conduced to an increase of litigation.

10. *Land Revenue, &c.*—The current demand of land revenue rose from Rs. 33,67,739 to Rs. 33,83,507, and there was a general improvement in

collections. In spite of a heavy arrear balance, the collections in Backergunge for the first time within the last ten years reached the normal standard of 90 per cent., a result which is most creditable to Mr. Faxon. The balances at the close of the year show a decrease in every district, and the number of certificates filed fell from 14,096 to 13,862. There was an increase in revenue both from Stamps and Excise, and, with regard to the latter, it is satisfactory to note that it was accompanied by a general decrease in the number of shops and licenses. The collections under the present Income-tax Act more than doubled those under the Act of 1872, and showed an increase of 63·1 per cent. over those under the License-tax Act in 1885-86.

11. *Relations between Landlord and Tenant.*—In the Dacca and Furreedpore districts relations between landlord and tenant are reported to have been more satisfactory than in the preceding years; but in Backergunge, and still more in Mymensingh, there appears to be considerable tension. The reports of the District Officers under this head are chiefly taken up with accounts of the introduction of the form of rent receipt prescribed by the Tenancy Act. The difficulties attending the introduction of the form are briefly put by Mr. Glazier, Collector of Mymensingh, as follows:—

“Rent receipts are making their way but slowly. A large number have been used, but their use is by no means universal. In many cases the zemindars do not care to use them, as they do not see their way to incorporate with the rent the illegal cesses they have been accustomed to levy. In other cases the ryots object to them, as they do not agree to the amount of annual rent the zemindar wishes to enter in the receipt.”

On the whole matters appear to be settling down with the more general recognition on the part of the landlords that accurate records will check litigation and with the growing appreciation by the ryots of the benefit of a definite acquittance. The management of the Dakhin Shabazpore estate in Backergunge was taken over by the Court of Wards on the application of the joint-proprietors under the provisions of sections 93 to 95 of the Tenancy Act, and the result of the experiment will be awaited with interest. On the general working of the Tenancy Act in this division, Mr. Larminie made the following remarks in his Land Revenue Report:—

“So far I think there is no reason to be dissatisfied with the working of the new Rent Law. Its provisions are of course being only gradually understood, and it would be very rash as yet to predict that the present calm will continue. I see no reason, however, to anticipate any serious disturbances. From what I have been able to gather, a certain sense of security has grown up amongst the ryots, and landlords generally have become conscious that it is useless to try and either evade or act in opposition to the law.”

12. *Monetary arrangements.*—There was a large decrease, which is not fully accounted for, in both the receipts and the issue of currency notes everywhere except in Mymensingh. Money-order transactions and savings bank deposits increased in a very satisfactory manner.

13. *Railways and communications.*—The passenger traffic on the Dacca State Railway was most encouraging, but the high rate of freight seems to have interfered with the success of the goods traffic. It is unfortunate that there is not more successful enterprise in the matter of internal steamer communication in this division. Existing roads were maintained in an efficient state, except in the district of Furreedpore, and more original works were executed than in the preceding year. Considerable damages caused by floods had to be made good in the Dacca district. The schemes for the opening up of khals in the Backergunge district appear to be particularly useful.

14. *Education.*—The returns of the Education Department show a continued loss of lower primary schools and pupils in all the districts of this division, except Dacca, with the result that the aggregate numbers of schools of all kinds and pupils at the end of the year were 9,248 and 213,096 respectively as against 11,249 and 245,735 at the end of the preceding year. The Circle Inspector writes that the schools which have disappeared from departmental cognizance were for the most part of inferior quality; but it is also said that in Furreedpore the prosecution of some gurus for submitting false returns alarmed others and prevented them from furnishing any returns. The loss of schools, including girls' schools, was proportionately largest in Furreedpore, and it is observed that the Deputy Inspector in that district is charged with want of interest in his work. In Dacca only was there improvement in female educa-

tion in the year, and the good result here is perhaps due to greater efficiency. The number of upper primary schools and secondary schools increased, and the results of the Entrance Examination were remarkably good.

15. *Working of Committees and conduct of zemindars.*—District and Municipal Committees appear on the whole to have worked very well in this division, but the Lieutenant-Governor regrets to hear of irregularity on the attendance of Honorary Magistrates in Dacca. An efficient Bench of Honorary Magistrates reflects credit on the Magistrate of the district, and on Sub-divisional Magistrates, and no effort should be spared to obtain the zealous co-operation of non-official gentlemen in the administration of justice.

16. The Commissioner finishes his report with a long list of generous donations, many of which are intended to commemorate the Jubilee of the Queen-Empress, made by the zemindars of this division, who are not second in public spirit and liberality to the zemindars of any other part of these Provinces.

17. The Commissioner's remarks on the character of his subordinates will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Government of Bengal.

CONFERENCE FOR DISCUSSION OF CERTAIN EDUCATIONAL QUESTIONS.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 13th September 1887.

RESOLUTION.

READ the following papers on the subject of the periodical holding of Educational Conferences:—

Paragraph 20 of Bengal Government letter No. 2186T—G, dated 25th September 1884, addressed to the Government of India.

Paragraph 29 of Government of India Resolution No. 10—309, dated 23rd October 1884.

Paragraphs 39 and 339 of the Report on Public Instruction in Bengal for 1883-84, and paragraphs 6 and 20 of the Government Resolution thereon, dated 23rd February 1885.

Letter from the Secretary to the Calcutta Missionary Conference, dated 15th March 1886.

Letter from the Director of Public Instruction, No. 2851, dated 27th April 1886.

Letter from the Director of Public Instruction, No. 5303, dated 15th August 1886.

Letter to the Director of Public Instruction, No. 575, dated 18th August 1886.

Letter from the Director of Public Instruction, No. 7528, dated 2nd December 1886.

Letter to the Director of Public Instruction, No. 693, dated 21st December 1886.

Letter from the Director of Public Instruction, No. 4005, dated 21st June 1887.

In paragraph 29 of the Home Department Resolution No. 10—309, dated the 23rd October 1884, the Government of India approved the recommendation of the Education Commission that conferences (1) of officers of the Education Department, and (2) of such officers with managers of aided and unaided schools should be held from time to time for the discussion of questions affecting education, the Director of Public Instruction being in each case *ex-officio* President of the Conference. In accordance with this recommendation, a conference of Inspectors of Schools in the Lower Provinces was held in 1884, and interprovincial conferences have been held of Inspectors of European schools in the Bengal Presidency. Two educational conferences have also been held at Calcutta in 1886 and 1887 at which teachers and managers of European schools attended for the purpose of discussing the provisions of the Code for European schools. A more general conference was proposed by the Director of Public Instruction in his report for the year 1883-84 for consideration of the rules for grant-in-aid to colleges and native schools, with special reference to the standards and other requirements of female education. This proposal was approved by the Lieutenant-Governor, but arrangements were postponed during Sir Alfred Croft's absence on furlough. In August of last year it was determined that a conference, which should be as representative as possible, should be held in Calcutta in the cold weather of 1886-87, and a report of the proceedings of this Conference, which was duly held, has been submitted to Government.

2. In the deliberations of the Conference, which met altogether sixteen times, commencing from the 14th February 1887 to 30th April, the ladies and gentlemen below named took part:—

1. The Revd. K. S. Macdonald, M.A.; } Representatives of the Calcutta Missionary
2. Mr. W. C. Madge, } Conference.
3. " Abdur Rahman, Barrister-at-Law, representative of the Muhammadan Literary Society.
4. " Ameer Ali, Barrister-at-Law, representative of the National Muhammadan Association.
5. Baboo Bijoy Kishen Mukherjee, President of the Uttarpara Hiskari Sabha.
6. " Surja Kumar Adhikari, B.A., Principal, Metropolitan Institution.
7. " Umes Chandra Dutt, B.A., Principal, City College.
8. " Krishna Behari Sen, M.A., Principal, Albert College.
9. Dr. Gura Das Banerjee, Member of the Bethune School Committee.
10. Miss A. M. Houtz, Superintendent of the S. P. G. Zenana Mission.
11. " Hook, Superintendent of the American Zenana Mission.
12. Mrs. Clifford, of the Church of England Zenana Mission.
13. " Macdonald, of the Free Church Zenana Mission.
14. " M. Wheeler, Inspector of Schools.
15. Rai Radhika Prasanna Mukherjee, Buzadar, Inspector of Schools, Presidency Circle.

The Director of Public Instruction was *ex-officio* President of the Conference, and the Inspector of Schools, Presidency Circle, acted as Secretary.

The subjects discussed by the Conference were—(1) The grant-in-aid Rules. (2) The course and standards of female education and the means of encouraging and extending it. (3) The revision of the regulations governing the transfer of pupils from one school to another.

3. *The grant-in-aid Rules.*—The principal changes recommended by the Conference refer to rules 6, 11, 14, 15, 16, 19, 20, 21, and to the rules regarding special and building grants. The reasons for the changes and additions made are thus stated in paragraphs 4 and 5 of the Director of Public Instruction's report No. 4005, dated 21st June 1887.

"Rule 6 has been considerably simplified, and brought into harmony with the requirements of classes needing special encouragement, as recommended by the Education Commission. Provision has also been made for a certain proportion of free scholars in aided schools, in accordance with recommendation 5, chapter VII, and recommendation 23, chapter VIII of the report of the Education Commission.

In Rule 9 (i) the distance of four miles has been substituted for six miles in accordance with the unanimous recommendation of the Circle Inspectors. The shorter distance has been for years past practically accepted by the officers dealing with applications for grants-in-aid.

In Rule 11—Municipal contributions are treated as receipts from public sources, in accordance with the views expressed in the report of the Education Commission, chapter XII, paragraph 868, and its appendix, page xxxvi. Similarly, in the report of the Sub-Committee of the Education Commission appointed in 1882 to revise the annual statistical returns of the Education Department, it is explained (paragraph 11) that "schools, whether aided from provincial, from local, or from municipal funds, are classed together as aided schools," in general table III, now in use throughout India. The effect of the proposed change of rule will be to render schools situated within municipal limits more dependent than before on municipal contributions.

Rule 14—Has been altered with a view to encourage independent effort in the direction of higher education. Paragraph 478 of the report of the Education Commission (page 420), pointed out that, although a proportion of 25 per cent. of the total expenditure was sufficient for Calcutta, it was not large enough for the country districts of Bengal, where no aided college had yet been established by private enterprise; and that it was therefore necessary to raise the proportion to 33 per cent. This recommendation has now been adopted.

Rules 15 and 16.—The difference of advancement between district and district, which has all along been recognised for middle schools, is now extended to high schools, in accordance with the recommendations of the Circle Inspectors. In rule 16, the limit as to which the higher rate of aid to middle schools may be given has been raised from Rs. 30 to Rs. 40, as it is now recognised that middle schools maintained at a cost of from Rs. 30 to Rs. 40 a month are just those that need most encouragement.

Rule 20.—The conference raised strong objections to the rule that "a grant should ordinarily be reduced on renewal." It has been reproduced (in new rule 19) in a less stringent form, and in closer accordance with the principles declared in paragraphs 507-509 of chapter VIII of the Education Commission's Report.

Proposed rule 20 merely confirms the existing practice. The object of the stamped agreement is to fix the responsibility of the managers in a formal way.

Rule 21 (1) (b).—Charges for servants and contingencies are omitted, except in the case of girls' schools. Many schools are apt to raise these charges above what is necessary, in order to claim a larger grant. If not recognised in the grant, the expenditure on this account will be kept at the lowest possible point.

Rule 21 (3).—There is greater simplicity in submitting the accounts for the month for which the grant is claimed, and not for the previous month. This change renders it necessary also to substitute the word "due" for "paid" in the form of certificate annexed to the account.

Rule 21 (7a).—It is the duty of the Department not only to see that competent teachers are appointed, but to protect them against the chance of wrongful dismissal.

Rule 21 (10 and 11).—Are introduced as being an improvement on the existing rules.

Rule 21 (15-18).—These are new provisions to meet cases that arise from time to time. The object is to enable the Department to exercise more complete control over the accounts of schools, and to secure the construction of school buildings in accordance with sanitary principles.

Rules 22-28.—Provide for special grants for buildings and furniture, and have been adopted bodily from the corresponding sections in the Code for European schools. In rule 24 the proportion of the maximum Government contribution has been defined in the case of each class of schools.

Rule 30.—This is a new rule, intended for the assistance of schools that desire only a temporary advance from the public funds in lieu of a grant.

5. It only remains for me to add that the forms have been altered to suit the rules, and that in Form A a statement of the proposed fee-rates is in future to be entered."

The amendments in the rules are approved by the Lieutenant-Governor, with the exception of the change recommended

* Existing rule.—A grant should ordinarily be reduced on renewal.

Proposed rule.—A grant may be reduced on renewal if this can be done without loss of efficiency.

in the second sentence of rule 20 (new rule 19). The proposed change in this rule shown in the margin* would abolish an important principle of the grant-in-aid system—the gradual

transfer of Government aid from established to new and struggling institutions. It is only by enforcing this principle that funds can be secured, without imposing additional burdens on the tax-payer, for the development of education in parts of the country still in a backward state among classes who have not as yet taken full advantage of the benefits offered, and in directions which have hitherto been to some extent overlooked. The proviso suggested in the words "if this can be done without loss of efficiency," implies that grants made for a term are to be treated in fact as perpetual, except in the rare case where the withdrawal of the grant would not lead to some diminution in the facilities afforded for instruction. Such a rule would, however, altogether cripple the action of Government in promoting the general cause of education. It implies that Government must for ever renew all grants in full, unless precisely the same efficiency can be obtained with the diminished income as with the greater, and that though there may be no funds available, or though such funds as can be used might produce more good if devoted to some other purpose. The Lieutenant-Governor cannot therefore approve this amendment, but he accepts an amendment of the rule

A grant should ordinarily be renewed on renewal, when this can be done without serious loss of efficiency.

shewn on the margin, which has been proposed by Sir Alfred Croft. The addition of the sentence requiring that notice be given to managers of schools in all cases of reduction of grants is in accordance with the recommendation made by the Education Commission in paragraph 509 of their report, and is accepted.

The Lieutenant-Governor agrees with the Director of Public Instruction in thinking that it will be necessary to revise, in the sense of the grant-in-aid rules now sanctioned, the rules relating to grant-in-aid, in Part VI (Education) of the rules framed under the Local Self-Government Act, for all schools, the grants to which are sanctioned by District Boards. The Director is requested to submit draft revised rules for the approval of Government.

4. *The course and standards of female education, and the means of encouraging and extending it.*—The improved vernacular standards of examination adopted by the Conference for girls' schools and zenanas are approved by the Lieutenant-Governor. In view, however, of the present urgent necessity for keeping down all expenditure which is not absolutely necessary, the proposal to provide an additional Inspectress of Schools, and to create special scholarships for girls, cannot be sanctioned. The proposal that rewards should be given to female teachers on passing by standards IV, VI or VII to the amount of Rs. 10, Rs. 20, and Rs. 30, respectively, will not involve much cost and may be sanctioned.

5. *The revision of the regulations governing the transfer of pupils from one school or college to another ("inter-school rules") with a view to their application to the educational institutions of Calcutta.*—The "inter-school rules" or "transfer rules" for colleges and high schools, as revised at the Conference, are sanctioned provisionally for one year; they will be again subject to revision in the light of experience at the end of that time. The Lieutenant-Governor accepts the Director's recommendation that the revised rules should be at once applied to Calcutta only, and that Circle Inspectors and other local authorities should be consulted as to the expediency of substituting these rules throughout Bengal for those now in force.

6. Sir Stuart Bayley desires that his thanks may be conveyed to the President and to the ladies and gentlemen who took part in the deliberations of the Conference.

ORDERED—That this Resolution and the revised rules and forms approved in paragraphs 3 and 5 above, and also the statement of vernacular standards of examination for girls' schools and zenanas, be published in the *Calcutta Gazette*, and that copies be sent to the leading newspapers. The Bengali Hindi, and Uriya Translators will be requested to translate the revised grant-in-aid rules into Bengali, Hindi, and Uriya, and to publish them in the vernacular *Gazettes*; also to furnish the Director of Public Instruction with as many copies of the translations of the rules as may be required for distribution. The Bengali Translator will also be requested to translate into Bengali the vernacular standards of examination for girls' schools and zenanas, and to publish the same in the *Bengali Gazette*; also to furnish the Director of Public Instruction with as many copies of the vernacular translation of the standards as may be required for distribution.

The Superintendent of Government Printing, Bengal, will be asked to supply the Director of Public Instruction with as many English copies (1) of the revised grant-in-aid rules and forms, (2) of the vernacular standards of examinations for girls' schools and zenanas, and (3) of the transfer rules of high schools and colleges as may be required for distribution.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RULES FOR GRANTS-IN-AID TO COLLEGES AND SCHOOLS IN BENGAL, 1887.

1. A grant from Provincial revenues is assigned by Government annually for the province, to be expended in grants-in-aid to schools not under Government management provided they fulfil the conditions prescribed in the following rules.

2. The grant is distributed by the Director of Public Instruction, on the recommendation of the Circle Inspector, to schools which are certified to be eligible under these rules, reference being had to the requirements of each locality, as compared with others, and to the funds disposable.

3. Any school to which aid is given, together with all its accounts, books, and other records, shall at all times be open to inspection and examination by any officer appointed by the Government for the purpose; and to this end the records and accounts shall be placed in such custody that they shall be always accessible on the visit of any inspecting officer. Such inspection and examination shall have no reference to religious instruction, but only to secular education.

4. Inspecting officers will interfere as little as possible with the local management of schools, but are employed to see that the instruction is efficient, and that the conditions on which the grants were made are fulfilled; and aid will be withdrawn from any school in which such conditions are not fulfilled.

5. Grants are given on the principle of strict religious neutrality, and no preference will be shown to any school on the ground that any particular religious doctrines are taught or not taught therein.

6. Grants-in-aid will be made to such colleges and schools only (with the exception of training schools, girls' schools, night schools for adults, and schools for aborigines and low castes) as require some fee, however small, from all their scholars. Exemption from this rule may be allowed in exceptional cases by the Director of Public Instruction.

7. The promoters or managers of any institution by whom application for a grant is made must appoint a Secretary to conduct their correspondence with the Department, and they must record the names of the managers.

8. The managers are responsible for the due expenditure of the school funds in accordance with the conditions of the grant.

9. In respect of any school for which application is made, full information must be supplied on the following points, and must be thrown into the shape given in form A appended to these rules—

- (a) The pecuniary resources, permanent and temporary, on which the school will depend for support.
- (b) The proposed monthly expenditure in detail.
- (c) The average number of pupils to be instructed.
- (d) The persons who will form the Committee of Management.
- (e) The class of school and course of instruction.
- (f) The number and salaries of the teachers.
- (g) The fees to be charged in each class.
- (h) The amount of aid sought.
- (i) The treasury at which the grant, if sanctioned, is to be payable.
- (j) The existence of other schools of all classes within a distance of four miles.

10. An application for a grant is made either directly to the Circle Inspector, or to the District Deputy Inspector, who forwards it with his remarks to the Inspector. The Inspector, after taking the opinion of the Magistrate upon his proposals, forwards the application to the Director for sanction. If the Magistrate and the Inspector differ, the decision rests with the Director.

11. Grants shall in no case exceed in amount the sums to be expended from private sources, except in special cases, under special orders of Government. Municipal contributions will be reckoned for this purpose as receipts from public sources.

12. Aided places of instruction are divided into the following classes:—

Colleges—In which students who have passed the University Entrance Examination are educated in the University Course or any part of it.

High Schools—In which students are educated up to the standard of the Entrance Examination.

Middle Schools—In which the scholars are educated up to the middle English or middle vernacular scholarship standard.

Primary Schools—In which the scholars are educated up to the upper or lower primary scholarship standard.

Girls' Schools—Including agencies for women instruction.

Training Schools—For the training of masters and mistresses.

Special Schools—For instruction in special subjects.

Grants are also given in certain cases in aid of boarding establishments.

13. Grants are of two kinds—annual grants and special grants.

ANNUAL GRANTS.

14. For colleges the grants shall not exceed one-half of the income guaranteed from private sources, and in Calcutta they shall not exceed one-third of such income.

15. For high schools the grants shall not exceed one-half of the income guaranteed from private sources, except in the districts of—

Beerbhoom,	Chittagong,
Dinagapore,	Tipperah,
Kungpore,	Noakhally,
Bogra,	The Patna Division,
Darjeeling,	„ Bhagulpore „
Julpigorie,	„ Orissa „
Mymensingh,	„ Chota Nagpore „
The island of Dhakin Shohbazpur in	
Backergunge,	

in which the grants may equal two-thirds of the income so guaranteed.

16. For middle schools, in which the expenditure is more than Rs. 40 a month, the grants shall not exceed two-thirds of the income guaranteed from private sources, except in the districts mentioned in the last rule, in which the grants may equal the income so guaranteed.

17. For primary schools, as well as for girls' schools, training schools, and special schools the grant shall not exceed a sum equal to the full amount of the income guaranteed.

18. The amounts above laid down are *maximum* amounts, and it must be understood that the *maximum* grant will not in all cases, and as a matter of course, be sanctioned.

19. Grants will be sanctioned ordinarily for a term of three years; but the Inspector may at any time during its currency recommend the revision of any grant. A grant should ordinarily be reduced on renewal, when this can be done without serious loss of efficiency. In this way money will from time to time be set free, and the Department will be able to aid new schools even though the grant-in-aid allotment remains stationary. Notice of any proposed reduction shall in all cases be given to the managers, who shall be allowed an opportunity of stating any objection that they may have to the reduction.

20. When a grant is sanctioned, the managers shall sign an agreement on stamped paper to the effect that they will conduct the school in accordance with the conditions of the grant.

21. The sanction of a grant is conveyed in the following form* :—

Office Memorandum of the Director of Public Instruction.

(1) A grant of Rs. _____ a month is sanctioned from the _____ 18
for the _____ school at _____ in zillah _____, on the following
conditions :—

(a)—That Rs. _____ a month at least be regularly contributed from private sources.

(b)—That the following scale of expenditure be maintained, subject to any alteration that may be sanctioned by the Inspector.

	Ra. A. P.
Head Master
Second do.
Third do.
Do. do.
Do. do.
Do. do.
Servants } In the case of girls'	
Contingencies } schools only.	

(2) The grant is payable every month.

(3) The monthly bill (in form B annexed) must be sent to the Inspector for counter-signature, and must be accompanied by a certificate (in form C) that all salaries for previous months have been paid in full.

(4) The monthly bill and the certificate must be signed by the Secretary of the school.

(5) The bill is countersigned on the distinct understanding that the salaries and other charges certified by the Secretary to have been paid have actually been paid.

* In the case of colleges the form is modified.

(6) Salaries for service in any month become due on the first day of the following month.

(7) The appointment and dismissal of every teacher shall be notified to the department. No appointment shall be confirmed until it has received the sanction of the department; and the department shall have power to inquire into any case of the dismissal of a teacher.

(8) The grant is liable to be reduced or withdrawn if the payment of any teacher's salary is delayed for more than two months after it has become due.

(9) The grant is liable to be reduced or withdrawn if the school is unfavourably reported on as regards the attendance or proficiency of the scholars.

(10) The grant is liable to be reduced or withdrawn if the managers keep their accounts in a negligent and untrustworthy manner, or if they send up incorrect accounts, or if they fail to transmit punctually the periodical returns required by the department, or if the school-house is unfit for the purposes of the school, or is untidy or dirty, or if the department is otherwise dissatisfied with the management of the school.

(11) The grant is liable to be reduced or withdrawn if the teachers are inefficient, or if they are absent from duty otherwise than in accordance with the rules of the department, or if they keep the school registers in a negligent or untrustworthy manner.

(12) Holidays are not to exceed 60 days in the year, exclusive of Sundays, except under peculiar circumstances and with the sanction of the Inspector.

(13) Every new election to the Committee of Management must be notified to the Inspector under the signatures of the Secretary and of the member or members elected.

(14) Every change of Secretary must be notified to the Inspector under the signatures of the new Secretary and the Members of the Committee of Management.

(15) All receipts from whatever sources or for whatever purposes collected must be entered in the account book of the school, which shall be open to inspection and examination by any officer appointed by Government for that purpose.

(16) No part of the previous balance of a school shall be spent without the sanction of the Inspector, except for payment of the sanctioned establishment, in order to make up any deficit in the private contributions in any particular month.

(17) No new building shall be constructed for the school until the plan and estimates have been approved by the Inspector.

(18) Government may claim a fair share of any balance at the credit of a school at the time of its abolition, as well as of the sale proceeds of any school-house or furniture towards the erection or purchase of which a grant may have been made by Government.

SPECIAL GRANTS.

22. Grants may be given to managers of schools in aid—

(a) Of erecting, enlarging or furnishing school buildings.

(b) Of executing extensive repairs.

(c) In special cases, of paying off debts incurred in erecting or enlarging school buildings.

NOTE.—Expenditure in the purchase of buildings may be treated as expenditure in the erection of buildings.

23. Except in the case provided in the foregoing rule, no grant shall be made in consideration of former expenditure on school buildings.

24. In general, the proportion of the Government contribution made under rule 22 shall not exceed the proportion laid down in rules 14 to 17 for schools of the same classes.

25. Before a building grant is sanctioned, the site, plans, estimates, specifications, title and trust deed must be approved by the Director of Public Instruction. If the school receives no monthly grant, the managers must also satisfy the department that it is likely to be maintained in efficiency, and that it will be open to inspection.

26. The trust deed must declare the building to be granted in trust for school purposes only. It must also provide for the legal ownership of the premises, for the proper maintenance of the building, and for the inspection and management of the school.

NOTE.—This rule does not preclude the managers from using the building for other purposes when not required for the purposes of the school.

27. No grant is finally sanctioned until a certificate is received from the managers, setting forth that the funds in their hands will, when added to the grant, be sufficient to meet all claims and to close the account.

28. Advances may be made from time to time out of the sanctioned grant on receipt of a report from the Public Works Department that the work is proceeding satisfactorily.

29. The grant is not paid in full until—

(1). A report is received from the Public Works Department or other sufficient authority that the building is satisfactorily completed.

(2). The trust deed is duly registered, and a copy lodged with the Department.

30. Loans may also be made to managers of schools for the erection of school buildings. The amount of such loan shall generally be limited to the amount of any grant claimable under rule 24. The building shall be mortgaged to the Government as a guarantee for the repayment of the loan, and a term shall be fixed within which the loan is to be repaid. Interest at a rate not exceeding 4 per cent. may, if necessary, be charged.

FORM A—(continued.)

PRESENT STATE OF THE SCHOOL.

To be filled up if the School has been in existence for six months and upwards.

Classes.	Average number of pupils during the last six months.	Fees charged to each class.	Average charges incurred monthly for the last six months.	Average receipts monthly for the last six months.	Remarks.

Vernacular Standards of Examination for Girls' Schools and Zemindars.

Note (1).—The text-books named in the table are recommended for the present. It will, however, be open to the managers of schools to substitute for those mentioned any other books of the same value, character, and standard of difficulty.
 Note (2).—In standards IV, VI, and VII, the departmental examinations for scholarships will be held in the text-books named.

	LOWER PRIMARY STANDARDS.					UPPER PRIMARY STANDARDS.		MINOR STANDARDS.
	Standard I. A.	Standard I. B.	Standard II.	Standard III.	Standard IV.	Standard V.	Standard VI.	Standard VII.
ling	To recognize and name the letters of the alphabet, vowels and consonants.	To have a correct knowledge of the sound and formation of the different vowel signs, from Part I, Barnaparichay.	To read with intelligence from any primer; to spell without mistake up to a word in Part II, Barnaparichay.	Competent knowledge of spelling in Part II, Barnaparichay; intelligent reading of Shikshopan, Part III, reciting ten lines of poetry from Padypath I.	Book-keeping with explanation; Padypath I, committed to memory, with explanation.	Questions out of the first half of Bastubhikhar; reading and explanation from Charupath II, and Padypath II; committing to memory of Padypath II.	Questions from Bastubhikhar; reading and explanation from Akhyam Manjar II; Kabitak-graha I, committed to memory, with explanation and paraphrasing.	Shastabharat, Padypath III, Prabandha Karam by Rajani Kanta Gupta.
ing	To write the letters legibly.	Writing easy words from dictation.	Dictation from the primer used in the class.	Dictation from the reading book.	Dictation from Bodhoday, each passage slowly read out twice. Reading from manuscript.	Dictation from Charupath II, each passage read in simple Bengali the purport of lessons; reading from manuscript.	Short essays on subjects treated in the text-books of the class.	Short essays on familiar subjects.
radio	To count up to 50, and be able to state of what two digits each number is composed. Easy mental arithmetic.	Writing down numbers of two digits; addition of numbers not exceeding two digits.	Numeration and addition of numbers up to four digits.	Numeration in five figures; addition; subtraction; tables up to 3x10.	Numeration in six figures; simple addition, subtraction, multiplication and division; tables up to 10x10; country tables to gundakhi.	The four simple and two compound rules; tables up to 12x12; easy mental reductions; mensuration.	Four simple and compound rules; bearing weights and measures, mantan, sotkash, highakali, kashakali, masbharat.	Add to Standard VI, simple proportions and simple fractions.
uar	Classification of letters, vowels, and consonants.	Easy sandhi of vowels from the reader.	Sandhi of vowels and consonants; easy samas.	Sandhi, kashak, striva, samas.	Questions arising out of the text-books.
raphy	Definitions, illustrated by the map, general knowledge of India.	Definitions, general knowledge of Asia, knowledge of the districts of Bengal.	Knowledge of map of the world, and of India in detail.	Add to Standard VI, general knowledge of the four quarters.
ry	History of Bengal for beginners, by Raj Krishna Mukerjee.	History of India by Ram gati Khyaratana.
stis	Gardhashya Swasthya-lidhi, by Chandranath Bose.	Gardhashya Path, by Chandranath Bose.	Gardhashya Path	The Way to Health.
work	Running and felling; or, Arithmetic to Standard V.	Marking, stitches all crossed, the same way and making a kashak, or, Arithmetic to Standard VI.	Cutting out a doorte, sewing on buttons and strings, and making button-holes; or, Arithmetic to Standard VII.	Gathering and sewing on a head, darning, and herring-boning; or, Prati Britanta.	Cutting out and making a pashak; and fancy-work; or, Padasha Bidya.
and subject.	Step by Step	Royal Reader IV; letter writing, parsing.
ish	Royal Reader I; dictation; nouns and verbs.	Royal Reader II; dictation, parts of speech.	Royal Reader III; letter writing, easy parsing.	Royal Reader IV; letter writing, parsing.

TRANSFER RULES—COLLEGES.

I.—A student applying for admission to a college affiliated to the University in Arts, or Law, shall be required to produce a certificate from the Principal of the college in which he was last reading. But if he applies, at the beginning of a session, for admission to the first year or to the third year class, the certificate of having passed the last Entrance or First Arts Examination respectively shall be accepted in lieu of such certificate. A student who has failed at the First Arts or the B. A. examination may be admitted in the following session to the second or fourth year class of the college, on production of the Registrar's receipt.

II.—The certificate shall run as follows:—

_____ is permitted to remove his name from the college register. He has been a student in the _____ class from _____ to _____ 18 ; during that period the roll of the class was called _____ times, and _____ was present on _____ of these occasions. His character and conduct have been _____ College fee paid for _____

III.—The certificate is to be given without any avoidable delay. The only grounds on which it can be refused are (1) gross misconduct, (2) failure to pay the sums due to the college, including college fees and fines and transfer fee (if any). If a certificate is refused, the cause of refusal shall be notified in writing to the applicant.

IV.—Fees are annual charges, though for the convenience of students they are levied monthly. They are therefore payable for the vacation months equally with others. If a student applies for transfer in or after the month of January, he shall be liable to pay fees in that college up to the close of the session. The transfer fee shall in no case exceed the ordinary admission fee.

V.—All questions arising between one Principal and another respecting the enforcement of these rules shall be referred as soon as possible to the Director of Public Instruction.

VI.—If a student be found producing a false certificate, or making a false statement as to his attendance at any college, he shall be liable to expulsion, and shall be reported to the Director of Public Instruction.

VII.—Wilful transgression of any of the foregoing rules will render a college liable to forfeit the right of sending up candidates for Government scholarships, and to be reported to the University.

TRANSFER RULES—HIGH SCHOOLS.

I.—A boy, before he is admitted to a high school, shall be required to state in what school he has last been reading, and to produce a certificate from the head-master of that school. He should also be required to bring with him a letter of application from his parent or guardian. If he has failed at the previous Entrance examination, and applies for admission at the commencement of the following session, the Registrar's receipt shall be accepted in lieu of a certificate.

II.—The certificate shall run as follows:—

"Certified that—was in the—class of the—school, and leaves with a—character. All sums due by him to this school have been paid. He has (or has not) passed the annual examination for promotion to the—class."

III.—The certificate is to be given without any avoidable delay. The only grounds on which it can be refused are (1) gross misconduct, (2) failure to pay the sums due to the school, including schooling fees and fines and transfer fee (if any). If a certificate is refused, the cause of refusal shall be notified in writing to the applicant.

IV.—Fees are payable for the vacation months equally with others. If a boy applies for transfer in or after the month of February, he shall be liable to pay fees in that school up to the close of the session. No transfer fee shall be charged to any pupil leaving a school at the close of a session, nor shall it in any case exceed the ordinary admission fee.

V.—A boy coming for admission shall not be placed in a class higher than that in which he was in the school he has left, or if he has passed the annual examination for promotion in that school, in the next higher class. This rule shall apply to admissions to the first and second classes only. Thus, a boy failing at the annual examination of the third class of one school cannot be admitted to the second class of another.

VI.—The fact of a boy appearing for admission without having undergone the annual examination of his old school must be regarded, unless the reverse is certified to by his former head-master, as sufficient evidence of his not having been fit for promotion; he should therefore be admitted into the class in which he was reading in the other school.

VII.—After admission under the foregoing rules, no boy shall be promoted to a higher class before the next annual examination of the school.

VIII.—All questions arising between one head-master and another respecting the enforcement of these rules shall be referred as soon as possible to the Inspector of Schools (or in Calcutta, to the Director of Public Instruction).

IX.—If a boy be found producing a false certificate, or making a false statement as to his attendance at any school, he shall be liable to expulsion, and shall be reported to the Department.

X.—Wilful transgression of any of the foregoing rules will render a school liable to forfeit the right of sending up candidates for junior scholarships, and to be reported to the University.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 10th September 1887.

No.	District and date of return.	Rainfall at Sadler station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
<i>Western Districts.</i>			
SUNDERBAND DIVISION.	1 Bardwan, Sept. 10, '87	8.18	Weather—very hot and sultry. Paddy suffering much from want of rain all over Cutwa and Culna: prospects fair elsewhere, but rain nevertheless wanted. Prices for the most part stationary, but rising in Cutwa. Cholera in the Sadler; fever also prevalent. Rain now falling.
	Culna " "	0.79	
	Cutwa " "	0.61	
	Ransegunge " "	2.67	Weather—very hot. Rain much wanted in all parts of the district. <i>Amra</i> rice in some places already damaged, and so will the <i>amra</i> crop on high lands also be if it do not rain soon. <i>Kolas</i> paddy flowering and <i>chali</i> is being reaped. <i>Birhalai</i> doing well. Sugarcane is being irrigated. Prices continue stationary. Public health good.
	2 Bankura " 10, '87	0.61	
	Bishenpur " "	1.08	Weather—sultry. Rainfall very beneficial to young <i>amra</i> rice; but more urgently needed. Sugarcane flourishing. Public health not satisfactory: a good deal of fever and some cholera abroad. Cattle-pox also rife.
	3 Barabhoon " 10, '87	2.79	
	Rampur Haut " "	3.09	Weather—muggy. State and prospects of crops good. More rain wanted.
	4 Midnapore " 10, '87	0.88	
	5 Hooghly " 10, " "	Nil	Weather—hot and sultry, but to-day (10th) cool and damp. <i>Amra</i> paddy being reaped. Timely rain now falling will, if general, improve the prospects of winter rice which the dry weather has affected. A little fever and cholera reported.
	Barampur " "	0.43	
PASCHIM DIVISION.	Jehanabad " "	1.75	Weather—a sultry week terminating with clouds and rain. Reaping of <i>amra</i> and jute in progress. Prospect of sugarcane promising. Paddy on low lands good. More rain wanted for crops on high lands. Fever to some extent in south of the district.
	Hawrah " "	1.00	
	Oolooberiah " "	2.52	<i>Central Districts.</i>
	6 24-Pergha, Sept. 10, '87	1.30	
	7 Naddea " 10, " "	0.28	Weather—unsettled; cloudy and very hot with occasional showers. Rain has been deficient this week and is badly wanted in Barabhoon, Dum-Dum and parts of Bishnihat and Sadler. Prospects of jute, <i>amra</i> and sugarcane favourable. Public health fairly good for the time of year.
	Kushtha " "	2.06	
	Muharpur " "	1.45	Weather—very sultry and oppressive. <i>Amra</i> nearly harvested; outturn fair. <i>Amra</i> in some parts could not be transplanted for want of rain. Fever prevalent. Rivers rising steadily.
	Choudanga " "	1.43	
	Ranaghat " "	Nil	Weather—seasonable. <i>Amra</i> paddy harvested. Transplantation of <i>amra</i> nearly completed. Rain of the week has done good. Public health generally good.
	8 Khosla " 10, '87	3.60	
RAJSHAHY DIVISION.	9 Jessore " 10, " "	1.12	Weather—very hot; scanty rain. Harvesting of <i>amra</i> paddy continues. Prospects good. Rain wanted for <i>amra</i> paddy on high land.
	Jhondah " "	0.63	
	Magurah " "	0.34	Weather—very hot; rain at intervals. Harvesting of <i>khadoi</i> paddy almost over. Prospects of <i>amra</i> still good, except in Kandi, where it is suffering from want of rain. Sowing of <i>sil</i> has commenced. Sugarcane and jute progressing. Public health good.
	Narail " "	0.25	
	Bangong " "	0.45	Weather—heavy rain in the beginning of the week; clear and very hot in the latter part. Transplantation of <i>amra</i> nearly finished. Harvesting of <i>khadoi</i> and jute continues. Rice 23 <i>seers</i> per <i>rupee</i> .
	10 Moorshedabad " 10, '87	2.73	
	Lalbagh " "	4.50	Weather—extremely hot. Cutting of <i>amra</i> paddy continues. Prospects of crops generally good. Fever rather prevalent.
	Kandi " "	1.15	
	Jangipur " "	6.73	Heavy rain very favourable to the <i>amra</i> crop. Tobacco is being sown. Public health fair for the time of year.
	11 Dinajpur " 10, '87	5.75	
DACKA DIVISION.	Thakurgaon " "	8.15	Weather—very hot. State and prospects of crops satisfactory. Public health fair.
	12 Rajshahy " 10, '87	4.51	
	Nattora " "	8.20	Weather—hot. Rivers rising. General health and prospects of crops good.
	Rowcong " "	0.98	
	13 Rangpur " 10, " "	5.85	Weather—sultry. State and prospects of crops good.
	Kurigram " "	9.13	
	Nilphamari " "	9.07	Weather—early in the week rainy; latterly hot and sultry. Reaping of <i>khadoi</i> and jute going on; outturn below the average. Sugarcane doing well. Transplantation of <i>amra</i> rice nearly completed everywhere. High floods in the east of the district. Public health good. Cattle-disease prevalent in places.
	14 Bogra " 10, '87	0.50

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, DURING THE MONTH OF AUGUST 1887.**

THE normal meteorological conditions in Bengal during August resemble those of July to a very great extent, and the month is therefore nearly as important as July from a meteorological point of view. The south-west monsoon winds continue to blow over the province with almost undiminished force during the greater part of August, though towards the end of the month, or commencement of September, wind velocities begin to fall off. The normal rainfall in August is distinctly, though slightly, smaller than in July, and this would tend to show that the monsoon current even in August commences to weaken. The greater part of the rainfall in Bengal in August is undoubtedly brought up by the Bay of Bengal current, but a considerable part of the rainfall at the western stations of the province is also due to the Bombay branch of the current, which, interacting in these districts with the Bengal branch, causes ascensional air motion, and consequently increased precipitation of rain. The Bay of Bengal branch alone gives the heaviest rainfall to the southern, eastern, and northern districts, but the interaction just mentioned increases the rainfall in the western districts, and thus supplements the action of the Bengal current, and tends to produce greater uniformity of rainfall over the whole province.

The actual amount of rainfall in August will no doubt depend mainly on the strength and volume of the Bay of Bengal monsoon current, the heaviest rainfalls usually occurring in the eastern and northern districts, and the amount slowly diminishing towards the western districts; but the actual distribution will be affected by the causes which have been discussed in the previous monthly summaries. One of the causes which will produce marked variations from the normal distribution of rainfall will be the formation and passage of areas of barometric depression or small cyclonic storms, which bring large amounts of rain to the districts through which they pass. The formation of such storms is a prominent characteristic of many rainy seasons, though they are to a certain extent absent in others: and as the line of country through which they pass varies very considerably, they are prominent causes in modifying the distribution of rain in particular years. A second cause which modifies the normal distribution of the rainfall is the varying strengths of the two currents, and the amount and position of their interaction, and it will be seen that, if from any cause a larger amount of interaction than usual takes place over the western districts of the province, the rainfall will be increased by a corresponding amount.

The normal distribution of rainfall during the month is comparatively simple. The two localities in which rainfall is heaviest, and where the amount exceeds 20 inches, include, first, the Chittagong, Noakholly, and Backergunge districts; and second, the Julpigoree, Cooch Behar, and Darjeeling districts. The area which receives a rainfall of between 20 and 15 inches starts from Sagar Island and runs nearly parallel to the sea coast, then turns to the north, runs parallel to the Tipperah and Sylhet hills, and through the centre of the Rungpore district to Khasnongee in the Purneah district. The greater part of Chutia Nagpur, and of South-West, Central, East and North Bengal receives a rainfall of from 12 to 15 inches, while the greater part of Behar receives only from 10 to 12 inches. The central districts of Behar receive the smallest amounts of rain, the average being generally rather less than 10 inches.

Meteorology of the month.—During the last week of July a small cyclonic storm which had formed at the head of the Bay had advanced inland through South-West Bengal and had filled up and disappeared near Suttia on the 28th of July. In the rear of the storm a very strong current set in from the Bay of Bengal, and at the commencement of August conditions were decidedly favourable for general rainfall in Bengal. The strength of the monsoon current blowing over Bengal at the commencement of August may be shown by the fact that from the 1st to the 2nd the average wind velocity at Sagar Island was no less than 30 miles an hour. This velocity, however, was exceptionally high, and it speedily became smaller; but for the first ten or twelve days of the month a fairly strong monsoon current continued to blow over the province, and the only feature of change or of interest was the alternate increase and falling off in the strength of the two branches of the monsoon current—for some days the current from the Bay of Bengal holding entire possession of the province, when it would be then partially driven back by the westerly current from the Arabian sea, only to be again re-established a few days subsequently. About the 12th of August, however, it became evident that both branches of the monsoon current were becoming decidedly weaker as rain-bearing currents, and on this day the area of rainfall rapidly contracted, and the greater part of the province received little or no rain. A partial break in the rains then set in, which lasted only three or four days in some districts, and about a week in others, and during this period a feeble cyclonic storm was formed in the north of the Bay, which only crossed the west coast to the south of Gopalpur on the 19th. This storm naturally formed a prominent feature in the meteorology of this part of the month, and during its formation and advance towards the west coast the monsoon winds were mainly deflected towards it, and rain to a great extent ceased in Bengal, and it was only after the feeble storm had advanced inland that it again became possible for the

monsoon winds to blow over Bengal. Rains therefore became pretty general in Orissa, South-West Bengal, and East Bengal on the 19th and 20th, but the general rainfall only reached North Bengal and the greater part of Behar and Chutia Nagpur on the 21st and 22nd. The monsoon current blowing over Bengal was, however, not very strong, and as usual the two branches of the current alternately strengthened and weakened, giving rise to a certain amount of interaction between them for some days, till on the 26th a distinct cyclonic circulation of winds set up over South-East Bengal, and this was accompanied by the formation of an exceedingly feeble area of low pressure. On the 27th the very feeble depression had moved in a westerly direction and was in South-West Bengal, and was moving into Chutia Nagpur; it was still accompanied by a feeble circulation of winds and by rather heavy rain, and amounts exceeding two inches were received at a considerable number of stations in South Bengal and in Chutia Nagpur, while rather heavy rain also set in over the northern districts on the same day. On the 28th the depression had disappeared in a westerly direction, and a moderate south-easterly and southerly outcurrent from the Bay of Bengal set in over the whole province, but the rainfall was confined to a few light showers up till the 30th, when, though the general conditions had scarcely altered, heavy and rather general rain commenced in the northern districts of the province, and on this day Protabgunge, in the North Bhagulpur district, received 7·85 inches, and Buxi 4·21 inches, and over the southern districts moderate showers were rather numerous. This heavy rain in the north of Bengal on the 30th set up a slight cyclonic circulation of winds, which was distinctly noticeable on the 31st, and pressure also became slightly low over the central and northern parts of the province, and with these favourable conditions for rainfall, particularly heavy rain was received over a considerable part of North Bengal. On this day Julpigoree reported the excessive fall of 11·47 inches, Mickligunge one of 7·75 inches, Fallacotta 7·51 inches, Protabgunge 5·11 inches and Kaliagunge 4 inches; while moderately heavy showers became pretty numerous over the whole province. At the close of the month therefore conditions were again rather favourable for rainfall over the whole of Bengal.

Barometric depressions of the month.—It will be seen from the foregoing summary that only one barometric depression of any importance was formed, while the second, which lasted only on the 26th and 27th, was exceedingly feeble. The second was formed in South-East Bengal, and moved in a westerly direction through South-West Bengal and Chutia Nagpur, and it had practically disappeared from the province on the 28th. The first was decidedly more important, as it produced a distinct break in the rains in Bengal. Its history may be briefly described as follows:—

Barometric depression of the 14th to the 20th of August.—On the 13th the conditions over Bengal and the sea area to the south of it were those of an ordinary very light monsoon, except that pressure was decidedly low along the coast of Madras from Gopalpore to Masulipatam. Winds also were rather more strongly easterly along the west coast than is usual. Conditions remained almost unchanged for the following two days at the stations in the northern half of the Bay and in Bengal, but the strength of the monsoon blowing in the south of the Bay began to increase very considerably. On the 16th winds became north-easterly at many stations in Bengal, and also along the Orissa coast and at Akyab, while to the south winds were westerly. It was therefore clearly evident on this day that a distinct depression had formed in the centre of the Bay. On the 17th the centre of the feeble storm was off the South Orissa coast, but it had not strengthened to any material extent, though there was a distinct cyclonic circulation of winds accompanying it. On the 18th it had approached rather nearer the land, but it still remained a feeble storm, and on the morning of the 19th it was crossing the South Orissa coast a little to the south of Gopalpore, and the centre of the storm on this day was a little distance inland. The storm afterwards drifted into the Central Provinces, where, after a day or two, it filled up. It was a remarkably persistent storm, though the barometric depression at its centre was feeble, and though the winds in connection with it were comparatively light; but at sea it gave rise to somewhat squally weather and rough sea.

Strength of the monsoon current during August.—The only actual measure of the strength of the monsoon current is obtained by recording the wind velocity. This record is manifestly important though imperfect, for it only deals with one of two important factors, for the monsoon current may not only vary in velocity, but also in depth or volume, and probably of the two, the latter will be the more important factor in influencing the rainfall. The estimation of the second of these factors is impossible, and thus the actual strength of the monsoon current blowing sea only be judged by the measurement of the wind velocity. At the end of August the strength of the monsoon undoubtedly begins to diminish, but, on the other hand, if the wind velocities measured during August are equal to or above the normal, there is a reasonable probability that the strength of the monsoon (i.e., both velocity and depth) is fully equal to the normal, and that the monsoon will continue to blow, and to give rain for the normal period. In the following table the actual and normal wind velocities are given at the typical coast stations at the head of the Bay, and also at five or six of the most important inland stations of the province. The average of the whole of the eleven stations shows that the actual daily wind velocity has been 129 miles against the normal 126 miles. Out of the eleven stations, however, seven show a velocity distinctly smaller than usual while at Saurgar Island and Hazeribagh velocities have been much above the normal. If these two stations are left out of the calculation (as

there is evidently something abnormal in them), both in the determination of the mean for the month and the normal, the mean velocity for August has only been 98 miles against the normal 103 miles. These facts would distinctly point to the probability that the monsoon current blowing in August was decidedly weaker than usual, and this is borne out by the diminished rainfall. Another fact which has been noticeable throughout the month is the strong westerly element which has frequently been present in the wind directions. This being the case and the monsoon being weaker than usual, there is perhaps a possibility that the present monsoon, as derived from the Bay of Bengal, will close rather earlier than usual.

Average daily wind velocity in miles for August.

Pressure.—The variations of pressure have as a rule not been very large during the month. At the commencement of August pressure was in excess of the normal by amounts varying from about 0.03" to 0.05". The largest excess pressures at this time were recorded in Orissa and South-West Bengal, and the smallest in Assam. For the second week in the month the excess pressure rather increased to about 0.06", but the seat of maximum excess was transferred to the northern parts of the province and to Sibsaugur, while at the extreme western stations the excess was decidedly smaller. For the third week the pressures were largely influenced by the existence of the depression in the Bay, and thus while in Orissa pressure was nearly normal, at Purneah an excess pressure of 0.114" was registered, and at Dacca one of 0.072". In Assam also the mean pressure was above the normal by 0.043". Conditions as to pressure then became far more nearly normal, and for the greater part of the remainder of the month pressure was generally slightly below the normal. For the whole province, taking into consideration only those stations at which observations have been recorded for some years, and which therefore yield reliable averages, it may be said that the mean pressure for the month has been above the normal by 0.035 inch. This excess pressure has been smallest in the southern and south-western districts, and largest in the northern districts, and particularly along the foot of the hills, where at Purneah it equals 0.062 inch and at Durbhunga 0.053 inch. In Assam pressure has also been pretty uniformly in excess, the mean pressure showing 0.028 inch in excess of the normal.

Temperature.—As is usual during the monsoon period, the variations of temperature have generally been small and of little importance, though during the break in the rains in the middle of the month temperature rose rather considerably. In the first week the mean temperature of Bengal was 0.7° in defect of the normal, while in Assam the defect was 0.8°. In the second week temperature was again below the normal, the defect averaging about 1.4° to 1.5° both in Bengal and Assam. In the third week temperature had become in excess generally by about 1°, and the excess continued, though in smaller amounts, up till the close of the month. For the whole month the average temperature in Bengal has been very slightly in defect of the normal, the defect equalling about a tenth of a degree. In Assam the mean defect has been rather larger, and it averages 0.8°.

Rainfall.—The comparison of the actual rainfall of the various great divisions of the province during August with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight columns giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the actual rainfall for the first eight months of the year expressed as a percentage of the

rainfall for the period. The figure 100 in this table will therefore represent a normal fall; a number larger than 100 an excess fall, and so on :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months expressed as a percentage of the normal fall for the period.
Orissa	119	Nil.	137	89	102	86	81	83	91
South-West Bengal	302	2	112	85	139	86	105	70	82
East Bengal	412	14	206	84	71	70	84	71	89
North Bengal	399	3	274	114	146	139	83	97	118
North Behar	381	Nil.	127	149	177	135	86	111	107
South Behar	431	Nil.	207	189	233	70	81	83	107
Chutia Nagpur	500	Nil.	10	111	331	73	81	99	100

That is to say, in August North Behar has received a rainfall decidedly in excess of the normal, Chutia Nagpur and North Bengal have received falls nearly equal to the normal, South Behar and Orissa falls in decided defect, and South-West Bengal and East Bengal falls rather largely in defect of the normal.

In actual amounts North Bengal has received the largest average fall, equalling 13·74 inches, and North Behar the next largest amount, 12·79 inches; East Bengal and Chutia Nagpur have received average falls between 11 and 12 inches, and Orissa, South Behar, and South-West Bengal amounts between nine and ten inches. These figures, however, represent only the average falls over the seven large divisions into which the province is divided for meteorological purposes, and the actual falls at different stations have varied much more largely than this. Thus the fall has varied between about fifty and five inches at various stations, for while Buxa in the Darjeeling Hills district has received 50·72 inches, Gyabanda in the Rungpur district has received 4·85 inches, Sherepore in the Bogra district 3·95 inches, Kishnaghar 4·6 inches, Magoora 4·79 inches, Maldah 4·76 inches, and Dhurmasalla in the Cuttack district 4·81 inches. These stations indeed appear to have been centres of particularly scanty rainfall throughout the month. These figures will indicate that the distribution of the rainfall during August has been very irregular, decidedly more irregular than is the case in most years. The Bombay branch of the monsoon, as has been previously indicated, has been decidedly strong, and the Bay of Bengal branch has therefore had a more easterly set, or has been deflected towards the east more than usual. At the same time the amount of interaction between the two branches has been more marked than usual over the western parts of the province. In the actual distribution of the rainfall in this month there appear to be no less than three areas of large precipitation; the first along the line of the hills to the north of the province, where falls of 30 inches and upwards are frequent; the second in South-East Bengal, where the falls rise to about 20 to 25 inches; and the third in the west of the province, where the falls are from 15 to 18 inches, and from these three centres rainfall diminishes in quantity towards the centre of the province.

Compared with the normal fall for the month, it is seen that there are two large and one small tract of excess rainfall, but that the whole of the remainder of the province, constituting probably about three-quarters of the whole, has been in very decided defect. The one large area of excess precipitation comprises the whole of Chutia Nagpur except the Hazaribagh district, the western stations in Orissa, Ranigunge, and the whole of the Bankoura district. The second large area runs along the line of the hills to the north of North Bengal and North Behar, and includes the greater part of Behar to the north of the Ganges, but does not include Champaran, and also includes the Dinagpur and Rungpur districts; but, on the other hand, parts of the Rungpur and Darjeeling districts are in defect. The third area of excess precipitation comprises a small part of the Moorshedabad and Sonthal Pergunnahs districts. The excess falls generally vary up to about three inches, but in some cases they exceed five inches. The whole of the remainder of the province is in defect, a large part being in defect by amounts larger than three and in some cases five inches. The following are the principal areas of defect:—the greater part of the Patna district and part of the Gya district, and the following districts:—the South Bhagulpore, Maldah, Pubna, Bogra, Mymensingh, Dacca, part of Comilla, Furreedpur, Backergunge, Jessore, Khoolna, part of Nuddea, Burdwan, Birbhoom, Hooghly, Howrah, part of Midnapore, Pooree and Cuttack. In the Furreedpore, Dacca, Bogra, Pubna, and Maldah districts the average falls scarcely equal half the normal amount.

The following table gives full data for the comparison of the actual and the normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third column in a slightly different form. It states as a percentage

how much the district rainfall of the month varied, in excess or defect from the normal rainfall, and is hence the difference between the numbers in the third column and 100 :—

Percentage Table for August 1887.

Division.	District.	Normal district rainfall, August 1887.	Actual district rainfall, August 1887.	Percentage of actual to normal rainfall.	Percentage, excess (+) defect (—)
Orissa	Pooree ...	11·32	8·63	76	— 24

METEOROLOGICAL OFFICE, BENGAL ;

ALEXANDER LEDLER,

The 13th September 1887.

Offg. Meteorological Reporter to the Govt. of Bengal.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
9TH OF SEPTEMBER 1887.**

At the close of the previous week conditions were fairly normal for the season, and on the 2nd instant, in particular, rainfall had been general over the whole province, and at many of the northern and eastern stations the falls had been heavy. Up till the 2nd the province had been almost entirely influenced by the monsoon current blowing from the Bay of Bengal, but on this day a westerly element appeared in the wind directions, showing that the Bombay branch of the current was again commencing to make itself felt. On the 3rd conditions had not altered to any material extent; decidedly strong monsoon winds were blowing over the whole Bay, and rainfall continued fairly general over the province. At the northern stations winds, however, were a little irregular, and on the 4th a distinct circulation of winds had set up over part of Behar and North Bengal, the centre of which appeared to be near Maldah. Conditions therefore became favourable for very heavy rain in the north of the province, and the following represent some of the heaviest falls recorded on this date:—Matuari in the Purneah district 16·20 inches, Pallacotta (Julpigoree district) 15·09 inches, Mickligunge (Cooch Behar district) 12·50 inches, Julpigoree 11·98 inches, Debigunge 10·6 inches, Alipore Duar 9·06 inches, Buxa 9·82 inches and Matabhanga 8·78 inches. Over the remainder of the province also rainfall was fairly general, but only moderate in amount. On the 5th the feeble wind circulation had been transferred to South Behar, and pressure commenced to rise very rapidly, the rise exceeding a tenth of an inch at many of the stations in North Bengal and Behar; moderate to heavy rain continued to fall on this day, particularly in the north of the province, but it was clear that the area of rainfall was decreasing. On the 6th a rapid and almost complete change took place in the meteorological conditions. The minimum pressure recorded in the Bay retreated southwards to Coconada; pressure again rose rapidly in Bengal, the rise in some instances exceeding a tenth of an inch. Winds became light and variable, and at neighbouring stations were frequently of opposite directions in the interior of the province, and instead of the very strong monsoon current which had previously been blowing at the head of the Bay, a light and rather irregular current was reported, though at the same time an extremely strong monsoon current was blowing in the south of the Bay. Rainfall also to a great extent ceased in Bengal, though in Behar some heavy falls were reported. On the 7th these conditions developed further, winds became northerly at the greater number of stations in the province, pressure remained very high in Bengal and an almost complete break in the rains was established. Conditions over the centre and south of the Bay were probably decidedly disturbed at this time, and wind directions all round the Bay showed distinct indraught towards the sea area, while in the south of the Bay at Galle a particularly strong monsoon current was blowing. These conditions continued unaltered until the 9th, when an extremely rapid fall of pressure set in over the northern half of the Bay, the pressure giving way most rapidly at the eastern stations, and on this day conditions were decidedly favourable to the production of a barometric depression in the eastern part of the Bay. The depression afterwards developed on the 10th, but its history belongs to the meteorology of the following week. The break in the rains in Bengal also continued up till the close of the week, and thus from the 6th to the 9th the falls reported have been light and very local.

Pressure.—The most noticeable feature in the pressure of the week was the extremely rapid rise which took place on the 5th and 6th, the rise in certain districts almost equalling a fifth of an inch. The mean pressure has therefore been very considerably in excess of the normal, and the excess at some stations, such as Purneah and Darbhanga, almost equals a tenth of an inch. The mean excess is less than this, and does not generally exceed 0·06". The excess is smallest in South-East Bengal, in the neighbourhood of which pressure was comparatively low at the end of the week, and at Chittagong it has only equalled 0·024".

Temperature.—Was about normal, or rather above it, during the earlier part of the week, when rainfall was fairly abundant, but directly the break in the rains commenced, temperature commenced to rise with great rapidity, and at the close of the week it was largely in excess of the normal. For the whole week the mean temperature has been considerably in excess of the normal in all districts except Behar and Assam. In East Bengal the average excess has been 2·3°, in South-West Bengal 2·0°, in Orissa 1·5°, and in Chutia Nagpur 1·2°. In North Bengal the excess has been much smaller and only equals 0·2°. In Assam, on the other hand, temperature has been in defect by 0·3°, and in South Behar by 0·7°, while in North Behar the defect has been the considerable amount of 2·5°. For the whole of Bengal the mean temperature for the week has been in excess by 0·6°.

Rainfall.—Has been largely in excess of the normal in North Bengal, moderately above it in North Behar, and slightly above it in South Behar. It has been largely in defect in Chutia Nagpur and South-West Bengal, very largely in defect in East Bengal, while in Orissa the fall has been only about a fifth of the normal. The actual average fall in North Bengal has been the large amount of 6·44 inches, in North Behar it has averaged 3·11 inches, and in South Behar 2·48 inches. The falls in other districts have been very much smaller and in South-West and East Bengal and in Chutia Nagpur the falls have been from one to about one-and-a-half inches, while in Orissa the fall has only averaged 0·65

inch. Compared with the normal fall, and expressed as a percentage of that amount, the average falls in each of the seven meteorological districts for the week have been— in Orissa 23 per cent., in South West Bengal 42 per cent., in East Bengal 31 per cent., in North Bengal 173 per cent., in North Behar 122 per cent., in South Behar 102 per cent., and in Chutia Nagpur 58 per cent. Taking each of these districts as having an equal value in the calculation, the rainfall of the whole province has equalled 73 per cent. of the normal.

The heaviest falls have been mainly determined towards the following districts— Julpigoree, Rungpore and Maldah, and also towards Darjeeling, Sarun and Bogra; while on the other hand the following districts have been very largely in defect :—all the districts in Orissa, the Midnapore, 24-Pergunnahs, Howrah, Hooghly, Burdwan, Bankoora, Nuddea, Jessore and Khoolna districts, in South-West Bengal, all the districts in East Bengal, the Pubna district in North Bengal, and the Chyebassa district in Chutia Nagpur.

In Assam, during the week, particularly heavy rainfall has been reported at Dhubri, which has received 9.34 inches; moderate rain at Silchar, which reports 2.69 inches; and light rain at Sibsagar, which has received only 1.02 inches.

The following table gives the summary of the temperature and rainfall data of each of the eight meteorological divisions of the province for the week ending Friday, the 9th of September 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of August.		Since 1st of May 1887.

 The maximum temperature ... 93.0

The mean relative humidity ... 87
 Inch.

The total fall of rain from 4th to 10th September 1887 ... 1.36

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;

The 12th September 1887.

A. PROLER,

for Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

For the week ending 27th August 1887, the returns from the principal Municipalities in Bengal disclosed the following results :—

1. That the ratios per *mile* of population of births stood at 19 as opposed to very nearly the same proportion, viz. 18·9, during the preceding week ending 20th August, and of deaths at 28·4 against 29·1.

2. That the following Municipalities registered the highest proportions of births and deaths :—

<i>Births.</i>			<i>Deaths.</i>		
		Ratio per mile.			Ratio per mile.
Monghyr	...	40·7	Arrah	...	72·9
Bhagulpore	...	34·1	Monghyr	...	48·8
Serampore	...	33·3	Gya	...	48·6
Durbhanga	...	32·3	Beaulah	...	44·0
Beaulah	...	31·5	Bhagulpore	...	39·8
			Serampore	...	39·3
			Durjiling	...	39·0
			Chupra	...	37·1
			Burdwan	...	35·1
			Suburbs of Calcutta	...	30·4

3. That the only noticeable point in connection with the incidence of the specific death-causes in comparison with the outcome of the preceding week, is a sensible abatement in the mortality from fever ; *vide* subjoined table :—

					Ratio per mile during the weeks ending—	
					27th August 1887.	20th August 1887.
Cholera	4·9	5·5
Small-pox	1	2
Fever	10·4	11·8
Bowel-complaints	4·3	3·6
Injury	2	5
Other causes	8·2	7·6

4. That while no Municipality suffered much from small-pox or presented a large number of casualties from violence, the following returned conspicuously high death-rates from the rest of the diseases specified in the above table :—

<i>Cholera.</i>		<i>Fever.</i>		<i>Bowel-Complaints.</i>		<i>Other Causes.</i>	
	Ratio per mile.		Ratio per mile.		Ratio per mile.		Ratio per mile.
Arrah	... 49	Beaulah	... 31·1	Bhagulpore	... 11·8	Gya	... 17·8
Chupra	... 23·5	Putna	... 30·8	Puri	... 10·5	Monghyr	... 14·5
Monghyr	... 13·6					Serampore	... 13·7
Burdwan	... 6·1					Bhagulpore	... 13·6
Gya	... 4·8					Puri	... 10·5
Bhagulpore	... 4·5					Suburbs of Calcutta	... 10·1
Suburbs of Calcutta	... 3·7						
Putna	... 2·3						

5. That the mortality in relation to *Sex*, *Class* and *Age*, stood as follows :—

<i>According to Sex.</i>		<i>According to Class.</i>		<i>According to Age.</i>	
	Ratio per mile.		Ratio per mile.		Ratio per mile.
Males	27·8	Christians	26·1	Under 1 year	240·9

General remarks on the fluctuation of principal staples carried over the East Indian Railway during the month ended 30th July 1887.

INCREASES.

Coal and coke.—There was an increase in both the upwards and downwards despatches; the upwards increase was due to demands by Foreign Railways, and that in the down traffic is attributable principally to the facilities afforded by the opening of the Jubilee Bridge.

Cotton.—The increase in this staple was due to the shipment demands having improved after the dullness which prevailed in June 1887.

Jute.—This increase is entirely new traffic brought to the mills in the neighbourhood of Howrah over the Jubilee bridge.

Rice (shelled and unshelled).—The reasons for the increase in this commodity being as before, good crops near stations on Loop line and high prices ruling up-country.

Other grains.—This increase was chiefly in the despatches from stations in the Allahabad district to Dinapore, Bharatpur, Agra and Lucknow.

Oil.—The increase is entirely made up of despatches in kerosine oil from Howrah.

Railway Material, Foreign.—This was principally in despatches from Bombay *via* Jabalpur to Manikpur for the Indian Midland Railway, and from Howrah to Benares for the Oudh and Rohilkhand Railway.

Skins.—Due to despatches from up-country stations to Madras.

Sugar, refined and unrefined.—Increases are shown at some of the sugar-despatching stations in the Dinapore district for despatches to up-country stations where the market is favourable.

Government stores.—The increase was principally in the despatches of Government Ordnance stores to Military stations.

DECREASES.

Termeric.—This falling off can only be ascribed to large stocks up-country and to supplies now going from Bettis *via* the Bengal and North-Western Railway, and from Malwa to the North-West.

Grain and Pulses.—This is in continuation of the small despatches reported during the last few months, and was principally in long lead traffic from Delhi, *via* Delhi and Cawnpore.

Grain.—The falling off was almost entirely at Howrah and followed the decrease in the export traffic in wheat and seeds.

Wheat.—Due to sudden fall in the home markets and to sellers holding out for better rates.

Iron.—This decrease was principally in the despatches from Howrah owing to there being no buyers and the market dull.

Salt.—This decrease was chiefly in the despatches *via* Agra due to diversion of the traffic by the Bombay, Baroda and Central India Railway to Cawnpore.

Seeds.—This decrease is attributable to the home markets being dull.

Tobacco.—This decrease as in the previous month is due principally to poor crops.

ALLEN MEARS, Dy. Traffic Manager.

TRAFFIC MANAGER'S OFFICE, CALCUTTA, the 6th September 1887.

Weekly Return of Traffic Receipts on Indian Railways.

EAST INDIAN RAILWAY.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 4446A.

GENERAL.—*The 14th September 1887.*—Baboo Bhubotosh Banerjee, Deputy Magistrate and Deputy Collector, Purneah, is appointed to perform the functions of a Collector under section 4 of Act VII (B.C.) of 1880 in that district.

Mr. H. Luson, Officiating Joint-Magistrate and Deputy Collector, Mozafferpore, is appointed to perform the functions of a Collector under section 4 of Act VII (B.C.) of 1880 in that district.

Baboo Burhundeo Narsin, Deputy Magistrate and Deputy Collector, Durbhunga, is appointed to perform the functions of a Collector under section 4 of Act VII (B.C.) of 1880 in that district.

The 15th September 1887.—Mr. J. R. Hand, Deputy Magistrate and Deputy Collector, Shahabad, is allowed leave for one month, under section 72, chapter V of the Civil Leave Code, with effect from the 3rd proximo, or such subsequent date as he may avail himself of it.

The 16th September 1887.—Mr. E. G. Colvin, Assistant Magistrate and Collector, is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the Sudder station of the Darjeeling district, with effect from the 16th instant, in addition to his own duties as Private Secretary to the Lieutenant-Governor of Bengal.

The services of Mr. H. A. D. Phillips, Under-Secretary to the Government of Bengal, are placed temporarily at the disposal of the Government of India in the Legislative Department.

The 19th September 1887.—Mr. H. W. C. Carnduff, Officiating Joint-Magistrate and Deputy Collector, is appointed to act as Under-Secretary to the Government of Bengal, during the absence, on deputation, of Mr. H. A. D. Phillips, or until further orders.

In supersession of the orders of the 7th May last, Mouvie Syed Wajid Hossain, Special Butwara Deputy Collector, Patna, is allowed extraordinary leave, without allowances, for three months, under section 134 of the Civil Leave Code, with effect from the 13th May 1887.

In modification of the order of the 29th April last, Baboo Koylas Chunder Chatterjee, Sub-Deputy Collector, Monghyr, is posted to the district of Darjeeling.

Baboo Nirod Nath Banerjee, Temporary Sub-Deputy Collector, Manbhoon, is allowed leave for one month, under section 128-1, chapter X of the Civil Leave Code, with effect from the date on which he availed himself of it.

Mr. E. G. Glazier, Magistrate and Collector, Mymensingh, is appointed to act as Magistrate and Collector of Pubna, during the absence, on leave, of Mr. C. H. Vowell, or until further orders.

Mr. R. C. Dutt, Officiating Magistrate and Collector, Pubna, is appointed to act, until further orders, as Magistrate and Collector of Mymensingh.

Baboo Shama Churn Dass, Deputy Magistrate and Deputy Collector, Jamalpore, Mymensingh, is transferred to Chittagong, and is posted to the Sudder station of that district.

Mr. C. B. Marriott, Assistant Magistrate and Collector, is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the Sudder station of the Patna district, on being relieved of his present appointment as Officiating Magistrate and Collector of that district.

The services of Baboo Bemola Churn Bhattacharjee, Deputy Magistrate and Deputy Collector, Patna, are placed at the disposal of the Board of Revenue for employment in connection with the Excise administration.

Baboo Prokash Chunder Roy, Officiating Deputy Magistrate and Deputy Collector, Champaran, is transferred to the Sudder station of the district of Patna.

POLICE.—*The 16th September 1887.*—Mr. J. Patch, District Superintendent of Police, Cuttack, is appointed to have temporary charge of the Gurjhat Mehala Police in addition to his own duties, during the absence, on deputation, of Mr. G. A. Patton, or until further orders.

EDUCATION.—*The 17th September 1887.*—Baboo Chaturbuj Patnaik, Uriya Translator to Government, is allowed leave for one month, under section 72 of the Civil Leave Code, in extension of the leave granted to him under the order of the 12th July last.

OPIMUM.—*The 19th September 1887.*—Mr. A. R. Bean, Assistant Sub-Deputy Opium Agent, Behar Agency, is allowed leave for three months, under section 72 of the Civil Leave Code, with effect from the 15th instant.

The 20th September 1887.—Mr. J. R. Mawson, Assistant Sub-Deputy Opium Agent, Benares Agency, is allowed leave for one month and 28 days, under section 72 of the Civil Leave Code, in extension of the leave granted to him under the order of the 25th June last.

The following are republished from the *Assam Gazette* :—

No. 296.—*The 8th September 1887.*—The undermentioned officer has been granted by Her Majesty's Secretary of State for India permission to return to duty, as advised in list dated the 5th August 1887 :—

Permitted to return.

Name.	Service.	Appointment.	Date on which permitted to return.
J. C. Arbuthnot ...	Covenanted ...	Assistant Commissioner, Assam...	To return to India.

No. 299.—*The 9th September 1887.*—Mr. G. Gordon, Assistant Commissioner, third grade, is appointed to officiate in the first grade, with effect from the 31st August 1887, to fill an existing vacancy.

No. 94.—*The 5th September 1887.*—Leave of absence for seven days, under section 134, chapter X of the Civil Leave Code, has been granted to Baboo Rabi Chandra Ganguli, First Munsif of Habiganj, in the district of Sylhet, in extension of the leave granted to him in notification No. 64, dated the 29th June 1887.

No. 97.—*The 8th September 1887.*—The Chief Commissioner is pleased to appoint Baboo Ashutosh Sircar, M.A., B.L., to act as a Munsif in the district of Sylhet, and to be ordinarily stationed at Karimganj, in the place of Maulvi Mohabut Ali, who has obtained leave of absence.

No. 98.—Baboo Ashutosh Banerji, B.L., Officiating Second Munsif of Maulvi Bazar, in the district of Sylhet, is appointed a Munsif in the same district, to be ordinarily stationed at Maulvi Bazar, *substantive pro tempore*.

No. 99.—Under the provisions of section 25 of Act XII of 1887 (the Civil Courts Act), the Chief Commissioner is pleased to invest Baboo Purna Chandra Dey, Second Munsif of Habiganj, in the district of Sylhet, with the powers of a Judge of a Court of Small Causes for the trial of suits cognizable by such a court up to the value of Rs. 50 within the local limits of the Habiganj Munsifi.

No. 100.—The services of Baboo Rabi Chandra Gangooly, First Munsif of Habiganj, and Baboo Kali Nath Dhur, Second Munsif of Maulvi Bazar, in the district of Sylhet, are placed at the disposal of the Government of Bengal.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 16th September 1887.—In modification of the order dated the 9th August last, published in the *Calcutta Gazette* of the 10th idem, it is hereby notified for general information that the next Half-yearly Departmental Examination of Assistants and Deputy Magistrates in the Regulation and Non-Regulation Districts, and of officers in the Police, Jails, Medical, Forest, and Opium Departments, will be held on Monday, the 14th November 1887, and following days.

J. WARE EDGAR,

Fabre-Tonnerre, District Superintendent of Police, Sonthal Pergunnahs, having passed an examination in the Rajmehal Paharia language in accordance with the rules laid down in Appendix V to the Departmental Examination Rules of the 21st March 1883, is authorized to draw the prescribed reward of Rs. 1,000 (one thousand).

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

FOREST DEPARTMENT—BENGAL.

NOTIFICATION.

The 16th September 1887.—With reference to Rule 20, section 79 of the Civil Leave Code, and in continuation of the notification, dated 3rd June 1887, published in the *Calcutta Gazette* of the 8th idem, Part I, page 498, it is notified that Mr. E. G. Chester, Deputy Conservator of Forests, Darjeeling and Working Plans Divisions, is allowed furlough for 15 months, under section 50, chapter V of the Civil Leave Code.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 16th September 1887.—Mr. W. M. Green, Deputy Conservator of Forests, on return from the three months' privilege leave granted to him in the notification dated 22nd June 1887, is posted to the charge of the Julpigoree Forest Division and of the Buxa sub-division of that division.

Mr. E. E. Wylly, Sub-Assistant Conservator of Forests, on being relieved by Mr. Green, will assume charge of the Julpigoree sub-division of the Julpigoree Forest Division from Baboo Hem Chunder Sircar, Forest Ranger.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 16th September 1887.—In modification of so much of the notification of 21st June 1887 as relates to the posting of Mr. F. B. Manson, Deputy Conservator of Forests, to the Darjeeling Forest Division, Mr. Manson is hereby posted to the charge of the Darjeeling Forest Division and of the Darjeeling sub-division of that division, with effect from the date on which he relieves Mr. E. G. Chester, Deputy Conservator of Forests.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 20th September 1887.—In exercise of the powers conferred on him by section 3 of Act V (B.C.) of 1881, the Lieutenant-Governor is pleased to appoint the Revd. G. W. Manson, Senior Chaplain of the Church of Scotland, to be a Member of the Burial Board for the Town and Suburbs of Calcutta, in place of the Revd. G. G. Gillan.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

NOTIFICATION.

The 16th September 1887.—The following telegram, regarding the continuance of quarantine at Cairo on arrivals from Bombay, received from the Government of Bombay, dated the 13th instant, is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

Telegram, dated the 15th September 1887.

From—Bombay,

To—Calcutta,

From—General Secretary,

To—Bengal, Marine.

FOLLOWING from Political Resident, Aden, dated 11th September 1887 :—Following received from Agent and Consul-General, Cairo : Our delegate, Sanitary Board, cannot recommend that quarantine be removed on arrivals from Bombay not earlier than before meeting in October—ends.

NOTIFICATION.

The 17th September 1887.—It is hereby notified that the Lieutenant-Governor is pleased, under section 10, Act IV (B.C.) of 1887, to appoint Baboo Nityananda Roy to be Vice-Chairman of the Commissioners of the Port of Chittagong.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 20th September 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 54).

RED SEA—EAST SHORE.

Temporary buoys North of Jebel Zukur.

Information has been received from the Hydrographer that, as it is the intention of the Admiralty that a further examination of the area lying some 20 miles North of Jebel Zukur—in which locality the steam-ships *Avocat* and *Teddington* have recently reported dangers—shall be made during the months of October and November 1887 :—

Notice is hereby given that whilst this examination is in progress, certain buoys and floating beacons will be moored in the area abovementioned.

Mariners are requested not to disturb any of these temporary surveying marks, and are warned to steer clear of them ; for which purpose it will be necessary to keep to the westward of the line joining Centre Peak Island and Abu Ail.

By direction of the Government of Bengal,

ARTHUR W. STIRRE, Captain, R.M.,
Port Officer of Calcutta.

Port Office, Calcutta, the 15th September 1887.

[Third Publication.]

NOTIFICATION.

The 6th September 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 53).

BAY OF BENGAL.
INDIA—EAST COAST.
COAST OF ORISSA.
DHAMRA RIVER.
SOUTH CHANNEL BUOY.

The following information has been received from the Port Officer of Chandbally :—

The G. buoy in the South Channel, entrance to the Brahmini or Dhamra river, being damaged by the cyclone of May 1887, has been changed, and a fairway buoy, painted black and white, with spire and basket, substituted.

The best track over the outer bar at present is to keep the G. buoy nearly on with this fairway buoy, or a little open to the northward of it.

By direction of the Government of Bengal,

ARTHUR W. STIRRE, Captain, R.M.,
Port Officer of Calcutta.

Port Office, Calcutta, the 5th September 1887.

JUDICIAL DEPARTMENT.

No. 4447A.

The 6th September 1887.—Baboo Rabi Chunder Gangooly, Munsif, is appointed to be a Munsif in the district of Mymensingh, to be ordinarily stationed at Attia.

SENATE HOUSE,
The 15th September 1887.

P. K. RAY,
Registrar.

CALCUTTA UNIVERSITY.

NOTICE.

The Senate will proceed in the month of March, 1888, to the election of a Tagore Professor of Law for the term of one year to commence on the 1st of September, 1888.

The salary of the Professorship is Rs10,000 per annum, and the Professor will be expected to deliver a course of not less than twelve lectures upon one of the following subjects:—

- (1) The Law relating to Damages.
- (2) The Law relating to Riparian Rights, including the Law of Alluvion and Diluvion, and the Law of property in navigable and non-navigable rivers.
- (3) The Mahomedan Law relating to Marriage, Dower, Divorce, Legitimacy and Guardianship of Minors according to the Sunnis.
- (4) The Mahomedan Law relating to Marriage, Dower, Divorce, Legitimacy and Guardianship of Minors according to the Shiaks.
- (5) The Law of Endowments, both Hindu and Mahomedan.

Candidates for the Professorship are requested to forward their applications to the Registrar on or before the 1st of January, 1888, and at the same time to state on which of the above-mentioned five subjects they are prepared to lecture.

P. K. RAY,
Registrar.

SENATE HOUSE,
The 14th September, 1887.

C. H. TAWNEY, *Offg. Director of Public Instruction.*

DARJILING, 14th September 1887.

NOTIFICATION.

In accordance with the Government of Bengal Notification of the 23rd July 1887 notice is hereby given, to those whom it may concern, that the next half-yearly examination of Compounders will be held at 11 A.M. on Wednesday, the 12th October 1887, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce one of the following certificates:—

(a) From the Superintendent of a Vernacular Medical School that he has attended regularly for one year the compounder class of the school.

(b) From the legally-qualified medical manager of a chemist's and druggist's establishment recognised by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment.

(c) From a Civil Surgeon that he has assisted in the dispensing of drugs at the Sudder dispensary of a civil station for a period of five years.

3. Applicants must register their names and submit their certificates, together with a fee of Rs. 3, at least one week before the 12th October 1887, at the office of the undersigned.

Note.—The students belonging to the compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

N. B.—The attention of candidates is drawn to Rule 5, section (b) of the Government notification of the 23rd July 1887, from which they will observe that the chemists' and druggists' establishments from the legally-qualified medical managers of which they obtain their certificates will have to be recognised by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

S. C. MACKENZIE, M.D.,

Superintendent, Campbell Medical School.

CAMPBELL MEDICAL SCHOOL, CALCUTTA, the 17th August 1887.

Junior Scholarships for 1888.

It is hereby notified that in accordance with the Government Resolution, dated the 18th January 1887, published in the *Calcutta Gazette* of the 19th idem, seven junior scholarships of the second grade and 13 of the third grade have been allotted to the Presidency Division, to be awarded at the Entrance Examination to be held in April 1888.

2. The second grade scholarships will be awarded to those candidates who take the highest places in the divisional list, irrespective of districts.

3. The third grade scholarships will be distributed among the different districts of the Presidency Division as follows:—

24. Pergunnahs	4
Nuddea	3
Jessore	2
Khulna	2
Moorshedabad	2
Total						13

A. N. BHATTACHARJEE,

Personal Assistant, for Commissioner.

NOTIFICATION OF THE BOARD OF REVENUE.

No. 1121B.

Notice is hereby given that the Tenth Sale of Opium, the provision of 1885-86, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Thursday, the 6th October 1887, at 11 A.M., and will comprise 4,750 chests, viz.:—

Opium manufactured at the Patna Factory	2,375
Ditto at the Ghazepore Factory	2,375
Total				4,750

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 29th November 1886, and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 11th and 21st October 1887, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 p.m. of Tuesday, the 11th October 1887, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 p.m. of Friday, the 21st October 1887.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazepore Factories will be brought to sale in the present year about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

DATE.	Manufactured at the Patna Factory, about chests.	Manufactured at the Ghazepore Factory, about chests.	Total about chests.
On or about Wednesday, 2nd November 1887 ...	2,375	2,375	4,750
On or about Thursday, 1st December " ...	2,375	2,375	4,750
Total ...	4,750	4,750	9,500

By order of the Board of Revenue, L. P.,

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L.P., CALCUTTA, the 30th August 1887.

NOTIFICATION.

It is hereby notified for general information that, under section 16 of the Bengal Municipal Act III (B.C.) of 1884, an election of Municipal Commissioners will be held in the Tangail Municipality, in the district of Mymensingh, on the 1st day of November 1887.

W. R. LARMINE, *Commissioner.*

DACCA COMM'R.'s OFFICE, the 10th September 1887.

NOTIFICATION.

It is hereby notified for general information that an election will be held, under section 27, Act III (B.C.) of 1884, on the 27th October 1887, in Ward No. II of the Sasseram Municipality, in the district of Shahabad, to fill up the vacancies caused in that Ward by the deaths of Shah Qeyanuddin Ahmed and Moulvi Nazir Ali Khan.

JOHN BOXWELL, *Offg. Commr., Patna Division*

SUPPLEMENT TO The Calcutta Gazette.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE BHAGULPORE DIVISION FOR THE YEAR 1886-87.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 15th September 1887.

RESOLUTION.

READ—

The Annual General Report of the Bhagulpore Division for the year 1886-87.

This report is submitted by Mr. N. S. Alexander, who was in charge of the division throughout the year under review.

2. *Annual Tours.*—The Commissioner spent 114 days on tour, during which time he was especially occupied with Sonthal Pergunnahs' affairs. All the District and Sub-divisional Officers were in camp for the prescribed number of days, and in Bhagulpore the Joint-Magistrate also spent 43 days in the interior.

3. *Weather, Crops, and Public Health.*—The rainfall during the year was abnormally heavy in all parts of the Bhagulpore Division, and was on the whole well distributed, as is shown by the generally abundant harvests. In Maldah, the Sonthal Pergunnahs, Monghyr and Purneah, the crops, especially rice, were good, and in Bhagulpore, where the *bhadoi* suffered from flooding, the general results were not much below the average. The year was on the whole a particularly healthy one, and a decrease in mortality is shown by the returns of every district. With the exception of Purneah, where cholera made its appearance at the close

of the rains and continued up to the colder months, the whole division appears to have enjoyed comparative immunity from epidemics of any kind. The local officers are to be congratulated on the result of their efforts to extend vaccination in Monghyr and Purneah, but the excellent results there obtained are unfortunately counterbalanced by a falling off in the number of vaccinations, which is not satisfactorily explained in the other districts of the Division.

4. *Material Condition of the People.*—The mass of the population is agricultural, and their material condition necessarily varies with good and bad seasons. The abundant harvests of the year have restored to the cultivators a measure of prosperity which they had lost in recent unfavourable seasons. Only in the case of the Paharias in the Sonthal Pergunnahs is no improvement reported by the District Officer, and the Lieutenant-Governor would desire to have a special report on the condition of these aborigines, and on any measures which may appear to the local officers to be possible for the amelioration of their present wretched condition. As was to be expected under the circumstances of the year, the price of food fell throughout the division: the fall was particularly marked in the Bhagulpore district, at the sudder station of which rice was cheaper than it had been during the last 10 years. A corresponding tendency to rise in the rate of wages is noticed in Bhagulpore and Maldah, while the returns of registered emigration show a decrease. The remarks made by the Deputy Commissioner of the Sonthal Pergunnahs with regard to abuses in the system of free emigration to the tea districts have been read by the Lieutenant-Governor with attention, but it is observed that no mention is made of specific instances of fraud or kidnapping, or of any other criminal offence. It is important that it should be borne in mind that a policy of non-interference with free emigration to the labour districts has been definitely accepted by Government on the ground that greater evils would be caused by interference with a view to stop possible abuses than are involved in the relatively small number of instances in which abuses occur.

5. *Manufactures and Mines.*—Indigo is manufactured in all the districts of the division, but chiefly in Bhagulpore and Monghyr; this industry is reviving both in Purneah and Maldah. The season was on the whole favourable to this crop, but prices were low. Opium is grown in Monghyr alone, and the area under cultivation expanded slightly, but the outturn, owing to unseasonable rains, compares unfavourably with that of 1885-86. The manufacture of silk fabrics is a declining industry in Bhagulpore and Maldah, but the price of cocoons rose in both districts on account of larger demands for export. The manufacture of *bidri* work in Purneah is reported to be dying out, and the iron industry of South Bhagulpore does not flourish, but the manufacture of muzzle-loading guns in Monghyr has increased. Experiments made in slate quarrying and enamelling have not proved very successful, and exorbitant terms demanded by the zemindars, both in this district and in Bhagulpore, have stood in the way of mining enterprises.

6. *Trade and Commerce.*—The trade of the division was generally brisk during the year on account of the favourable harvests, and the increased export of food-grains, especially of wheat, is noticeable. The import of piece-goods appears to have improved in Monghyr and Maldah, but the Commissioner makes no comment on the report received last year from the Sonthal Pergunnahs to the effect that the bad quality of European piece-goods has made them unpopular and checked their importation, although the advisability of making enquiry was suggested in the Government Resolution. The timber trade with Nepal suffered from an overstocked market, but the demand for Nepal jute was maintained. The subject of registration of trade with Nepal in Purneah, to which attention is drawn in paragraph 68 of the Commissioner's report, will be separately considered. Under the head of development of trade routes, the opening of a station on the Tirhoot State Railway in the north-west corner of the Bhagulpore district, the opening of the Purneah branch of the Assam-Bihar State Railway, and the increased traffic of steamers on the Ganges must be noticed.

7. *Public Feeling and Administrative arrangements.*—The account of the general demonstrations of loyalty called forth by the Queen-Empress's Jubilee is in accord with those contained in the reports of other Commissioners. On

other topics public feeling did not display itself. The introduction of the income tax did not affect the mass of the people, and the Tenancy Act is hardly mentioned by the Commissioner in his report. From the tabular statement given by the Commissioner, showing the employment of Muhammadans in Government service in this division, it appears that 1 in 6 of the gazetted officers is a Muhammadan, and that in superior and inferior service the respective proportions are 1 in 5 and 1 in 3. The Commissioner expresses a decided opinion that in making appointments the best man available, irrespective of creed, is selected, and that the orders of Government are duly observed in filling up vacant appointments.

8. *Police and Crime.*—The results for the year under the head of Police and Crime were not altogether satisfactory. There was a decrease in the number of offences against property, probably connected with the agricultural prosperity of the year, but on the whole both cognizable and non-cognizable crime slightly increased. The percentage of convictions in sessions trials fell as low as 43·9, and there was no improvement in the results of prosecutions for false complaints. The police force of the division appears to be below the average in efficiency. In the rural police improvement is reported.

9. *Civil Justice.*—In civil suits there was an increase under the head of suits for money or moveables, a small decrease in the number of title suits, and a rather large decrease in rent suits. The increase under the first head is attributed to good seasons following bad ones; while the decrease of rent suits is said to be due to the general uncertainty felt regarding the effects of the provisions of the Tenancy Act. In Monghyr, however, the number of applications for deposit of rent was much higher than before. The Collector of Maldah quotes the opinion of the Munsif to the effect that the introduction of the new law has led to the speedier disposal of suits for arrears of rent, enhancement, and the surrender of holdings, and that the enhancement sections have benefited landlords.

The question of the advisability of permanently establishing a Subordinate Judge's court at Monghyr is under the consideration of the Lieutenant-Governor, and the opinion of the High Court thereon has been invited. The question of establishing a Munsif's court at Soopool will be considered in the Judicial Department.

10. *Land Revenue.*—The current demand of land revenue increased from Rs. 33,62,145 to Rs. 33,67,500, and the current collections exceeded those of the preceding year by Rs. 30,557, the percentage of current collections to current demand rising from 96·8 to 97·5. There was an improvement likewise in arrear collections. The registration of estates and the writing up of registers under Act VII (B.C.) of 1876 have been nearly completed in all the districts of the division.

11. *Excise, Stamps and Income Tax.*—The excise revenue rose from Rs. 10,26,244 to Rs. 11,11,357 during the year under report, the increase being shown under all heads—country spirits, tari, ganja, and opium—and being due apparently to the more prosperous circumstances of the people. The gross realizations from stamps also advanced from Rs. 9,74,919 to Rs. 10,50,574, the largest increase, particularly noticeable in Monghyr, being under the head of judicial or court-fee stamps. The total amount realized from the income tax, exclusive of fines and penalties, and the proceeds of the tax on Government salaries and pensions, was Rs. 2,15,098 as against Rs. 1,47,904 collected in the preceding year under the license tax.

12. *Communications.*—The Kosi extension of the Tirhoot State Railway and the opening of the Purneah section of the Assam-Bihar State Railway have been noticed above. A considerable number of useful original works were undertaken by the Road Cess Committees during the year, but the state of existing roads in Monghyr, Bhagalpore and Maldah is unsatisfactory. It would appear that the attention of the new District Committees should be directed rather to up-keep of existing roads than to undertaking new works at the expense of the maintenance of present lines of communication.

13. *Education.*—The percentage of success at the different examinations compares favourably with that reported in the preceding year, but otherwise the educational results of the year 1886-87 are discouraging. There has been a total decrease of 362 schools and of 5,889 pupils, secondary education

showing a loss of one school and a gain of 381 pupils, and primary education a decline of 655 schools and 7,617 pupils; the balance is accounted for by inclusion in the returns of the department of a larger number of indigenous schools. The decrease is due, as in other divisions, to the exclusion of small and inefficient schools from the returns, but the falling off in female education in all districts, except Maldah, which appears to be the result of the exclusion of small schools, is to be regretted. Gratifying progress is being made by Muhammadans, who, although they form only 19·6 per cent. of the whole population of the division, contribute 22·9 per cent. of the total school population. In the Damin-i-Koh the number of Santhali pathshalas aided by Government has increased from 99 to 110.

14. *Committees and Local Bodies and Conduct of Zemindars.*—The meetings of Road Cess Committees during the year were not well attended, except in Purneah, and the Lieutenant-Governor has perused with regret the unfavourable remarks contained in the report on the working of Municipal Committees in respect especially of sanitary arrangements. The responsibility devolving on District Officers for the success of such Committees must not be forgotten, and Sir Steuart Bayley relies upon their energy and tact to assist the first developments of Local Self-Government.

The conduct of zemindars in this division is reported to have been generally satisfactory. The most serious difficulties between landlords and tenants exist apparently in North Bhagulpore, where the remedy of a survey and record of rights is to be applied in the two zemindaris of Srinagar and Banaili.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

WOOL TRADE OF BENGAL.

The following is published for general information.

P. NOLAN,

Secretary to the Govt. of Bengal.

No. 2737—497 Agri., dated Calcutta, the 5th September 1887.

From—H. W. C. CAMBER, Esq., Offg. Under-Secy. to the Govt. of Bengal,

To—The Director of the Agricultural Department, Bengal.

I AM directed to acknowledge receipt of your letter No. 1194 Agri., dated the 4th August 1887, forwarding copy of an interesting Note on wool prepared by you at the instance of the Government of India, Revenue and Agricultural Department, and to say that Sir Stuart Bayley would be prepared to give his support to a scheme for improving the breed of sheep in Behar, if submitted with your approval.

Note on Wool in Bengal.

THE Government of India having asked me, by demi-official communication, for some information regarding the trade in wool in Bengal, and the possibility of improving the supply or quality of that article, I have made some enquiry on the subject. The information which I have been able to obtain is meagre and vague in its character. Further enquiries will continue to be made, but, pending results of such enquiry, I now give the small amount of information on the subject which I have been able to gather.

First, as regards the supply of wool from Thibet and the Northern Frontier, the following remarks occur in the report of the External Trade of Bengal with Nepaul, Sikkim, and Bhutan, published by the Government of Bengal, 1885:—

"The quantity of wool available for export from Thibet is believed to be enormous. Between Kamba and Shigatse, within a march and a half of the Sikkim frontier at the head of the Lachen, sheep are killed, not for the sake of their hides or fleece, which are practically valueless for want of a market, but in order that their carcases may be dried into jerked meat and sold for 8 annas each. At Kamba itself carpets and rugs are manufactured of the finest quality, and of patterns evincing excellent taste and skill; but there is no outlet for these fabrics. Further north on the Great Chang Thang (or northern plateau), which begins just beyond the Saupo, within five marches of the Kongra Lama, are prodigious flocks and herds which roam at will over the endless expanse. In noticing the improvements in the supplies of wool imported into Bengal from Thibet during 1883-84, it was remarked in the report for that year—'it is believed that this trade has dwindled during the current year (1884-85), partly owing to the difficulties placed in the way by Thibetan officials,' the statistics recorded show that the belief was well founded, for the quantity imported during 1884-85 was only one tenth that imported during 1883-84, viz. 91 maunds against 911 maunds. With the exception of 19 maunds registered at Rungeet in 1883-84, and 5 maunds in 1882-83, the entire supply during the three years was brought through Pheydong. The value of manufactured woollen goods (chiefly blankets) during 1884-85 was Rs. 4,415 in excess of the figures of 1883-84, but Rs. 564 below those of 1882-83. By far the largest supplies are brought via Pheydong."

The following statement shows the quantity of wool imported into British territory from Sikkim and Thibet during the past five years:—

					Ma.
1882-83	104
1883-84	911
1884-85	91
1885-86	2,555
1886-87	1,933

The falling off in imports of wool in 1884-85, as compared with the two previous years, has been attributed to the difficulties placed in the way of this trade by Thibetan officials; but though this may be one of the true causes of the decline in question, it is to be noted that the trade appears to have been at all times insignificant and irregular. At the same time that there was a decline in the imports of wool, it is to be observed that there was a very large increase in the imports of other articles—for example, musk and yak tails.

	1883-84.	1884-85.
	Rs.	Rs.
Musk	2,583	84,100
Yak tails	8,924	56,784

margin, largely increased in 1884-85.

2. Without, however, questioning the existence or the pernicious effects of restrictions placed by the Thibetan officials on the frontier trade—matters on which I have no knowledge and no special sources of information—I may say that, having made some enquiry on the subject at Darjeeling, I have not seen or heard anything which would lead me to doubt that a considerable trade in Thibetan wool can be developed even under existing conditions, by

which, however, may be accounted for by the greater facility with which these less bulky articles may be smuggled. The imports of these latter commodities had, as will appear from the figures quoted in the

simply creating a steady demand and securing a steady sale for the article in Darjeeling. It will be seen from a letter from Mr. Spencer Robinson, which is annexed, that a merchant trading with Thibet has recently offered to deliver to that gentleman in Darjeeling ten thousand maunds of wool, provided he guaranteed the purchase of it at Rs. 16 per maund. The Thibetans, he adds, will not place any obstacles in the way of allowing the wool to come through. If the wool, as stated, can be delivered at Darjeeling at Rs. 16 a maund, or, say, three to three and a half pence per pound, and the wool is worth in England 6½ to 7 pence per pound, as it is believed to be, there would appear to be little doubt that the existence of a steady demand at Darjeeling, or some other place nearer the frontier within British territory, would lead to a steady supply so far as the resources of Thibet allow. I am not here arguing against the desirability of removing trade restriction—a question which does not come within my province, and on which I am not called upon to offer an opinion—but what I am arguing in favour of is the creation of a steady demand for Thibetan wool in Darjeeling by establishing an agency, public or private, for the continuous purchase of it. The attempts being made by Mr. Spencer Robinson, who has, I am informed, much practical knowledge of the subject, will, from this point of view, be watched with much interest. It will be seen from the annexed report, with which I have been favoured by the Chamber of Commerce, and from the Secretary of the Agri-Horticultural Society, that Thibetan wool as per sample received from Mr. Spencer Robinson is supposed to be worth 6½ to 7 pence per pound in England, where the price is rapidly rising. If this estimate turn out to be correct, and wool is forthcoming from Thibet in large quantities as stated to Mr. Spencer Robinson, the importation of wool from Thibet should be a highly remunerative business.

3. The following statement shows the exports or imports of wool from and to Calcutta according to the Custom House returns and statistics of river and rail-borne trade in Bengal since 1881-82:—

				<i>Sea-borne trade.</i>	
Year.				Export. lbs.	Import. lbs.
1881-82	13,416	7,184
1882-83	2,336	41,617
1883-84	32,684	19,613
1884-85	78,395	21,612
1885-86	57,595	86,367

4. As regards the trade in wool produced in the plains of Bengal, there is very little information available in the records of the Bengal Government, and as the Government of India has called for very early report on the subject, I have not been able to ask local officers for further information regarding it. No attempts have ever been made in Bengal to improve the quantity or quality of wool produced in these provinces. The bare suggestion of the possibility of taking measures with this end in view has been made subject of gibes and ridicule. It will, however, be seen from the papers annexed that practical men, who have given attention to the subject, are by no means of opinion that nothing can, or that nothing ought, to be done by Government in this matter. Mr. Abbott, a well-known indigo-planter of Tirhoot, is enthusiastically in favour of endeavouring to improve the breed of Behar sheep by judicious cross-breeding, and is willing himself to undertake the supervision of the experiment on an inexpensive plan, which will be found described in his letter annexed, and Mr. Orrah, Deputy Superintendent of the Bhagulpore Jail, is of the same opinion. I think that Mr. Abbott's plan is an eminently practical one, and that cross-breeding on the lines suggested by him and Mr. Orrah ought to be tried. The Revenue and Agricultural Department of the Government of India may perhaps be in a position to give some assistance and support by supplying merino or other good rams and ewes. I am myself also in communication on the subject with Dr. Greenhill of Calcutta, who has been good enough to volunteer his assistance in the selection and importation of good rams from Australia.

5. I annex some interesting papers with which, through the courtesy of Dr. Lettbridge, I have been favoured by Mr. Orrah.

This gentleman has given much attention to the subject of Indian wool, and probably knows more about it than any official in Bengal. Some of his suggestions for effecting improvements in the quality of Bengal wool, owing no doubt to his want of acquaintance with the actual conditions of Bengal peasant life, are, I think, impracticable; but he agrees with Mr. Abbott in thinking that much may be done by judicious cross-breeding. Mr. Orrah, being in charge of the manufacture of woollen articles in the Bhagulpore Jail, is in a position to offer an opinion of value on the subject, and he bears testimony to the fact that the attempts made to improve the breed of sheep in the North-Western Provinces have led to a marked improvement in the quality of the wool of that province, which he says is decidedly superior to that produced in Bengal. Further, he significantly notes that since the stoppage of cross-breeding sheep by continuous importation of fresh stock has ceased in the Western Provinces, the quality of the wool produced is there also deteriorating.

I regret that I am unable to furnish the Government of India at present with more full and detailed information on this subject, and have only two practical suggestions to offer in a view to improvement in the supply and quality of wool from Bengal and the other.

These are—

1st.—That arrangements may be made by which a steady demand and sale can be guaranteed for Thibetan wool in Darjeeling or elsewhere within British territory—such demand will create the supply, and will probably arise without the aid or interference of Government, when it is known that wool is forthcoming. If, in addition to this, the Government of Thibet can be induced to remove restrictions which must as a matter of course injuriously affect trade, all the better; but I am not in a position to offer an opinion on this point. Further, it would perhaps be at first desirable to allow specially favourable rates for carriage of wool from Darjeeling by rail to Calcutta, and orders to have this done have, I understand, been recently issued. It would also be well, if possible, to improve the means of communication by road with the Thibetan frontier.

2nd.—That as regards wool produced in the plains of Bengal, the suggestions made by Mr. Abbott for cross-breeding in his letter, which is annexed, be accepted as a tentative measure.

M. FINUCANE,

Director of the Agricultural Department, Bengal.

Dated Teondaria, the 17th July 1887.

Demi-official from—SPENCER ROBINSON, Esq.,

To—M. FINUCANE, Esq., C.S.

I forward by Mr. Stevenson two samples of Thibet wool as received from that country.

One is ewe wool, the other ram's wool. I have been selecting wool for a Calcutta merchant during the last week, who is sending it home to England. This is the first shipment of wool sent home. I received a valuation on this wool recently, which was 6½ to 7 pence per pound in England.

The wool trade with Thibet can be developed into a large business, and a merchant trading with Thibet offered to deliver me 10,000 maunds of wool in Darjeeling (provided I would guarantee to buy it) at Rs. 16 per maund. He states the Thibetans will not place any obstacles in the way of allowing the wool to come through the Passes. He is sending me samples of cloth, &c., purchased by the Thibetans, and wishes me to forward them to English manufacturers and let him know the price of such cloth when landed in Calcutta.

Dated Jaintpore, the 27th June 1887.

Demi-official from—H. E. ABBOTT, Esq.,

To—M. FINUCANE, Esq., C.S.

* * * * *
 Suffice it then to say, as a commencement of correspondence, that as far as sheep-breeding in Behar is concerned, I live in the very centre of it and, roughly speaking, my tenants own at least a lakh of these useful little animals; but as far as wool or quality of meat goes they are of the most wretched description, though, like most things indigenous to the country, hardy to a degree. As I told you personally, I am convinced that judicious crossing would prove eminently beneficial (were Australian or British blood imported) to both wool and mutton. I do not think much outside trade is done in the wool line, the shepherds finding a sufficient market at present by weaving it into blankets, which they dispose of locally; but with the railroad now at their doors, the industry only wants encouragement to develop into a very valuable adjunct to the commercial economy of the district. Be it always remembered that the grazing in Behar is for India the best *par excellence*. Sheep during the hot weather are driven to the northern cheurs, when for a mere nominal sum they fairly well keep themselves; while during the rains practical farming-planters are glad enough to let them have the magnificent grazing of the inevitably heavy undergrowth in their indigo lands, charging the value of one sheep in the hundred for the right. Therefore, Behar is eminently a country suited to sheep farming, and it behoves Government to improve the breed. Give me a dozen rams and double the number of ewes, allow me Rs. 20 a month to keep them up, and I will guarantee to make a present of 90 per cent. of every ram produced in the stock to sheep-farmers in the district, and 50 per cent. of the ewes. Your charge shall be no more than the above Rs. 20 as long as I am in the country, and when I leave, I will give back to Government the same amount of stock that they handed me, or at the end of five years I will ask no further aid from Government, but will return it in kind the amount of rams and ewes advanced me. I will with pleasure furnish statistics of the entire births, deaths and distribution of the stock: of course you will fully understand that, should the stock die, I have no claim whatever against you as far as the Rs. 20 per mensem goes. My mere wish is to show how Government aid, properly applied, can benefit the district at small expense, and be made in the long run almost self-supporting. After a bit, I believe we could make money by letting out the services of the rams. But this must be done gradually. I have already proved that, as far as horses, poultry and dogs are concerned, one can with imported blood and judicious local crossing do very great things in Behar; and as I honestly believe, as far as Bengal is concerned, it could be made the nursery for grain, horses, oilseeds, sheep, cattle, *et hoc genus omne*, for the whole of Southern India.

In such a country as this the encouragement of horses, sheep, and poultry-breeding, of the importation of finer seeds from foreign countries, in fact the entire working up of Behar as a wholesale producer for India, should be the work of the Government at first, and of every Englishman who, like myself, is grateful to it for a happy if an exiled home.

Many experiments have doubtless been made, but forgive me if I say unhesitatingly they have been, as a rule, made on wrong lines. They are generally made through the means of the temporary Collector of the district, without the smallest effort being made to find whether the gentleman in question has a penchant for this kind of thing. The odds are he has not. Witness the attempt to breed mules in Mozufferpur.

Report by Mr. Orrah.

In reply to the Inspector-General of Jails' request, I have the honour to submit the following report upon Bengal wools, together with extracts.

Wool characteristics.

Regarding the production and improvement of wool grown in Bengal, it will be necessary to enter somewhat minutely into the characteristics of wool, namely—

1st.—Softness.

2nd.—Elasticity.

3rd.—Length of staple.

4th.—Uniformity of staple.

5th.—Fineness.

6th.—Soundness.

So far as my experience goes in the working of Bengal wools, I find them wanting in all the aforementioned characteristics.

Causes of deterioration.

As regards want of softness and elasticity, I attribute this partly to the hardness of the water the sheep may have to drink, being of a limy character.

The scarcity of yolk in the fibre, which is the natural reservoir from which the wool fibre gains its character for softness, &c., shows the sheep are not sufficiently and suitably fed.

As regards length of staple, uniformity, fineness and soundness, these deficiencies are more the result of want of care and attention to the breeding. Good breeding is undoubtedly the main cause by which sheep of all countries are improved, or for want of it are deteriorated.

Whilst Bengal wools show these deteriorations all round, and contrast very unsatisfactorily with other provinces in the North-West of India, *there is one redeeming feature, which is a very valuable one, possessed by the Bengal sheep, and that is they are very receptive, or in other words susceptible of being improved more rapidly than many other classes of sheep.* The Thibet sheep, for instance, will require much more time to eradicate the coarse hairs and kemps out of the fleece than would the Bengal sheep.

To improve the quality and quantity of Bengal wool, I will mention a few principal methods of treatment necessary for this purpose, for part of which there is some evidence of its having been successful in India as well as other countries.

1st. Pasturage.—I have spoken of the water as being hard; this seems to point out

Pasturage and water.

that land pasturage over Bengal is of a calcic or lime character,* and would undoubtedly not only account for hardness of water, but the pasturage thereof must contain in its grasses, herbs and trees and vegetation generally a large proportion of calcium, therefore the food upon which the sheep live and graze must also contain lime, and we see as a natural consequence that the wool they grow is dry, natureless, stunted, and irregular in staple, harsh in feeling, coarse, brittle, inelastic, whilst the yolk of the fibre is scanty and poor.

I would therefore suggest that the water which sheep drink should be tested, and if found to be hard should be treated chemically with a small sprinkling of oxalic acid,† viz. 1 oz. of the salt of this acid to 500 gallons of water, to deposit the lime of waters drunk by the sheep. The washing water for sheep should also have any lime that exists in it deposited before being used.

Quantity and quality of wool, which is distinguished from the fleshy parts of sheep by the large proportion of sulphur which it contains, is very much affected by the soil upon which the food grows: some soils growing poor grasses keep the sheep grazing thereon lean, and whilst giving finest of wool yields only 1½lbs., but a merino fed upon good pasturage, of chemically treated soils, often gives a fleece weighing 10½lbs. to 11½lbs. It is calculated that 30,000,000 sheep yield on an average 111,000,000lbs. wool, or about 4½lbs. of wool to the fleece. This quantity of wool contains 5,000,000lbs. of sulphur, which is of course all extracted from the soil.

If we suppose this sulphur to exist in, and to be extracted from, the soil in the form of gypsum, then the plants which the sheep live upon must take out from the soil to produce the wool alone 30,000,000lbs. or 13,000 tons of gypsum. Though the proportion of this gypsum lost by any one sheep farm in a year is comparatively small, yet it is reasonable to believe that by the long growth of wool on land to which nothing is even added, either by art or from natural sources, those grasses must gradually cease to grow in which sulphur most largely abounds, and which therefore form growth of wool—in other words, the

* This is doubtful.

† Impracticable, and if practicable, would be dangerous, oxalic acid being a poison.

produce of wools likely to diminish by lapse of time where sulphur has for centuries been yearly carried off the land: and again the produce is likely to be increased in amount when such land is dressed with gypsum or other manures in which sulphur naturally exists.* This, I believe, could be obtained in a very cheap form from the gas works of the country; some of their waste products containing sulphur in a large degree, such, for instance, as the sulphate of lime, a waste product of these works. There probably also is a natural form of sulphur found in connection with the rock salt districts, as geologically it exists in some form in the same strata. Iron pyrites also contains sulphur in large proportions. Though not acquainted with all the natural products of India, I am quite sure products could be obtained sufficiently low in rates for manuring purposes. No bones of animals ought to leave India, for its land sadly needs it, being also a valuable manure for sheep farms, in addition to the various dungs of animals of all descriptions.

Next, I would suggest as of first importance also that a definite system of cross-breeding should be sustained with rams obtained from pure blood stock. There is, I believe, some difference of opinion amongst flock-owners as to what countries the best rams are obtainable from; but experience has always proved this fact, that the merino ram, whether of European, South African, or Australian breed, is decidedly the best for crossing with Indian sheep.

As success has been obtained by crossing the merino rams of each one of these aforementioned countries with Indian sheep, the aim of flock-owners should be to obtain wools for clothing purposes of a finer quality. This could be accomplished, and some six different qualities be obtained, which would work in combination or serve the special direct purposes of manufacture in general. With this end in view, I would suggest—

Crosses. 1st.—For producing finest fibres of a felty character, a cross of one South African merino ram, pure bred, with 100 Bengal ewes.

2nd.—For producing uniformity of lengths of staple, medium fineness, soundness, and elasticity, a cross of an English merino ram, pure bred, with 100 Bengal ewes.

3rd.—For medium qualities and characteristics ranging between Nos. 1 and 2, a cross of one Australian merino ram, pure bred, with 100 Bengal ewes.

4th.—For improvement from Indian stock rams for coarser wools and cloths, a cross with North-West part-bred merino rams, the result of crossings with European stock in years gone by. This crossing would give wool closely approaching the Agra wool, or wool used largely by Cawnpore and Dhariwal mills, and also exported largely to Europe.

5th.—I would advise a trial being made of crossing some Thibet ewes with an English merino ram, pure bred, and the rams obtained from this crossing should then be crossed with Bengal ewes. The effect, I believe, would be that a Bengal wool would be produced, having a character distinctly its own, and a flannel and clothing wool also suitable for hosiery would be produced of an excellent character and high value.

6th.—To produce combing wool of very long fine staple, soft in form, in length, soundness, and elasticity of a high value, for European combing machinery, would, I believe, be obtained by crossing Australian fine merino ewes, pure bred, with Thibet rams.

In connection with this matter of breeding are several important factors, such as the ascertaining of defects, pursuing a good system of selection or rejection and sub-division of sheep into classes. These should be done regularly by a yearly inspection, so as to form correct opinion of the nature and properties of the fleeces borne by each, in order that the defective sheep may be removed and never again allowed to mix with those drafted and set apart for the production of fine wool.

White-woolled sheep, free from gray or black, should be kept separate.

Black-woolled sheep, free from white or gray, should be kept separate; also the rams of same should be similarly kept separate with their flocks, and not allowed to mix promiscuously. All parti-coloured sheep should be extirpated.

Kemp and hairy wool is very objectionable. Bengal wool is very kempy, that is, full of white hairy coarse bristles or hairs which protrude and will not dye or become amenable to any process or operation of improvement. This, however, is the result of deterioration in all its forms, and can only be eradicated by the carrying out of all such operations as are being suggested herein. If only a few kemps be seen in wool, it lowers its value immensely for clothing purposes. Good feeding, protection and breeding will eradicate these objectionable features. Thus it is that changes in the fleeces of sheep are wrought by propagation or crossing of breeds possessing those qualities which it is wished to acquire.

Lord Western, whose interest in the growth and improvement of wool production years ago, records the effect of a union he made with one of his lordship's own merino taps and some East Indian ewes, on which a striking proof was exhibited of the influence of the male upon the progeny, the latter having a fleece infinitely superior to that of the dams. The ram was kept highly fed, and consequently their fleeces became long in fibre, heavy in weight, the breed of the ram being the merino, which is considered the best from which foreign stock can be improved. Purity of blood should be unquestionable, and the result will then be a stronger stamina capable of standing changes of climate better.

It is, however, impossible, in the brief space of a report like this, to enter more fully into the minute details of sheep husbandry. I subjoin, however, a few extracts obtained from my library, which may be of interest in showing what has been done in the past in the

* Gypsum would no doubt be good manure for pasture land, but hericellids are not likely to use it.

other presidencies of India, and which I consider somewhat confirms by facts some of the suggestions herein made.

Before concluding I might remark, from my present workings of the North-West of India wools, as compared with Bengal wools, there is so decided a superiority of the North-West wools that I am obliged to use a large proportion to obtain more satisfaction from those who purchase our blankets and cloths, and I have no doubt in my own mind that this same superiority has been given to it by some such early action in the matter of breeding, &c., having been taken by the Government of the North-West of India in the years gone by.

I am also convinced that Bengal could so improve its wools, and if the system of cross-breeding was kept up continuously, might eventually supersede in character the wools of those provinces. I judge also from what I see of the North-West wools, at present there are signs in their wools now that the system of cross-breeding is not being kept up by continuous importations of fresh stock, a very desirable element to sustain and further improve their wools: this I would suggest Bengal should attend to continuously.

ARTHUR ORRAH,

Deputy Supdt., Central Jail, Bhagulpore.

The 15th June 1887.

Extracts.

EARLY efforts to improve the country breed by merino of imported stock.

The Cape-bred merino rams have been found to answer for this country, India, better than those imported from England, so much so that Government have determined henceforth to import only from the Cape as appear from the memorandum from Mr. Secretary Reid in 1836.

The attention of Government was first directed at the end of 1835 to the improvement of the wool and sheep of Western India. From the information furnished to Government, it appears that many parts of the Deccan and Guzerat are very well adapted to sheep pasture, and that, if the wool of this country, which, though very inferior in kind, finds a ready market, were improved by importing superior sheep so as to improve the fleece of the country breed, the natives would be greatly benefitted. Measures were accordingly adopted by Government to import sheep of a superior breed, and in 1837 a supply of rams and ewes, about 100 in number, of the Southdown merino breed, were sent out at a very heavy expense by the Honourable Court under the care of an experienced English shepherd. About 60 rams and ewes of the Saxon and merino breed were obtained from the Cape of Good Hope where the breed is very fine.

A large supply of sheep (600) was also obtained through the agency of Colonel Pottenger and Captain Burne from Afghanistan and Cabul, and the pastoral districts in the vicinity of the Indus. A small number of sheep was also brought from Bussorah, as it is well known that the breed in that part of the country yields a very fine lengthy fleece. The sheep obtained from England, the Cape and Cabul, have been distributed about the country, and many of them are entrusted to the care of gentlemen who understand the management of this animal, and take an interest in the undertaking. A sheep farm was established at Ahmednugger, and another at the fort of Jeoner, where the climate is good and pasturage plentiful, and these farms were entrusted to Mr. J. Webb of the Civil Service, who had a good practical acquaintance with the management of sheep. The natives in the interior, who breed sheep, are supplied from these farms with half-bred lambs and were allowed to send their ewes to the Government. From the experience gained by these practicalists, it was found that the Cape-bred merino sheep were far superior to those bred in England and better adapted to the Indian climate, the English sheep being too large for the slight made ewes of this country, and are moreover greatly affected by the change in the climate. The Cape sheep are less affected by the climate, and not so subject to disease as those of this country or of England, while their lambs are much stronger than those produced from the English sheep. It was therefore determined not to obtain any more supplies from England.

Of this enterprise on the part of the Government were noted by Sir George Arthur, who brought to the subject a valuable fund of information which he had acquired during his previous administration

Results recorded. in New South Wales, and thus early declared himself a decided patron and supporter of improvements in Indian wool. When visiting the Government sheep farms of Ahmednugger and Amrut Mahub, he inspected the flocks, and in a minute drawn up on the occasion, remarked that "an improvement in the breed of sheep, as regarded the views of Government, was not an object that at all had reference to profit, but one on which the authorities took the lead, as being the best means of interesting industrious natives in the experiment. Sir George suggested the advantages which would be derived from establishing a more definite system in breeding in the first place by carefully ascertaining the defect on the indigenous race, and this done, by steadily pursuing a good system of rejection and crossing. He at the same time adopted a fresh mode of pasturing and sub-division of the sheep in such a manner that no flock should exceed 700 head, and recommended that, in order to encourage the natives to try the experiment, a given number of the improved sheep should be transferred to the native shepherds under an agreement to provide pasture and attendance, receiving in payment one-third of the produce, and so on.

Again, about a year later, Sir George Arthur having occasion to visit Allepore when the Government flock had been collected by a previous arrangement with the Superintendent, again inspected the stock, and in a minute written by himself, and dated 27th September 1843, he expressed himself much pleased with the manifest improvements in the condition of the sheep, which was such as showed the care and attention paid to them by the Superintendent, and the general appearance of the flock being greatly bettered by the removal of parti-coloured sheep, recommending at the same time that no relaxation in this system should be allowed, and urging that it would be proper in the next report from the farm to have the sale price of the wool compared with the ordinary country sheep distinctly noted. Sir George Arthur observed that in order to ensure success it would be necessary annually to import a fresh stock of merino rams till the improved stock had thoroughly superseded the country one on the farm.

Captain Henderson, who acquired much information on the subject as a sheep-farmer at the Cape in 1836, submitted to the Government of Bombay a paper of instruction on the management of merino sheep. In this treatise the Captain states that on rearing these animals the diseases in India most to be guarded against are dysentery and mange. As a precaution against the first, he says that dry pasturage is most essential, and in order to prevent the mange, that great attention should be paid to the cleanliness of the sheep. A Patna ewe crossed with a Southdown ram was tried in Calcutta by a gentleman who had had considerable experience in the growth and cleaning of the staple in the Australian Colonies, and he entered among the proceedings of the Agri-Horticultural Society of India the following result:—The wool is decidedly of a very good quality for the first cross, uniting length of staple and softness with great uniformity of quality throughout the fleeces, which is much desirable. The quality from its coarseness will not admit of being used for other than blankets and very coarse cloth. Its market value was in the Home market 16d per pound. He further states that Mr. Rickets, the owner, had acted correctly in having crossed Patna with the Southdown, and should strongly recommend him to carry out the improvement by crossing the production with the merino, as he only requires now the texture, he having procured the length of staple with crosses. India can in my opinion, if sufficient care was displayed in the crosses, produce as good a sample of wool as any of Her Majesty's dominions from the luxuriousness of feed and the temperature of the climate, as texture with length of staple is all that is necessary.

Colonel Hazlewood, in writing to Captain Jacob, of Bombay Artillery, dated Bangalore, 1837, says:—I have just received six more Saxon rams from the ruby flock of Sydney. Mr. Sullivan brought out two merino rams and two ewes, and I have seen the effect of crossing by these and also by Southdown rams imported by Sir William Rumbold on the Neilgherries. Even the red hairy sheep of India become Southdown in size and wool in the second generation, and the white-wooled sheep of India become merino and Southdown in size and wool after one crossing. I have shown Mr. Sullivan's merinos which have been two years in India after twice washing and shearing the day after the ewes gave five or four and a half pounds each; in fineness, length of staple, elasticity and oiliness, equal to any I ever saw in Tasmania, where 2½ lbs. is the utmost ever got from a ewe of the merino kind.

Further report by Mr. Orrah.

Since writing my report upon the wools of Bengal, I have received, by mail, a copy of the weekly paper called the Wool and Textile Fabrics, which contains a report made by Mr. F. H. Bowman, D.S.C., F.R.S., &c., an authority in England on technical matters upon Indian wools. I have therefore had a copy of the same written out, which I send to you with this letter.

COLONIAL WOOL

IV.

Copy from the Wool Textile Fabrics Weekly of 14th May 1887.

We take the following paper on colonial wools (by Mr. F. H. Bowman, D.S.C., F.R.S. &c., President of the Society of Dyers and Colourists) from the "Reports on the Colonial sections of the Colonial and Indian Exhibition," issued under the supervision of the Council of the Society of Arts, and edited by the Secretary to the Society, Mr. H. Trueman Wood, M.A.

The whole of the wools exhibited from India, except one or two incidental specimens were confined to those contained in a case within the Economic Court. In speaking of them as wools, the term is used in its widest sense, so as to include all goat and sheep fibres. The samples were 23 in number, and no reference appears to be made to them specially in the official catalogue. Few of these samples were named specifically, the largest portion being only distinguished by a number or letter without label. In character they covered a wide range of quality from the very coarsest goat's hair down to the finest wool or pure pashmina, which is the undergrowth of the Tibetan shawl-goat, as well as the native Indian wools, of which there are at least eight varieties. These wools are interesting, as they contain almost every variation in the individual fibres, which is to be found in all other races of sheep. Most of the hairs and wools exhibited in this section, however, are of comparatively small interest to European manufacturers, because the export is small and the quality such that they can only be used for the coarsest class of goods, and when worked by machinery

they require to be mixed with other wools. They are, however, of considerable importance in India as forming the staple of the woollen industry in the mountain districts, where the great bulk of the woollen goods are worn. Many of them are singular mixtures of coarse and fine fibres; so much so that those who are only accustomed to the regular wools of cultivated sheep can hardly conceive it possible that many of the samples could be obtained from a single animal. The finest specimen in quality and regularity of fibre, and in all characteristics which are typical of the best wools, can scarcely be surpassed; but by far the largest numbers of samples are defaced by irregularities in the structure and quality of the fibre, which are only to be found in the most neglected sheep in the United Kingdom and the Colonies. To enumerate all the defects which are found in many of these wools, when compared with the highest standards attainable in the Australasian Colonies, would be to mention all the defects to be found in any wool, and indeed many of the samples probably resemble the covering of the primitive sheep, from which all the truly domesticated varieties are originally derived. Without further knowledge in regard to the place of origin, a mere classification of these wools would be of little service, and especially since the wools of India scarcely come within the scope of this report, and will probably receive attention elsewhere.

As already remarked, the wide range over which the growth of the wool extended, and the difference in climate and other conditions to which the sheep in the various colonies were subjected, rendered the present opportunity most valuable in making a comparative examination of the different wools. This survey brought home to the eye most forcibly the very wide range of conditions under which the sheep can be cultivated, and the high state of perfection to which it can attain in almost every part of the world, when due attention is paid to the culture and breed. It seems to indicate that special cases of sheep are more adapted to certain regions of the earth's surface than others, and that in many cases the environment of the sheep tends in the course of generations, under careful management, to produce a special character which becomes permanent, and may be retained as a pure breed. It also shows that certain characteristics of the wool, such as lustre in the long-woolled breeds, can only be retained permanently by the re-introduction of fresh blood from time to time; at any rate, in all the regions which lie nearest to the equator, a certain degree of equality of temperature and atmospheric moisture being necessary for its permanence. Thus it appears to be retained longest in New Zealand and the southern coast of the Australian Continent. The nature of the herbage also affects the quality of the wool in a marked degree, and probably one of the chief reasons why the Australian merinos deteriorate when introduced into the Cape Colony is because the herbage is not fitted for the highest development of the sheep. One very marked lesson of the Exhibition is the fact that all the best wools exhibited show that, whatever tends to improve the character of the sheep in any one direction, re-acts all round in a benefit to all the other characteristics. The same conditions which tend to increase the size of the sheep cause the wool to be better nourished, firmer and more tenacious, without injury to the best qualities of the fibre, provided care is taken in the proper selection and purity of breed in the sheep. The question of difference in the lustre of the wool is an important one, and opens a wide field for investigation. It has been already noticed that the Victorian wools stand foremost in this respect amongst the merinos. When the fibres are examined by a microscope, it appears that, while the fibres are equally fine when compared, say, with those from New South Wales or South Australia, the development of the individual scales on the surface is larger, and they present fewer scales in the linear inch. On the other hand, as the fineness in diameter is maintained in the less lustrous fibres, and the development of the scales is greater in number, and this gives a greater softness and pliability to the individual fibres with a large degree of serration, and therefore a higher felting power. It is for this reason probably that the wools of New South Wales are more adapted for fine clothing trade than the more lustrous Victorian, or the coarser fibre wools of South Australia. The judicious introduction of the best characters of certain classes of sheep into other breeds, as is clearly shown, may induce a permanent improvement of the new breed only under certain conditions, and it seems now beyond a doubt that it will always be necessary for the farmer to discover the special class for which his own climate and surroundings are the most advantageous, if he is to attain the highest perfection in the production of wool. Those who are growers of wool must remember that every year the demand for quality in the raw material is greater, and those only who aim at securing all the best properties which wool can possess will secure the markets of the future.

In several instances "kemps" were found associated with the wool. These kemps are fibres, usually shorter and thicker than the others, in which all traces of wool structure are absent. They are brittle, solid, and ivory like. This is the sure indication of want of truthness in breed, and is most objectionable, as these kempy fibres will neither felt nor take any dye. They cannot be removed from the fleece by any process, except picking them out, and hence they injure the quality of any goods for which the wool may be used. The defect was specially noticed in some of the cross-breeds with the long-woolled sheep, and where it exists the value of the wool is most seriously deteriorated.

Nothing can compensate for the want of condition in the wool when sheep are neglected, and it cannot be too strongly urged that every endeavour should be made to maintain in the bulk the high standard presented in the samples exhibited. Without this care and due attention to classification, the results of good breeding and cultivation may all be lost, and rendered commercially unremunerative.

An endeavour was made in preparing this report by each specimen exhibited in relation to the geographical position in which it was grown, to determine, if possible, whether any general law with regard to characteristic properties could be drawn from this relation, but the differences in the breed of sheep, and in the care and attention bestowed on the wool, rendered any sound deduction impossible, and it therefore appears probable the selection of breed, good pasturage and attention, have far more influence than mere geographical position within the range of the temperate zone.

In conclusion, the author of this report begs to record his high sense of the uniform kindness and courtesy which he experienced from all the officials in charge of the various colonial exhibits, and from the Executive of the Exhibition. This was all the more appreciated, as it involved on their part, from the number of samples and variety of information required, a large amount of labour and time.

Dated Calcutta, the 28th July 1887.

From—S. E. J. CLARKE, Esq., Secretary, Bengal Chamber of Commerce,
To—M. FINUCANE, Esq., C.S.

I HAVE only received your letter of the 21st and 27th instant, the former handing me two samples of ram's wool and ewe's wool from Thibet, of which you wish to know the value in Calcutta. The samples have been examined by the Committee of the Chamber of Commerce, who direct me to send you the enclosed copies of letters written by Messrs. Peel, Jacob and Company of this city, with reference to similar descriptions of wool sent to them from Darjeeling in the beginning of 1884. Such wool, say 30 to 40 maunds, was then valued in Calcutta at Rs. 18 per maund. It was, however, subsequently sold to the Elgin Mills Company of Cawnpore for Rs. 25 per maund.

Through the courtesy of Mr. J. L. Mackay, of Messrs. Mackinnon, Mackenzie and Company, I am able to supplement the information given by Messrs. Peel, Jacob and Company by a London Valuation Report dated 18th May of the current year, on some samples of Thibetan wool sent home by Mr. Mackay's firm. The valuation given is from 6½d. to 7d. per pound at the then current market rates. The *Economist* gives the price, January—June 1884, of unwashed wool at 7d. per pound. The value of wool similar to the samples you have now sent would be probably at that time 5d. to 5½d. per pound. The higher quotation given by Messrs. Buxton, Ronald and Company in May last is owing to the rise in the price of wool which has taken place during the last three years.

Thibetan wool is not well known in this market, so that it is difficult to say what the demand for it would be.

The Committee of the Chamber of Commerce desire me to say that they are of opinion it would be advisable to send the samples to the Elgin Mills Company at Cawnpore, and also to the Egerton Woollen Mills Company, Limited, at Dharwal, Umritsur, from both of which concerns you would be likely to receive valuable and practical reports as to the quality of the wool and its suitability to their requirements. They would probably also be in a position to say what place it would take in the home market.

In conclusion, I am to say that, if you desire it, Mr. Mackay will be happy to send the samples home for valuation in London. An early reply to this suggestion will oblige.

Report on Wool Samples referred to in Mr. Clarke's letter.

WE have two samples of wool from you, and value the first received at 5d. per pound, and that last received at 5½d. per pound. The wool is unwashed and unassorted; it is well grown and is of a sound and healthy character. Such wool would sell in Europe in any quantity. Of similar wool from Bombay, Kurrachee, and Beyrout, we sell 50 million pounds annually. There is always a market for such wool at a price; at present the value of all carpet wools (this is carpet wool) is remarkably low. Please refer to the figures in the enclosed circulars about East India wool, which will govern this wool also. These figures are for washed wool, assorted into various colours and qualities; and it might be advisable to trace a small lot of the wool you have in view in this manner, and ship it to test this market. At the same time, we would certainly suggest that *five* or *ten* bales should be shipped in the natural state, and then we could report fully, and you would be prepared to act in the event of prices rising. It appears to us that the subject is one of great importance, for it is evident that the wool shown by your samples comes from a country perfectly adapted for the growth of a sound and healthy wool.

In Bombay and Kurrachee it is customary to assort and wash the wool before it is shipped, and this plan commends itself to our buyers. We send you samples of a parcel of Candahar wool which was worth 5½d. per pound in its original state as clipped from the sheep, and we give you the result in the assorted and marked washed state of this wool. We do not, however, know what the wool weighed before it was washed.

24, Bassinghall Street, London, the 18th May 1867.

From—Messrs. BURTON, RONALD AND COMPANY.

To—Messrs. DUNCAN, MACNEILL AND COMPANY.

With reference to the sample of Thibet wool submitted to us this day for valuation, we beg to say we consider the wool worth from 6½ to 7d. per pound at present market values.

In accordance with your instructions, we have retained a portion of your sample as reference, and now return the remainder herewith.

Calcutta, the 14th January 1884

From—Messrs. PERL, JACOB AND COMPANY.

To—The Secy. to the Bengal Chamber of Commerce.

The sample of wool referred to in your letter of 8th instant is to hand, and we will endeavour to send you a valuation for it in a few days.

Our Liverpool correspondents, to whom we sent a sample of your wool, write us as follows:—

“We find the present value is about 5d. for unwashed, and say 9d. per pound if washed. It is recommended to be washed before shipment, and if in addition the colours be assorted, each sort being of course packed separately, higher prices would be obtained. We understand there is usually a good demand for this article.”

These particulars may be interesting to you, even if they do not induce you to send a trial shipment to England.

Calcutta, the 25th January 1884.

From—Messrs PERL, JACOB AND COMPANY,

To—The Secy. to the Bengal Chamber of Commerce.

We much regret we have been unable to send you any report on the last sample of wool sent us, as we have not received any communication so far from the Elgin Mills, Cawnpore, to whom we sent it.

We have now the pleasure to enclose a report on your earlier samples, which we have received from our home correspondents, who have gone to some trouble in the matter, and we have sent you by post the five samples referred to therein. We enclose, for your further information, a Liverpool Wool Circular, details in which may be of interest to you. We would ask your careful consideration of the report, and would recommend you to make a trial shipment as suggested, with the view of commencing a regular business.

Dated Calcutta, the 30th July 1867.

From—The Secretary to the Agri-Horticultural Society of India.

To—The Director of the Agricultural Department, Bengal.

I am now in a position to reply to your demi-official No. 284 of the 21st instant, regarding two samples of wool from Thibet, ram and ewe.

As mentioned in my previous note on this subject, there is very little trade done in wool in Calcutta, and the dealers in Thibetan wool amount to probably less than half a dozen in number. I have obtained the opinion of two of these traders on the samples. They consider they are good raw wools, but are very dirty, and their value would depend on the washing and cleaning they should receive before being put upon the market. In the present state the wool would be unsaleable here. The final market for wool of good quality is Amritsar, and the price there for staple of the quality of the samples would be from Rs. 1 to Rs. 5 per seer according to the cleaning to which it has been subjected; it would there meet in competition Australian and European wools which are imported *via* Bombay. Another market would be found at the mills in the North-Western Provinces, but prices are not good there, as best qualities of wool are not sought after.

Of the two samples the ewe's wool is the better; the brown spots in it would, however, probably depreciate its value. From an European point of view the samples would be much improved were the two qualities of wool of which they are each composed separated. The outer wool of the sheep is wiry and harsh as compared to the soft inner fleece which is the more valuable. Should you desire it, I can obtain a more precise valuation from Bombay in a few days.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 17th September 1887.

No.	District and date of return.	Rainfall at Sudder station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.	
BENGAL.				
Western Districts.				
BRUHMAN DISTRICT.	1 Burdwan, Sept. 17, '87	2.64	Weather—hot; dry during latter half of week. Rain wanted for <i>amwa</i> rice throughout most of the district, and badly in Cutwa, where price has risen somewhat; elsewhere prices stationary. <i>Am</i> harvest approaching completion with fair outturn. Cholera decreasing; fever prevalent.

BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CUTTACK DIV.	22 Chittagong, Sept. 20, '87	1.94	Weather—seasonable. <i>Am</i> as thriving. Cholera reported; public health otherwise good. Prices stationary.
	23 Nookhally Ferry „ 16 „	2.42 2.60	Weather—generally sultry; latterly seasonable. Transplantation of <i>am</i> all but completed. Prospects fair. A few heavy showers at intervals will be very welcome. The Subdivisional Officer writes “prospects so far good.”
	24 Tipperah Brahmanbarish Chandpur „ 15 „	0.68 Nil 0.76	Weather—not quite seasonable, because not enough rain. <i>Rain</i> is much wanted and a great deal of it. Paddy fields on comparatively high land are cracking, and the paddy turning yellow. In many fields of this sort transplantation is not feasible. Unless heavy rain falls soon the outlook will be very bad. [The recent daily weather reports show rainfall at Comillah as follows:—15th .45, 16th .05, 17th nil, 18th .15.]
	25 Chittagong Hill Tracts „ 13 „	1.24	Weather—sultry and excessively hot at noon. Occasional fall of rain throughout the week. Harvesting of <i>jam</i> paddy commenced. Cotton doing well. Transplanting of paddy in low land nearly over.
	Hill Tipperah „ 14 „	0.85	Weather—hot; rain much wanted. <i>Am</i> paddy still being transplanted. Sugar-cane and <i>jam</i> crops doing well. Public health good.
BEHAR.			
PATNA DIV.	26 Patna Sept. 17, '87	0.46 0.25 0.56 Nil	Weather—hot with occasional showers. Reaping of <i>bladoi</i> crops still going on. Rice transplantation nearly over. More rain required for a good crop of rice. Cholera still reported in Behar and a few cases in Dinapur; public health otherwise good.
	27 Gaya „ 17 „	0.50	Weather—cloudy. <i>Bladoi</i> being harvested. Paddy suffering for want of rain. Cholera reported from some quarters. Fever also reported.
	28 Shahabad „ 17 „	0.68	Weather—hot, but occasionally cloudy. Paddy transplantation finished. <i>Bladoi</i> crops being harvested. Prospects hopeful. Public health generally good. Prices stationary.
	29 Darbhanga „ 17 „	0.71	Weather—sultry and occasionally cloudy. <i>Bladoi</i> harvest still in progress. Prospects of rice very promising. Transplantation of tobacco commenced. Price of common rice averages 19 annas per <i>rupur</i> . Public health generally good.
	30 Muzaffargarh „ 17 „	0.48	Weather—very variable, but little rain has fallen, and more wanted. <i>Bladoi</i> crops are being harvested. Prospects of all crops excellent. Sporadic cholera exists.
	31 Saran Sewan Gopalganj „ 17 „	0.08 Nil 0.08	Weather—days hot, mornings cool. Prospects of crops continue favourable. Cholera abating; otherwise public health fair.
	32 Champaran Bettiah „ 17 „	0.23 0.95	Weather—cloudy with westerly wind. Prospects of <i>bladoi</i> good. Harvesting of <i>makoi</i> commenced. <i>Aghoni</i> crops look promising. Prices stationary. Public health good.
	33 Munger, Sept. 17, '87	0.62 0.49 0.58	Weather—hot and sultry. Prospects of winter rice continue promising, but more rain wanted. Harvesting of <i>bladoi</i> crops nearly completed. Some cholera still reported from theas Tegra and Kunkarpur.
PUBBANAH DIV.	34 Bhagalpur „ 17 „	0.84	Weather—bright and sultry till 15th. State of all crops good, and prospects, now the rain has begun again, are very favourable. <i>Bladoi</i> harvest in north continued.
	35 Patna „ 17 „	0.90 1.48	Weather—hot; latterly heavy showers with high wind. All crops promise well.
	36 Madina „ 17 „	1.32 0.65 2.78 1.19	Weather—seasonable. <i>Bladoi</i> harvest still going on in some places. Winter rice doing well. <i>Kuloi</i> is being sown on the <i>deoras</i> . Common rice 21 annas per <i>rupur</i> . Fever rather prevalent.
	37 Chanchal „ 17 „	0.65	
	38 Sileganga „ 17 „	2.78	
	39 Chajula „ 17 „	1.19	
ORISSA.	40 South Pargha. „ 17 „	1.82 8.49 1.04	Partial heavy rain. Weather growing cooler. State and prospects of crops fair. Slight damage done by <i>ganges</i> floods. Fever in the flooded tracts.
	41 Patna „ 17 „	8.49	
	42 Rajshahi „ 17 „	1.04	
ORISSA.			
CUTTACK DIV.	34 Cuttack	Report not received.
	35 Poores Khorda „ 15 „	2.22 1.54	Weather—cloudy and rainy. Prospects of <i>swad</i> rice crop in Chikla tracts bad; in other places weeding in progress and prospects fair. Common rice 23 annas per <i>rupur</i> in Sudder subdivision and 20 annas 4 chittacks in Kharis subdivision. Public health good.
	40 Balasore „ 16 „	2.20	Weather—seasonable. Weeding of <i>swad</i> crop advancing. Reaping of <i>bladoi</i> paddy commenced. Prospects of crops good. Rain has fallen in parts of Balasore and Chudhally thanas, where it was wanted. Public health generally good.
CHOTA NAAGPORE.			
<i>South-West Frontier Agency.</i>			
41 Hazaribagh, Sept. 16, '87		0.68	Weather—occasionally cloudy. Prospects generally good, but rain still wanted in parts. <i>Bladoi</i> being harvested; outputs below the average. A few cases of cholera reported; otherwise general health good. Cattle-disease in some villages.
42 Lohardugga „ 17 „		4.25	Weather—seasonable. Rain throughout the week. Prospects of crops favourable. Price of rice fluctuating and has a tendency to rise. Cholera still continues.
43 Saginnum „ 16 „		1.85	Weather—cloudy and cool. More rain required to secure crops. Prospects improving. Rain all over district except Kharawan and Serakela. <i>Gora</i> dhan being reaped, and uplands being ploughed. General health good.
44 Manikpur „ 17 „		4.08 1.29	Good rain during the week; weather hot and sultry. The rain has done much good, and the prospects of the crops are now excellent.

Published for general information.

Remarks.—**Summary.**—The normal mean of air pressure and temperature are the arithmetic average or means of the reading during the same period for the past 30 years. The humidity, h , the atmosphere is measured as barometer, saturated air being represented by 100. A clear sky is denoted by 1 and an overcast sky by 10. The

for the week ending Friday, the 16th September 1887.

Notes. The variations are negative when the mean for the week is less than the corresponding normal mean, and positive when greater. Under the head District observations of rainfall, the normal mean is given for the part of the sky covered, the whole sky being covered by 10. Under the head District observations of rainfall, the normal mean is given for the part of the sky covered, the whole sky being covered by 10. Under the head District observations of rainfall, the normal mean is given for the part of the sky covered, the whole sky being covered by 10.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 16th of September 1887.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 16th of September 1887—*continued.*

[illegible]

Explanation.—Indicates that no pain has taken. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total residual column are left blank.

Calcutta, the 16th September 1887.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
10TH OF SEPTEMBER 1887.**

On September, the 9th, or the last day of the previous week, an extremely rapid fall of pressure set in over the northern half of the Bay, the pressure giving way most rapidly at the eastern stations, and thus forming an area of relatively low pressure over the north-eastern part of the Bay. On the 10th a further very rapid fall of pressure took place over the northern half of the Bay, and at some of the stations in South Bengal the fall equalled about 0·15 inch. A distinct barometric depression was therefore formed, the centre of which was apparently not very far south of the Sunderbans, and on the 10th the centre of the wind circulation accompanying it was to the south or south-west of Buttrial. The depression then travelled in a westerly direction, and on the 11th the centre of the feeble storm was about midway between Saugor Island and False Point, and it was again accompanied by a distinct cyclonic circulation of winds, though the wind velocities in connection with it were light. On the morning of the 12th the depression had passed well inland, and had disappeared into the Central Provinces, and in South Bengal pressure rose very rapidly, while the area of lowest pressure in the Bay retreated to South Orissa. Pressure continued to rise on the 13th, but the general conditions were unaltered, and the depression had quite ceased to affect the weather in the Province of Bengal. During the formation and advance of the feeble storm, moderate to heavy rain was brought to the southern districts, and in some cases the falls were very heavy: thus on the 10th, Bongong received 5·05 inches, Culna 3·08 inches, Khoolna 2·94 inches, Kanaghat 2·85 inches, Kandi 2·22 inches, and Tumlook 2·40 inches. On the 11th rainfall was again very general in the southern districts, and many stations received falls exceeding an inch, but on the 12th rainfall became rather less general and rather lighter.

The storm having disappeared inland, it then became possible for the monsoon winds to flow over the Province. Moderate rain commenced to fall in many districts, but it was neither very general nor heavy. A rather strong south-easterly current set in over the whole of Bengal from about the 13th, though, at the same time, a strong westerly current was blowing across the south of the Bay from the Arabian Sea. This seems to have deflected the area of heavy rainfall from the Bengal current towards the east coast of the Bay, and on the 14th Diamond Island reported the excessive rainfall of 9·58 inches. On the 15th a rapid fall of the barometer took place in the north-west angle of the Bay, resulting in the formation of another very feeble depression, the centre of which was near Palawore, and which was accompanied with cyclonic circulation of winds, and the result was that heavy rainfall was brought on this day to parts of South-West Bengal and Orissa, and thus Pooree reported 3·18 inches, False Point 4·46 inches, Dharmaallah 4·02 inches, Garbetta 2·18 inches, and Anda (Bankura district) 2·70 inches. On the 16th the depression had entirely passed inland, and a steady monsoon current from the Bay of Bengal flowed over the whole Province, and on the 14th and 15th moderate rainfall was general over almost the whole Province.

It will thus be seen that conditions have been rather favourable for rainfall in all districts, except North Bengal and Behar, and the presence and movement of the two depressions have brought good rain to Orissa, South-West Bengal, and Chutia Nagpur.

Pressure.—The variations of pressure over the Province during the week have been large. At the commencement pressure generally fell rapidly in connection with the formation of the depression, but with its disappearance pressure rose rapidly till the 14th, when a fall again occurred, which was succeeded on the 15th and 16th by a further rise; but even at the close of the week pressure was still below the normal over the whole Province, the defect being as large as a tenth of an inch in Chutia Nagpur. The mean pressure for the whole week has therefore been considerably in defect of the normal, the defects varying from 0·133 inch at Gopalpur and 0·132 inch at False Point to 0·071 inch at Purneah. Taking only those stations into consideration, from which records have been received for a number of years, and which therefore furnish reliable averages, the mean pressure for the week for the whole Province has been in defect of the normal by 0·107 inch. In Assam also pressure has been in defect of the normal by nearly a tenth of an inch at each of the three stations, and the mean defect has been 0·101 inch.

Temperature.—Owing to the defective rainfall in North Bengal and Behar, temperature has been about 2° above the normal in these districts, while in the other districts of Bengal the variations from the normal have been small, though temperature has been generally rather higher than usual. For the whole week the mean temperature of the Province has been 1·2° above the normal. In Assam also temperature has been rather largely above the normal, and the excess has averaged 3°.

Rainfall.—It has already been stated that conditions were rather favourable for rainfall in Orissa, South-West and East Bengal, and in Chutia Nagpur, and unfavourable elsewhere. Orissa has received an average of about four inches of rain, South-West Bengal and East Bengal about three inches, and Chutia Nagpur about two and a half inches, and in each district rain has fallen on an average of four or five days during the week. In North Bengal and South Behar the rainfall has averaged little more than an inch, while in North Behar it has been less than half an inch, though even these districts have received rain on two or three days

in the week. Compared with the normal fall for the period, and expressed as a percentage of that amount, the actual district average falls for the past week have been—Orissa 142 per cent., South-West Bengal 144 per cent., East Bengal 128 per cent., North Bengal 86 per cent., North Behar only 20 per cent., South Behar 63 per cent., and Chutia Nagpur 112 per cent. Taking all these large divisions as having an equal value in the calculation, the average rainfall of the whole Province for the week may be said to have been 92 per cent. of the normal. The following districts have received very heavy falls during the week:—Poores, Midnapore, 24-Pergunnahs, Howrah, Hooghly, Burdwan, Berhampore, Krishnagore, Jessore and Burrial; while the following are very largely in defect:—Bogra, Rajshahye, Maldah, Dinagepore, Rungpore, Julpigoree, Darjeeling, Purneah, Durbhanga, Chumparan, Gya, Patna and Sarun.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 16th of September 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 1886 May 1907.

The total fall of rain from 11th to 17th September 1887

1.62

The mean temperature and humidity are obtained by applying to the mean of the 10a, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;

A. PEDLER,

The 19th September 1887.

for Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE mortuary returns of the districts in Bengal for the month of July 1887 disclose the following results:—

1. That the deaths of 137,112 persons were registered in these districts among their population of 66,163,884, representing an annual death-rate of 24·84 per 1,000 against 20·40 per 1,000 during the preceding month, and 16·92 per 1,000 during the corresponding month of the preceding year, indicating, as compared with both the periods, a very considerable advance in the registration of the events.

2. That the highest casualty, rates were returned from the following districts:—

<i>Districts.</i>			<i>Districts.</i>		
		Ratio per mille.			Ratio per mille.
Shahabad	...	72·00	Darjiling	...	33·73
Gya	...	63·80	Hazaribagh	...	33·36
Puri	...	58·08	Bhagalpore	...	28·58
Patna	...	51·00	Chumparun	...	26·76
Lohardugga	...	42·72	Jalpaiguri	...	26·40
Monghyr	...	40·32	Balasore	...	26·04
Saran	...	38·40			

3. That the mortality from the specific death-causes specified in the table appended to this memorandum, as contrasted with the outcome of the corresponding month of the preceding year, stood as follows:—

				Ratio per mille during—	
				July 1887.	July 1886.
Cholera	5·52	·72
Small-pox	·07	·04
Fever	14·52	12·12
Bowel-complaints	·81	·60
Injury	·72	·72
Other causes	2·88	2·28

indicating a marked increase of mortality from cholera and fever, particularly those from the former, no noticeable differences from the rest of the diseases, the casualties from injury remaining stationary.

4. That while no district presented noticeably high mortality from small-pox and injury, Darjiling suffered pre-eminently from bowel-complaints; Puri from the maladies classed under the head of "other causes" (the former disease furnishing a death-rate of 10·32, and the latter of 11·52 per 1,000 of population), and the following districts from cholera and fever at the rates noted opposite them.

<i>Cholera.</i>			<i>Fever.</i>		
		Ratio per mille.			Ratio per mille.
Puri	...	40·08	Shahabad	...	29·16
Shahabad	...	37·44	Gya	...	25·80
Gya	...	29·88	Monghyr	...	25·58
Lohardugga	...	29·64	Lohardugga	...	25·20
Patna	...	14·52	Patna	...	24·24
Saran	...	14·04	Jalpaiguri	...	23·40
Balasore	...	9·36	Dinajpur	...	22·08
Monghyr	...	7·80	Rajshahye	...	21·72
Cuttack	...	6·72	Bhagalpore	...	21·00
Chumparun	...	6·24	Rangpore	...	20·40
Darbhanga	...	6·00			
Mozufferpore	...	5·40			
Hazaribagh	...	2·28			
Midnapore	...	2·16			

It will be seen from the foregoing table that Puri, Shahabad, Gya and Lohardugga suffered notably from cholera, and the same districts, excluding Puri and including Monghyr, from fever.

5. That under the heads of *Sex*, *Class* and *Age*, the mortality of the month was distributed as follows:—

<i>According to Sex.</i>			<i>According to Class.</i>			<i>According to Age.</i>		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Males	...	27·00	Christians	...	12·96	Under 1 year	...	148·08
Females	...	22·68	Hindus	...	27·48	1 and under 5 years	...	16·76
Ratio of male deaths to every 100 female deaths	...	117	Mahomedans	...	19·68	6 " " 10 "	...	16·20
			Budhists	...	17·04	10 " " 15 "	...	12·96
			Other classes	...	27·60	16 " " 20 "	...	16·20
						20 " " 30 "	...	16·56
						30 " " 40 "	...	18·12
						40 " " 50 "	...	22·56
						50 " " 60 "	...	30·60
						60 years and upwards	...	45·00

R. LINDERDALE, M.D., Deputy Surgeon-General,
Sanitary Commissioner for Bengal.

The 16th September 1887.

[illegible]

D., Deputy Surgeon-General,
Sanitary Commissioner for Bengal.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 10th September 1997.

MEMORANDUM.

THE returns from the principal Municipalities in Bengal presented, during the week ending 3rd September 1887, the following results :—

1. That births and deaths were recorded in these Municipalities at the rates respectively of 17·1 and 25·1 per 1,000 of population, as opposed to 19 and 28·4 per 1,000 in the preceding week ending 27th August, indicating a large reduction in the registration of both the events.

2. That these events were returned in the highest proportions from the following Municipalities :—

<i>Births.</i>				<i>Deaths.</i>			
			Ratio per mille.				Ratio per mille.
Monghyr	41·6	Gya	54·6
Bhagulpore	37·1	Arrah	45·6
Gya	35·6	Puri	42·0
Durbhanga	33·8	Suburbs of Calcutta	30·2
				Bhagulpore	35·3
				Monghyr	32·6
				Ranaghat	29·9
				Serampore	29·4

3. That, in comparison with the results of the preceding week, there was a considerable reduction in the death-rate from cholera; no variations in fatality from small-pox and injury; and only small differences in the casualty-rates from the rest of the death-causes :—

				Ratio per mille during the weeks ending—	
				3rd September 1887.	27th August 1887.
Cholera	2·6	4·9
Small-pox	·1	·1
Fever	9·7	10·4
Bowel-complaints	4·8	4·5
Injury	·3	·3
Other causes	7·6	8·2

4. That the Municipalities named below appear to have suffered the most from the diseases indicated in the foregoing table, excepting small-pox and injury, the casualties from which were nowhere above normal :—

<i>Cholera.</i>		<i>Fever.</i>		<i>Bowel-Complaints.</i>		<i>Other Causes.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.		Ratio per mille.
Arrah	14·8	Ranaghat	23·9	Puri	14·7	Gya	23·2
Butdwan	10·7	Bhagulpore	23·6	Suburbs of Calcutta	10·1	Puri	18·9
Monghyr	6·3	Arrah	22·7			Serampore	13·7
Gya	5·6					Midnapore	10·8
Durbhanga	3·9					Suburbs of Calcutta	9·0
Patna	3·6						

5. That the casualties in relation to *Sex*, *Class* and *Age*, were returned at the rates indicated below :—

<i>According to Sex.</i>		<i>According to Class.</i>		<i>According to Age.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.
Males	24·0	Christians	17·4	Under 1 year	233·2
Females	20·0	Hindus	20·8	1 and under 5 years	41·7
Ratio of male deaths to every 100 female deaths	109	Mahomedans	21·6	6 " " 10 "	14·7
				10 " " 15 "	7·2
				16 " " 20 "	14·1
				20 " " 30 "	14·2
				30 " " 40 "	11·3
				40 " " 50 "	20·8
				50 " " 60 "	30·0
				60 years and upwards	51·0

WEDNESDAY, SEPTEMBER 21, 1887.

PART IB.

ORDERS BY THE LIEUT. GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 17th September 1887.—It is hereby notified for general information that, in accordance with the recommendation of the Commissioners of the Purnia Municipality, made at a meeting, and in exercise of the power conferred on him by section 9 of Act III (B.O.) of 1884, the Lieutenant-Governor intends to revise the northern boundary of the said Municipality, unless good reasons be shown to the contrary within one month from the date of the publication of this notification within the above Municipality. The revised northern boundary of the Municipality will be as follows:—

On the north by a line drawn from the intersection of the centre lines of the Purnia and Ranchi road and North Lake road at their junction near Mangooria to a point on the *Chatani* rock, east of the village, situated at a distance of 620 feet at a bearing of 321° ; from this point to a point south of Raghupore busti at a distance of 3,190 feet at a bearing of $87^{\circ} 30'$; and thence to the south end of the west parapet of the Jamoonajore bridge along the Purnia and Parrakur road, also by the Jore itself for some distance.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 17th September 1887.—It is hereby notified that, under section 27, Act III (B.O.) of 1884, the Lieutenant-Governor is pleased to appoint Dr. D. Basu to be a Commissioner of the Nussirabad Municipality, in the district of Mymensingh, vice Dr. Crawford, transferred.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th September 1887.—It is hereby notified that, under section 19 of the Bengal Local Self-Government Act III (B.O.) of 1885, Baboo Ananda Chandra Das has been elected to be a member of the District Board of Burdwan in the place of Baboo Kedar Nath Sen, resigned.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 17th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Uttarpara Municipality for a public purpose, viz., for a night-soil depository, in the villages of Uttarpara and Maklah, pergunnah Boro, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigah 11 cottaks and 13 chittaks of standard measurement, is required. The land is bounded on the north by the Maklah drain; on the east by the Kalipore road; on the south by the lands of Proo Nath Banerjee, Haran Chunder Ghose, Sonaton Ghose, and Baboo Joy Kissen Mookerjee; and on the west by the Jakhraj lands belonging to Baboo Manohar Mookerjee.

This declaration is made, under the provisions of section 8 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 18th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a bathing platform, it is hereby declared that for the above purpose a piece of land No. 67, Nabootollah Lane, situated in the town of Calcutta, district 24-Pergunnah, measuring, more or less, one cottah only, is required.

The boundaries of the land are as follow:—On the north and west the premises of No. 67, Nabootollah Lane; on the south the premises of No. 69, Nabootollah Lane; and on the east Nabootollah Lane.

A plan and specification of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 18th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for improving Sikdarpara Bustee, it is hereby declared that for the above purpose a piece of land No. 29-2, Sikdarpara Street, situated in the town of Calcutta, district 24-Pergunnah, measuring, more or less, 4 chittacks and 22½ square feet, is required.

The boundaries of the land are as follow:—On the north and west public roads; on the south the premises of No. 29-2, Sikdarpara Street; and on the east a public bathing platform.

A plan and specification of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 18th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a bathing platform, it is hereby declared that for the above purpose a piece of land No. 8, Shampooker Street, situated in the town of Calcutta, district 24-Pergunnah, measuring, more or less, one cottah only, is required.

The boundaries of the land are as follow:—On the north and east the premises of No. 8, Shampooker Street; on the south a new road; and on the west Mullick's Lane.

A plan and specification of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 18th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a bathing platform, it is hereby declared that for the above purpose a piece of land No. 2—2, Lower Circular Road, situated in the town of Calcutta, district 24-Pergunnah, measuring, more or less, 1 cottah 2 chittacks and 80 square feet only, is required.

The boundaries of the land are as follow:—On the north, south, and west the premises of No. 2—2, Lower Circular Road; and on the east Camac Street.

A plan and specification of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 18th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a bathing platform, it is hereby declared that for the above purpose a piece of land No. 104, Upper Circular Road, situated in the town of Calcutta, district 24-Pergunnah, measuring, more or less, one cottah only, is required.

The boundaries of the land are as follow:—On the north and west the premises of No. 104, Upper Circular Road; on the south Hogul Cooria Gully; and on the east Upper Circular Road.

A plan and specification of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 18th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Motihari Municipality for a public purpose, viz., for trenching night-soil in the village of Motihari, pergunnah Majhanah, zillah Chumparan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 8 cottaks and 6 chittaks of local measurement, by a rod of $7\frac{1}{2}$ cubits=1 rood 9 poles, is required. The land is bounded on the north by Akloo Mian and Phool Ohund's fields; on the east by Chutto Duasadh's fields; on the south by Bakhtawan Tewarie's Bagicha; and on the west by Laung Mian's garden.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

Chittagong Collectorate, the 19th August 1887.

A. MANSON, Collector.

NOTICE is hereby given, under section 8, Act XI of 1859, that the undermentioned dependent tenure in the Patia Khas Mahal, in the district of Chittagong, will be put up to public and unreserved sale at the Collector's office of that district on the 19th day of October 1887 for arrears of rent and cesses remaining unpaid after the last day of payment, 25th day of May 1887:—

Number of dependent tenures in the khas mehal rental.	Name of dependent tenure with its situation.	ANNUAL RENTAL.		AMOUNT OF ARREARS FOR WHICH THE TENURE WILL BE SOLD.			REMARKS.
		Rent.	Cesses.	Rent.	Cesses.	Total.

S. J. DOUGLAS, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

1st.—The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as the proprietors of these estates, and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

T. L. JENKINS, Coid. Deputy Collector in charge.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchaser will be subject to the following conditions of sale:—

1st.—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him free of revenue.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchaser to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Patna Collector's Office, the 31st August 1887.

C. R. MANNING, Offg. Collector.

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated along the main line and Hajipore Extension of the Tirhoot State Railway, in the district of Moorshpore, will be put up to sale at the Moorshpore Collectorate on the 7th October 1887, and at Silant Station on the 8th October 1887, and at Hajipore on the 10th October 1887.

The purchasers of the several plots of land will be subject to the following conditions:—

- (1).—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough the land closer than 3 feet from its foundation.
- (2).—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
- (3).—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by the noon of the 16th day after the sale, reckoning the day of sale as one, or if that day be a close holiday then by the noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to the Government and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement in the case of original sale.
- (4).—The balance of purchase-money due under 3rd condition may be paid either to the Deputy Collector in charge, or into the Government Treasury at Moorshpore.
- (5).—The plot of land will be sold revenue free to the highest bidder.
- (6).—The purchaser shall be put in possession on receipt of the order of the District Collector approving the sales, but such possessions will be liable to be disturbed in case the final confirmation of the Board of Revenue shall not be accorded to the proceedings.

No. 2.

Commissariat Advertisement for Tea for the Madras Presidency:

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office, Madras) will be received by the Commissariat Storekeeper-General, Madras, until 1 o'clock on Monday, the 17th October 1897 (and opened by him at the same time and place in presence of those interested), for the supply, by contract, of Indian black tea not exceeding in quantity 139,745lbs., to be delivered at the Commissariat Stores at Madras to the Commissariat Storekeeper-General on or before the 30th day of April 1898 free of all charges whatsoever. No payment will be made on account of such supply prior to the 1st April 1898. The above quantity is subject to a possible deduction of 117,000lbs. or less, if favourable tenders for out-stations (as per paragraph 8) are received.

3. **Earnest Deposits.**—Each tender must be accompanied by a receipt from the Secretary of the Bank of Madras acknowledging the payment of earnest-money equal to the amount shown in the table in paragraph 3 according to the number of stations tendered for, or by Government promissory notes to the same amount duly endorsed over to the Commissariat Storekeeper-General, Madras. If such earnest-money is not lodged, the tender will be rejected. Tenders to be sealed and superscribed "Tender for Tea."

3. Tenderers have the option of tendering for the supply of the whole quantity of tea at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given opposite each station. In the latter case the amount inserted opposite each station is the earnest-money to accompany such tenders in the manner set forth in the preceding paragraph:—

						Tea.	Earnest-money.
						lbs.	Rs.
Bangalore	23,000	240
Belgaum	12,000	150
Bellary	12,000	150
Cannanore	7,000	90
Kamptee	12,000	150
Madras	22,745	280
Secunderabad	38,000	480
Wellington	13,000	150
Total						139,745	1,750

4. **Security Deposits.**—The earnest-moneys of successful competitors will be retained until they lodge with the Commissariat Storekeeper-General at Madras (or with the Executive Commissariat Officers in case separate tenders are accepted for each station) a security deposit of 10 per cent. on the value of the quantity or quantities of tea tendered by them. The security deposit may be lodged either in cash or in Government promissory notes. If the contractor desires to lodge the deposit in cash, he should pay the same to the Secretary of the Bank of Madras, or to the nearest Government treasury; and forward to the Storekeeper-General the Bank or treasury receipt for the same. If Government promissory notes are deposited, they are to be endorsed over to the Commissariat Storekeeper-General, Madras, for the time being as security for the due fulfilment of the contract. The earnest-moneys deposited with the successful tenders will then be returned to the tenderers.

5. The earnest-moneys of all unsuccessful competitors will be returned on the decision of Government as to the acceptance of any tender being received.

6. **Contract Deed.**—The successful competitors will be required to sign contracts on the basis of their tenders containing the usual provisions in the form used in the Commissariat Department (form whereof can be seen on application to the Commissariat Storekeeper-General at Madras), and to furnish the requisite security deposit within eight days from the date on which the acceptance of their tenders is notified to them. Should the successful competitors fail to sign the contracts or to furnish the security deposits within the time specified, so much of their earnest moneys will be forfeited as will reasonably compensate Government for such breach of contract, and their tenders will be considered as having been rejected. It is, however, to be clearly understood that the forfeiture of the total amount (if necessary) of such earnest-moneys for such default shall in no way preclude Government from recovering from the defaulting competitors all such damages as Government may sustain by reason of such defaults, and that the amount of such earnest-moneys is not to be taken as the total amount of compensation payable to Government for such defaults.

7. **Size and Weight of Chests.**—The chests containing the tea must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches

Weight of wooden chest...	18
Do. lead lining	4
Do. tea in chest	59
Gross weight						...	73

long by 15 inches wide and 12½ inches deep (outside measurement), and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead.

lining. No chests of other dimensions than those specified above will be received. No broken or damaged chests will be received. Each chest should contain 60lbs. of Indian tea and should be marked "60lbs. net." A certain number of the chests will be opened and examined by a Committee to ascertain that they contain not less than the weight represented, dependent on which examination the remainder will be taken to contain the net weight marked thereon.

8. **Quality of tea.**—The quality of tea will be subject to the approval of, or rejection by, a Committee to be appointed, at the request of the Commissary-General, by the Officer Commanding the District, and payment will be made for such quantity of tea only as may be approved of by the said Committee.

9. **Samples.**—Samples of tea can be had free of charge on application at the Commissariat Storekeeper-General's Office at Madras.

10. Each tender must be accompanied by a sample chest containing 60lbs. of the tea it is proposed to supply, which will be paid for at the rates tendered if of good quality.

11. **Defaults.**—If the contractors make default in delivering the whole or any part of the tea on or before the 30th April 1898, so much of the security deposited by them as will reasonably compensate Government for such breach of contract will be liable to be realized by Government, and, should such security be insufficient to compensate Government for such breach of contract, the contractors will be liable to pay to Government the difference between the amount of such security and such compensation, and any such compensation may, at the option of the Government, be deducted either from the moneys payable to the contractors for the tea delivered by them or from the securities deposited by them.

General Stipulations.

12. All further information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

13. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest-money shall be forfeited to Government.

16. No offers by telegram will be accepted.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

No. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 26th October 1887, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 10,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat Stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1888 to 30th September 1888. The above quantity is subject to a possible deduction of 10,000 Imperial gallons of matured rum and 10,824 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 8, are received.

1. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

2. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

DESCRIPTION OF ARTICLES.	PROBABLE QUANTITY.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes or Government promissory notes.	Compensation to be paid to Government for each breach of contract.
	Matured rum.	New rum.					
MADRAS.	Im. GALS.	Im. GALS.					
Best sugar-cane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	8,728	The whole quantity must be delivered between 1st April and 30th September 1888 in such quantities and by such dates as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in to the warehouse at the General Arrack Depot, Commissariat Storekeeper-General's Office, Madras.	Rupees 200 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced as a voucher of payment, or Government promissory notes to the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding Rs. 2 per gallon rejected or not delivered.
Best sugar-cane new rum of Indian manufacture, 5 degrees over London proof.	11,012					
RANGOON.							
Best sugar-cane new rum of Indian manufacture, 5 degrees over London proof.	10,329	Ditto to the Store and Shipping Officer, Rangoon.	Ditto Rangoon ...	Rupees 250 ditto		
Best sugar-cane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,500					
Total Imperial gallons	18,228	21,971			Total Rs. 1,150		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the samples not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he proposes supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

No. 10.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Store-keeper-General's Office, Madras) will be received by the Commissariat Store-keeper-General, Madras, until 1 o'clock on Monday, the 17th October 1887 (and opened by him at the same time and place in presence of those interested), for the supply, by contract, of Indian or China tea, not exceeding in quantity 34,484 lbs., to be delivered either to the Commissariat Store-keeper-General at Madras, or at the Commissariat Stores at Rangoon to the Commissariat Store and Shipping Officer there, on or before the 30th April 1888, free of all charges whatsoever.

No payment will be made on account of such supply prior to the 1st April 1888.

2. **Earnest Deposits.**—Each tender must be accompanied by a receipt from the Secretary of the Bank of Madras, acknowledging the payment of earnest-money equal to the amount shown in paragraph 3, or by Government promissory notes to the same amount duly endorsed over to the Commissariat Store-keeper-General, Madras. If such earnest-money is not lodged, the tender will be rejected. Tenders to be sealed and superscribed "Tenders for Tea."

3. Tenderers have to tender for the supply of the whole quantity of tea either at Madras or at Rangoon as mentioned in paragraph 1, the earnest-money to accompany each tender in the manner set forth in the preceding paragraph.

	Tea.	Earnest-money.
	Rs.	Rs.
Rangoon	34,484	450

Security Deposits.—The earnest-moneys of successful competitors will be retained until they lodge with the Commissariat Store-keeper-General at Madras (or with the Store and Shipping Commissariat Officer, Rangoon) a security deposit of 10 per cent. on the value of the quantity or quantities of tea tendered by them. The security deposit may be lodged either in cash or in Government promissory notes. If the contractor desires to lodge the deposit in cash, he should pay the same to the Secretary of the Bank of Madras or to the nearest Government treasury, and forward to the Store-keeper-General the Bank or treasury receipt for the same. If Government promissory notes are deposited, they are to be endorsed over to the Commissariat Store-keeper-General, Madras, for the time being, as security for the due fulfilment of the contract. The earnest-money deposited will then be returned to the tenderer.

5. The earnest-money of all unsuccessful competitors will be returned on the decision of Government as to the acceptance of any tender being received.

6. **Contract Dead.**—The successful competitors will be required to sign contracts on the basis of their tenders containing the usual provisions in the form used in the Commissariat Department (form whereof can be seen on application to the Commissariat Store-keeper-General at Madras), and to furnish the requisite security deposit within eight days from the date on which the acceptance of their tenders is notified to them. Should the successful competitors fail to sign the contracts or to furnish the security deposits within the time specified, so much of their earnest-moneys will be forfeited as will reasonably compensate Government for such breach of contract, and their tenders will be considered as having been rejected. It is, however, to be clearly understood that the forfeiture of the total amount (if necessary) of such earnest-moneys for such defaults shall in no way preclude Government from recovering from the defaulting competitors all such damages as Government may sustain by reason of such defaults, and that the amount of such earnest-moneys is not to be taken as the total amount of compensation payable to Government for such defaults.

7. **Size and Weight of Chests.**—The chests containing the tea must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches long by 16 inches wide and 12½ inches deep (outside measurement), and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead lining.

Weight of wooden chest	10
Do. lead lining	6
Do. tea in chest	60
Gross weight	76

No chests of other dimensions than those specified above will be received. No broken or damaged chests will be received.

Each chest should contain 60 lbs. of Indian or China tea and should be marked "60 lbs. net." A certain number of the chests will be opened and examined by a committee to ascertain that they contain not less than the weight represented, dependent on which examination the remainder will be taken to contain the net weight marked thereon.

8. **Quality of Tea.**—The quality of tea will be subject to the approval of, or rejection by, a committee to be appointed, at the request of the Commissary-General, by the Officer Commanding the District, and payment will be made for such quantity of tea only as may be approved of by the said committee.

9. **Samples.**—Samples of tea can be had free of charge on application at the Commissariat Store-keeper-General's Office at Madras.

10. Each tender must be accompanied by a sample chest containing 60 lbs. of the tea it is proposed to supply, which will be paid for at the rates tendered if of good quality.

11. **Defaults.**—If the contractors make default in delivering the whole or any part of the tea on or before 30th April 1888, so much of the security deposited by them as will reasonably compensate Government for such breach of contract will be liable to be realized by Government, and should such security be insufficient to compensate Government for such breach of contract, the contractors will be liable to pay to Government the difference between the amount of such security and such compensation, and any such compensation may, at the option of Government, be deducted either from the moneys payable to the contractors for the tea delivered by them or from the securities deposited by them.

General Stipulations.

12. All further information may be had on application at the Commissariat Store-keeper-General's Office at Madras.

13. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest money shall be forfeited to Government.

16. No offers by telegram will be accepted.

(By order of the Commissary-General.)

Commissariat Store-keeper-General's Office,
Madras, 19th August 1887.

B. GOMPERTZ, Major,
Commissariat Store-keeper-General.

Commissioners for making Improvements in the Port of Calcutta.

NOTICE

UNDER SECTION 69 OF ACT V (B.O.) OF 1870.

G. H. SIMMONS, Traffic Manager.

THE public are hereby informed that the well-known Kartick Baroni Fair, which is held every year on the banks of the Dhaleswari river, near Moonsheegunge, in the district of Dacca, will commence on the 31st October 1887 A.D., corresponding to the 15th Kartick 1294 B.S. and continue up to 14th December 1887. Tradesmen, dealers and others may buy and sell there during these six weeks.

L. HARR, Chairman.

Notice.

It is hereby given that the District Board of Julpigoree have decided that road cess shall be levied at the maximum rate of half anna in the rupee of the annual value of lands in the district during the ensuing year 1888-89.

PRANATH BANERJEE, Vice-Chairman,
District Board, Julpigoree.

(641—2)

Notification.

UNDER section 46 of the Local Self-Government Act of 1880, the District Board of Bogra, at its meeting held on the 18th of August 1887, determined to levy road cess for the year 1888-89, commencing from 1st April 1888, in the district of Bogra, at the maximum rate, viz., one-half anna on each rupee of the annual value of lands.

J. J. LIVERAY, Chairman.

Postal Notice.

IT is hereby notified for general information that only two deliveries daily will be made from Calcutta General Post Office and its Town Sub-Offices on the two great days of the Durga Poojah festival, viz., the 23rd and 24th September current.

The delivery arrangements on these days will be in all respects the same as on Sunday.

The other departments of the General Post Office and its Town Sub-Offices will be open as usual to the public for the receipt of registered and insured articles and of parcels, and for the issue and payment of Money Orders, as well as Savings Bank transactions.

E. HURROW, Presidency Post Master.

General Post Office, Calcutta, the 15th September 1887.

Notes on Forestry,

By C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wymen & Co., Calcutta. Price Rs. 3-6, or including postage, Rs. 4. Or of the publishers, Messrs. Triebner & Co., Ludgate Hill, London. Price five shillings.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 5 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PADLER,

Offg. Meteorological Reporter to the Govt. of Bengal.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the Calcutta Gazette of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

Without postage. With postage.

For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
" each of the Madras, Bombay, and Allahabad Series ...	6 0	7 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	"	2 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	"	1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

" Thacker & Co., Bombay.

" Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

" Curator of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 4489A.

GENERAL.—The 17th September 1887.—Mr. T. J. Mendes, Deputy Magistrate and Deputy Collector, Karigram, Runpore, on leave, is appointed temporarily to have charge of the Bhuddruck sub-division of the Balasore district, during the absence, on leave, of Mr. J. S. Davidson, or until further orders.

Mr. G. E. Manisty, Joint-Magistrate and Deputy Collector, is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted temporarily to the Sudder station of the Shahabad district on being relieved of his present appointment as Officiating Magistrate and Collector of that district.

The 20th September 1887.—Baboo Dwarka Nath Mookerjee, Deputy Magistrate and Deputy Collector, Sarun, is allowed furlough for one year, under section 132 of the Civil Leave Code, with effect from such date as he may avail himself of it.

Baboo Brohmanath Sen, Deputy Magistrate and Deputy Collector, on deputation as Manager of Kumar Padmanund Singh's estates, is allowed leave for two months, under section 72 of the Civil Leave Code, with effect from the 1st September 1887.

The 21st September 1887.—Mr. C. H. Vowell, Magistrate and Collector, Pubna, on leave, is appointed to be Magistrate and Collector of Midnapore.

Mr. E. H. Ruddock, Magistrate and Collector, Rajshahye, is allowed leave for two months, under section 72 of the Civil Leave Code, with effect from the 10th proximo, or such subsequent date as he may be relieved.

Mr. H. Lee, Officiating Magistrate and Collector, Midnapore, is appointed to act as Magistrate and Collector of Rajshahye, during the absence, on leave, of Mr. E. H. Ruddock, or until further orders.

Mr. J. Anderson, Magistrate and Collector, Moorshedabad, is allowed furlough for eleven months and twenty days, under section 56, chapter V of the Civil Leave Code, with effect from the 30th September 1887.

The 22nd September 1887.—Mr. J. S. Davidson, Deputy Magistrate and Deputy Collector, Bhuddruck, Balasore, is allowed leave for two months and ten days, under section 72 of the Civil Leave Code, with effect from the date on which he availed himself of it.

The orders of the 29th August last, granting privilege leave for one month to Baboo Chunder Kant Gangooly, Sub-Deputy Collector, Mynaguri, Julpigoree, and appointing Baboo Komal Chunder Dett to act for him, are cancelled.

The 25th September 1887.—Baboo Okhoy Coomar Sen, Personal Assistant to the Commissioner of the Dacca Division, is allowed leave for three months, under section 72 of the Civil Leave Code, with effect from any date after the 16th proximo on which he may be relieved.

Baboo Okhoy Coomar Sen, Deputy Magistrate and Deputy Collector, Backergunge, is appointed to act as Personal Assistant to the Commissioner of the Dacca Division, during the absence, on leave, of Baboo Okhoy Coomar Sen, or until further orders.

Mr. F. H. Smith, Deputy Magistrate and Deputy Collector, Pakour, Sonthal Pergunnah, is allowed leave for fifteen days, under section 72 of the Civil Leave Code, with effect from the date on which he availed himself of it.

Baboo Chunder Bhawan Chuckerbatty, Deputy Magistrate and Deputy Collector, Patna, is allowed leave for three months, under section 72 of the Civil Leave Code, with effect from the date on which he may be relieved.

Baboo Peary Mohun Banerjee, Deputy Magistrate and Deputy Collector, on leave, is posted to the Sudder station of the Patna district.

The 27th September 1887.—Mr. F. H. Barrow, Officiating Magistrate and Collector, Chumparun, is allowed leave for one month and twelve days, under section 72 of the Civil Leave Code, with effect from the 3rd October 1887.

Mr. G. E. Manisty, Joint-Magistrate and Deputy Collector, Shahabad, is appointed to act as Magistrate and Collector of Chumparun, during the absence, on leave, of Mr. F. H. Barrow, or until further orders.

Mr. C. R. Marriott, Officiating Joint-Magistrate and Deputy Collector, Patna, is appointed to act temporarily as Magistrate and Collector of Moorshedabad, until further orders.

POLICE.—*The 26th September 1887.*—Mr. E. C. Ryland, Officiating Assistant Superintendent of Police, Serampore, Hooghly, is allowed leave for one month, under rule 2, section 138 of the Civil Leave Code, with effect from the 7th proximo.

REGISTRATION.—*The 26th September 1887.*—Moulvie Hadi Ali Khan, Special Sub-Registrar, Gya, is allowed leave for seven weeks, under section 72 of the Civil Leave Code, with effect from the date on which he availed himself of it.

Moulvie Soban Ali Khan, Sub-Registrar, Jehanabad, Gya, is appointed to act as Special Sub-Registrar of Gya, during the absence, on leave, of Moulvie Hadi Ali Khan, or until further orders.

EDUCATION.—*The 23rd September 1887.*—Mr. C. H. Tawney, Principal, Presidency College, is allowed privilege leave for three months, under chapter V of the Civil Leave Code, with effect from the 26th instant, or such subsequent date as he may avail himself of it.

This cancels the order of the 1st December 1886, granting furlough for seven months to Mr. Tawney.

Mr. A. Pedler, Professor, Presidency College, is appointed to act as Principal of that College, during the absence, on leave, of Mr. C. H. Tawney, or until further orders, in addition to his duties as Officiating Meteorological Reporter to the Government of Bengal.

The 24th September 1887.—In modification of the order of the 17th December last, Mr. J. Woud-Mason's substantive appointment *pro tempore* to be Professor of Comparative Anatomy in the Medical College, Calcutta, has effect from the 6th March 1886.

The 27th September 1887.—Baboo Nobin Chandra Dey, Law Lecturer, Patna College, is allowed leave without allowances for fifteen days, with effect from the 3rd proximo.

Baboo Abinash Chandra Ghosh, M.A., B.L., is appointed to act as Law Lecturer, Patna College, during the absence, on leave, of Baboo Nobin Chandra Dey, or until further orders.

OPIMUM.—*The 26th September 1887.*—Mr. C. M. Jerdon, Sub-Deputy Opium Agent, Aligarh, is allowed furlough for one year, under section 50, chapter V of the Civil Leave Code, with effect from the 10th proximo, or such subsequent date as he may avail himself of it.

MEDICAL.—*The 26th September 1887.*—Surgeon-Major L. Cameron, Civil Surgeon, Rajshahye, is allowed leave for two months, under section 72 of the Civil Leave Code, with effect from the date on which he was relieved.

Dr. R. S. Ashe, Civil Medical Officer, Julpigoree, is appointed to act as Civil Medical Officer of Rajshahye, during the absence, on leave, of Surgeon-Major L. Cameron, or until further orders, with effect from the date on which he joined his appointment.

Surgeon-Major C. J. W. Meadows, Officiating Civil Surgeon, Patna, and Superintendent, Temple Medical School, Bankipore, is allowed leave for thirty-five days, under section 72 of the Civil Leave Code, with effect from the date on which he was relieved.

Dr. R. Macleod, Civil Medical Officer, Gya, is appointed to act as Civil Medical Officer of Patna and Superintendent, Temple Medical School, Bankipore, during the absence, on leave, of Surgeon-Major C. J. W. Meadows, or until further orders, with effect from the date on which he joined his appointment.

VACCINATION.—*The 26th September 1887.*—Surgeon L. A. Waddell, Deputy Sanitary Commissioner, Ranahi Circle, is appointed to act as Deputy Sanitary Commissioner, Darjeeling Circle, during the absence, on leave, of Surgeon-Major J. J. Wood, or until further orders.

The following are republished from the *Asian Gazette* :—

No. 301.—*The 13th September 1887.*—Privilege leave of absence, under section 74 of the Civil Leave Code, is granted to Mr. A. F. Steinberg, c.s., Assistant Commissioner, with effect from 14th September 1887, or any subsequent date from which he may avail himself of it, until the 31st October 1887.

No. 305.—*The 14th September 1887.*—The services of Mr. J. Kelleher, c.s., District and Sessions Judge of Sylhet, and Sessions Judge of Cachar, at present on privilege leave of absence for three months, are replaced at the disposal of the Government of Bengal, with effect from the 24th September 1887, the date of expiry of his leave.

No. 103.—*The 12th September 1887.*—Baboo Jiban Kristo Chatterji, First Subordinate Judge of Chittagong, whose services have been placed at the disposal of the Chief Commissioner by Bengal Government notification of the 31st August 1887, is appointed to be Subordinate Judge of Sylhet, with effect from the 19th October 1887, the date on which Baboo Ram Kumar Pal Chaudhuri retires.

No. 104.—In exercise of the powers conferred on him by section 25 of Act XII of 1887 (the Civil Courts Act), the Chief Commissioner is pleased to invest Baboo Jiban Kristo Chatterji, Subordinate Judge of Sylhet, with the powers of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 100, within the limits of the Sadar Munsifi in the district of Sylhet.

No. 106.—*The 14th September 1887.*—Leave of absence for seven days, under section 134, chapter X of the Civil Leave Code, has been granted to Baboo Rabi Chandra Ganguli, First Munsif of Habiganj, in the district of Sylhet, in extension of the leave granted to him in notification No. 94, dated the 5th September 1887.

NOTICE TO MARINERS—(No. 54).

RED SEA—EAST SHORE.

Temporary buoys North of Jebel Zukur.

Information has been received from the Hydrographer that, as it is the intention of the Admiralty that a further examination of the area lying some 20 miles North of Jebel Zukur—in which locality the steam-ships *Avon* and *Teddington* have recently reported dangers—shall be made during the months of October and November 1887:—

Notice is hereby given that whilst this examination is in progress, certain buoys and floating beacons will be moored in the area abovementioned.

Mariners are requested not to disturb any of these temporary surveying marks, and are warned to steer clear of them; for which purpose it will be necessary to keep to the westward of the line joining Centre Peak Island and Abu Ail.

By direction of the Government of Bengal,

ARTHUR W. STIRPE, Captain, R.M.,
Port Officer of Calcutta.

Port Office, Calcutta, the 15th September 1887.

JUDICIAL DEPARTMENT.

No. 4490A.

The 19th September 1887.—Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Baboo Anant Lal Chatterjee and Moulvie Anwar Ahmed, Sub-Deputy Collectors of Madhubani and Tajpore, respectively, in the district of Durbhunga, to take down evidence in criminal cases in the English language.

Baboo Umesh Chander Batabyal, Deputy Magistrate and Deputy Collector of Manbhoom, is vested with powers under section 110 of the Code of Criminal Procedure.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Baboo Niharun Chander Ghuttack, Sub-Deputy Collector, Sectamarhi, Mozufferpore, to take down evidence in criminal cases in the English language.

The 21st September 1887.—Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Baboo Baroda Kant Gangooly, Deputy Magistrate, Rajshahya, to take down evidence in criminal cases in the English language.

The 22nd September 1887.—Mr. H. Luson, Officiating Joint-Magistrate and Deputy Collector, Mozufferpore, is vested with powers under sections 110 and 123 of the Code of Criminal Procedure.

Baboo Bhuban Mohun Gangooly, a Munsif in the district of Midnapore, is vested with the powers of a Judge of a Court of Small Causes for the trial of suits cognizable by such Court up to the amount of Rs. 50 within the local limits of the Sudder Munsifi of 72 of district.

The 27th September 1887.—Baboo Amvica Charn Mukerjee, B.L., is appointed to be an of Pat Munsif in the district of Bankoora for six months.

leave,
date of

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 21st September 1887.—It is hereby notified, under the provisions of section 15 of Act V of 1861, that as the villages of Chagaldi, Shontoshdi, and Charadi, in police station Backergunge, in the district of Backergunge, are still in a disturbed and dangerous state, owing to the existence of disputes regarding the possession of lands and collection of rents, the Lieutenant-Governor has sanctioned the retention, for a further period of one year, commencing from the 1st October 1887, of a reduced special police force of one head-constable and two constables to be quartered in the above mentioned villages. The cost of the police force noted below will be assessed on, and levied from, the inhabitants of the aforesaid villages in proportion to their respective means:—

			Rs.	A.	P.
1 Head-constable, 2nd grade	20	0	0

SENATE HOUSE,
The 15th September 1887.

P. K. RAY,
Registrar.

CALCUTTA UNIVERSITY.

NOTICE.

The Senate will proceed in the month of March, 1888, to the election of a Tagore Professor of Law for the term of one year to commence on the 1st of September, 1888.

The salary of the Professorship is Rs10,000 per annum, and the Professor will be expected to deliver a course of not less than twelve lectures upon one of the following subjects:—

- (1) The Law relating to Damages.
- (2) The Law relating to Riparian Rights, including the Law of Alluvion and Diluvion, and the Law of property in navigable and non-navigable rivers.
- (3) The Mahomedan Law relating to Marriage, Dower, Divorce, Legitimacy and Guardianship of Minors according to the Sunnis.
- (4) The Mahomedan Law relating to Marriage, Dower, Divorce, Legitimacy and Guardianship of Minors according to the Shiaks.
- (5) The Law of Endowments, both Hindu and Mahomedan.

Candidates for the Professorship are requested to forward their applications to the Registrar on or before the 1st of January, 1888, and at the same time to state on which of the above-mentioned five subjects they are prepared to lecture.

C. H. TAWNEY, *Off. Director of Public Instruction.*

DARJEELING, the 6th September 1887.

NOTIFICATION.

In accordance with the Government of Bengal Notification of the 23rd July 1887, notice is hereby given, to those whom it may concern, that the next half-yearly examination of Compounders will be held at 11 A.M. on Wednesday, the 12th October 1887, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce one of the following certificates:—

- (a) From the Superintendent of a Vernacular Medical School that he has attended regularly for one year the compounder class of the school.
- (b) From the legally-qualified medical manager of a chemist's and druggist's establishment recognised by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment.
- (c) From a Civil Surgeon that he has assisted in the dispensing of drugs at the Sudder dispensary of a civil station for a period of five years.

3. Applicants must register their names and submit their certificates, together with a fee of Rs. 3, at least one week before the 12th October 1887, at the office of the undersigned.

Note.—The students belonging to the compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

N. B.—The attention of candidates is drawn to Rule 5, section (b) of the Government notification of the 23rd July 1887, from which they will observe that the chemists' and druggists' establishments from the legally-qualified medical managers of which they obtain their certificates will have to be recognised by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

S. C. MACKENZIE, M.D.,
Superintendent, Campbell Medical School.

CAMPBELL MEDICAL SCHOOL, CALCUTTA, the 17th August 1887.

TREASURY NOTICE.

UNCOVENANTED DEPUTY COLLECTOR BAHADU BUNKIM CHUNDER CHATTERJEE has been placed in charge of the Midnapore Treasury, and is authorized to draw bills on other treasuries.

E. V. WESTMACOTT, *Offg. Commissioner.*

COMM'R'S OFFICE, BURDWAN DIVISION, the 20th September 1887.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1227B.

Notice is hereby given that the Eleventh Sale of Opium, the Provision of 1885-86, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Wednesday, the 2nd November 1887, at 11 A.M., and will comprise 4,750 chests, viz.—

			Chests.
Opium manufactured at the Patna Factory	2,375
Ditto ditto at the Ghazepore Factory	2,375
		Total	4,750

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 29th November 1886, and published in the *Government and Exchange Gazette*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 7th and 17th November 1887, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Monday, the 7th November 1887, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Thursday, the 17th November 1887.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazepore Factories will be

brought to sale in the present year about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

Date.	Manufactured at the Patna Factory. About chests.	Manufactured at the Ghazepore Factory. About chests.	Total about chests.
On or about Thursday, 1st December 1887 ...	2,375	2,375	4,750

By order of the Board of Revenue, L. P.,

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L.P., Calcutta, the 20th September 1887.

No. 11316.

NOTICE is hereby given that the Tenth Sale of Opium, the provision of 1885-86, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Thursday, the 6th October 1887, at 11 A.M., and will comprise 4,750 chests, viz:—

		Chests.
Opium manufactured at the Patna Factory	2,375
Ditto at the Ghazepore Factory	2,375
Total	...	4,750

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 29th November 1886, and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 11th and 21st October 1887, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Tuesday, the 11th October 1887, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Friday, the 21st October 1887.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazepore Factories will be brought to sale in the present year about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

Date.	Manufactured at the Patna Factory, about chests.	Manufactured at the Ghazepore Factory, about chests.	Total about chests.
On or about Wednesday, 2nd November 1887 ...	2,375	2,375	4,750
On or about Thursday, 1st December " ...	2,375	2,375	4,750
Total	4,750	4,750	9,500

By order of the Board of Revenue, L. P.,

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L.P., CALCUTTA, the 30th August 1887.

NOTIFICATION.

It is hereby notified for general information that the next elections of Commissioners under Act III (B.C.) of 1884 in all municipalities in the district of Hooghly, in which the last election was held in the year 1884, will take place on the 28th and 29th November 1887.

E. V. WERNHACOTT, *Offg. Commissioner.*

COMMR.'s OFFICE, BURDWAN DIVISION, the 20th September 1887.

NOTIFICATION.

In supersession of this office notification of the 20th July last, it is hereby notified for general information that an election will be held, under section 27, Act III (B.C.) of 1884, on Wednesday, the 19th October 1887, in Ward No. 11 of the Raneegunge Municipality, in the district of Burdwan, for the purpose of electing a Commissioner in the place of Baboo Protap Chandra Ghose, who has ceased to be a Commissioner under section 20 of the Act.

Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following order, issued by the Government of India in the Legislative Department, is published for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd September 1887.

No. 29.—Mr. H. A. D. Phillips, c.s., Under-Secretary to the Government of Bengal, Judicial, Political and Appointment Departments, is appointed to officiate as Deputy Secretary to the Government of India in the Legislative Department, during the absence on deputation of Mr. J. M. Macpherson, or until further orders.

A. B. WILSON, *Registrar,*
for Secretary to the Government of India.

The following orders, issued by the Government of India in the Department of Finance and Commerce, are republished for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATIONS.

PENSIONS AND GRATUITIES.

Simla, the 23rd September 1887.

No. 5144.

RESOLUTION.—By the Government of India, Department of Finance and Commerce.

Read—

Paragraph 3 of a Despatch from the Right Honourable the Secretary of State, No. 196 (Financial), dated 28th July 1887, regarding certain alterations in the Uncovenanted Service Pension Rules.

Para. 3. I accordingly sanction the grant of invalid and compensation pensions to members of the Uncovenanted Service on the following scale, viz. :—

$\frac{1}{15}$ ths of the officer's average emoluments after 10 years' qualifying service, and thereafter an additional $\frac{1}{25}$ th of average emoluments for each additional year's service up to 24.

$\frac{1}{15}$ ths of average emoluments after 25 years' qualifying service.

The maximum limit for half-pay pensions will be Rs. 5,000, and the maximum for the pensions for 10 to 24 years' service will be 10 to 24 twenty-fifths of that amount.

Resolution.—The Governor-General in Council directs that from the 17th August 1887, the date of the receipt of the above-quoted despatch, the new scale of invalid,

compensation, and superannuation pensions given in the following table be substituted for that stated in section 113 of the Civil Pension Code:—

Completed years of superior qualifying service.	OLD SCALE.		NEW SCALE.	
	Pension admissible.	Limit.	Pension admissible.	Limit.
10 years	Gratuity only.		Sixtieths of average emoluments.	Rs. a year.
11 "			Ten	1,000
12 "			Eleven	1,100
13 "			Twelve	1,200
14 "			Thirteen	1,300
15 "			Fourteen	1,400
16 "			Fifteen	1,500
17 "			Sixteen	1,600
18 "			Seventeen	1,700
19 "			Eighteen	1,800
20 "	One-third of average emoluments.	Rs. 3,000 a year, or if average emoluments do not exceed Rs. 12,000 a year, then Rs. 2,000 a year.	Nineteen	1,900
21 "			Twenty	2,000
22 "			Twenty-one	2,100
23 "			Twenty-two	2,200
24 "	One-half of average emoluments.	Rs. 4,000 a year, or if average emoluments do not exceed Rs. 12,000 a year, then Rs. 4,000 a year.	Twenty-three	2,300
25 and above			Twenty-four	2,400
			Thirty	3,000

2. Officers now in service, who may, within six months from the date of this Resolution, retire from the service of Government under circumstances which entitle them to a pension for service of 15 years and not exceeding 20 years, may be allowed pensions calculated under the old scale, if it is the more favourable to them; otherwise the new scale will be applied to all officers retiring on or after 17th August 1887.

3. Invalid, compensation, and superannuation gratuities for service under 10 years and for inferior service will be calculated as at present.

4. The provisions of section 124, Civil Pension Code, for condonation of deficiencies of service do not apply to pensions granted on the graduated scale now sanctioned.

5. The necessary additions and corrections in the Civil Pension Code will be issued hereafter.

ORDER.—Ordered, that this Resolution be communicated to all the Departments of the Government of India; to the several Local Governments and Administrations; to the Comptroller and Auditor General; to all Accountants-General and Comptrollers; to the Head Commissioner of Paper Currency; the Director-General of the Post Offices of India; the Mint and the Assay Masters, Calcutta and Bombay; the Commissioner of Northern India Salt Revenue; and to the Superintendent of Government Printing, India.

Also that it be published in the *Gazette of India*.

Tajpore	<div> <div>...</div> <div>...</div> <div>...</div> <div>...</div> </div>

2. The Lieutenant-Governor is pleased, under section 7 of the Act, to appoint the following gentlemen to be members of the above Board:—

The Executive Engineer of the Patna Division	...	} <i>Ex-officio.</i>
The Civil Surgeon of Durbhunga	...	
The Deputy Inspector of Schools	...	
The Road Cess Deputy Collector	...	
Baboo Moha Maya Persad.		
Moulvie Mohamed Khan.		
Munshi Fazle Karim.		
Moulvie Mohamed Ishaq Khan.		
Baboo Tulapat Singh.		
Mr. Lawrence Crowdy.		
“ Frederic Wood.		
Baboo Ram Dhari Lal.		

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 19th September 1887.—It is hereby notified that the Lieutenant-Governor is pleased, under section 22, Act III (B.C.) of 1885, to appoint the Magistrate of Durbhunga to be the Chairman of the Durbhunga District Board.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 19th September 1887.—It is hereby notified that, under section 21 of Act III (B.C.) of 1885, the Lieutenant-Governor has directed that the District Board constituted under the Act in the district of Durbhunga should come into existence from the 1st April 1887.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 23rd September 1887.—Whereas a notification, dated the 18th June 1887, was published at page 172, Part IB of the *Calcutta Gazette* of the 22nd idem, declaring the intention of the Lieutenant-Governor to extend the provisions of Part X, Act III (B.C.) of 1884, to the Lalgunge Municipality, in the district of Mozufferpore, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in him by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Lalgunge Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the provisions of Part X, Act III (B.C.) of 1884, to the said Municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1887.—It is hereby notified that Dr. J. M. Zorab has been elected by the Sadder Local Board of Balasore, under section 7 of Act III (B.C.) of 1885, to be a member of the Balasore District Board.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1887.—It is hereby notified that, under section 19, clause (3) of the Bengal Local Self-Government Act III (B.C.) of 1885, the Lieutenant-Governor is pleased to appoint Baboo Jogendra Nath Sen to be a member of the Narsil Local Board, in the district of Jessore, in the place of Baboo Kunja Lall Mookerjee, resigned.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1887.—Whereas a notification, dated the 5th April 1887, was published at page 115, Part IB of the *Calcutta Gazette* of the 6th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of Part IX of Act III (B.C.) of 1884 to Wards I, II and III of the North Barrackpore Municipality, and whereas objections were raised to the extension of the Act to Wards I and II, and on reconsidering the matter the Commissioners desire that the Act should be extended only to the area comprised in the following boundaries within Wards II and III:—

“Starting from the Ferry Ghat eastward along the Shastitola Road to its junction with the Uriapara Road, and thence southward along the Uriapara Road to its junction with the Goalapara Road, thence eastward along the Goalapara Road to the boundary of Ward No. I, thence northward along the boundary of the Nowpara Ward, and thence northward to the river Hooghly.”

And whereas no valid objection has been raised to the extension of the Act to the area comprised within the aforesaid boundaries, it is hereby notified for general information that, in exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the North Barrackpore Municipality made at a meeting, the Lieutenant-Governor sanctions the extension of the above part to so much of Wards II and III of the municipality as are comprised within the aforesaid boundaries.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 26th September 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Uterparah Municipality for a public purpose, viz., for widening the east end of the Female School Street, in the village of Uterparah, pergunnah Boro, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, one cottah of standard measurement, is required. The land is bounded on the north by the lands of Kalidhone Chatterjee and Kristodhone Chatterjee, the dwelling houses of Sori Bhusan Mookerjee, Nundo Lal Banerjee, and Gobinda Lal Banerjee; on the east by the Grand Trunk Road; on the south by the Female School Street; and on the west by the drain of Chowdhuri Street.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1877.—The following statement of loans obtained by Municipalities and other Corporations from Government is published for general information, in accordance with Rule 18 of the Rules under the Local Authorities Loan Act, 1879.

Chittagong Collectorate, the 19th August 1887.

A. MASON, Collector.

NOTICE is hereby given, under section 6, Act XI of 1859, that the undermentioned dependent tenure in the Patia Khas Mahal, in the district of Chittagong, will be put up to public and unreserved sale at the Collector's office of that district on the 12th day of October 1887 for arrears of rent and cesses remaining unpaid after the last day of payment, 25th day of May 1887:—

Number of dependent tenure in the khas mahal rent-roll.	Name of dependent tenure with its situation.	ANNUAL RENTAL.		AMOUNT OF ARREARS FOR WHICH THE TENURE WILL BE SOLD.			REMARKS.
		Rent.	Cesses.	Rent.	Cesses.	Total.

1320 1848 2069	Block's Estate, Gulam Ali Nagir, Hoi Taluk Abdulla Khan, Fuzul Ali Chowdhry, Asgar Ali, and Anwarul Chowdhry.	765 8 0	53 1 0	141 8 6	5 0 0	146 8 6	The entire taluk will be sold.

S. J. DUVOLAS, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

1st.—The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as the proprietors of these estates, and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Patna Collector's Office, the 31st August 1887.

C. H. MANSFORD, Offg. Collector.

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated along the main line and Hajipur Extension of the Tirhoot State Railway, in the district of Mouzafferpore, will be put up to sale at the Mouzafferpore Collectorate on the 7th October 1887, and at Silaut Station on 8th October 1887, and at Hajipur on 10th October 1887.

The purchasers of the several plots of land will be subject to the following conditions:—

- (1).—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough the land closer than 3 feet from its foundation.
- (2).—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
- (3).—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday then by the noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to the Government and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement in the case of original sale.
- (4).—The balance of purchase-money due under 3rd condition may be paid either to the Deputy Collector in charge, or into the Government Treasury at Mouzafferpore.
- (5).—The plot of land will be sold revenue free to the highest bidder.
- (6).—The purchaser shall be put in possession on receipt of the order of the District Collector approving the sales, but such possessions will be liable to be disturbed in case the final confirmation of the Board of Revenue shall not be accorded to the proceedings.

Tipperah Collectorate, the 29th August 1887.

J. C. Paton, Collector.

Income Tax.

THE persons in the list (Part III*), which is open for inspection at the Collector's Office, 4, Bankshall Street, are hereby informed that they have been assessed under Part IV of the Second Schedule of Act II of 1886 for the financial year 1887-88, according to the particulars specified therein, and they are hereby required to pay the amount of the tax to the Treasury Officer at No. 4, Bankshall Street, within sixty days from the date hereof, or to apply to me within thirty days from such date to have the assessment reduced or cancelled, failing which they will be proceeded against as the law provides.

G. M. GOODRICK, Collector.

Calcutta Collectorate, the 28th September 1887.

* N. B.—Part III includes all those persons who paid income tax in Calcutta last year under Part IV of Act II of 1886 out of income derived from the 3,000 per annum, derived from income, house property, &c., &c., earned or to be held within the limits of Calcutta.

THE public are hereby informed that the well-known Kurlik Bazaar Fair, which is held every year on the banks of the Dhaleswari river, near Moussabongee, in the district of Dacca, will commence on the 31st October 1887 A.D., corresponding to the 16th Kartick 1294 B.S. and continue up to 14th December 1887. Traders, dealers and others may buy and sell there during those six weeks.

L. HARE, Chairman.

In the Court of the Subordinate Judge of Bhagulpore.

EXECUTION CASE No. 120 OF 1887.

Bahoo Sirdhary Lall ... Decree-holder,
versus

Bahoo Kartik Nath Pandey, Bahoo Pura Lall Pandey, Bahoo Kissen Prasad Pandey, Roy Chatterput Singh, Bahoo Brij Nath Tewary. ... Judgment-Debtors.

TO be sold by the Nazir of the District Judge's Courts, Bhagulpore, at 12 o'clock on the 19th day of October 1887, in the District Judge's Court-house at Bhagulpore, the property, amongst others named below, for satisfaction of a mortgage debt of Rs. 96,009-5-6. Decree-holder in a verified petition states that the property is not mortgaged elsewhere:—

(1). Eight annas out of 16 annas share of kistmat 12 annas pottas of Mouza Sathina Sawad Bhalkhand, Kori, Khajraitha, Thebban Udeypore, Farhad principal and inmates, pergunnah Forkia, bearing 4812 former collectorate Tauji No. and 5656 present Tauji No., and paying Rs. 1,401-2-11 as per former Collectorate Register and Rs. 1,357-2 as per present Collectorate Register in the Monghyr Collectorate within the jurisdiction of Sub-Registrar of Gogri.

JOSEPH CHANDER MITRA, Subordinate Judge of Bhagulpore.

Subordinate Judge's Court, Bhagulpore, the 6th (1873-2) September 1887.

No. 9.

Commissariat Advertisement for Tea for the Madras Presidency:

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office, Madras) will be received by the Commissariat Storekeeper-General, Madras, until 1 o'clock on Monday, the 17th October 1887 (and opened by him at the same time and place in presence of those interested), for the supply, by contract, of Indian black tea not exceeding in quantity 139,745lbs., to be delivered at the Commissariat Stores at Madras to the Commissariat Storekeeper-General on or before the 30th day of April 1888 free of all charges whatsoever. No payment will be made on account of such supply prior to the 1st April 1888. The above quantity is subject to a possible deduction of 117,000lbs. or less, if favourable tenders for out-stations (as per paragraph 3) are received.

2. *Earnest Deposits.*—Each tender must be accompanied by a receipt from the Secretary of the Bank of Madras acknowledging the payment of earnest-money equal to the amount shown in the table in paragraph 3 according to the number of stations tendered for, or by Government promissory notes to the same amount duly endorsed over to the Commissariat Storekeeper-General, Madras. If such earnest-money is not lodged, the tender will be rejected. Tenders to be sealed and superscribed "Tender for Tea."

3. Tenderers have the option of tendering for the supply of the whole quantity of tea at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given opposite each station. In the latter case the amount inserted opposite each station is the earnest-money to accompany such tenders in the manner set forth in the preceding paragraph:—

	Tea.	Earnest-money.
	lbs.	Rs.
Bengalore	23,000	200
Belgaum	12,000	160
Bellary	12,000	150
Cannanore	7,000	90
Kanplee	12,000	150
Madras	22,745	220
Secunderabad	38,000	400
Wellington	13,000	160
Total	139,745	1,760

4. *Security Deposits.*—The earnest-moneys of successful competitors will be retained until they lodge with the Commissariat Storekeeper-General at Madras (or with the Executive Commissariat Officers in case separate tenders are accepted for each station) a security deposit of 10 per cent. on the value of the quantity or quantities of tea tendered by them. The security deposit may be lodged either in cash or in Government promissory notes. If the contractor desires to lodge the deposit in cash, he should pay the same to the Secretary of the Bank of Madras, or to the nearest Government treasury; and forward to the Storekeeper-General the Bank or treasury receipt for the same. If Government promissory notes are deposited, they are to be endorsed over to the Commissariat Storekeeper-General, Madras, for the time being as security for the due fulfilment of the contract. The earnest-moneys deposited with the successful tenders will then be returned to the tenderers.

5. The earnest-moneys of all unsuccessful competitors will be returned on the decision of Government as to the acceptance of any tender being received.

6. *Contract Deed.*—The successful competitors will be required to sign contracts on the basis of their tenders containing the usual provisions in the form used in the Commissariat Department (form whereof can be seen on application to the Commissariat Storekeeper-General at Madras), and to furnish the requisite security deposit within eight days from the date on which the acceptance of their tenders is notified to them. Should the successful competitors fail to sign the contracts or to furnish the security deposits within the time specified, so much of their earnest moneys will be forfeited as will reasonably compensate Government for such breach of contract, and their tenders will be considered as having been rejected. It is, however, to be clearly understood that the forfeiture of the total amount (if necessary) of such earnest-moneys for such default shall in no way preclude Government from recovering from the defaulting competitors all such damages as Government may sustain by reason of such defaults, and that the amount of such earnest-moneys is not to be taken as the total amount of compensation payable to Government for such defaults.

7. *Size and Weight of Chests.*—The chests containing the tea must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches long by 16 inches wide and 12½ inches deep (outside measurement), and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead.

Weight of wooden chest...	19
Do. lead lining	4
Do. tea in chest	67
Gross weight	73

lining. No chests of other dimensions than those specified above will be received. No broken or damaged chests will be received.

Each chest should contain 50lbs. of Indian tea and should be marked "50lbs. net." A certain number of the chests will be opened and examined by a Committee to ascertain that they contain not less than the weight represented, dependent on which examination the remainder will be taken to contain the net weight marked thereon.

8. *Quality of tea.*—The quality of tea will be subject to the approval of, or rejection by, a Committee to be appointed, at the request of the Commissary-General, by the Officer Commanding the District, and payment will be made for such quantity of tea only as may be approved of by the said Committee.

9. *Samples.*—Samples of tea can be had free of charge on application at the Commissariat Storekeeper-General's Office at Madras.

10. Each tender must be accompanied by a sample chest containing 50lbs. of the tea it is proposed to supply, which will be paid for at the rates tendered if of good quality.

11. *Defaults.*—If the contractors make default in delivering the whole or any part of the tea on or before the 30th April 1888, so much of the security deposited by them as will reasonably compensate Government for such breach of contract will be liable to be realized by Government, and, should such security be insufficient to compensate Government for such breach of contract, the contractors will be liable to pay to Government the difference between the amount of such security and such compensation, and any such compensation may, at the option of the Government, be deducted either from the moneys payable to the contractors for the tea delivered by them or from the securities deposited by them.

General Stipulations.

12. All further information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

13. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest-money shall be forfeited to Government.

16. No offers by telegram will be accepted.

By order of the Commissary-General.

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;

Madras, 17th August 1887.

B. COMPERTE, Major,

Commissariat Storekeeper-General.

NO. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 25th October 1887, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 10,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1888 to 30th September 1888. The above quantity is subject to a possible deduction of 10,000 Imperial gallons of matured rum and 10,869 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 3, are received.

2. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

3. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

DESCRIPTION OF ARTICLES.	PAYMENTS OF EARNEST.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes, or Government promissory notes.	Compensation to be paid to Government for each breach of contract.
	Matured rum.	New rum.					
MADRAS.	IN. DATES.	IN. DATES.					
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	2,725	The whole quantity must be delivered between 1st April and 30th September 1888 in such quantities as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in accordance with the orders of the General Agent, Commissariat, Storekeeper-General's Office, Madras.	Rupees 900 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced and number of payment, or Government promissory notes to the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding the 2 per cent. in respect of rum not delivered.
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	11,632					
RANGOON.							
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	10,869	Here in the Store and Shipping Office, Rangoon.	At Rangoon	Rupees 850 only.		
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,100					
Total Imperial gallons	10,824	21,971			Total Rs. 1,750		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the sample not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he proposes supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General.

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;

Madras, 17th August 1887.

B. COMPERTE, Major,

Commissariat Storekeeper-General.

No. 10.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Store-keeper-General's Office, Madras) will be received by the Commissariat Store-keeper-General, Madras, until 1 o'clock on Monday, the 17th October 1887 (and opened by him at the same time and place in presence of those interested), for the supply, by contract, of Indian or China tea, not exceeding in quantity 34,484 lbs., to be delivered either to the Commissariat Store-keeper-General at Madras, or at the Commissariat Stores at Rangoon to the Commissariat Store and Shipping Officer there, on or before the 30th April 1888, free of all charges whatsoever.

No payment will be made on account of such supply prior to the 1st April 1888.

2. **Earnest Deposits.**—Each tender must be accompanied by a receipt from the Secretary of the Bank of Madras, acknowledging the payment of earnest-money equal to the amount shown in paragraph 3, or by Government promissory notes to the same amount duly endorsed over to the Commissariat Store-keeper-General, Madras. If such earnest-money is not lodged, the tender will be rejected. Tenders to be sealed and superscribed "Tenders for Tea."

3. Tenderers have to tender for the supply of the whole quantity of tea either at Madras or at Rangoon as mentioned in paragraph 1, the earnest-money to accompany each tender in the manner set forth in the preceding paragraph.

	Tea.	Earnest-money.
	Lbs.	Ls.
Rangoon	34,484	450

Security Deposits.—The earnest-moneys of successful competitors will be retained until they lodge with the Commissariat Store-keeper-General at Madras (or with the Store and Shipping Commissariat Officer, Rangoon) a security deposit of 10 per cent. on the value of the quantity or quantities of tea tendered by them. The security deposit may be lodged either in cash or in Government promissory notes. If the contractor desires to lodge the deposit in cash, he should pay the same to the Secretary of the Bank of Madras or to the nearest Government treasury, and forward to the Store-keeper-General the Bank or treasury receipt for the same. If Government promissory notes are deposited, they are to be endorsed over to the Commissariat Store-keeper-General, Madras, for the time being, as security for the due fulfilment of the contract. The earnest-money deposited will then be returned to the tenderer.

5. The earnest-money of all unsuccessful competitors will be returned on the decision of Government as to the acceptance of any tender being received.

6. **Contract Default.**—The successful competitors will be required to sign contracts on the basis of their tenders containing the usual provisions in the form used in the Commissariat Department (form whereof can be seen on application to the Commissariat Store-keeper-General at Madras) and to furnish the requisite security deposit within eight days from the date on which the acceptance of their tenders is notified to them. Should the successful competitors fail to sign the contracts or to furnish the security deposits within the time specified, so much of their earnest-moneys will be forfeited as will reasonably compensate Government for such breach of contract, and their tenders will be considered as having been rejected. It is, however, to be clearly understood that the forfeiture of the total amount (if necessary) of such earnest-moneys for such defaults shall in no way preclude Government from recovering from the defaulting competitors all such damages as Government may sustain by reason of such defaults, and that the amount of such earnest-moneys is not to be taken as the total amount of compensation payable to Government for such defaults.

7. **Size and Weight of Chests.**—The chests containing the tea must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches long by 44 inches wide and 12½ inches deep (outside measurement) and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead lining.

Weight of wooden chest	5
Do. lead lining	5
Do. tea in chest	50
Gross weight	60

No chests of other dimensions than those specified above will be received. No broken or damaged chests will be received.

Each chest should contain 50 lbs. of Indian or China tea and should be marked "50 lbs. net." A certain number of the chests will be opened and examined by a committee to ascertain that they contain not less than the weight represented, dependent on which examination the remainder will be taken to contain the net weight marked thereon.

8. **Quality of Tea.**—The quality of tea will be subject to the approval of, or rejection by, a committee to be appointed, at the request of the Commissary-General, by the Officer Commanding the District, and payment will be made for such quantity of tea only as may be approved of by the said committee.

9. **Samples.**—Samples of tea can be had free of charge on application at the Commissariat Store-keeper-General's Office at Madras.

10. Each tender must be accompanied by a sample chest containing 50 lbs. of the tea it is proposed to supply, which will be paid for at the rates tendered if of good quality.

11. **Defaults.**—If the contractors make default in delivering the whole or any part of the tea on or before 30th April 1888, so much of the security deposited by them as will reasonably compensate Government for such breach of contract will be liable to be realized by Government, and should such security be insufficient to compensate Government for such breach of contract, the contractors will be liable to pay to Government the difference between the amount of such security and such compensation, and any such compensation may, at the option of Government, be deducted either from the moneys payable to the contractors for the tea delivered by them or from the securities deposited by them.

General stipulations.

12. All further information may be had on application at the Commissariat Store-keeper-General's Office at Madras.

13. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest money shall be forfeited to Government.

16. No offers by telegram will be accepted.

(By order of the Commissary-General.)

Commissariat Store-keeper-General's Office,
Madras, 19th August 1887.

B. GOMPERTZ, Major,
Commissariat Store-keeper-General.

Notice

IT is hereby given that, in pursuance of the provisions of the Chota Nagpore Enamoured Estates Act (as amended by Act V of 1881) and the Dec Estate Act, the undermentioned properties will be sold by public auction to the highest bidder at the Gya Collectorate for the settlement of debts and liabilities against the Dec Estate on the 11th of November 1887 at 1 p.m. and the following days if necessary.

One-fourth of the purchase-money will have to be deposited by the purchaser at auction on the date of sale. The remainder will be payable after a fortnight on confirmation of the sale, which will principally depend on the highest offer in consideration of the estimated air jumma. If the full purchase-money is not paid on confirmation of sale, the money deposited will be forfeited.

The purchaser will get deduction from the purchase-money for any money remaining still unpaid on account of poshgi of third-party.

Any application for purchase by private contract offering reasonable price for all or any of the undermentioned properties will be received by the Manager till the 10th of November 1887 :—

List of properties appertaining to Deo Estate in Gya district proposed for sale by public auction for the liquidation of debts against the Estate.

Dated: the 16th September 1887.

BRUCE LEE, Manager, Ref. Sec.
(688-55)

(Illegible) Collector of Gva.

Road Closures Notification.

DISTRICT OF MONTPELIER.

IT is hereby notified for general information that, under section 46 of Act III of 1885, the District Board of Meersehabad have, at a special meeting of the Board held on the 30th September 1887, determined that the seed cess in the district for the ensuing year 1888-89 shall be levied at the maximum rate, viz., at the rate of one-half of an anna on each rupee of the annual value of lands.

J. Anderson, Chairman. (440-2)

Road Case

DISTRICT CHURCHES.

IT is hereby notified for general information that, under section 46 of Act III (B.C.) of 1886, the District Board of Chittagong have determined that the land cess for the next year in the district shall be levied at the maximum rate, viz., at the rate of one-half of an anna on each rupee of the annual value of lands.

SUNATH BEURIA, Vice-Chairman.

Chittagong, the 16th September 1887. (687-2)

Notification.

NOTICE is hereby given, under section 5 of the Indian Treasure Trove Act, VI of 1878, that on the 4th August 1887, some golden and silver ornaments and pearls, worth Rs. 650-13-4, were found in the earth on the southern bank of the river Coysa, close to the manzab Andohi, pergunnah Bahadurpore, within the jurisdiction of the Budder sub-division of this district.

All persons claiming the said treasure or part thereof are hereby required to appear personally or by agent before the Collector of Madras at his office at 11 A.M. on the 22nd January 1888, in order that the matter may be enquired into and determined according to the provisions of the said Act.

H. LEE, Offg. Collector.

In the Court of Small Causes at
Bhagulpore.

SUIT No. 1070 OF 1887.

Mr E. M. Cohen, of Mowaschuck, pergunnah Bhagulpore, plaintiff, *versus* Mr. C. W. Birch, of Pealapur Indigo Factory, pergunnah Colgong, defendant.

To Mr. C. W. Birch—

WHEREAS Mr. E. M. Cohen, of Monackebuck, paragonah Bhangulpore, has instituted a suit against you for Rs. 71-4 due on account of price of goods sold and delivered to you from 7th to 24th August 1884, you are hereby summoned to appear in this Court in person, or by a duly authorized Pleader of the Court, on Saturday, the 5th November 1887, at 11 o'clock a.m. in the forenoon, to answer the above-named plaintiff, and you are hereby required to take notice that, in default of your appearance on the day before mentioned, the suit will be heard and determined in your absence.

Given under my hand and the seal of the Court,
this 10th day of September 1887.

JOSEPH CHANDLER MITCHELL Judge.
(1889-1915)

Oudh Forest Department.

BAHRAMGHAT DEPOT.

OF THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of all beams and scantlings supplied from this depot will be as follows:—

Beams.—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

Scantlings.—From 12 to 20 feet, at Rs. 2-8 per a. ft.

Under 12 and over 7, at	2-4
Under 7 feet	2

The above prices are for ordinary building purposes. For *Planking, Sleepers, &c.*, special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KANNYA LAL,

Sub-Assistant Conservator of Forests,
Bahranghat Division.

Bahranghat, the 1st April 1886.

Oryetalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds and upwards* at a time, from the Superintendent, Royal Botanic Garden, Seelipore, near Calcutta, for cash only, at the following rates:—Per four ounce tin Rs. 6 ann. 8; per eight ounce tin Rs. 12 ann. 8; per pound tin Rs. 24. The general public can be supplied by the Superintendent, Royal Botanic Garden, for cash only, at the undernoted rates:—Per four ounce tin Rs. 9 ann. 8; per eight ounce tin Rs. 18 ann. 8; per pound tin Rs. 32. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, for cash only, at the following rates:—per four ounce tin, Rs. 4 ann. 8; per eight ounce tin, Rs. 8 ann. 8; per pound tin, Rs. 16 ann. 8. The general public can be supplied by the Superintendent, Botanical Garden, for cash only, at the undernoted rates:—per four ounce tin, Rs. 6 ann. 8; per eight ounce tin, Rs. 10 ann. 8; per pound tin, Rs. 20. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.
The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1886, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-6.

Without postage. With postage.

For the Calcutta Series ..	Rs. 10 0	Rs. 12 6
.. each of the Madras, Bombay, and Allahabad Series 6 0	.. 7 0
.. a part of the Calcutta Series purchased separately (inclusive of postage in India) 2 0
.. a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) 1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Madras. Thacker, Spink & Co., Calcutta.

.. Thacker & Co., Bombay.

.. Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

.. Curator of Government Books, North-Western Provinces and Oudh.

.. Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1886 should be at once submitted.

Notification.

In modification of the Notice, dated the 7th November 1862, published in Part II, page 1686 of the *Calcutta Gazette*, the following notice is published for information:—

Notice is hereby given, that the terms for the purchase of publications from, and for all work done in, the Bengal Secretariat Press for other than Government offices, or offices under the control of Government Officers, are strictly cash.

In future no publication will be supplied, or advertisement notice, &c., inserted in either of the *Gazettes*, except for the offices mentioned above, unless the cost thereof has been remitted to the Accountant, Bengal Secretariat. In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil

courts or offices, and for those forwarded by the Official Assignee, cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

R. H. WILSON,

Offg. Secy. to the Govt. of Bengal.

The 24th February 1866.

NOTE.—Rate for advertisements in the *Calcutta Gazette* :—

	Rs.
Full page, per issue	20
Half " " "	10
Casual advertisements, 4 annas per line.	

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, office of the Legislative Department, Government of Bengal, situated at No. 5 on the top floor of the Government Offices, Writers' Buildings, Calcutta.

Copies are available for purchase at MESSRS. THACKER, SPINK AND Co., Government Place, Calcutta.

RAINFALL, Weather, and State and Prospects of the Crops	1725	Extracts of the Meteorological Observations taken at the Alipore Observatory from 12th to 24th September 1887.	1729
Meteorological Report of the Province of Bengal for the week ending Friday, the 21st September 1887	1728	Results of the Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 28th to 29th September 1887	1730
Statement of Rainfall in Bengal for the week ending Friday (4 p.m.), the 22nd of September 1887	1734	Weekly Return of Traffic Receipts on Indian Railways	1735

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 24th September 1887.

No.	District and date of report.	Rainfall at Sadler station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.	
BENGAL.				
Western Districts.				
BURDWAN DIV.	1 Burdwan, Sept. 24, '87	2.54	Weather—reasonable. Crop prospects improved by rain during week, but more wanted in some tracts, especially in Cutwa. Prices easier. Cholera abated. Fever prevalent.	
	Cutwa " "	1.25		
	Cutwa " "	0.85		
	Hansergunge " "	1.75		
	2 Bankura " 24, '87	0.44		
Bishnupur " "	2.58	Weather—reasonable. Jute being harvested. Standing crops doing well. Prices stationary. Public health good.		
HOOGLY DIV.	3 Hughli " 25, '87	2.65	Weather—cool and showery. More rain needed for paddy, which is, however, a very promising crop. Sugarcane coming up well. Prices falling and markets very dull. Cattle-disease reported from north of district. A good deal of fever everywhere.	
	Rampur Hant " "	1.46		
	4 Midnapur " 24, '87	0.55		Thickly clouded, with occasional foul weather. The prospects of the rice crop are generally good, the only exceptions being certain parts of (illicit) and Contai sub-divisions, which have suffered from floods. Public health is good, but there are reported a few cases of cholera and malarious fever.
	5 Hooghly " 24, "	0.71		Weather—cloudy and rainy. The rain has been seasonable and sufficient. No further damage to the crops is apprehended.
	Sreempur " "	1.15		Weather—hot and sultry, with slight showers of rain. Harvesting of jute and rice proceeding. Prospects of some and sugarcane continue good.
Central Districts.				
PRESTON DIV.	6 24-Pargas., Sept. 24, '87	4.78	Weather—unsettled; cloudy and hot with occasional showers. Harvesting of some nearly complete. Rain has done much good to some. Prospects of jute and sugarcane good. Public health generally good, but a few cases of cholera and fever reported from Basirhat and Sadler sub-divisions.	
	7 Nuddea " 24, "	4.40		Weather—reasonable. Prospects generally good. Rain of the week has benefited some crop. Prospects of jute and sugarcane favourable. Td, chillies and arhar very slightly damaged by flood. Rice very much lower. Fever prevalent.
	Kushtia " "	0.71		
	Mahorpur " "	1.78		
	Chudanga " "	1.60		
	Ranaghat " "	2.97	Weather—hot with occasional heavy showers. Late rice has benefited much from late rain. Prospects good. Public health good.	
	8 Khosla " 24, '87	0.90		Week's rainfall has been good and weather tolerably cool. Harvesting of some paddy nearly finished. Prospects of some crop excellent in Mequrah and good in other sub-divisions. Public health good.
	9 Jessore " 24, "	2.70		Weather—seasonable: rain at intervals. Prospect of some good. Sowing of rice and kharai commenced. Sugarcane and jute progressing. Public health good. Fever prevails in Lalbagh sub-division.
	Jhenidah " "	0.86		
	Magurah " "	Nil		
	Nasadi " "	0.27	Weather—hot and showery. Prospects of some paddy and other crops generally good. Public health fair.	
	Bongong " "	3.11		
	10 Meerutabad " 24, '87	2.77		Weather—hot, but cloudy. Rain wanted for some crop throughout the district. Transplantation going on. Harvesting of rice and jute—steeping in progress.
	Lalbagh " "	2.53		
	Jungipore " "	1.56		
	RAJSHAHY DIV.	11 Dinagepur " 24, '87	1.68	Weather—hot and showery. Prospects of some paddy and other crops generally good. Public health fair.
		Tinkurgau " "	3.86	
12 Rajshahy " 24, '87		1.58	Weather—hot, but cloudy. Rain wanted for some crop throughout the district. Transplantation going on. Harvesting of rice and jute—steeping in progress.	
Natore " "		1.80		
Nowgung " "		2.35		
13 Rangpur " 24, "		2.91	Weather—hot, but cloudy. Rain wanted for some crop throughout the district. Transplantation going on. Harvesting of rice and jute—steeping in progress.	
Gaibanda " "		0.88		
Kurigram " "		1.26		
14 Bogra " 24, '87		1.50	Weather—hot, but cloudy. Rain wanted for some crop throughout the district. Transplantation going on. Harvesting of rice and jute—steeping in progress.	
Sherpur " "		1.94		
Nowkhilla " "		1.90		
15 Pabna " 24, '87		0.46	Weather—seasonable. Rivers falling. Public health and prospect of crops good.	
Serajgunge " "		5.01		
16 Darjiling " 24, '87		1.71		Weather—hot. State and prospects of crops good.
Jalpigore " "		0.87	Weather—seasonable. Prospects of crops good. Jute rather bad. More rain wanted. Cattle-disease prevails in Mymagori. Public health good.	
Eastern Districts.				
Dacca Division.		18 Dacca, Sept. 24, '87	0.64	Weather—hot. Harvesting of jute still continues. Prospects of crops good. Rivers gradually falling. Public health generally good.
	19 Faridpur " 24, '87	0.64	Weather—cloudy with occasional light showers. Some promises well. Outbreak of some good. General health good.	
	Gondwadi " "	0.85	Weather—seasonable but rain somewhat scanty. Transplantation of some paddy not yet finished. Prospect of crops favourable. General health good.	
	Madaripur " "	1.02		Rain on six days of the week; heavy on the 20th. Weather stormy. Prospect of crops good.
	20 Backergunge " 23, '87	3.37		
	21 Mymensingh " 23, '87	1.70		
	Jumalou " "	1.85		
Kishoreganj " "	1.27			
Astora " "	0.61			
Natorekuma " "	0.67			

No.	District and date of return.	Rainfall at Sadler Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CHITTAGONG DIV.	22 Chittagong, Sept. 27, '87	1.08	Weather—seasonable. Prospects of aman and sugarcane good. Cholera reported; public health otherwise good. Prices stationary. Report not received.
	23 Noakhully	
	24 Tipperah	0.84	Weather—hot. Aman paddy on high lands has begun to be affected. Heavy rain is wanted to better the prospects, which up to now are fair.
	Brahmanbariah	0.94	
	Chandpur	0.43	
CHITTAGONG DIV.	Chittagong Hill Tracts	0.95	Weather—sunny and excessively hot at noon. Occasional fall of rain during the week. Harvesting of jute paddy continues. Cotton doing well. Transplantation of paddy on low lands now over. Public health good.
	25 Hill Tipperah	0.60	Weather—seasonable. Transplantation of aman paddy is being stopped. Sugarcane and jute crops doing well. Public health good.
BEHAR.			
PATNA DIV.	26 Patna	1.73	Weather—hot and clear. Reaping of <i>khaddi</i> crops completed. Paddy growing well. Sowing of winter continues. Cholera still reported in Bihar; otherwise public health good.
	Bah	2.40	
	27 " "	7.03	Weather—fair. <i>Khaddi</i> reaped. Paddy good. Cholera and fever reported from almost all parts of district.
	28 Bhadrad	1.77	Weather—bright and clear. Harvesting of <i>khaddi</i> now reaching to a close. Rice doing well, but a little more rain wanted. Prospects continue promising. Public health good. Prices stationary.
	29 Darbhanga	1.13	Weather—seasonable. Harvesting of <i>khaddi</i> crops nearly completed. Prospects of rice continue favourable. Transplantation of <i>tolawa</i> seedlings in progress. Price of common rice averages 19 annas per rupee. Public health generally good.
PATNA DIV.	Muduhani	1.70	
	Tajpur	2.55	
	30 Mozafferpur	1.47	Weather very variable. Little rain has fallen during the week and more wanted. <i>Khaddi</i> crops are being harvested. Prospects of all crops excellent.
	31 Barua	0.81	Weather—days hot, mornings cool. Prospects of crops continue good, but rain much wanted for <i>agham</i> rice. Cholera abating; otherwise public health good.
	Savna	2.00	
PATNA DIV.	Gopalgungo	0.90	Weather—hot with westerly wind. Prospects of <i>khaddi</i> crops good. Harvesting of <i>maksi</i> in progress. <i>Agham</i> looks promising, but more rain wanted. Public health fair. Prices remain stationary.
	32 Champarna	3.05	
	Betuan	0.44	
	33 Monghyr	2.72	Weather—hot and sultry in the first part of the week, a little cool in the latter part with westerly wind. Prospects of winter rice continue favourable. <i>Khaddi</i> crops have been harvested with favourable outcome. A little cholera in the Sadler sub-division; otherwise public health good.
	Begumari	3.48	
PATNA DIV.	34 Monghyr	2.08	Weather—warm with little cloud and westerly breeze. Harvesting of early rice and <i>amra</i> closing with good outcome. Late rice doing well.
	35 Patna	0.75	Weather—rather hot for the time of year. <i>Agham</i> promising well. <i>Khaddi</i> and jute being harvested. Public health very bad.
	36 Malda	0.73	Weather—seasonable. <i>Khaddi</i> harvest still going on in some places. Winter paddy very promising. <i>Kulsi</i> thriving. Common rice selling at 22 annas per rupee. Fever very prevalent.
	Chandail	1.07	
	Sahganj	1.27	
PATNA DIV.	37 Santal Pargna	0.1	Stormy, ending with cool fair weather and north winds. Indian-corn harvest ended with good outcome. More rain wanted in Dargah. <i>Sergooja</i> and <i>Kurki</i> sowing begun. Fever in Rajmahal.
	Dargah	1.63	
	Jamtara	1.84	
	Gidda	0.26	
	Rajmahal	1.12	
PATNA DIV.	Pabna	6.61	
	38 Cuttack	3.49	Weather—cloudy and rainy at times. Reaping of <i>khaddi</i> still continues. <i>Sarad</i> rice growing well. Ordinary fever prevails. Cases of cholera still reported; otherwise public health good. Price of rice unchanged.
	39 Poores	4.86	Weather—cloudy and rainy. Prospect of <i>sarad</i> crop on the Chilka tracts bad. Weeding in progress. Common rice 23 annas 10 chittacks per rupee in Sadler sub-division and 20 annas 6 chittacks per rupee in Khoorda sub-division. Public health good.
	40 Khoorda	1.33	Weather—cloudy and seasonable. Weeding of <i>sarad</i> crop advancing. <i>Khaddi</i> paddy being reaped. Prospects of crops generally good. Public health good except a few cases of cholera in Chandbally and Bhadruck.
	41 Balasore	0.60	
CHOTA NAPORE.			
<i>South-West Frontier Agency.</i>			
CHOTA NAPORE.	41 Hazaribagh, Sept. 23, '87	2.00	Weather—fine. A heavy storm of rain at head-quarters on 20th. Recent rain has done good, but more required. All standing crops look well. <i>Khaddi</i> being harvested with fair outcome. General health good.
	42 Lohardugga	1.78	Weather—seasonable; cool. Slight rain during the week; more wanted. Prospects of rice good. Prices as before. Cholera still prevails; otherwise general health good.
	43 Singhbhum	3.55	Rain all over the district has done much good. Weather cool and pleasant. Good reports of crops. Ploughing for <i>rabbi</i> going on and autumn crops being sown. General health good.
	44 Manikpur	0.82	Weather—much cooler. More rain still wanted in parts of district for high land paddy. <i>Khaddi</i> and other autumn crops being harvested with good outcome. Public health good.
	Gorakhpur	1.30

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 23rd of September 1937—*contd.*

[illegible]

Supplemental information may be included on this form. If the space for any due has not been exhausted, the corresponding space is left blank. If any of the return is missing, the corresponding space is left blank.

Calcutta, the 27th September 1827.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
23RD OF SEPTEMBER 1887.**

At the close of the previous week the meteorological conditions were almost normal over the greater part of the province, except that pressure was rather lower than usual. A fairly steady monsoon current was blowing from the Bay of Bengal, and easterly and south-easterly winds were reported from almost all stations. Conditions were almost unchanged on the 17th, and on this day light but rather local rain was reported from the greater part of the province. On the 18th the changes of pressure over the province were a little irregular, and at the western stations winds became rather westerly, showing that the westerly current blowing from the Arabian Sea was again beginning to influence Bengal. On the 18th rainfall was rather irregularly distributed, and the greater part of the centre of the province received little or no rain. On the 19th pressure commenced to fall, the fall being rather large in North Bengal and Assam, and the area of lowest pressure at the Bay stations was transferred to the north-west angle of the Bay and the Orissa Coast; the westerly winds strengthened, and winds became westerly and south-westerly over the greater part of the province. On this day also general and rather heavy rain was received in Behar and North Bengal. On the 20th a brisk fall of pressure took place over parts of South-West Bengal, and pressure became distinctly low, a band of low pressure apparently stretching from South-West Bengal through West Bengal into Behar. Winds also commenced to show a very faint tendency to circulation over Bengal, and rain again fell over a considerable part of Behar and North Bengal. On the 21st pressure continued to fall, and a low pressure area was formed over the whole of the centre of the province, while on the 22nd a distinct barometric depression accompanied by cyclonic circulation of winds had formed over the head of the Bay, the centre being only a short distance south of the Sunderbuns and between Saugor Island and Burrisal. On the 23rd the depression was still only of slight intensity and had scarcely moved its position, and its centre on this day was probably almost over the coast line of the Sunderbuns. During the formation of the depression the monsoon current was as usual prevented from blowing over the province, and rain almost ceased over the interior of Bengal, but at the stations on and near the coast, which were affected by the depression, rather heavy rain fell at the close of the week.

The rainfall of the week has therefore again not been heavy, and all districts have received amounts averaging from about one-and-a-half to two inches. The rainfall has thus been about equal to the normal amount in South-West Bengal, Chutia Nagpur and Behar, while it is seriously in defect in East and North Bengal and Orissa.

Pressure—During the previous week averaged about a tenth of an inch below the normal, but for the greater part of the present week pressure was increasing, and it was only at its close that the southern districts of the province were affected by the formation of the depression at the head of the Bay. The mean pressure for the present week has thus been much more nearly normal, and though pressure is at almost all stations below the average, the variations as a rule are not larger than two or three hundredths of an inch. Taking only those stations into consideration from which observations have been received for a considerable period, and which therefore yield reliable averages, the mean pressure of the whole of Bengal for the week has been 0·021 inch below the normal, and the extreme variations are only from a defect of 0·041 inch at Jessore to an excess of 0·004 inch at Cuttack. In Assam pressure has been more largely below the normal, the defect varying from 0·037 inch at Bibaungor to one of 0·071 inch at Dhubri, the mean defect for Assam for the week being 0·054 inch.

Temperature.—The variations of temperature from the normal of the week are small and in no district equal a degree. In East Bengal and North Bengal the mean temperature has been above the normal by 0·3° and 0·2° respectively, but all other districts show defects. In Orissa, North Behar and Chutia Nagpur the defects are small and are less than half a degree, but in South-West Bengal and South Behar the defects are larger and equal 0·7° and 0·9° respectively. For the whole of Bengal temperature has been in defect by 0·3°. In Assam temperature has been above the normal by 0·8°.

Rainfall—Has been moderate in amount in all districts during the week, and the average rainfall in each of the seven meteorological districts has varied between one-and-a-half and two inches. Rainfall is, however, now becoming decidedly less frequent, and the average number of rainy days in the week has been from 2 to 3 in the various districts. Compared with the normal fall for the period, the rainfall in East Bengal has been most largely in defect; North Bengal has also been largely in defect, while in Orissa the defect has been a little less pronounced. The other districts have received falls nearly equal to or in excess of the normal, but while in South-West Bengal and North Behar the excess amounts are very small, in South Behar the excess is considerable. Compared with the normal, and expressed as a percentage of that amount, the actual rainfall in the seven meteorological districts during the past week has been—in Orissa 62 per cent., in South-West Bengal 101 per cent., in East Bengal 50 per cent., in North Bengal 55 per cent., in North Behar 106 per cent., in South Behar 130 per cent., and in Chutia Nagpur 93 per cent. Taking each of these districts as having an equal value in the calculation, the

average rainfall of the province for the past week has been equal to 85 per cent. of the normal.

The rainfall for the whole of September has been generally deficient in Bengal. This can be most clearly seen by giving the figures representing the rainfall for each week in each of the seven districts expressed as a percentage of the normal fall.

Rainfall expressed as a percentage of the normal fall.

Meteorological District.	From 2nd September to 9th September 1887.	From 9th September to 16th September 1887.	From 16th September to 23rd September 1887.	* Average of the first three weeks of September.
Orissa	23	142	62	76
South-West Bengal	42	144	101	96
East Bengal	31	128	50	70
North Bengal	173	96	55	88
North Behar	134	20	106	53
South Behar	109	61	130	88
Chutia Nagpore	58	112	93	86
Average for whole province ...	79	92	86	86

All districts except South Behar and South-West Bengal have therefore received a decidedly defective rainfall during September, and in Orissa and East Bengal, and in the northern districts of the province, the defects have been large.

Taking up the rainfall of the province rather more in detail, during the week under review the following districts have received particularly scanty falls:—parts of the Hooghly, Burdwan, Jessore, Khoolna, and Bankoorah districts, the whole of the Furrædpore, Dacca, and Comilla districts and part of Mymensingh, and the Maldah district. The extreme scantiness of the rainfall at some of the stations in East Bengal during the week may be shown by the fact that in the Furrædpore district the average fall for the week has been 0·20 inch, the normal fall for the period being 1·80 inches; in the Dacca district the actual fall has averaged 0·55 inch against the normal 2·67 inches; and in the Comilla district the fall has averaged, so far as the reports have been received up to the present, about a tenth of an inch against the normal 2·63 inches. In fact, since the first of the month up to the 18th the station of Comilla has only received 2·55 inches, while the normal fall is 9·61 inches, and since the 15th of May it has only received 40·91 inches, the normal for the period being 69·30 inches. Chandpore also in the Tipperah district has only received 2·23 inches of rain since the 1st of the month up to the 22nd against the normal fall of 10·24 inches, and since the 15th of May the actual fall has been 32·27 inches against the normal fall of 70·98 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 23rd of September 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Mainly days.			Since 1st of month.		Since 15th May 1887.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 4499A.

GENERAL.—*The 29th September 1887.*—Mr. A. C. Brett, District and Sessions Judge, Mozufferpore, is allowed leave for two months, under the note to rule 2, section 73 of the Civil Leave Code, with effect from the 18th proximo.

Mr. W. H. Page, District and Sessions Judge, Dacca, is appointed to be District and Sessions Judge of Moorshedabad.

Mr. Page is appointed to act as District and Sessions Judge of Mozufferpore, during the absence, on leave, of Mr. A. C. Brett, or until further orders, on being relieved of his appointment at Dacca by Mr. T. D. Beighton.

Mr. R. H. Anderson, Officiating Joint-Magistrate and Deputy Collector, Purneah, is appointed to act temporarily as District and Sessions Judge of Moorshedabad, during the absence, on deputation, of Mr. W. H. Page, or until further orders.

Mr. T. D. Beighton, District and Sessions Judge, Moorshedabad, is appointed to be District and Sessions Judge of Dacca.

The 1st October 1887.—Mr. J. Kelleher, c.s., is appointed to act as District and Sessions Judge of Hooghly, during the absence, on furlough, of Mr. J. P. Grant, or until further orders.

Baboo Bhupati Chuckerbutty, Temporary Deputy Magistrate and Deputy Collector, Midnapore, is allowed leave for fourteen days, under rule 2, section 138 of the Civil Leave Code, with effect from such date as he may avail himself of it.

The 4th October 1887.—Captain C. T. Metcalfe, c.s.i., Commandant, Orissa Volunteer Rifle Corps, is allowed leave of absence for three months, with effect from the 12th August 1887.

Captain E. R. Henry is appointed to act as Commandant of the Orissa Volunteer Rifle Corps, during the absence, on leave, of Captain C. T. Metcalfe, c.s.i., or until further orders.

POLICE.—*The 1st October 1887.*—Mr. G. J. Cawley, District Superintendent of Police, Nuddea, is allowed leave for forty-two days, under section 73 of the Civil Leave Code, with effect from the 3rd October 1887.

Mr. H. A. Reilly, Officiating Assistant Superintendent of Police, Dacca, is transferred to Nuddea.

Mr. R. N. W. Pritchard, Officiating Assistant Superintendent of Police, Nudda, is transferred to Dacca.

Mr. S. N. Waller, Assistant Superintendent of Police, is posted to the Chittagong Hill Tracts District, on being relieved of his appointment as Officiating District Superintendent of Police, Chittagong.

Mr. V. W. Bartelsen, District Superintendent of Police, is appointed to be District Superintendent of Police, Hooghly, with effect from the date on which he joined his appointment.

REGISTRATION.—*The 30th September 1887.*—Munshi Abdul Hakim, Probationary Rural Sub-Registrar of Dacca, in the Pubna district, is confirmed in that appointment.

EDUCATION.—*The 3rd October 1887.*—Rai Radhica Prasanna Mookerjee Bahadur, Officiating Inspector of Schools, Presidency Circle, is confirmed in that appointment, with effect from the 18th June 1887, *vice* Mr. C. B. Clarke, who has applied for permission to retire.

PORT TRUST.—*The 4th October 1887.*—Under the provisions of section 7 of Act III (B.C.) of 1887, the Lieutenant-Governor is pleased to appoint the Hon'ble H. J. Reynolds, C.S.I., to be Chairman of the Commissioners for making Improvements in the Port of Calcutta, *vice* Mr. F. M. Halliday, resigned.

MEDICAL.—*The 27th September 1887.*—Mr. G. Nash is appointed to be a member of the Committee for the management of the Eden Sanitarium, Darjeeling, *vice* Mr. C. H. Pillans, deceased.

The 1st October 1887.—Surgeon-Major R. Macrae, Officiating Civil Surgeon, Shahabad, is confirmed in that appointment.

The 3rd October 1887.—Dr. A. L. Sandel, Officiating Civil Medical Officer, Pooree, is appointed to act as Civil Medical Officer of Serampore, Hooghly, during the absence, on leave, of Dr. R. A. Barker, or until further orders.

The following are republished from the *Assam Gazette* :—

No. 308.—*The 21st September 1887.*—Mr. R. F. Guise, District Superintendent of Police, Bengal, whose services have been placed at the disposal of the Chief Commissioner of Assam, in Home Department Notification No. 338, dated the 9th September 1887, is posted to Dibrugarh, and placed in charge of the police of the Lakhimpur district.

No. 107.—*The 17th September 1887.*—Baboo Prem Chand Pal, whose services have been placed at the disposal of the Chief Commissioner by Notification of the Government of Bengal No. 4173A of the 6th September 1887, is appointed a Munsif in the district of Sylhet, to be ordinarily stationed at Habiganj.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 30th September 1887.—It is hereby notified for general information that, in exercise of the powers conferred upon him by clause 17 of the rules prescribed by the Governor-General in Council under Act II of 1886, the Lieutenant-Governor is pleased to amend Rule 20 of the rules made under that clause, and published at pages 161 and 162, Part I of the *Calcutta Gazette*, dated the 10th March 1886, by omitting the words "during the first year of the operation of the Act." The rule as now amended is as follows :—

20 (a). A person who has been assessed under Part I of the second schedule of the Act shall not be again assessed in respect of his income chargeable under Part IV, where the amount of such income is less than five hundred rupees per annum.

(b). A person whose income under Parts I and IV is less than five hundred rupees per annum, respectively, shall not be liable under Part IV by reason of his aggregate income under these two parts being in excess of five hundred rupees per annum.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 30th September 1887.—The following telegram, received from the Government of Bombay, dated the 29th September 1887, is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

Telegram, dated the 29th September 1887.

From—Bombay,
From—Chief Secretary.

To—Calcutta,
To—Bengal, Municipal (Marine).

QUARANTINE on arrivals from Bombay at Goa discontinued from 23rd instant.

NOTIFICATION.

The 4th October 1887.—The Lieutenant-Governor sanctions the addition of the following clause to the rule published at page 888, Part I of the *Calcutta Gazette* of the 9th September 1885 as an addition to the Rules for the award of Middle and Primary Scholarships:—

“Unless his (the candidate's) transfer within that period (one year) was made with the approval of the Deputy Inspector of the district in which the school from which he was transferred is situated.”

P. NOLAN,

Secretary to the Govt. of Bengal.

ERRATUM.

The 4th October 1887.—In notification of 5th September 1887, published at page 786, Part I of the *Calcutta Gazette* of the 7th idem, for “Mr. A. Macdonell, Professor, Presidency College, Calcutta, is appointed to be in charge of the Bengal Economic and Art Museum collections” read “Mr. A. Macdonell, Professor, Presidency College, Calcutta, is appointed to act as Assistant Curator of the Bengal Economic and Art Museum collections.”

P. NOLAN,

Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 27th September 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,

Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

EATON W. PETLEY,

Offg. Port Officer of Calcutta.

PORT OFFICE, Calcutta, the 27th September 1887.

[Third Publication.]

NOTIFICATION.

The 29th September 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 54).

RED SEA—EAST SHORE.

Temporary buoys North of Jebel Zukur.

Information has been received from the Hydrographer that, as it is the intention of the Admiralty that a further examination of the area lying some 20 miles North of Jebel Zukur—in which locality the steam-ships *Assent* and *Teddington* have recently reported dangers—shall be made during the months of October and November 1887:—

Notice is hereby given that whilst this examination is in progress, certain buoys and floating beacons will be moored in the area above-mentioned.

Mariners are requested not to disturb any of these temporary surveying marks, and are warned to steer clear of them; for which purpose it will be necessary to keep to the westward of the line joining Centre Peak Island and Abu Ail.

By direction of the Government of Bengal,

ARTHUR W. STIERE, *Captain, I.M.,*
Port Officer of Calcutta.

Port Office, Calcutta, the 15th September 1887.

JUDICIAL DEPARTMENT.

No. 4509A.

JUDICIAL.—*The 3rd October 1887.*—Bahadur Tarini Lal Chowdry, Deputy Magistrate and Deputy Collector, Maluan, is vested with the powers of a Magistrate of the first class.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd October 1887.—The following amended rule, which has been approved by the Lieutenant-Governor, is published for general information, in supersession of Rule 9 of the Rules made by Government, under section 259 of Act X of 1865, for the custody and preservation of Wills, which appeared at page 1620 of the *Calcutta Gazette* of the 23rd October 1867:—

"9. In cases where the fees collected exceed Rs. 5 per mensem, District Judges may assign a moiety to the officer entrusted with the custody of the Wills, the balance being credited to Government. In cases where the collections do not average more than Rs. 5 per mensem, District Judges may sanction the payment to such officer of the full amount realised."

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

ESTABLISHMENT—GENERAL.

The 29th September 1887.

No. 316.—*Notification.*—Mr. L. R. Fraser, Assistant Engineer, is placed on special duty under the orders of the Inspector of Local Works in the Patna Division.

ESTABLISHMENT—RAILWAY.

The 4th October 1887.

No. 317.—*Notification.*—The following notification, issued by the Government of India, Public Works Department, is republished for information:—

No. 290.—*The 26th September 1887.*—Public Works Department notification No. 207, dated 29th June 1887, transferring Mr. F. K. Caultiff, Class III, Superior Revenue Establishment of State Railways, Stores Department, from the establishment under the control of the Government of Bengal to that under the Director-General of Railways, is cancelled.

No. 319.—*Declaration*.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., constructing bungalows for employes of the East Indian Railway Company in the village of Seoraphuli, pergunnah Boroë, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 8 bighas 19 cottaks and 12 chittacks, or 1a. 1r. 11p. of standard measurement, bounded on the south by the public road leading to Seoraphuli Haut and crossing both East Indian Railway and Tarakeshwar Railway; on the north by land belonging to late Harish Chandra Mookerjee, Jogendra Chandra Mitter, Abinash Chandra Chatterjee and Kala Chand Bhattacharjee; on the east by the East Indian Railway, and on the west by the Tarakeshwar Railway, is required within the aforesaid village of Seoraphuli.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

C. M. BROWNE, Col., R.E.,

A. N. BHATTACHARJEE, Personal Assistant, for Commissioner.

COMM.'s OFFICE, PRESIDENCY DIVISION, Calcutta, 30th September 1887.

The Calcutta Gazette.

WEDNESDAY, OCTOBER 5, 1887.

PART I A.

Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Simla, the 30th September 1887.

HIS EXCELLENCY THE VICEEROY will leave Simla on Thursday, the 27th October 1887.

His Excellency will visit Sibi, Quetta, Kurrachi, Dehra Ghazee Khan, Dehra Ismail Khan, Peahawar, Kohat, Rawul Pindi, Lahore, Bhurtpore, Allahabad, and Benares, and will probably arrive at Calcutta on or about Saturday, the 17th December, 1887.

By Command,

WILLIAM BERESFORD, *Major,
Military Secretary to the Viceroy.*

The following order, issued by the Government of India in the Home Department, is republished for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—POLICE.

Simla, the 27th September 1887.

No. 368.—The services of Mr. V. W. Bertelsen, District Superintendent of Police, Assam, are replaced at the disposal of the Government of Bengal.

A. P. MacDONNELL,
Secretary to the Govt. of India.

The following order, issued by the Government of India in the Revenue and Agricultural Department, is republished for general information.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—FORESTS.

Simla, the 30th September 1887.

No. 926F.—Consequent on the return from privilege leave of Mr. G. Mann, Conservator of Forests of the 3rd grade in Assam, the following appointment and reversions are made, with effect from the 17th instant, and until further orders.

Mr. A. L. Hume, Conservator of the 3rd (officiating 1st) grade, in Bengal, to revert to Officiating Conservator of the 2nd grade.

E. C. BUCK,
Secretary to the Govt. of India.

The Calcutta Gazette.

WEDNESDAY, OCTOBER 5, 1887.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 1st October 1887.—It is hereby notified that, under section 23 of Act IV (B.C.) of 1876, the Lieutenant-Governor is pleased to appoint Dr. Fowler Greenhill to be a Commissioner of the town of Calcutta, *vice* Surgeon-Major R. C. Sanders, M.D.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th October 1887.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Mr. H. E. Ransom, C.S., to be Chairman of the Sasseram Municipality, in the district of Shahabad, *vice* Mr. D. Cameron, transferred.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1887.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of Act III (B.C.) of 1884, and in accordance with the recommendation of the Commissioners of the Hazaribagh Municipality, made at a meeting, to extend the provisions of sections 236 to 244 of the said Act to the above municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1887.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of Act III (B.C.) of 1884, and in accordance with the recommendation of the Commissioners of the Hazaribagh Municipality, made at a meeting, to extend the provisions of Part IX of the said Act to the above municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 3rd October 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Municipality of Soory for a public purpose, viz., for the construction of a market in the town of Soory, pergunnah Khattanga, zillah Beerbhoom, it is hereby declared that for the above purpose a piece of land measuring, more or less, 7 cottahs and 4 chittacks of standard measurement, is required. The land is bounded as follows:—On the north by waste lands and a kutcha house; on the east by a lane west of Husseni Gariwala's house; on the west by a lane in front of Hossein Bux's house; and on the south by the Sainthea Road.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th September 1887.—In supersession of the notification, dated the 31st August 1887, published at page 218, Part IB of the *Calcutta Gazette* of the 7th September 1887, it is hereby notified that the Lieutenant-Governor re-appoints the gentlemen named below to be members of the Manbhoom District Road Committee:—

- | | |
|----------------------------|----------------------------------|
| 1. Baboo Ramdyal Morumdar. | 4. Baboo Kirti Nath Chowdhury. |
| 2. " Radha Nath Bari. | 5. " Keshub Lal Missir. |
| 3. " Raj Krishna Mukerjee. | 6. Rai Raj Chunder Roy Bahadoor. |

The Lieutenant-Governor also appoints the gentlemen named below to be members of the Manbhoom District Road Committee:—

- | | |
|------------------------------|--------------------------------|
| 1. Mr. H. Deveris. | 2. Baboo Rashbehari Lal Singh. |
| 3. Baboo Ganga Narain Singh. | |

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

The Calcutta Gazette.

WEDNESDAY, OCTOBER 5, 1887.

PART II.

Advertisements.

(N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.)

LAND SALE NOTICES.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1869, that the undermentioned estates or shares of estates in the district of Monghyr will be put up for sale at the Collector's office of that district on 24th October 1887, for arrears of revenue and other demands which, by the Regulations and Acts in force, are directed to be realised in the same manner as arrears of revenue.

When in columns 5, 7 and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and the other share or shares in the estate are excluded from the sale:—

S. J. DOUGLAS, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 19th Poush 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

1st.—The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as the proprietors of these estates, and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

T. L. JENKINS, Covtd. Deputy Collector in charge.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchaser will be subject to the following conditions of sale:—

1st.—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him *free of revenue*.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchaser to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Patna Collector's Office, the 31st August 1887.

C. R. MANSUR, Offg. Collector.

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated along the main line and Hajipur Extension of the Tirhoot State Railway, in the district of Moorshidpur, will be put up to sale at the Moorshidpur Collectorate on the 7th October 1887, and at Hajipur on 10th October 1887.

The purchasers of the several plots of land will be subject to the following conditions:—

- (1).—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough the land closer than 3 feet from its foundation.
- (2).—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
- (3).—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday then by the noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to the Government and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement in the case of original sale.
- (4).—The balance of purchase-money due under 3rd condition may be paid either to the Deputy Collector in charge, or into the Government Treasury at Moorshidpur.
- (5).—The plot of land will be sold revenue free to the highest bidder.
- (6).—The purchaser shall be put in possession on receipt of the order of the District Collector approving the sale, but such possession will be liable to be disturbed in case the final confirmation of the Board of Revenue shall not be accorded to the proceedings.

Tipperah Collectorate, the 20th August 1897.

J. C. PRICE, Collector.

Income Tax.

THE persons in the list (Part III*), which is open for inspection at the Collector's Office, 4, Bankshall Street, are hereby informed that they have been assessed under Part IV of the Second Schedule of Act II of 1886 for the financial year 1897-98, according to the particulars specified therein, and they are hereby required to pay the amount of the tax to the Treasury Officer at No. 4, Bankshall Street, within sixty days from the date hereof, or to apply to me within thirty days from such date to have the assessment reduced or cancelled, failing which they will be proceeded against as the law provides.

G. M. GOSWAMY, Collector.

Calcutta Collectorate, the 23rd September 1897.

* N. B.—Part III includes all those persons who paid income tax in Calcutta last year under Part IV of Act II of 1886 on account of business under Rs. 5,000 per annum, derived from business, house property, &c., &c., carried on or held within the town of Howrah.

THE public are hereby informed that the well-known Kartick Baroni Fair, which is held every year on the banks of the Bhaleswari river, near Moosahagunge, in the district of Dacca, will commence on the 31st October 1897 A.D., corresponding to the 15th Kartick 1294 B.S. and continue up to 14th December 1897. Tradersmen, dealers and others may buy and sell there during these six weeks.

L. HARR, Chairman.

Estate Katherine Smith, deceased.

ALL persons claiming to be next-of-kin, according to the Statutes for the distribution of intestate estates, of the said Katherine Smith, deceased (widow of Colonel Edward Fleetwood Smith, formerly of the 23rd Regiment, Bengal Native Infantry), late of 32, St. Mary's Road, Westbourne Park, Middlesex, England, living at the time of her death on the 4th day of October 1893, or to be the legal personal representatives, of such of the said next-of-kin as are now dead, are, on or before the 31st day of December next, to come in and prove their claims at the Office of the Administrator-General of Bengal, Calcutta.

H. A. ADAMS,

Offg. Solicitor to the Govt. of India,
1, Roplane West, Calcutta, the 4th August 1897.

(487—3)

Notice.

WANTED by the District Board, Tipperah, two Sub-Inspectors of Schools on a salary of Rs. 50 a month each, and travelling allowances. Preference will be given to graduates and to those who have had experience.

Applications, with copies of testimonials, to be sent to the undersigned on or before the 15th October 1897.

E. F. SANDS, Vice-Chairman, District Board.

(546—5)

Commissariat Advertisement for Tea for the Madras Presidency.

3. Tenderers have the option of tendering for the supply of the whole quantity of tea at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given opposite each station. In the latter case the amount inserted opposite each station is the earnest-money to accompany such tenders in the manner set forth in the preceding paragraph:—

						Total.	Barren- mow.
						lbs.	Ra.
Bangalore	23,000	280
Belgaum	12,000	150
Bellary	12,000	150
Cannanore	7,000	90
Kamptee	12,000	150
Madras	22,745	280
Secunderabad	38,000	440
Wellington	12,000	150
Total						189,745	1,750

7. Size and Weight of Chests.	-The chests containing the tax	must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches long by 16 inches wide and 12½ inches deep (outside measurement), and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead

General Stipulations.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest-money shall be forfeited to Government.

16. No offers by telegram will be accepted.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

NO. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 26th October 1887, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 19,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat Stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1888 to 30th September 1888. The above quantity is subject to a possible deduction of 10,000 Imperial gallons of matured rum and 10,869 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 3, are received.

2. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

3. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

Description of articles.	Probable quantity.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes or Government promissory notes.	Compensation to be paid to Government for each breach of contract.
	Matured rum.	New rum.					
MADRAS.							
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	9,724	The whole quantity must be delivered between 1st April and 30th September 1888 in such quantities as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in to the rate at the General Account Deptt., Commissariat Storekeeper-General's Office, Madras.	Rupees 500 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced as a voucher of payment, or Government promissory notes of the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding Rs. 2 per gallon rejected or not delivered.
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	11,047					
RANGOON.							
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	10,869	Bills to the Store and Shipping Officer, Rangoon.	Ditto Rangoon	Rupees 500 ditto		
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,000					
Total Imperial gallons	19,824	21,971			Total Rs. 1,100		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the samples not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he purposes supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;
Madras, 17th August 1887.

B. GOMPERTZ, Major,
Commissariat Storekeeper-General.

No. 10.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Store-keeper-General's Office, Madras) will be received by the Commissariat Store-keeper-General, Madras, until 1 o'clock on Monday, the 17th October 1887 (and opened by him at the same time and place in presence of those interested), for the supply, by contract, of Indian or China tea, not exceeding in quantity 34,484 lbs., to be delivered either to the Commissariat Store-keeper-General at Madras, or at the Commissariat Stores at Rangoon to the Commissariat Store and Shipping Officer there, on or before the 30th April 1888, free of all charges whatsoever.

No payment will be made on account of such supply prior to the 1st April 1888.

2. **Earnest Deposits.**—Each tender must be accompanied by a receipt from the Secretary of the Bank of Madras, acknowledging the payment of earnest-money equal to the amount shown in paragraph 3, or by Government promissory notes to the same amount duly endorsed over to the Commissariat Store-keeper-General, Madras. If such earnest-money is not lodged, the tender will be rejected. Tenders to be sealed and superscribed "Tenders for Tea."

3. Tenderers have to tender for the supply of the whole quantity of tea either at Madras or at Rangoon as mentioned in paragraph 1, the earnest-money to accompany each tender in the manner set forth in the preceding paragraph.

	Tea.	Earnest-money.
	lbs.	Rs.
Rangoon	34,484	450

Security Deposits.—The earnest-moneys of successful competitors will be retained until they lodge with the Commissariat Store-keeper-General at Madras (or with the Store and Shipping Commissariat Officer, Rangoon) a security deposit of 10 per cent. on the value of the quantity or quantities of tea tendered by them. The security deposit may be lodged either in cash or in Government promissory notes. If the contractor desires to lodge the deposit in cash, he should pay the same to the Secretary of the Bank of Madras or to the nearest Government treasury, and forward to the Store-keeper-General the Bank or treasury receipt for the same. If Government promissory notes are deposited, they are to be endorsed over to the Commissariat Store-keeper-General, Madras, for the time being, as security for the due fulfilment of the contract. The earnest-money deposited will then be returned to the tenderer.

5. The earnest-money of all unsuccessful competitors will be returned on the decision of Government as to the acceptance of any tender being received.

6. **Contract Deed.**—The successful competitors will be required to sign contracts on the basis of their tenders containing the usual provisions in the form used in the Commissariat Department (form whereof can be seen on application to the Commissariat Store-keeper-General at Madras), and to furnish the requisite security deposit within eight days from the date on which the acceptance of their tenders is notified to them. Should the successful competitors fail to sign the contracts or to furnish the security deposits within the time specified, so much of their earnest-moneys will be forfeited as will reasonably compensate Government for such breach of contract, and their tenders will be considered as having been rejected. It is, however, to be clearly understood that the forfeiture of the total amount (if necessary) of such earnest-moneys for such defaults shall in no way preclude Government from recovering from the defaulting competitors all such damages as Government may sustain by reason of such defaults, and that the amount of such earnest-moneys is not to be taken as the total amount of compensation payable to Government for such defaults.

7. **Size and Weight of Chests.**—The chests containing the tea must be of suitable material, lined with lead, and the lead lining thereof must be sound and strong. Each chest must measure 27 inches long by 16 inches wide and 13½ inches deep (outside measurement), and must weigh as per margin. Each chest must be bound completely round with hoop iron at both ends, the nails being driven so as not to injure the lead lining.

	lbs.
Weight of wooden chest	18
Do. lead lining	4
Do. tea in chest	52
Gross weight	74

No chests of other dimensions than those specified above will be received. No broken or damaged chests will be received.

Each chest should contain 50 lbs. of Indian or China tea and should be marked "50 lbs. net." A certain number of the chests will be opened and examined by a committee to ascertain that they contain not less than the weight represented, dependent on which examination the remainder will be taken to contain the net weight marked thereon.

8. **Quality of Tea.**—The quality of tea will be subject to the approval of, or rejection by, a committee to be appointed, at the request of the Commissary-General, by the Officer Commanding the District, and payment will be made for such quantity of tea only as may be approved of by the said committee.

9. **Samples.**—Samples of tea can be had free of charge on application at the Commissariat Store-keeper-General's Office at Madras.

10. Each tender must be accompanied by a sample chest containing 50 lbs. of the tea it is proposed to supply, which will be paid for at the rates tendered if of good quality.

11. **Defaults.**—If the contractors make default in delivering the whole or any part of the tea on or before 30th April 1888, so much of the security deposited by them as will reasonably compensate Government for such breach of contract will be liable to be realized by Government, and should such security be insufficient to compensate Government for such breach of contract, the contractors will be liable to pay to Government the difference between the amount of such security and such compensation, and any such compensation may, at the option of Government, be deducted either from the moneys payable to the contractors for the tea delivered by them or from the securities deposited by them.

General Stipulations.

12. All further information may be had on application at the Commissariat Store-keeper-General's Office at Madras.

13. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

14. The Government reserves to itself the right of rejecting any tender without assigning any reason for so doing.

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof, and, in the event of his doing so, his earnest money shall be forfeited to Government.

16. No offers by telegram will be accepted.

(By order of the Commissary-General.)

Commissariat Store-keeper-General's Office,
Madras, 19th August 1887.

B. GOMPERTZ, Major,
Commissariat Store-keeper-General.

Notice

It is hereby given that, in pursuance of the provisions of the Chota Nagpore Encumbered Estates Act (as amended by Act V of 1884) and the Deo Estate Act, the undermentioned properties will be sold by public auction to the highest bidder at the Gya Collectorate for the settlement of debts and liabilities against the Deo Estate on the 11th of November 1887 at 1 P.M. and the following days if necessary.

One-fourth of the purchase-money will have to be deposited by the purchaser at auction on the date of sale. The remainder will be payable after a fortnight on confirmation of the sale, which will principally depend on the highest offer in consideration of the estimated sir jumma. If the full purchase-money is not paid on confirmation of sale, the money deposited will be forfeited.

The purchaser will get deduction from the purchase-money for any money remaining still unpaid on account of pashgi of the owners.

Any application for purchase by private contract offering reasonable price for all or any of the undermentioned properties will be received by the Manager till the 10th of November 1887.—

List of properties appertaining to Deo Estate in Gya district proposed for sale by public auction for the liquidation of debts against the Estate.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1083, Part II of the Calcutta Gazette of the 9th July 1884:—

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
" each of the Madras, Bombay, and Allahabad Series ...	" 8 0	" 7 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	"	2 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	"	1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

" Thacker & Co., Bombay.

" Higinbotham & Co., Madras.

The Government Central Book Depot, Bombay.

" Curator of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1886 should be at once remitted.

Notification.

In modification of the Notice, dated the 7th November 1882, published in Part II, page 1686 of the *Calcutta Gazette*, the following notice is published for information:—

Notice is hereby given, that the terms for the purchase of publications from, and for all work done in, the Bengal Secretariat Press for other than Government offices or offices under the control of Government Officers, are strictly cash.

In future no publication will be supplied, or advertisement notices, &c., inserted in either of the *Gazettes*, except for the offices mentioned above, unless the cost thereof has been remitted to the Accountant, Bengal Secretariat. In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil

courts or offices, and for those forwarded by the Official Assignee, cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

R. H. WILSON,

Offg. Secy. to the Govt. of Bengal.

The 24th February 1886.

NOTE.—Rate for advertisements in the *Calcutta Gazette* :—

	Rs.
Full page, per issue	20
Half " " "	10
Casual advertisements, 4 annas per line.	

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, office of the Legislative Department, Government of Bengal, situated at No. 5 on the top floor of the Government Offices, Writers' Buildings, Calcutta.

Copies are available for purchase at MESSRS. THACKER, SPINK AND CO., Government Place, Calcutta.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 1st October 1887.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.		
BENGAL.					
Western Districts.					
Burdwan Divn.	1 Bardwan, Oct. 1, '87	0.68	Weather—seasonable. Prospects of crops favourable, but more rain wanted. Public health generally good. Cholera reported from Ryas thana. Price of rice stationary.		
	Cohra ..	1.37			
	Cotea ..	1.60			
	Hanagunge ..	0.01			
	2 Bankura .. 1, '87	0.00			
Burdwan Divn.	3 Boorhanpur .. 1, '87	0.57	Weather—seasonable. Rain very much wanted in all parts of the district. Amsa crop on high lands will be damaged if it does not rain soon. Price stationary. Public health good.		
	Rampur Hunt ..	1.75			
Burdwan Divn.	4 Midnapur .. 1 '87	0.25	Weather—dry generally. Prospects of crops hopeful, except partly in thames Pataspur and Bhagwanpur in Contai sub-division. More rain wanted in Ohatal sub-division. Public health good.		
	5 Houghly .. 1, "	0.98			
Burdwan Divn.	Serampur ..	1.07	Weather—hot. State and prospects of all crops favourable, though in places more moisture is required for winter rice. Cholera reported from one village in Serampur sub-division.		
	Howrah .. 1, '87	0.14			
Burdwan Divn.	Chakraborty ..	Nil	Weather—sultry with clear sky. Prospects of rice crop fair, but more rain required. Sugarcane on high lands doing well. Aar daan and jute harvest continues.		
	Central Districts.				
Presidency Divn.	6 24-Pargu., Oct. 1, '87	0.44	Weather—seasonable. Aar harvest practically over. Sugarcane and jute doing well. Prospects of amsa crop have improved with the recent rain. Public health generally good.		
	7 Nadia .. 1, "	1.73		Weather—hot with showers, especially in the early part of the week. Prospects good. Amsa, sugarcane, fl, arhar and chilies doing well. Flood level falling steadily. Public health good, except that there is still a good deal of fever.	
		Kachua ..			3.62
		Maharpur ..			4.99
		Chandrag ..			4.85
Presidency Divn.	8 Kishore .. 1, '87	3.12	Weather—hot with some rain in the first part of the week. Prospects continue favourable owing to recent rain. Public health good.		
	9 Jessore .. 1, "	1.48			
Presidency Divn.	Jhenidah ..	2.01	Weather—hot and bright after good showers. The early morning is tolerably cool. Harvesting of amsa is finished. Prospect of amsa is good, and the late showers seem to promise a good deal of benefit towards this crop. Public health good.		
	Mugur ..	2.38			
	Narail ..	1.2			
	Rangpur ..	2.49			
	10 Moorshedabad .. 1, '87	7.65			
Presidency Divn.	Kandi ..	0.59	Weather—seasonable. Prospects of amsa good. Sowing of fl and kharif going on. Public health generally good.		
	Jungpur ..	0.58			
Rajshahi Divn.	11 Dinagpur .. 1, '8	0.71	Weather—seasonable. State and prospects of kharif paddy good. Harvesting of jute nearly finished. Also 18 to 26 wees per rupee.		
	Thakurga ..	0.51			
	12 Rajshahi .. 1, '87	1.48		Weather—clear and bright. Prospects of amsa paddy and other crops continue generally good. Public health fair.	
	Natuna ..	2.70			
	Nawab ..	1.40			
Rajshahi Divn.	13 Rangpur .. 1, "	1.60	Weather—seasonable. Transplanting of amsa is over. Harvesting of jute continues. Public health fair.		
	Nilphamari ..	1.07			
	Gabanda ..	0.85			
	Kurigram ..	1.20			
	14 Bogra .. 1, '87	1.41			
Rajshahi Divn.	Sherpur ..	2.92	Weather—milder day by day. Sunny days with cool winds. Transplantation of amsa is nearly over. Harvesting of amsa and jute-stocking going on. Public health generally good. Cow-pox continues to be reported from Sherpur thana.		
	Nawalpala ..	2.65			
	15 Pabna .. 1, '8	1.45		Weather—seasonable. Rivers have fallen. Public health and prospect of crops good.	
	16 Darjeeling .. 1, '87	2.66			
	17 Jalpaiguri .. 1, "	2.64			
Eastern Districts.					
Dacca Divn.	18 Dacca, Oct. 1, '87	Nil	Weather—seasonable. Harvesting of jute nearly completed; that of amsa paddy rapidly going on. Cultivation for mustard and pulses commenced. Prospects of crops good. Public health fair.		
	Manickgunge ..	0.81			
	Munshigunge ..	1.04			
	Naralingunge ..	0.7			
	19 Faridpur .. 1, '87	1.43			
Dacca Divn.	Goaland ..	1.21	Weather—cloudy with occasional showers. Prospects of amsa crop good. Public health good. Rivers falling.		
	Madaripur ..	0.77			
	20 Backergunge			
	Report not received.				
	21 Mymensingh Sept., 30, '87	3.55		Rain on four days; 1.88 inches on 26th. Weather cloudy. Prospects of crops good.	
Jamalur ..	1.34				
Kishoregunge ..	0.67				
Atta ..	0.80				
Netrokona ..	2.47				

No.	District and date of return	Rainfall at Sadler Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date
BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CHITTAGONG DIVN.	22 Chittagong, Oct. 4, '87	0-0	Weather—seasonable. <i>Amor</i> and sugarcane thriving. Cholera reported; public health otherwise good. <i>Pilus</i> stationary.
	23 Noakhally Sept. 30, "	2-50	Weather—seasonable. Prospects of <i>amur</i> fair. New <i>amur</i> rice has come to market, and its price has fallen to 27 <i>seers</i> per <i>rupes</i> . General health fair.
	24 Tipperah " 29, "	1-28	Weather—seasonable and occasionally cloudy. The little rain has done some good. Prospects of crops still pretty fair. Paddy on comparatively high lands has begun to suffer, and unless there is heavy rainfall soon the crop in general will be considerably affected.
	Brahmanbariah Chaudpur " 27, "	1-43 0-50	Weather rainy during the middle of the week, cold at night. Foggy this morning (27th). Cotton doing well. Harvesting of <i>joom</i> paddy continues. Transplanting of plough-paddy over. Prospects of sugarcane good.
	26 Hill Tipperah " 28, "	3-67 1-95	Weather—rainy and stormy. Prospects of <i>amur</i> paddy and <i>Sagarcane</i> fair. <i>Jute</i> and <i>joom</i> crops being reaped. Public health good.
BEHAR			
PATNA DIVN.	26 Patna Oct. 1, '87	Nil	West wind; sky clear. Prospects of rice crop fair, but more rain wanted on high lands. <i>Kokor</i> and cotton doing well. Lands being prepared for other <i>rabbi</i> crops. No cholera cases reported from Behar sub-division.
	27 Gaya " 1, "	Nil	Weather—fair. Paddy suffering for want of rain. Cholera and fever reported from some stations.
	28 Bhudabad " 1, "	Nil	Weather—seasonable. Harvesting of <i>khaddai</i> crops almost completed. Paddy coming up well, but more rain wanted. Public health generally good. Prices stationary.
	29 Darbhanga " 1, "	0-05	Weather—days hot and mornings cool. Harvesting of <i>khaddai</i> completed. More rain needed for rice crop, which is, however, very promising. <i>Urid</i> coming up well. Price of common rice averages 19 <i>seers</i> per <i>rupes</i> . Public health generally good. Some fever about.
	30 Muzafferpur " 1, "	Nil	Weather—clear. Rain wanted for rice crop. Harvesting of <i>khaddai</i> in progress, and prospects of all crops excellent.
PATNA DIVN.	31 Buxar " 1, "	Nil	Weather—days hot, mornings cool. Prospects of crops continue good, but rain much wanted for <i>aghar</i> paddy. Fields are being prepared for <i>rabbi</i> sowings. Public health on the whole good.
	32 Champaran " 1, "	Nil	Weather—hot. Harvesting of <i>khaddai</i> crops nearly completed. Prospects of <i>aghar</i> crops promising, but more rain wanted on high land. Mahai of indigo finished. Prices stationary. Public health good.
	33 Monghyr " 1, "	Nil	Weather—days hot, mornings cool. Prospects of winter rice continue promising, but rain still wanted for a good crop. A few cases of cholera reported from the Sadar and Begowrah sub-divisions. Prices easy.
	34 Bhagalpur " 1, "	1-12 Nil	Weather—warm, but getting cool in the morning. Sky clear. Harvesting of <i>amur</i> completed, that of early rice going on with good outturn. Late rice, doing well, but a good shower of rain wanted.
	35 Purneah " 1, "	Nil	Weather—continue hot. <i>Khaddai</i> has been harvested. <i>Aggar</i> promises well. Lands for tobacco and sugarcane are being prepared.
PATNA DIVN.	36 Arrah " 1, "	0-23	Weather—fine and hot. Harvesting of <i>khaddai</i> nearly completed with good outturn. Winter paddy still very promising, but more rain will be needed.
	37 Madhah " 1, "	0-22	Khar thriving. Common rice selling at 23 <i>seers</i> per <i>rupes</i> . Fever very prevalent.
	38 Chausse " 1, "	0-23	Weather—northerly breeze; clouds gathering; days hot. Indian-corn harvested.
	39 Satep " 1, "	0-51	Rain generally wanted for all crops. Public health fair.
	40 Bhojpur " 1, "	0-5	
PATNA DIVN.	41 Bhojpur " 1, "	0-5	
	42 Bhojpur " 1, "	0-5	
	43 Bhojpur " 1, "	0-5	
	44 Bhojpur " 1, "	0-5	
	45 Bhojpur " 1, "	0-5	
ORISSA.			
CUTTACK DIVN.	38 Cuttack Sept. 30, '87	Nil	Weather—fair. <i>Beali</i> being cut and gathered. <i>Sarad</i> growing well. Cases of cholera still reported; otherwise public health good. Price of rice unchanged.
	39 Pooree " 29, "	0-01	Weather—hot and cloudy. Weeding of <i>sarad</i> in progress. Sufficient rain wanted for <i>sarad</i> crop. Common rice 20 <i>seers</i> 8 <i>chittacks</i> per <i>rupes</i> in Sadar sub-division, and 20 <i>seers</i> 2 <i>chittacks</i> in Khorda sub-division. Public health good.
	40 Balasore " 30, "	0-30	Weather—seasonable. <i>Beali</i> paddy being harvested. Weeding of <i>sarad</i> crop less greatly advanced. Prospects of crops generally good. Public health generally good.
CHOTA NAGPORE.			
<i>South-West Frontier Agency.</i>			
CHOTA NAGPORE.	41 Bazarbuck Sept. 30, '87	Nil	Weather—bright. Rain urgently wanted all over the district. Rice on higher lands reported to be suffering for want of rain. <i>Khaddai</i> being harvested with fair outturn generally. General health good.
	42 Lohardugga Oct. 1, "	Nil	Weather—hot and cloudy. Rain urgently required all over the district. Prospects of crops depend on further rainfall. Prices steady. Cholera decreasing.
	43 Singhbhum Sept. 30, "	Nil	Weather—clear; cool in the morning and hot during the day. In some parts want of rain for paddy crop is very keenly felt. <i>Gora</i> <i>dhana</i> harvested; outturn estimated at 12 <i>seers</i> on average. <i>Khaddai</i> crop reaped with fair outturn. Sugarcane thriving. Cutta-disease in Suralkella, and fever to some extent in Chhanna Chybasa and Seralkella. Public health otherwise good.
	44 Manbhoom Oct. 1, "	Nil	Weather—cool and pleasant. Rain urgently wanted for high land paddy. Public health fair.

Published for general information.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 30th of September 1887—contd.

[illegible]

Explanation.—Indicates that no race has failed. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are missing, the corresponding spaces in the total marginal columns are left blank.

Calcutta, the 4th October 1847.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
20TH OF SEPTEMBER 1887.**

On the last day of the previous week a feeble cyclonic storm or barometric depression, which had formed over the head of the Bay, had partly advanced over the land, and its centre was at 10 A.M. of the 23rd almost over the coast line of the Sunderbans, and between Sagar Island and Burrial. The feeble storm was, as usual, accompanied by distinct cyclonic circulation of winds, but the wind force at the land stations was moderate only, though at the head of the Bay squally weather generally prevailed. With the existence of the depression over the extreme south of the province, the monsoon winds were as usual prevented from extending over the province, and thus, though conditions were favourable for rainfall over the south and south-east of Bengal, the greater number of the northern and western stations were almost absolutely rainless. On the 24th the depression advanced slowly in a northerly or north-north-easterly direction, and at 10 A.M. its centre was near Burrial and between this station and Jessore. Pressure fell rapidly at Burrial, the fall almost equalling a tenth of an inch, and with the advance of the feeble storm inland, strong winds set in at the coast stations at the head of the Bay and moderate to heavy rain fell over the greater part of the south of the province. The following decidedly heavy rainfalls were recorded on the 24th in connection with the feeble storm:—in South-West Bengal Ranaghat 1·80 inches, Meherpore 1·82 inches, Koushtea 1·50 inches, Satkhira 3·30 inches, Jessore 2·49 inches, Jhenida 1·51 inches, and Bongong 2·70 inches; in East Bengal Cox's Bazar 1·75 inches, Kutubdia 2·12 inches, Burrial 2 inches, Bauphal 1·06 inches, and Perozapore 1·80 inches; and in North Bengal Cooch Behar 1·64 inches, Mikligunge 3·33 inches, Matabhanga 2·48 inches, and Siliguri 1·55 inches. The feeble storm continued its advance in a northerly direction, and at 10 A.M. of the 25th its centre was in North Bengal between Berajunge and Rampore Beaulah. It was still well defined, but the depression was decidedly shallower than on the previous day, and it was evidently filling up. With the advance of the depression into North Bengal, conditions became more favourable for rainfall in the eastern and northern districts, and good general rain fell on this day, but it was not as a rule heavy. On the 26th the depression had practically filled up, the cyclonic circulation of winds accompanying the feeble storm had disappeared, and winds became rather irregular in direction, while pressure generally rose, but rain showers were again fairly numerous in East and North Bengal. On the 25th and 26th the following heavy falls of rain were reported:—in South-West Bengal Choodanga 3·40 inches, Patkabares 3·10 inches on the 25th and 4 inches on the 26th, Bongong 2·80 inches, Koushtea 2·12 inches; and the following stations received between one and two inches:—Meherpore, Bagirhat, Khoolna, Narail, Jessore and Azimgunge; in East Bengal the following stations received between 1 and 2 inches in the two days:—Bhola, Noskholly, Ramgunge, Pakour, Netrekona, Subournakhally, while in North Bengal Natore, Naogan and Darjeeling received heavy falls.

With the disappearance of the depression conditions became at once less favourable for rainfall, and for the remainder of the week generally local showers only were reported, principally from the east and north of the province. From the 27th to the end of the week pressure has almost steadily risen, westerly and south-westerly winds also set in at the western stations and gradually forced back the southerly winds previously blowing until, at the close of the week, north-westerly winds were blowing over the whole province except at the eastern stations, where still south-easterly and southerly winds were reported. With the setting in of the dry north-westerly winds humidity rapidly decreased, until at several of the western stations the saturation was less than fifty per cent. of the possible amount. Cloud proportion also decreased rapidly, while temperature generally increased, and at the close of the week the conditions over the greater part of the province were distinctly those which mark the close of the rainy season, and the commencement of the transition conditions which obtain previous to the setting in of the north-east monsoon or the cold weather season in Bengal.

For the whole province the week has again been one of deficient rainfall. The central districts, it is true, have received good rain owing to the action of the depression, but elsewhere the falls have been small. In Orissa, Chutia Nagpur, and the greater part of Behar rainfall has been so small in amount as to be almost practically absent; in South-West Bengal the fall has been nearly equal to the normal, but in East and North Bengal the amounts have only been from about two-thirds to one half the usual amount.

Pressure.—The variations of pressure for the first three days were mainly due to the movement of the depression, but for the second-half of the week pressure rose almost uninterruptedly. The mean pressure for the week has, however, not varied very largely from the normal, though at most stations pressure has been slightly below it. Taking only those stations into consideration which have furnished observations for many years, and which therefore yield reliable averages, the mean pressure of the whole province of Bengal for the week has been below the normal by 0·01 inch. Generally speaking the western stations show excess pressures, and at Hazaribagh the excess is 0·025 inch, while the largest defects are at such stations as Burrial, where it is 0·042 inch, and at Calcutta, where it is 0·037 inch. Some of the stations in North Bengal, such

as Darjeeling, Julpigoree, Rangpore, and Dinagepore, show even a larger defect than these. In Assam also pressure has been decidedly below the normal, the defects ranging from 0·051 inch at Silchar to 0·077 inch at Dhubri, and the general defect for Assam has been 0·06 inch.

Temperature.—Has generally been in defect of the normal over the greater part of the province. Orissa and North Bengal show a slight excess temperature of about half a degree, but all other districts show defects, and in South Behar and Chutia Nagpur the defects range between 1° and 2°. For the whole of Bengal the average temperature of the week has been 0·6° below the normal. In Assam, on the other hand, the mean temperature has been 0·6° above the normal.

Rainfall.—The general distribution of the rainfall has already been referred to in the previous summary. The actual average rainfalls in South-West Bengal, East Bengal, and North Bengal have ranged from 1·35 inches up to 1·51 inches; while the next largest amount is 0·15 inch in Orissa and 0·12 inch in South Behar. Finally, in North Behar and Chutia Nagpur the amounts are only a few hundredths of an inch. Compared with the normal fall, and expressed as a percentage of that amount, the actual average rainfall in each of the seven large meteorological districts for the week has been—Orissa 7 per cent., South-West Bengal 53 per cent., East Bengal 52 per cent., North Bengal 51 per cent., North Behar 1 per cent., South Behar 8 per cent., and Chutia Nagpur 1 per cent.; or taking each of these districts as having an equal value in the calculation, the rainfall of the whole of Bengal for the week has been equal to only 30 per cent. of the normal quantity. Taking up the rainfall rather more in detail, all districts in Orissa have received extremely defective falls; in South-West Bengal the following districts have received fairly good falls:—Burdwan, Nuddea, Jessore, Khoolna, while in Midnapore, 24-Pergunnahs, Howrah, Hooghly, Bankoorah, Beerbhoom and Moorsshedabad the falls have been decidedly scanty; in East Bengal, the Chittagong, Backergunge, Noakholly and Mymensingh districts have received moderate falls, Furreedpore and Dacca have received smaller and rather scanty falls, while the greater part of Tipperah is again largely in defect. The station of Comilla has received a moderate fall of 1·23 inches, but Chandpore has only received 0·48 inch and Brahmanberish up to the 26th September only 0·82 inch. The actual fall at Comilla for the whole of September has been only 3·78 inches, against the normal 11·91 inches, at Chandpore it has been 2·71 inches, against the normal of 13·27 inches, and at Brahmanberish up to the 26th September it has been 3·52 inches, while the normal fall for September is 12·17 inches. For the whole of the monsoon period the falls in the Tipperah district have been only equal to about half the normal amount.

In North Bengal the districts of Pubna, Bogra, Rajshahye, Julpigoree, Cooch Behar and Darjeeling have received good rain, while Maldah, Dinagepore, and Rangpore are largely deficient. In North Behar all districts are largely in defect, rainfall being practically absent; in South Behar, the only district which has received rain is Sonthal Pergunnah, and in Chutia Nagpur rainfall has also been practically absent.

The rainfall in Bengal throughout September has been very considerably in defect, as has been pointed out in previous summaries. The table below contains the numbers representing the rainfall for the four weeks of September, the figures given being the actual rainfall of each of the seven large meteorological districts expressed as a percentage of the normal fall for the period:—

Rainfall for September 1887 expressed as a percentage of the normal fall for the period.

Meteorological district.	From 2nd to 9th September 1887.	From 9th to 16th September 1887.	From 16th to 23rd September 1887.	From 23rd to 30th September 1887.	Average of four weeks, 2nd to 30th September 1887.
Orissa	23	142	62	7	53
South-West Bengal	42	144	101	83	93
East Bengal	31	128	50	62	68
North Bengal	173	36	55	51	70
North Behar	132	20	106	1	62
South Behar	102	68	130	8	76
Chutia Nagpur	58	112	93	1	66
Average for whole Province ...	78	92	85	30	72

The defective rainfall is therefore becoming decidedly more pronounced, and in all districts, except South-West Bengal, rainfall during September has been decidedly scanty.

In Assam during the week fairly good rain has fallen. Sibsagar has received 3·37 inches, Silchar 1·99 inches, and Dhubri 1·16 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 30th of September 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The average fall of the corresponding period for 24 years, S. G.'s Office	58.97

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 26, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, A. dew.

PART V.

Acts of the Governor General's Council assented to by the Governor General

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor-General of India in Council received the assent of His Excellency the Governor-General on the 23rd September, 1887, and is hereby promulgated for general information:

ACT NO. XIX OF 1887.

An Act to provide for the Administration of the Estate of His late Majesty the King of Oudh.

WHEREAS His late Majesty Wajid Ali Shah, King of Oudh, was during his lifetime exempt from the jurisdiction of the Civil Courts, and it is expedient to make provision for the administration of his estate otherwise than under the authority of those Courts; It is hereby enacted as follows:—

1. (1) The Governor General in Council shall have exclusive authority to act in the administration of the property of whatever nature left by His late Majesty the King of Oudh in regard to the settlement and satisfaction of claims against the estate of His late Majesty, and may make distribution of the remaining property or the proceeds thereof in

such manner as he deems fit among the family and dependents of His late Majesty.

(2) No act of the Governor General in Council in connection with the administration to or distribution of the property left by His late Majesty shall be liable to be questioned in any Court.

2. The Agent to the Governor General with Indemnity to Agent His late Majesty, and all to the Governor General persons acting under his orders, are hereby indemnified and discharged from liability in respect of all acts done by him or them since the twentieth day of September, 1887, in connection with the preservation and administration of the estate of His late Majesty, and no suit or other proceeding shall be instituted in any Court against him or them, or against the Secretary of State for India in Council, in respect of those acts or any of them.

3. This Act shall take effect notwithstanding any testamentary or other disposition which may have been made by His late Majesty, and notwithstanding any proceedings which may have been or may be instituted before any Civil Court for administering his estate or collecting the debts due to it, and any person who under any probate, letters of administration or certificate, or otherwise howsoever, has received or realised any portion of the estate of His late Majesty shall be bound to account therefor to such officer as the Governor General in Council may appoint in this behalf.

STATEMENT OF OBJECTS AND REASONS.

As regard must be had in the administration of the estate of His late Majesty the King of Oudh to political considerations by which an executor or administrator under the ordinary law could not be guided, and as the winding-up of the estate will include the closing of the large establishment at Garden Reach, it is considered necessary to follow the precedent created by Act XVIII of 1848 in the case of the Nawab of Surat, and to confer upon the Government exclusive authority to act in the administration of the property of His late Majesty.

The object of this Bill is to confer that authority on the Governor-General in Council.

The 22nd September, 1887.

ANDREW R. SCOBLE.

S. HARVEY JAMES,
Secretary to the Government of India.

FOREST DEPARTMENT,—BENGAL.

NOTIFICATION

The 11th October 1887.—The following temporary promotions are made consequent on the departure of Mr. E. G. Chester, Deputy Conservator of Forests, on the leave granted to him in the notification of 16th September 1887 :—

Mr. W. M. Green, Deputy Conservator of Forests, fourth grade, to officiate until further orders, in the third grade, with effect from the 15th September 1887.

Mr. E. L. Heinig, Assistant Conservator of Forests, first grade, and Officiating Deputy Conservator, fourth grade, to continue to officiate, until further orders, in the fourth grade of Deputy Conservators of Forests.

P. NOLAN,

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 11th October 1887.—The Lieutenant-Governor, with the previous sanction of the Governor-General in Council, is hereby pleased to declare under section 18 of the Indian Forest Act (VII of 1878), that the area specified below, which, in the Notification of the 28th August 1882, published at page 744 of the Calcutta Gazette of the 30th idem, was declared to be a Reserved Forest under section 19 of that Act, forming part of the Reserved Forest then so declared under the name of the Jeet and Choo-Choo Forest, ceased to be a Reserved Forest with effect from 1st April 1887.

A piece of land measuring about 300 acres and bounded as follows:—

North—From pillar No. 1 on the south of the Rissisoom-Pasheting road situated at a point 4,988 feet measured along the north boundary as laid down on the ground west of the point of junction of the road from Richhula through Pankasari direct to Labah with that road, along that road eastwards to pillar No. 69; then along a demarcated line to pillar No. 68 on the ridge and eastwards along the ridge to pillar No. 54; thence along the Pasheting road eastwards to pillar No. 53 on the south of that road.

East—From pillar No. 53 a demarcated line in a generally south-westerly direction down the spur to pillar No. 41.

South—From pillar No. 41 a demarcated line generally in a westerly direction crossing several streams and spurs to pillar No. 19 on the north side of the Ohraming road.

West—From pillar No. 19 a demarcated line up a spur in a northerly direction to pillar No. 1.

Note—The above area is made over to the Deputy Commissioner of Darjeeling as a site for a settlement.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 3rd September 1887.—Baboo Radha Madhab Bose, Deputy Magistrate and Deputy Collector of Nuddes, is appointed to be Deputy Collector of Income-tax in that district, vice Baboo Sital Nath Bose, deceased, and, under section 40 of Act II of 1886, is vested with the powers of a Collector under the Act.

F. J. FERGUSON, Registrar of the Diocese.

DIOCESAN REGISTRY OFFICE, CALCUTTA, the 7th October 1887.

EDUCATION DEPARTMENT, BENGAL.

NOTIFICATION.

It is hereby notified for general information that, upon the result of the Entrance Examination of April 1888 being known, the six second grade junior scholarships allotted to the Patna Division will be awarded to the six best boys who stand first in order of merit in the divisional list, irrespective of the districts they come from, and the twelve third grade scholarships will be distributed as follows :—

Patna	2
Gya	2
Shahabad	2
Mozufferpore	2
Darbhanga	1
Saran	2
Chumparun	1
Total	12

DHANESH CHUNDER ROY, Personal Asst. to Commr., for Commr.
PATNA COMM. 'S OFFICE, BANKIPUR, the 19th September 1887.

NOTICE.

In accordance with the Government notification, dated the 16th September 1887, it is hereby notified for general information that the next half-yearly examination of Assistants and Deputy Magistrates and of officers of Police, Jail, Medical and Forest Departments in the Chota Nagpore Division will be held at Ranchi, on Monday, the 14th November 1887, and the following days.

RAICHARAN GHOSH, Personal Assistant to Commr., for Commr.
COMM. 'S OFFICE, CHOTA NAGPORE DIV., RANCHI, the 4th October 1887.

NOTIFICATION.

It is hereby notified that for the ensuing Half-yearly Departmental Examination of Junior Civilians, Deputy Magistrates, and others to be held on the 14th November next and subsequent days, two Local Committees will be formed in the Bardwan Division, viz., one at the Commissioner's Office at Bardwan for the examinees employed in the districts of Bardwan, Bankoora and Beerbhoom, and another at Midnapore for those employed in that district. Officers employed in the districts of Hooghly and Howrah, who have to appear at the examination, will be examined by the Local Committee at the Presidency, and must appear at the Office of the Commissioner of the Presidency Division at No. 14, Hare Street, Calcutta.

ANNADA PERRAD GHOSH, *Personal Assistant, for Offg. Commissioner.*

BURDWAN COMMISSIONER'S OFFICE, the 6th October 1887.

BEHAR CIRCLE.

ENTRANCE EXAMINATION, 1888.

The attention of those who wish to appear at the Entrance Examination of 1888, as teachers or as private students, is called to the following:—

I. By "teacher" is meant one who has been employed as such since 1st January 1887, and is a *bona fide* teacher, in receipt of a salary at the time of the examination. Satisfactory evidence of this will be required of those who wish to appear as teachers for the Entrance, F. A., or B. A. examinations.

II. Private students will have to produce evidence that they have not read in any school since May 1887, and send, together with their application, a certificate from the head-master of the last school they read in showing that they have observed the Inter-school Rules.

III. Teachers and private students will have to appear at the test examination of the nearest zillah school and pay a fee of two rupees.

IV. The application forms, when sent for the signature of the undersigned, must be accompanied by a statement signed by the head-master showing that there is a reasonable probability of the applicant's passing.

V. No applications to be allowed to appear at the test examination will be received later than 31st December 1887 from either teachers or private students.

VI. Head-masters of the zillah schools are informed that the standard of marking for the test examination is to be just that of the University. If candidates, whether pupils of the school, teachers or private students, fail to pass in more than two subjects, or fail very badly in two, their marks must be submitted to the undersigned, to decide whether they shall be sent up or not. Care must be taken to submit the marks in time.

JOHN VAN SOMEREN POPE,
Inspector of Schools, Behar Circle.

BANKPORE, the 6th October 1887.

NOTIFICATION OF THE BOARD OF REVENUE.

No. 1227B.

Notice is hereby given that the Eleventh Sale of Opium, the Provision of 1885-86, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Wednesday, the 2nd November 1887, at 11 A.M., and will comprise 4,750 chests, viz.—

			Chests.
Opium manufactured at the Patna Factory	2,375
Ditto ditto at the Ghazepore Factory	2,375
Total	4,750

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 29th November 1886, and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 7th and 17th November 1887, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Monday, the 7th November 1887, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Thursday, the 17th November 1887.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghaseepore Factories will be brought to sale in the present year about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

DATES.	Manufactured at the Patna Factory. About chests.	Manufactured at the Ghaseepore Factory. About chests.	Total about chests.
On or about Thursday, 1st December 1887 ...	2,375	2,375	4,750

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 3rd October 1887.—It is hereby notified that, under section 24 of the Bengal Local Self-Government Act III (B.C.) of 1885, the Lieutenant-Governor is pleased to re-appoint the Magistrate of Bankoora to be the Chairman of the Bankoora District Board.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 6th October 1887.—It is hereby notified for general information that, under the provisions of section 39 of Act IV (B.C.) of 1876, the Lieutenant-Governor has been pleased to approve the following modifications in the rules for the regulation of the grant for pension and gratuities to the officers of the Calcutta Municipality made by the Commissioners of that Municipality at a special general meeting held on the 31st March last:—

15. The amount of pension or gratuity that may be granted shall be determined by length of service as set forth below—

- (a) After a service of less than 15 years, a gratuity not exceeding one month's emoluments for each completed year of service, but not, under any circumstances, exceeding 12 months' emoluments in all, broken periods of a year not being taken into account in making the calculation.
- (b) After a service of not less than 15 years, but less than 25 years, a pension not exceeding one-third of the officer's average emoluments, and also not exceeding Rs. 3,000 a year; or, if the officer's average emoluments do not exceed Rs. 12,000 a year, Rs. 2,000 a year.
- (c) After a service of not less than 25 years, a pension not exceeding one-half of the officer's average emoluments, and also not exceeding Rs. 5,000 a year; or, if the officer's average emoluments do not exceed Rs. 12,000 a year, Rs. 4,000 a year.

17. A retiring pension may be granted after an approved service of not less than 30 years. It may be the same in amount as an invalid pension admissible after 30 years' service.

Compensation and invalid gratuity may be granted to peons at the following rates:—

After a service of less than 5 years ...	Nil.
Not less than 5 years, but less than 10 years ...	3 months' pay.
Not less than 10 years, but less than 15 years ...	4 " "
Not less than 15 years, but less than 20 years ...	5 " "
Not less than 20 years ...	6 " "

Compensation and invalid pension after a service of not less than 30 years, half-pay not exceeding Rs. 4 a month.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 9th October 1887.—In modification of the notification dated the 27th September 1884, published at page 1011, Part I of the *Calcutta Gazette* of the 1st October 1884, it is hereby notified for general information that the Lieutenant-Governor is pleased, in the exercise of the powers conferred on him by section 6, clause (c) of the Bengal Ferries Act I (B.C.) of 1885, to change the line of crossing of the Barari to Banagurra Ferry over the Ganges in the district of Bhagulpore, and to declare the following line of crossing to be a public ferry, viz., from Barari on the south bank to Pannuchuk on the north bank.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th October 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Hooghly and Chinsurah Municipality for a public purpose, viz., for a Municipal Strand Road, in the village of Khaksially, pergunnah Arsa, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 20 bighas 12 cottaks and 2 chittacks of standard measurement, is required. The land is bounded on the north by lands appertaining to villages Khaksially and Chandernagore; on the east by lands appertaining to villages Khaksially and Shoraghat; on the south by lands pertaining to Khaksially and chur Chandernagore; and on the west by the lands pertaining to the said chur Chandernagore.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th October 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Hooghly and Chinsurah Municipality for a public purpose, viz., for a municipal tank in Hooghly, in the village of Peepalpati, pergunnah Arsa, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 7 bighas 8 cottaks and 6 chittacks of standard measurement, is required. The land is bounded on the north by lands belonging to Sidhu Bawa, Prosonno Bawa, Nimoo Meen, and Maulavi Azal Hak; on the east by the Peepalpati Road; on the south by lands belonging to Denu Nath Pal, Thackoor Dass Pal, and Sristidhar Mochhee; and on the west by a garden belonging to the said Azal Hak.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 10th October 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for the reconstruction and extension of latrine No. 2 at Hastings, it is hereby declared that for the above purpose a piece of land, holding No. 4, Canal Road, Hastings, in the Town of Calcutta, district 24-Pergunnahs, measuring, more or less, 4 cottaks 8 chittacks and 44 square feet only, is required. The boundaries of the land are as follow:—On the north partly by Barar Road, No. 3, and partly by municipal land; on the south by a passage; on the east by portion of holding No. 4, Canal Road; and on the west partly by municipal land, and partly by Canal Road, Hastings.

A plan and specifications of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

The Calcutta Gazette.

WEDNESDAY, OCTOBER 12, 1887.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1869, that the undermentioned estates or shares of estates in the district of Monghyr will be put up for sale at the Collector's office of that district on 24th October 1887, for arrears of revenue and other demands which, by the Regulations and Acts in force, are directed to be realised in the same manner as arrears of revenue.

When in columns 5, 7 and 8 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and the other share or shares in the estate are excluded from the sale:—

S. J. DOUGLAS, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Dacca will be put up to sale at the Dacca Collectorate on the 12th January 1888, corresponding with 29th Poush 1294 B.S.

The purchasers will be subject to the following conditions of sale:—

1st.—The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as the proprietors of these estates, and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Chittagong Collectorate, the 19th August 1887.

A. MAXSON, Collector.

No. 8.

SEALED tenders in the form used in the Commissariat Department (blank forms whereof can be had on application at the Commissariat Storekeeper-General's Office at Madras) will be received up to 1 o'clock on Tuesday, the 26th October 1897, by the Commissariat Storekeeper-General at Madras, for the supply, by contract, of 10,824 Imperial gallons of matured rum 5° overproof and 21,971 Imperial gallons of new rum 5° overproof, as mentioned in the subjoined schedule, to be delivered at the Commissariat Stores at Madras, to the Commissariat Storekeeper-General, free of all charges whatsoever, from 1st April 1898 to 30th September 1898. The above quantity is subject to a possible deduction of 10,099 Imperial gallons of matured rum and 10,369 Imperial gallons of new rum, or less, if favourable tenders for Rangoon (free of all charges whatsoever), as per paragraph 3, are received.

2. Tenders will be opened by the Commissariat Storekeeper-General at Madras in presence of those interested who may choose to attend.

3. Tenderers have the option of tendering for the supply of the whole quantity of rum at Madras as mentioned in paragraph 1, or of supplying at the following stations separately the respective quantities given under each station. In the latter case the amount inserted under each station is the earnest-money to accompany such tenders as shown in the schedule.

SCHEDULE.

DESCRIPTION OF ARTICLE.	PROBABLE QUANTITY.		Period of delivery, specifying quantities.	Place of delivery and to whom to be made.	Amount of deposit.	Amount of security in cash, currency notes or Government promissory notes.	Compensation to be paid to Government for each breach of contract.
	Matured rum.	New rum.					
MADRAS.	IM. GALS.	IM. GALS.					
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	0,726	The whole quantity must be delivered between 1st April and 30th September 1898 in such quantities as the Storekeeper-General at Madras shall in writing from time to time direct.	To be delivered in to the warehouse at the General Arrivals Depot, Commissariat Storekeeper-General's Office, Madras.	Rupees 500 to be paid to the Secretary and Treasurer, Bank of Madras, his receipt being produced as a voucher of payment, or Government promissory notes to the same value, duly endorsed in his favour, to be handed to the Commissariat Storekeeper-General, Madras, with the tender.	Ten per cent. on the value of the articles contracted for.	Not exceeding Rs. 2 per gal. for rum rejected or not delivered.
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	10,812					
RANGOON.							
Best sugarcane new rum of Indian manufacture, 5 degrees over London proof.	10,369	Direct to the Store and Shipping Officer, Rangoon.	Direct Rangoon.	Rupees 250 ditto.		
Best sugarcane matured rum, either of Indian or foreign manufacture, 5 degrees over London proof.	10,099					
Total Imperial gallons	10,824	21,971			Total Rs. 750		

The rum is subject to the approval of a Committee, and must be in all respects equal to the sample to be seen in the Commissariat Storekeeper-General's Office.

4. Each tender must be accompanied by the deposit shown in the schedule, and in default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders.

5. No person making a tender shall be allowed to withdraw his tender for the space of sixty days from the date thereof, and, in the event of his so doing, he will be considered as having committed a breach of his contract, and will be held responsible for all damages which Government may sustain thereby.

6. Tenders should be superscribed "Tenders for rum" for Madras and Rangoon, or for Madras or Rangoon separately.

7. All needful information may be had on application at the Commissariat Storekeeper-General's Office at Madras.

8. Every tender not made in the required form will be rejected. The form of tender to be signed as well as the schedule.

9. The Commissary-General reserves to himself the right of rejecting tenders without assigning any reason for so doing.

10. Offers by telegram will not be accepted.

11. Rates offered in tenders are to be inserted in words as well as in figures, and the column "Amount" should also be filled up.

12. Parties at out-stations who may be desirous of forwarding their tenders will do so post-paid (so as to ensure their reaching the Commissariat Storekeeper-General on or before the date and before the hour named above), accompanied by a receipt from civil treasuries at those stations to the effect that they have lodged the required deposit money for the article tendered for. Cash, currency notes, or cheques will not be accepted.

13. Each tender must also be accompanied by the deposit of the further sum of Rs. 20, being the fee of the Government Chemical Examiner for analysing the samples forwarded with the tender. In default of such deposit the tender will be rejected. Should the samples not be analysed by the Government Chemical Examiner, the deposit will be returned, but if analysed by that officer, the deposit will be paid to the Government Chemical Examiner.

14. Each person tendering must submit with his tender a sample of not less than five gallons of the spirit he purports supplying.

15. Intending tenderers are strongly recommended to examine the sample of rum in the Commissary-General's Office.

By order of the Commissary-General,

COMMISSARIAT STOREKEEPER-GENERAL'S OFFICE;

Madras, 19th August 1897.

B. GOMPERTS, Major,

Commissariat Storekeeper-General.

Notice

IS hereby given that, in pursuance of the provisions of the Chota Nagpore Encumbered Estates Act (as amended by Act V of 1884) and the Dec Estate Act, the undermentioned properties will be sold by public auction to the highest bidder at the Gya Collectorate for the settlement of debts and liabilities against the Dec Estate on the 11th of November 1887 at 1 P.M. and the following days if necessary.

One-fourth of the purchase-money will have to be deposited by the purchaser at auction on the date of sale. The remainder will be payable after a fortnight on confirmation of the sale, which will principally depend on the highest offer in consideration of the estimated air jumma. If the full purchase-money is not paid on confirmation of sale, the money deposited will be forfeited.

The purchaser will get deduction from the purchase-money for any money remaining still unpaid on account of peshgi of the estate.

Any application for purchase by private contract offering reasonable price for all or any of the undermentioned properties will be received by the Manager till the 10th of November 1887:—

and Oudh, Oudh Circle.

KARNYA LAL,

Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1898.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Go-
vernment Factory from Red Cinchona Bark. This
is a more perfect substitute for Quinine than the ordi-
nary uncrystallized Febrifuge. It can be purchased by
Government officers for public and charitable purposes,
and by any one taking twenty pounds and upwards at a
time, from the Superintendent, Royal Botanic Garden,
Seerpore, near Calcutta, for cash only, at the following
rates:—Per four ounces tin Rs. 6 ann. 8, per eight
ounce tin Rs. 12 ann. 8, per pound tin Rs. 24. The
general public can be supplied by the Superintendent,
Royal Botanic Garden, for cash only, at the under-
noted rates:—Per four ounces tin Rs. 8 ann. 8, per
eight ounce tin Rs. 16 ann. 8, per pound tin Rs. 32.
This medicine is also sold by the principal European
and Native druggists in Calcutta. Postage four annas
per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas
per pound tin, in addition to the foregoing rates.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine
and can be purchased by Government officers for
public and charitable purposes, and by any one taking
twenty pounds at a time, from the Superintendent, Botani-
cal Garden, Calcutta, for cash only, at the following
rates:—per four ounces tin, Rs. 4 ann. 8; per eight
ounce tin, Rs. 8 ann. 8; per pound tin, Rs. 16 ann. 8.
The general public can be supplied by the Superintend-
ent, Botanical Garden, for cash only, at the undernoted
rates:—per four ounces tin, Rs. 6 ann. 8; per eight ounce
tin, Rs. 10 ann. 8; per pound tin, Rs. 20. This medicine
is also sold by the principal European and Native drug-
gists in Calcutta. Postage eight annas per 4 and 8 oz.
tins, and twelve annas per pound tin, in addition to the
foregoing rates.

Commissioners for making improvements in the Port of Calcutta.

NOTICE

UNDER SECTION 22 OF ACT V (B.C.) OF 1870.

THE following packages, landed at the Jetties from the undermentioned ships, have been removed to the Commissioners' Import Warehouse, where they remain at the risk and expense of the owners. If not cleared within two months from the date stated against each item, they will be sold under section 72 of the said Act:—

Notification.

It is hereby notified, under section 5 of the Indian Treasure Trove Act (VI of 1878), that in May 1887 a treasure consisting of twenty-five (25) old gold coins (Virarayan fanams), valued at Rs. 10-15, was found in field No. 1032, in the village of Punnam, Karur taluk, Coimbatore district.

All persons claiming the treasure or any part thereof are required to appear in person or by agents before

the Collector at Coimbatore on Monday, the 8th February 1888, with a view to the matter being enquired into and disposed of in accordance with the provisions of the said Act.

J. STRANROCK, Acting Collector.

Coimbatore Collector's Office, the 26th September 1887.

Messrs. W. Newman & Co., "Limited."

NOTICE is hereby given that the Sixth Ordinary General Meeting of Shareholders of the above Company will be held at the Registered Office, No. 4, Dalhousie Square, Calcutta, on Monday, the 31st October 1887, at 4 P.M., to pass the accounts for the year ended 30th June 1887, and to transact such further business as may be brought before the Meeting.

By order of the Directors.

Calcutta, the 11th October 1887.

JOHN ELIOT, M.A., Meteorological Reporter

to the Govt. of Bengal,

Calcutta, the 26th August 1876.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by post in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e. from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. FREDER.

Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1888

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	Rs. 20	Rs. 14	Rs. 9
" three issues	" 55	" 38	" 24
" six "	" 100	" 68	" 45
" nine "	" 145	" 96	" 61
" twelve "	" 180	" 120	" 80

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1484, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1886, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance
For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
" each of the Madras, Bombay, and Allahabad Series ...	" 8 0	" 7 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	"	2 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	"	1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
" Thacker & Co., Bombay.
" Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.
" Curator of Government Books, North-Western Provinces and Oudh.
" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1886 should be at once remitted.

BOOKS AND PUBLICATIONS

RESOLUTION ON THE REPORT ON THE LUNATIC ASYLUMS IN BENGAL FOR THE YEAR 1886.

MEDICAL.

Darjeeling, the 31st September 1887.

RESOLUTION.

READ—

The Report on the Lunatic Asylums in Bengal for the year 1886.

Read also—

The Report for the year 1885, and the Resolution recorded upon it.

Although the Report, which was due on the 1st May last, was not received by Government till the 14th July, yet no explanation of the delay in its submission has been furnished. The Lieutenant-Governor trusts that the Inspector-General of Civil Hospitals will in future pay more attention to the orders of Government regarding the punctual submission of reports.

2. The total number of persons who were in confinement in all the asylums in Bengal, with the exception of the European Asylum at Bhowani, on the 1st January 1886 was 955, of whom 757 were males and 198 females. The numbers of admissions and re-admissions during the year were 16 and 18 respectively. Of all those under treatment, 87 persons were discharged cured, 41 were transferred to the care of friends, 4 were discharged cured, 85 died, leaving 956 persons in the asylums on the 31st December 1886. The daily average population was 963.9 against 939.62 in 1885. The percentage of recoveries calculated on the daily average strength was 9.02 per cent against 8.89 in the previous year.

3. The number of criminal lunatics in the asylums on the 1st January 1886 was 387, of whom 349 were males and 38 females. During the year there were 81 new admissions and 12 re-admissions; 60 persons were discharged or transferred, and 23 died, leaving 397 in the asylums at the close of the year. This number is the highest on record within the past decade. In 1876 the number was only 292, and there has been a steady increase since that year, the number having increased by nearly 100 during the last quinquennial period from 1882 to 1886. In drawing attention to the steady increase in the number of this class of lunatics, the Inspector-General of Civil Hospitals observes that the figures are open to objection, as they represent not altogether cases of genuine insanity, but possibly cases in which insanity has been successfully pleaded in Court, and cases of crime committed under mere intoxication. The Superintendent of the Dullunda Asylum, referring to the increase in the number of criminal lunatics in that institution, remarks that "the increase in the criminal population is due to the necessity of retaining a prisoner in the institution after he has been declared sane longer than is the case with the non-criminal." Sir Stuart Bayley thinks it possible that non-homicidal lunatics have in some cases been detained for longer periods than was necessary. The statement of admissions and "crimes charged" shows that out of the total number of 81 admissions, 25 were charged with murder and attempts to commit murder, five with culpable homicide, four with grievous hurt, two with hurt, one with attempt to commit suicide, 20 with theft, one with receiving stolen property, three with trespass, one with mischief by fire, one with exposure of child, two with house-breaking, one with criminal trespass, one with lurking house trespass, five with house trespass, and one for each of the following offences:—namely, forgery, hurt, vagrancy, highway robbery, trespass and assault, wrongful confinement, obstruction on railway, and exposure of person. It is evident that many of these offences were comparatively trivial, and if the lunatics were harmless, there was no necessity for sending them to an asylum at all; in any case, if they are not dangerous, there appears to be no reason for prolonged detention. During the year 17 per cent. of the non-criminal population and 8 per cent. of the criminal class were discharged from the Dullunda Asylum. From this the Superintendent concludes that, while the non-criminals form, as it were, a floating population, the criminals are gradually, but surely, filling the asylums. He suggests the advisability of establishing a separate criminal asylum, as it is difficult to segregate, manage or control criminal lunatics in an ordinary asylum. The Inspector-General of Civil Hospitals agrees in this view, but he does not think that the want of an asylum for criminal lunatics is so much a question of importance as separate accommodation for dangerous lunatics, or those who it is found troublesome and difficult to manage. The Lieutenant-Governor expresses his opinion that it would be advisable to have a separate asylum for criminal lunatics only, but the expense both directly and indirectly caused by transfers would be so large, that the proposition is one which cannot be entertained at present.

4. The usual difficulty was experienced in regard to the classification of the insanes. During the year, however, 97 persons were returned under head of "Acute mania," 78 under "Chronic mania," 11 under "Melancholia," 1 under "Acute dementia," 15 under "Chronic dementia," 2 under "Imbecility," and 14 as "not insane."

5. The health of the asylums was fairly good. Of the principal diseases treated during the year, dysentery was most prevalent and increased in all the asylums, particularly in Dacca and Patna. Next in order come phthisis, pneumonia and cholera. The last-named disease was reported only from the Berhampore Asylum. The number of injuries sustained by the lunatics during confinement was comparatively few. There were only two cases inflicted by one lunatic on another. As regards the causes of insanity, 53 cases are said to have been due to ganja, 5 to bhang and churra, 53 to opium, 26 to fever, 38 to heredity, 25 to epilepsy, and 6 to other causes. The mortality in the asylums increased from 73 in 1885 to 85 in 1886. The total number of deaths, 30 were returned from Dullunda, 16 from Patna, 10 from Cuttack, and 11 from Berhampore. The causes of death were dysentery, phthisis, exhaustion from mania, and diarrhoea. The high rate of mortality in asylums is of course

to the fact that all the patients are lunatics, and also to the advanced age and chronic infirmities of many of them.

6. The space available in the Dullunda, Dacca and Cuttack Asylums was found to be insufficient to accommodate all the lunatics sent to those asylums during the year. In Dullunda the deficiency of accommodation was in the female ward. Under recent orders the number of districts supplying insane to the asylum has been considerably reduced, and it is hoped that this will have the effect of preventing any over-crowding for some time to come. In Dacca and Cuttack additional accommodation is being provided to meet the increased demand. No over-crowding was reported from Patna, but some of the lunatics are said to have been accommodated in the verandahs of the building, and this has been taken into account in calculating the capacity of the asylum. The Lieutenant-Governor would wish to be informed of the extent to which the verandahs have been so utilized, and whether the lunatics are subjected to any discomfort by being so lodged. The remarks of the Inspector-General of Civil Hospitals regarding the condition of the asylum building at Patna, and the improvements required to be made in it, will be communicated to the Public Works Department for consideration.

7. The receipts and expenditure of the asylums for the year are shown in the following statement:—

Receipts and Expenditure of each Asylum for the year 1886.

1	2	3	4	5	6	7	8	9	10	11	12	13	14
Asylums.	Daily average strength.	Total expenditure.	Received from friends of patients.	Actual profit from manufacture department.	Average cost of each patient per annum.	Average cost of each patient, deducting columns 4 and 5.	AVERAGE COST OF EACH PATIENT IN RELATION TO—						
							Establishment.	Diet.	Blank medicine.	Clothing.	Contingencies.	Other charges.	
		Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Dullunda	271 1/2	22,297 5 7	3,103 13 7	808 14 8	106 0 3	88 5 0	41 13 1	42 10 1	0 2 0	4 8 8	11 14 11	3 11 10	
Dacca	240 42	20,863 14 2	173 2 3	1,008 14 1	144 7 7	85 8 4	24 16 3	32 1 1	0 0 3	2 4 7	4 4 11	19 2 7	
Cuttack	241 37	17,372 18 8	227 15 0	3,107 11 0	71 14 5	82 0 7	23 15 0	27 4 10	0 0 4	2 15 8	2 8 2	4 2 1	
Berhampore	247 1/2	4,014 14 7	61 13 0	535 2 8	90 15 0	86 0 0	25 0 0	25 0 0	0 0 0	1 13 10	1 8 0	2 0 0	
Patna	178 36	18,038 11 10	—	925 14 3	24 18 10	81 14 2	45 10 5	28 0 10	0 1 5	1 4 1	2 13 1	2 7 8	
Total	948 9	88,110 11 7	1,078 14 10	9,041 8 7	31 0 0	88 5 4	30 14 5	34 7 4	0 1 3	2 14 2	5 11 10	8 0 2	

The total expenditure was Rs. 88,110 against Rs. 86,279 in 1885. The increase was due to extraordinary expenditure on repairs and alterations to the asylum buildings during the year. The cost of establishment and superintendence was Rs. 20,061 and Rs. 18,400, respectively, or nearly the same as it was in the previous year. Dullunda is still by far the most costly of all the asylums. The total amount expended on diet was Rs. 22,080 against Rs. 20,613 in 1885, showing an increase of Rs. 1,447, which was distributed among the Dullunda, Dacca, Cuttack, and Berhampore Asylums, and was mainly due to the rise in the price of provisions. The value of articles of diet made over from the Manufacture Department during the year was less than that of the previous year. The average cost of a lunatic's daily diet was one anna and five pies, against one anna and six pies in 1885. The cost of clothing and bedding, including articles received from the Manufacture Department, was Rs. 2,780, against Rs. 3,103 in 1885. The expenditure on account of manufactures was Rs. 22,791 against Rs. 29,248 in the previous year.

8. The foregoing paragraphs do not refer to the European Asylum at Bhowanipore the figures for which are given separately. There were in this asylum on the 1st January 1886, 29 lunatics, of whom 13 were males and 16 females. During the year 17 persons were admitted and 1 readmitted; of these 16 were from the civil population and two soldiers; four persons were discharged cured, one was made over to the Military authorities, four were despatched to Europe under the Merchant Shipping Act, six were transferred to the care of friends, one was sent to Europe as still insane, and two died, leaving 29 patients under treatment in the asylum at the close of the year. "Heredity" and

observation of the Court that, when such an enquiry is likely to involve a protracted hearing, a firm of solicitors might be entrusted with the duty of preparing the case beforehand. The circumstances, however, of this case were very exceptional, and rendered it necessary for the Court to examine all the evidence which might be offered. What was required, in fact, was an enquiry into the evidence at first hand, and not a trial of a case prepared on behalf of Government. The object of the enquiry was not merely a decision on evidence known to be available, but the discovery of such further evidence as might prove to be available, and it was impossible for Government to foresee that the task imposed on the Court would be so protracted and arduous as it proved to be.

4. The following are the conclusions of the Court:—

1. That the *Sir John Lawrence* foundered at sea with all hands on board, probably between the Ridge Light and Palmyra Point; that Captain Irvine, who perished in the vessel, committed an act of foolhardiness, almost criminal in its nature, in taking the vessel out to sea on the morning of the 26th of May.

2. That the vessel, with the exception of the plating in her upper structure, which was abnormally thin, was in other respects seaworthy.

3. That the *Sir John Lawrence* carried more than her proper complement of passengers when she started on her last voyage, but that such overcrowding, in the face of the violent cyclone she encountered, aided very little, if anything, in hastening the disaster which befell her.

4. That the method of survey adopted under the auspices of the Port Commissioners and Port Officer is extremely unsatisfactory, and in urgent need of speedy and thorough reform.

5. That the Storm Signal Code can be amended with advantage; that cable communication should be established between the Andamans and main land; and that the cable already in existence between Diamond Island and Bassin should be overhauled and placed in a state of thorough repair.

6. The first two findings practically dispose of the first part of the enquiry, and, with the modification which will be noted below, the Lieutenant-Governor fully accepts them. It is clear that the vessel was seaworthy, that she foundered because the Commander rashly took her out into a cyclone in spite of the clearest indications of danger, and that no fault of those responsible for her equipment contributed to her loss. It is conclusively shown that the storm which she encountered was one of unusual violence. In the same storm perished the *Retriever*, a new and powerful tug-steamer; and there can be no question that the temerity of the Commander, Captain Irvine, was the cause of the lamentable destruction of life which attended the loss of the *Sir John Lawrence*.

The allegations of Mr. Nucstein, a dismissed servant of the owners of the vessel, were considered by Sir Rivers Thompson some months ago, but were not credited by him. As, however, they were reiterated after the loss of the vessel, Sir Stuart Bayley deemed it right to cause them to be laid before this Court of Enquiry in order that there might be no possibility of evasion or concealment. The result is that on all material points the correctness of Sir Rivers Thompson's judgment has been established.

The Court have come to the conclusion that the plating in the upper structure of the vessel was "abnormally thin," though it is not suggested that this defect was the cause of the disaster. The finding of the Court is based mainly, but not entirely, on the evidence given as to the condition of one of the plates. The evidence both as to the thickness and as to the position of that plate is described as hopelessly conflicting, and though the Court incline to accept Leech's evidence that it was only one-eighth of an inch thick, they finally decide that this particular plate was nearer three-sixteenths than one-fourth of an inch. For a plate in that position one-fourth of an inch is accepted by Lloyd's Surveyor as quite safe. The evidence is perhaps somewhat slender to support the assertion that the plates in the upper structure of the vessel were below the standard of safety.

7. The conclusion of the Court regarding those responsible for the vessel's equipment is that she "was supplied with all needful stores and material, and that the owners and agents did not on any occasion exhibit the slightest reluctance to comply with any reasonable request for repairs or stores made upon them by the Chief Engineer or Captain." The Government is therefore now mainly concerned with the second part of the enquiry.

7. The points which call for notice are—

- (1) The Police and Sanitary arrangements connected with the passenger traffic;
- (2) The system of survey of Native passenger vessels; and
- (3) The system under which meteorological observations at selected points in and on the coast of the Bay of Bengal are communicated and published to the shipping.

8. (1) *Police and Sanitary Arrangements.*—The number of passengers which "Native Passenger Ships" are authorized to carry on short voyages is regulated by section 18 of Act X of 1887. This number was for the *Sir John Lawrence*, in seasons of fair weather, 735. The Police Corporal states that the full number was carried on her last voyage. It appears, however, from the evidence of Mr. Mackenzie, the representative of the firm of Agents, that a considerable number of these passengers cannot have held tickets. On this point the Court make the following observations:—"Mr. Mackenzie tells us that the sale of tickets to passengers for the *Sir John Lawrence* on the occasion of her last voyage began at Rs. 3 and gradually rose to Rs. 6. He also informs us that his firm sold 710 tickets for that voyage: of these some 30 or 40 passengers went by the *Mahratta*. He also tells us that he refunded money on 21 of these tickets after the vessel had started. It is therefore obvious that the *Sir John Lawrence* started that morning with only 689 passengers holding tickets. The police, however, tell us that the *Sir John Lawrence* left with her full complement—735 all told. It must therefore follow with mathematical certainty that there were at least 66 passengers on board who had no tickets." The Court here appear to have misapprehended Mr. Mackenzie's evidence. Mr. Mackenzie says that he sold 731 tickets and gave refunds on 21 of these, leaving 710 passengers still holding tickets. Of these 30 or 40 went by the *Mahratta*, and the remaining 670 or 680 by the *Sir John Lawrence*. The number of passengers on board without tickets would, therefore, on the theory that the full number of 735 was carried, be between 55 and 65.

Baboo Chandra Kumar Bhattacharjee states that he, with a party of 20 persons holding tickets, was refused admission to the vessel at 9 or 9-30 p.m. on the night before she started. The Court have not correctly described this gentleman's evidence as "quite uncontradicted." The Corporal denies that any one was turned away before 3 a.m., though he states that eight or ten boats full of passengers were then compelled to return to the shore. There can, however, be no doubt that Baboo Chandra Kumar Bhattacharjee's statement should be accepted, and it is a reasonable inference that he was refused admission because there was no space available. The aggregate fares to be collected on board from the passengers who would thus appear to have been received without tickets would, at the rate of Rs. 6, the price to which the tickets had risen in the evening, amount to between Rs. 330 to Rs. 390, not to Rs. 398 as stated by the Court. Mr. Currie, on behalf of the Agents, states that the "deck collections" paid in by the Captain on his return from Chandbally only occasionally amounted to as much as Rs. 100. The Court remark on the "ominous contrast" between these figures, and appear to draw the conclusion that the Captain carried a larger number of passengers than was authorized, and that he appropriated a portion of the profit. They seem to have overlooked the special circumstances of the occasion both in regard to numbers and in regard to price. Mr. Currie says: "The morning of the 25th May was the first big rush of the season." And it would appear that the increase in the price of the tickets from the ordinary rate of Rs. 2 to Rs. 6 was quite exceptional and was the result of this pressure. He also says:—"In competition times the deck collections were infinitesimal, because passengers could get tickets for 4 annas, and they could not go on board without them, when they would have to pay Rs. 2;" and it is in evidence that competition, i.e., the competition of steamers for passengers, had ceased before the occasion in question. In the Lieutenant-Governor's opinion these considerations leave open to doubt the inference which the Court would apparently draw from the contrast between the deck collections habitually paid in by Captain Irvine and the amount which he may be supposed to have collected on this particular trip; the more so as such an inference would be distinctly at variance with the evidence which has been offered of Captain Irvine's character and of the estimation in which he was held by his employers and his friends.

Similarly the Lieutenant Governor finds the view of the Court that the *Sir John Lawrence* carried on her last voyage a number of passengers which exceeded the legal limit to be based rather on an inference of what was *a priori* probable than on actual evidence; but he admits the *a priori* probability of the view. Quite enough has certainly been shown to prove that the police arrangements for the control of this traffic, both at Calcutta and at Chandbally, and both on the departure and arrival of the vessels, are most unsatisfactory, and that facilities are offered for disregarding the requirements of the law. As regards counting on arrival in Calcutta, there is a distinct conflict between the evidence of Captain Moore and that of Superintendent Robertson. The Commissioner of Police, Calcutta, and the Commissioner of Orissa, have been asked to report fully upon the whole subject with a view to the early introduction of more stringent regulations.

The Court are of opinion that in no case should passenger space have been permitted between decks on the *Sir John Lawrence*. The reason given is that the ventilation was imperfect. The Lieutenant-Governor does not fully understand the recommendation, as the provision of this accommodation is recognized in the law. The Health Officer of the Port will be required to report generally on the sanitary arrangements of the vessels plying to Chandbally.

It is stated in the evidence of Mr. Augier, late Customs Officer at Chandbally, that no reports of deaths which occur on the voyage are made to the authorities at the port of arrival. Under section 21 of Act VIII of 1876 (section 20 of Act X of 1887), the Port Officers were, by notification of 5th October 1877, appointed to receive such reports. Orders will now be issued to ensure that the penal provisions of section 34 of the present Act are strictly enforced in case of default by the commanders.

9. 21 *Surveys*.—The Court observe that “the requirements of the law as they obtained on the date when the *Sir John Lawrence* foundered at sea are to be found in the *Inland Steam-vessels’ Act of 1884*, the *Indian Steam-ships’ Act of the same year*, the *Native Passenger Act of 1876*, and in the *Indian License Act Amendment Act of 1880*.” They proceed to state that they are not aware whether the officer to whom the duty of delivering certificates under Act VII (*Indian Steam-ships’ Act*) is assigned is the Vice-Chairman of the Port Commissioners or the Port Officer. After remarking that they are informed by Mr. Bushby that the officer authorized by the Local Government “under the *Native Passenger Act of 1876*” to receive from masters, owners, or agents notice of an intention to carry Native passengers “happens to be the Port Officer, Captain Stiffe,” they proceed: “The conclusions we draw from this exposition of the law as it existed at the time is that at any rate so far back as the year 1884 it was the intention of the Legislature that there should be two separate and distinct surveys made in the case of steam-ships which at the same time happened to be Native passenger steam-ships—one conducted by a Surveyor under the direct control of the Port Commissioners, and the other conducted by Surveyors (not one surveyor, as in the former case), for which the Port Officer is directly responsible.” And they animadvert on the action of the Port Officer in accepting for the purposes of Certificate A under “the Act of 1876” materials furnished to him by the Port Commissioners’ office, “and apparently taken from the declaration made by their Surveyor after his survey held under one or other of the *Steam-ship Acts of 1884*.”

The reference to the “*Inland Steam-vessels’ Act, 1884*,” is unnecessary, as that Act could not apply to the *Sir John Lawrence*, which was not “a steam-vessel which ordinarily plies on inland water.” The Vice-Chairman of the Port Commissioners was appointed under Notification dated 8th July 1886 to be the officer to deliver certificates under section 13 of Act VII of 1884, and the Port Officer was appointed under Resolution dated 7th September 1877 to be the officer authorized under section 7 of Act VIII of 1876 (section 7 of Act X of 1887) to receive notices that ships are to carry Native passengers. Two surveys are not required under Act VII of 1884 and Act X of 1887 (*Act VIII of 1876*). Every steam-ship, with the exceptions noted in section 5, is required to obtain a certificate of survey under Act VII of 1884; and, under sections 13 and 14 of Act X of 1887 (sections 13 and 14 of Act VIII of 1876), such a certificate, if it is in force and if it states, as such certificates must practically state, “that the ship is seaworthy and properly equipped, fitted and ventilated, and the

number of passengers that she is capable of carrying," takes the place of Certificate A under that Act, unless the Port Officer considers that the certificate has, from any cause, become invalid after its issue. It was in view of these considerations that Government issued the orders dated 18th January 1884, to which the Court refer.

The only questions for consideration, therefore, are (a) the system under which and the manner in which surveys are performed and certificates granted by the Port Commissioners and their officers under Act VII of 1884, and (b) the manner in which Certificates B are prepared by the Port Officer under Act X of 1887.

10. The Court remark upon the circumstance, disclosed in the evidence, that Mr. John MacKellar makes independent surveys of vessels, both as Engineer-Surveyor and as Ship Surveyor. It would appear that Mr. MacKellar was appointed to be Assistant Engineer-Surveyor to the Port Commissioners in accordance with the sanction conveyed in Government order No. 2707T—G, dated 23rd October 1884. He was not, however, gazetted to exercise the powers of a Surveyor. In June 1885 the Port Commissioners decided to grant three months' leave to Mr. Bushby, their Engineer-Surveyor; and in their letter No. 854, dated 25th June 1885, they asked that Mr. John MacKellar "should be gazetted to enable him to perform so much of Mr. Bushby's duties as relate to the entire survey of inland steamers and the survey of the engines and boilers of ocean-going steamers." In the Notification published in the Gazette Mr. MacKellar was by inadvertence appointed "Surveyor of steam-vessels in the Port of Calcutta under Acts V of 1862 and I (B.C.) of 1868, and of steam-vessels under Act VIII of 1876," without any proper limitation either as to the duties to be performed or as to the period for which they were to be performed; but the Government letter referred fully to the limitations. It is apparently under this Notification that he has continued to exercise independent powers since Mr. Bushby's return. The Port Commissioners will be asked to submit a report on the full and permanent exercise by Mr. John MacKellar of powers which, as the correspondence with Government shows, it was only intended that he should exercise partially and as a temporary expedient.

11. As regards the payment of Rs. 1,000 to Mr. Bushby by Messrs. Macneill and Company, for professional advice given by him in regard to the alterations required in the hull of the *Sir John Lawrence*, the Lieutenant-Governor must abstain from passing any orders till he has received the explanation of Mr. Bushby, which the Port Commissioners will be desired to submit. The Lieutenant Governor observes, however, that though the Court sat for two days after Mr. Mackenzie's evidence on this point had been taken, they did not recall and examine Mr. Bushby on his action. Such an examination might have enabled them to express a matured opinion on the transaction with a full knowledge of the surrounding circumstances.

12. It has already been observed that under the provisions of sections 13 and 14 of Act X of 1887 (sections 13 and 14 of Act VIII of 1876), a certificate under Act VII of 1884 takes the place, in ordinary circumstances, of certificate A. For certificate B, however, the responsibility rests entirely with the Port Officer. Captain Stiffe states that he makes the survey personally for the purpose of this certificate when the vessel concerned is about to start on a long voyage. As regards ships going on short voyages, he sometimes goes on board. As a rule, however, it appears that, on a declaration being submitted by the Agents that the requirements of the law have been complied with, a certificate in his name is issued by his Chief Clerk. The Lieutenant-Governor cannot consider that this lax system of procedure is a sufficient compliance with the requirements of the law. If Captain Stiffe found it impossible to inspect personally every steamer starting for Chandbally to ascertain if the necessary provision of fuel, water and the like had been made, he should have represented the matter to Government; but he should certainly not have allowed a formality prescribed by the law to degenerate into a mechanical device.

13. (3) *Meteorological Observations and Storm Signals*.—The fifth conclusion of the Court relates to the storm signals, and on this they submit their recommendations that the Storm Signal Code can be amended with advantage; that cable communication should be established between the Andamans and

the main land; and that the cable already in existence between Diamond Island and Bassein should be overhauled and placed in a state of thorough repair.

14. These three questions have been recently under the consideration of Government, and on the day following that on which Mr. Pedler gave his evidence, a revised code of storm signals was published in the *Calcutta Gazette*, on the recommendation of the Meteorological Reporter, the Port Officer and the Port Commissioners, amending and simplifying the former Code, and bringing into force in the port of Calcutta the system of signals used for the river approaches to the port. Mr. Pedler in his evidence observes that it might be desirable to have one or two more general signals, and the subject will be further considered with reference to this question. The recommendation of the Court is that a new signal should be added to the Code, which, irrespective of the nature and probable position of an approaching cyclone, should, when hoisted, serve as an imperative prohibition to any ship, whatever her draft or size, from going to sea. When the Code of Storm Signals was originally drawn up, it was at first proposed to issue as prohibitions the warnings which were finally added to each signal. A correspondence on this subject took place between Government and the Chamber of Commerce, and it was ultimately decided that only warnings, and not prohibitions, should be issued. The Lieutenant-Governor has carefully considered the subject in the light thrown on it by the evidence in the present case, and especially by the evidence of the Commander of the *Tyrone*, one of the passenger steamers plying between Calcutta and Chandbally. Captain Spence says: "I considered the conduct of the Captain a little rash on the ground that he had a large number of passengers on board, and however well the ship itself would weather the storm, the passengers might be put not only to inconvenience, but be knocked about and even killed." This evidence, coming as it does from the Commander of one of these steamers is entitled to much weight, and it shows that in some cases the Captain may safely put to sea so far as the steamer is concerned, but not so far as the passengers are concerned. The Lieutenant-Governor has directed, therefore, that the subject should be reconsidered and that the opinions of the Port Commissioners, the Chamber of Commerce, the Port Officer, the Commissioner of Police, Calcutta, and the Commissioners of Chittagong and Orissa should be obtained on this question. Should it be found desirable to introduce penal provisions, a change in the law would be necessary.

15. The question of establishing cable communication between the Andamans and the main land has been fully considered. The Government of India is fully alive to the importance of this; but hitherto financial considerations have not admitted of any action in this direction. The recommendation of the Court will, however, again be brought to the notice of the Government of India.

16. The Court consider that the cable already in existence between Diamond Island and Bassein should be overhauled and placed in a state of thorough repair. The repeated interruption of communications with Diamond Harbour at the most critical times is a very important question and affects every port which benefits by the storm warnings from Calcutta. It has been ascertained, however, that these interruptions have been due, not to any injury to the submarine cable, but to rupture of connection on land caused by the fall of trees in the forest through which the line passes. This question is at present the subject of a correspondence between this Government and the Government of India.

17. The acknowledgments of the Government are due to the Court for their careful and laborious investigation of this case, which extended over 27 days, and was carried out in the face of great difficulties.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

Proceedings of a Marine Court of Enquiry held under Section 7 of Act V of 1883 (The Indian Merchant Shipping Act), at the instance of the Government of Bengal, to investigate all the circumstances connected with the loss of the S.S. "Sir John Lawrence" in the Bay of Bengal on the 25th May 1887.

PORT OFFICE, CALCUTTA, THE 11TH JULY 1887.

PRESENT:

C. H. REILLY, Esq., Chief Presidency Magistrate	... President.
CAPTAIN H. DESMIDT, Marine Surveyor	
E. TRELAWNY, Esq., Superintendent, Peninsular and Oriental Steam Navigation Company	} Members.
MR. G. C. KILBY, Deputy Legal Remembrancer, appears to conduct the enquiry on behalf of Government.	
MR. ORR, Attorney-at-Law, appeared on behalf of Messrs. Macneill & Co.	

Rosborough Spence sworn, with to Mr. Kilby.—I am in command of the *Tyrone*. She is a native passenger steamer which plies between Calcutta and Chandbally. I went down the river with my steamer on Wednesday, the 25th May, the day of the cyclone. I anchored at Kedgerree. I did so because the weather was threatening and the storm signals were up. I first saw the storm signals at half-past 10 A.M. when at Mud Point. The signals were visible from Kedgerree for half an hour after I anchored there. After that time the weather became thick, and then I could not see them. The *Curlaw* followed me, and anchored about ten minutes after I did at Kedgerree. I anchored about 11 o'clock. The warning signals were then still visible with a powerful glass. No. 8 signal was hoisted up; it indicated that a small cyclone, such as is usual in the rains, was passing to the westward of Saugur. There are several other signals which indicate severer cyclones. The *Sir John Lawrence* passed us at 1 P.M. while we were anchored. She must have come past Mud Point; it may have been too thick for the Master to have seen them when he passed Mud Point. When the *Sir John Lawrence* passed me the weather was very threatening, the wind was from the north-east increasing. I have been a number of years on this river, since 1871 in command. Before that time I was in command of the *Night Hawk* for a year. I have been in country vessels trading out of Calcutta since 1864. I have been in two or three cyclones. When the *Sir John Lawrence* passed me, the weather in my opinion indicated that a cyclone was coming up. The *Sir John Lawrence* passed us between a quarter and a half mile off. The river was smooth. The river gave us no indication what the sea was like outside. When storm signal No. 8 is up it is optional for vessels of light draughts to go to sea. The directions say that only light vessels can go to sea. The signal was an inverted cone over a ball. I did not signal the *Sir John Lawrence*. After the *Sir John Lawrence* passed, the squalls increased gradually in strength from the north-east, and the barometer fell steadily until 4 A.M. in the morning, the 26th May, 29.34; it fell from 11 A.M. on the 25th from 29.60 to 29.34 at 4 A.M. on the 26th May. The wind from 8 P.M. on the 25th gradually hauled south-east through east in very heavy squalls. At 4 A.M. the wind went still more to the southward, and the barometer began to rise again a little. The wind increased in force from this till noon, when the barometer registered 29.43. From noon hauled to S.S.W. and gradually abated. I remained at anchor till the morning of the 27th, and I then got underweigh at 6 A.M. and proceeded on my voyage, reached at eleven that night. We had a very heavy sea in the Western Channel; much smoother to the westward. I had no reason to suppose that *Sir John Lawrence* would founder judging from the specimen of the weather we experienced, but we were not in the centre of the storm. I thought she would have drifted down the coast, so hardly expected to find her at Chandbally. I saw no wreckage on my way to Chandbally or on my way back. The following week I passed a few dead bodies, three altogether, in the Western Channel. The following week they had turned white. I imagine they were natives. The *Sir John Lawrence* has not been heard of since. I do not think there is a doubt that she foundered in that cyclone. I have always believed the *Sir John Lawrence* to be a good sea-boat: she has a ways proved herself to be so. I have been on board her several times. I believe the *Sir John Lawrence* was well fitted, and found, so far as I could see, this was so. In foul weather season we carry 886 passengers. The tickets to passengers are sold at the office of various companies to whom the steamers belong. No one on board sells tickets or on vessels; tickets are not supplied us for that purpose. If the full complement of tickets has not been sold at the office, we take in passengers who pay their money on board. We receive instructions directly the full complement of tickets has been issued. I know of no instance where an application has been made by a passenger without a ticket for a passage before we receive intimation as to the sale of the tickets at the office. We do not usually, indeed very seldom, get our full complement of passengers. We generally receive a notice in the evening from the office as to the number of tickets sold, about 5 o'clock. After 5 or 6 o'clock no more tickets are sold at the office. If any one comes for a passage after that time we take the money on board and receive him as a

passenger. We take our passengers in after our cargo. It so happens that we usually begin taking in our passengers at 8. P. M., it may be a bit earlier sometimes; it all depends on the time when we have finished taking in cargo. I have never taken a passenger on board the *Pyrene* without a ticket during the time when the office is open. The police invariably count every passenger on board before we start.

The police count the passengers as they come up to the gangway. The passengers are counted by the police, so it would be impossible for a Master to carry more than the authorised amount of passengers without the police knowing it. It did once happen some years ago that I carried more than my authorised number of coolies. I was heavily fined for doing so. The police counted out 60 more at Chandbally. I was fined Rs 990. I do not remember the Captain of the *Sir John Lawrence* being fined for carrying excess passengers.

To the President.—I saw no storm signals at Diamond Harbour. I passed Diamond Harbour at 8-30 A. M. If I had proceeded on my voyage on the 25th, I should have expected to see signals at Saugor. The *Sir John Lawrence* ought to have been near enough to have seen the storm signals on that day at Saugor at quarter past 2. Taking the ordinary course down the western channel, the *Sir John Lawrence* would have been 8 miles distant from the signal station at Saugor. In my opinion the weather was too thick to permit the *Sir John Lawrence* to see the storm signal hoisted at Saugor. According to my calculation the *Sir John Lawrence* must have been passing the signal station at Mud Point about half-past 11. She would have passed them about 4 to 5 miles off. I think it is quite possible that the Master of the *Sir John Lawrence* did not see the storm signals at Mud Point. I had made up my mind before I saw the storm signals at Mud Point that I would anchor at Kedgerree, and I should have done this, whether the storm signals were up or not. I had made up my mind to do this before I had got to Fisherman's point. When I saw the *Sir John Lawrence* continuing her voyage on the 25th, I did think the conduct of the Captain was a little rash and that wholly unconnected with the fact whether the Captain of the *Sir John Lawrence* saw the storm signals or not. I thought the conduct of the Captain a little rash on the ground that he had a large number of passengers on board, and however well the ship itself would weather the storm the passengers might be put not only to inconvenience, but be knocked about and even killed. Though I did not think the vessel would founder. I thought it would be put to a severe strain which would do her no good, and there was in my opinion no serious necessity for exposing the ship or the passengers to these risks. In my opinion up to half-past 11 when I saw the last of the storm signal, I thought No. 8 was the most appropriate signal which could be hoisted to indicate the state of the weather at that time. On one occasion last year I went out to sea when storm signal No. 7 was hoisted at Saugor. I should not in any case have gone out to sea if I saw No. 8 signal hoisted. If I had been in command of the *Sir John Lawrence* on the morning of the 25th May, I should not have gone to sea whatever had been the nature of the cargo and passengers I carried. The *Sir John Lawrence* was in light trim. I could see this when she passed us that morning. The counting of the passengers on board a ship is done by a native jamadar and a constable crew. The police boat stays alongside till we start. The police invariably count the passengers out at Chandbally. This precaution is very strictly carried out. I had some conversation with the Captain of the *Carlisle* at Mud Point. We made up our minds to go back to Diamond Harbour if the storm signals were up. This was before I saw the storm signal at Mud Point. Half an hour after we saw the storm signal, the *Carlisle* turned round with the intention of going back. I kept on with the intention of making Kedgerree, No. 8 being hoisted. I thought I should be perfectly safe there; the *Carlisle* afterwards followed me.

To Captain deSmidt.—I don't know the draught of water the *Sir John Lawrence* drew. On the 25th May the *Sir John Lawrence* did not appear crank, she had a jib and two try-sails set. She had her awnings spread over the upper deck. Her decks did not look overcrowded. She seemed to have the usual complement of passengers on board. The *Sir John Lawrence* had an open deck with a rail round it; the only protection against a sea breaking over the open deck would be the rail and nettings. She had an open deck and main deck as far as I know.

To Mr. Stracey.—There was no rivalry at that time between the different companies carrying native passengers to Chandbally. There is no inducement held out to Captain to make "smart" passages irrespective of weather.

To Mr. Orr.—I knew the Chief Officer of the *Sir John Lawrence*, Mr. Smith; he was about three years in the Chandbally trade. Immediately before, he was in charge of a tug boat. I consider him a man experienced in navigating a vessel at the Sandheads and the Bay of Bengal. The name of the Captain was Peter Irvine. We had a 'tween-deck; the passengers were on deck and 'tween-decks. We did not batten down hatch-hes. I remember the *Sir John Lawrence* being in one cyclone before in 1874—in October 1874. The 1874 was a more extensive cyclone. Captain Baldwin was in command of the *Sir John Lawrence*. Peter Irvine was the Chief Mate I believe. The *Sir John Lawrence* was missing for some days, but came out of it with the loss of her boats.

Re-examination.—I do not think any lives were lost on the *Sir John Lawrence* in the cyclone of 1874.

The 11th July 1887.

R. SPENCE.

William Henry Neustein, sworn, saith to Mr. Kirby.—I was Chief Officer on board the *Sir John Lawrence* for over 18 months. I left that service on the 25th October 1886. On

the 28th of October 1886 I sent in a letter addressed to the Lieutenant-Governor of Bengal, put in and marked B. The letters attached to B are—

- (1).—Letter addressed by me to the Health Officer.
- (2).—Letter addressed by me to Assistant Government Surveyor.
- (3).—Letter addressed by me to Port Officer.
- (4).—List of repairs I was ordered to make out by the Captain in order to instruct Messrs. Macneil & Co. what repairs were necessary at the coming docking of the vessel.

I wrote another letter to His Honour the Lieutenant-Governor of Bengal, dated 4th June 1887, after the loss of the *Sir John Lawrence*. With it I enclosed two copies of letters previously sent in, viz. to the Port Officer and the Assistant Government Surveyor, put in and marked (C).

I consider the state of the windlass on board of the *Sir John Lawrence* as contributing to the general unseaworthiness of the vessel. I last saw the windlass on the evening of the 25th October 1886. The starboard side of the gipsy, had worn itself some three quarters of an inch with the wooden bits which supported the spindle. In consequence the windlass would not go round, and you could not get up chain or use the starboard anchor. The metal casting which supported the spindle in the centre was also broken, and the whole body of the windlass forced over to starboard. On or about the same date, on attempting to moor the ship at the Salt Golaha, we were compelled to take all the chain up from the port side, as it was impossible to use the starboard chain. Mr. Mathewson, the Harbour-Master in charge of the vessel at the time, tried all he could to make the starboard side of the windlass work, and failed to do so. The Harbour-Master said it was a rascally condition for a vessel to be in just after survey. It was a double windlass working on a screw, working on a diagonal cog-wheel. This is the most serious charge I have to bring against the owners of *Sir John Lawrence*. I next wish to say something of the state of the scuppers. The leaden pipe was just flanged out over the iron plate, and had no iron lip-guards to clamp them to the side. These were in existence when the ship was new. They had long since been knocked away. If necessary when the ship was new, they were a great deal more necessary as the ship grew older. The ship had three decks: I am speaking of the main deck. The bolts of the lip guards were left in the side; in some cases broken off half through the plate; hence the leaden pipe might be forced in at any moment by the sea, as it was repeatedly pushed in by boat-hooks used against it in port. These leaden pipes led into the hold. There were holes in one of them

* Witness adds, as far as I can remember.

each side.* In a rough sea, the state of these leaden pipes constituted in my opinion, a great danger to the ship. On occasions I had to build them up with cement; it was an easy matter to mend these. Nothing was done in my time beyond casting one of the pipes.* The next thing is the state of the pumps. There

* Witness substitutes "guards" from a pattern I had made.

was a survey of the vessel held shortly after. I joined about the first week in September 1885. In order to try the pumps, water was poured down them. The after-pump worked fairly well; the forward pump the water ran through as fast as you poured it in. Subsequently I discovered that the pipes had never been connected with the pumps. They were laying

† Witness adds or 1884.

‡ Witness substitutes "lighten."

over the beams bent and dented in. About the end of March 1883† the *Sir John Lawrence* was supposed to have undergone thorough repair. Before that, for about a twelve month she lay at the buoys doing nothing. Before these repairs were effected, the pumps had three connections—one to each bilge and one to the sea; the latter to be utilized for the purpose of washing deck, or on the occasion of a fire. After the ship's repairs were completed, I discovered that the connection with the two bilges and the sea were done away with; one single pipe to the centre of the vessel substituted instead. The pumps bear on to the main deck. There are no connections at all with the fore-hold pump; the pipes had never been attached. Under these circumstances, the vessel could only be pumped out when she was on even keel, and that by the after-pump only. Subsequently the forward pump was connected. The forward pump was before the engine-room; the after-pump abaft the engine-room. The *Sir John Lawrence* collided with the *Indore* shortly before I joined, or about September 1885, and had a hole knocked in her starboard bow between wind and water. The patch, which was irregular in shape, was about two feet square; an iron patch. The plating to which patch was rivetted was too thin to support the patch. I learnt this from the engineers employed who assisted us in putting on the patch (identifies Mr. Leach). I saw the *Sir John Lawrence* shortly before she foundered on her last voyage. At that time I noticed the patch; this was about three months before she foundered. I saw the patch still on and the lip-guards unrepaired. The proper way to repair the damaged plate would have been to remove the plate and put a new one. Had one plate been pulled out, it would have been necessary to pull out 10 plates, the ship was so old.*

W. H. NEWMAN.

The 11th July 1887.—Court adjourned till to-morrow.

C. H. BANY.

The 12th July 1887.—Examination continued.—On or about the 25th of October 1886 when the last survey was held the *Sir John Lawrence* lost a boat in the collision with the *Indore*. It was replaced by another good boat until the day when we passed the survey.

when it was removed shortly after and an equally useless boat was sent by Mr. Young's order alongside. This boat was leaking so badly, we had to hoist up one and to get the water out. All subsequent efforts to make it water-tight failed, and on attempting to land passengers by this leaky boat, it filled alongside, and this boat passed two subsequent surveys in that condition. The last of these two surveys was on the 28th October 1886. The collision was about three months or so before I joined, which was in September 1885. Six or eight months before I left the *Sir John Lawrence* she grounded on the shoal at the entrance to the river Diamrah. We were on shore four or five days. Some of the passengers were landed by the ship's boats. We had over a thousand passengers on board. It was on this occasion that the bad boat sank alongside. It would have gone to the bottom but for the tackle to which it was attached. The boat was the cutter. We had two life-boats. They were both in good order, also the jolly-boat. The passengers became clamorous and threatened my life. They wanted to be put on shore. We put some of them on shore. In the same collision the bowsprit was carried away—the end of the bowsprit, and with it the band, bobstay, and bowsprit shrouds. These were never replaced. It is impossible for any ship which carries a bowsprit to be equipped properly without these fittings. There was a bowsprit, without band, bobstay and bowsprit shrouds. The span was bent up on the edge of the bow-plate without any support below. The bobstay is the key and support to all masts, more especially the raking masts of a steamer which, like the *Sir John Lawrence*, depends so much on sail. The removal of iron bulkhead took place, I believe because I could see marks where these bulkheads had been fixed, and the bulkhead had disappeared when I was on board. I mean bulkhead between the stoke-hole and the engine-room, not an entire bulkhead, because it has a passage to the stoke-hole through it. As a matter of fact, the steamer has a collision bulkhead, a bulkhead before the stoke-hole, another one abaft the engine-room, and a small collision bulkhead aft. There are no rudder braces. There had been rudder braces previously. I know this because of the shackle and the places still existed where they were braced up. These were the more necessary, because the rudder head was old and worn in the trunk gearing and the pintles were old, patched up, and might have been carried away at any moment. I am speaking of the after-part of the rudder. By braces I mean the stays on the after-part of the rudder. The inner keelson in the wake of the hatchways, the angle-irons on both sides have been long since knocked off. I heard the surveyor remark this. The rails round the vessel on the upper deck, which were meant to protect passengers in case of heavy rolling, was so ill-supported, it was not safe to lean against them in the wake of the gangway; the covering board with which the stanchions were fixed were so rotten that the screws would not hold. On one occasion a cow rolled overboard through the rails carrying away the stanchion. There is no wire-netting on the rail: it was a rotten rope-netting. The windlass has been gradually getting worse through a period of eight months before the last survey I witnessed on board. It passed two surveys in this condition. About five months before I left we were in a cyclonic storm fifteen miles to the northward of Chandbally. We anchored in about eight fathoms water and dragged to about five fathoms till we were almost in the breakers, because I could not use the starboard anchor because the chain would not revolve round the windlass. I ordered steam at 2 o'clock, and had the wind not shifted we should all have been lost. There were a large number of native passengers on board; many of these passengers were knocked about. I was in hospital myself for a fortnight after, through illness brought about by exposure and anxiety. I understood, when the Harbour-Master took charge of the ship, that the survey had been completed. I believe it was Mr. Bushby who tried the pumps on the occasion when water was

* Witness adds assisted by Mr. McKellar.

survey the vessel. It was said at the time you cannot get water out of the ship when there is none in it. The

surveyor was satisfied with the experiment and nothing was done. The pump-hoses were afterwards taken ashore and repaired, and the pipe was connected below. When I was on board the *Sir John Lawrence*, I frequently thought she would roll over. I considered her a lively ship, top heavy. I never was in a ship which rolled so much. This was in my opinion owing to extra deck and house added. I could see that a deck had recently been added. I always felt nervous when the steamer was driving into a heavy sea. I do not think her hull was in a safe condition. The Captain (Irvine) ordered me not to go near the surveyor. Mr. Young said to me I will get you sacked, you know too much about the ship. Mr. Young is the Superintending Engineer of Macneill and Company. I was dismissed by a letter dated the 23rd October. It was not, however, given to me till after the survey at 10 o'clock on the night of the 25th. I saw three surveys made while I was on the steamer. The deck survey was made by Mr. Bushby.*

* Witness adds Mr. Bushby assisted by.

Mr. McKellar did the engine-room survey as assistant to Mr. Bushby. The second survey was carried out exactly in a similar way. In the last survey Mr. Bushby did the hull and part of the deck survey on the 24th October the steamer being in dock, and when the steamer came out of dock the next day† Mr. McKellar finished the deck survey. He then went into the engine-room. During the whole of the thirteen months I never saw Mr. Bushby below the hatches.‡ He went out of the engine-room. I put lamp rockets, life-buoys, buckets, fire-engine and hose, and appliances of a similar kind, which he looked at. He had the boats lowered to the rail, so that he could look into them. He went round the deck, then went on the main deck, looked down the hatches. He never went below the main deck hatches

† Witness adds in correction "the same day."

‡ Of the main deck in the Nautical Department.

He then went down into the engine-room. I did not follow him there. This survey occupied ten or fifteen minutes. When the ship was in dock Mr. Bushby walked round the deck and examined the outside of the ship. On the first occasion the chains were got out. The chains were not surveyed in the last survey in dock. On the third survey I was not permitted to accompany the surveyor; so I do not know whether the state of the windlass was pointed out to him. Captain Irvine attended to the passenger business entirely himself. I was told not to take part in the matter. The passengers began to drop alongside in boats from about 3 p.m., and at Poojah times there were several hundreds on board by 5 p.m. In fine weather, on those days, the *Sir John Lawrence* was entitled to carry 1,038 exclusive of crew. During Poojah times the deck was so crowded at 4 p.m. it was difficult to move about or clear a space opposite the hatchway to allow the cargo to be taken in. About 5 p.m. a large boat used to come alongside the gangway and a police boat lay alongside the boat, but often when they arrived there were many passengers on board. The Captain had a staff of old hands who were used to his way of doing business, with whom I was requested not to interfere. One man nominally stood at the gangway and was supposed to tally the men on board, but since passengers were taken in at all the ports where the dinghy might happen to come and by tipping the lascars the passengers were allowed to come in through the port. Nominally an order was given to the ghat serang not to allow passengers to come aboard till a stated time, generally 6 or 7 p.m. There were generally thirty or forty boats moored to the buoys and hanging about the ship. The passengers on these boats were, after bribing the lascars, permitted to get on board through the ports. The passengers continued to come on board during the whole of the night; tickets were not looked at. No one was prevented from coming on board. If 780 tickets were sold, that number would probably represent two-thirds of the passengers actually on board. The Captain used to collect the tickets after the ship had gone down the river. He went round the vessel with an attendant called a *panneewalla*. Those who had not tickets had to pay. Invariably the number of tickets sold was no criterion whatsoever of the number of passengers who actually travelled. The police boat was there, but I never saw the police attempt to count the passengers. The police boat stayed alongside pretty late. As far as I know the whole arrangement of the passenger traffic on board the vessel was left to the Captain. On Poojah days the crowd of passengers are so dense on the steamers, I could not walk along the deck without treading upon them, and had to walk on the rail holding by the awning and so get on to the bridge. The crowd was composed of men, women, and children, the majority were women. In process of time the deck became a seething mass of humanity and filth. I consider this crowd on board did endanger the safety of the steamer, so that it completely hampered the crew on the upper deck in carrying out the orders of the Captain and officers in dirty weather. When the steamer reached Chandbally, she was supposed to moor herself opposite a landing stage. A constable would come on board with a board and a piece of chalk, but it was absolutely impossible to count the living stream of passengers as they rushed by, so the counting was a farce. When the excess number was very palpable, a number was concealed about the cabin and saloon and let out after the policeman had gone. Sometimes we struck on a sand bank, and then there was no attempt at counting the passengers. They landed as they could. On Poojah days I should say we carried between thirteen to fourteen hundred passengers. The steamers on these occasions are properly full; completely full. The free board of the steamer, if she was deeply laden, say up to 13 feet 6 inches, would be about 3 feet from the main deck to the water. In heavy weather the water broke over the steamer. The after-part of the main deck was quite unprotected at the sides. I have seen half a dozen bodies thrown overboard between Diamond Harbour and Garden House Point.

To Captain de Smidt.—I cannot tell you how much dead weight we required to go to sea. We sometimes carried about 30 tons of cargo. Six hundred maunds of coal took us to Chandbally and back. Our draught aft, when run light, was 10 feet 6 inches to 11 feet. The screw was fairly under the water. If we broke down we had sufficient sail to take us into port. With a propeller disconnected, she might have gone two knots in the hour. On a favourable trip we get to Chandbally steaming twenty hours. Two four-hundred gallon tanks with water were carried between-decks. The *Sir John Lawrence* has a Master and the Mate. I believe Captain Irvine had a Master's certificate. I say it is impossible for one man, the Captain, to do Harbour-Master, Pilot, and Captain's work alone. The Captain of the *Sir John Lawrence* had so much to do that I have seen him frequently asleep on the bridge on the most dangerous parts of the river, crossing the James and Mary for instance. When the *Sir John Lawrence* was deep, she drew 13' 4". I heard that the boilers had been renewed. Some parts of the engine were worn. I had a sextant and navigating instruments on board. There was a barometer and aneroid in the Captain's cabin. There were seven openings on the upper deck. It would be quite a guess, but I think the steamer had ten lascars, three seacunnies, a serang, a tindal, a plumb-walla, two topazes, a Chinese carpenter, a masalchee, two saloon boys, and the butler. We had not enough lascars to properly man four boats in case of accidents. No life rafts, but six life buoys on board. All the boats were hanging on davits.

W. H. NEUSTEIN.

Case adjourned till Tuesday, the 19th July at half-past 12 o'clock.

O. H. RANBY.

Mr. Kilby for the Government.

Mr. Lal Mohun Ghose to watch the case on behalf of the relatives of Mr. O. C. Mullick and others, who are alleged to have been lost at sea.

Witness Henry Newton recalled, to Mr. Barr.—I never knew any European official come on board the *Sir John Lawrence* with the object of satisfying himself whether the vessel was overcrowded or not. I am speaking of the Calcutta end of the voyage. On the Chandbally end a European, a Mr. Angier, used to come on board, and was supposed to see that the police constables did count the passengers. I believe he did this spontaneously. I know Mr. Angier made a report to the Calcutta Police. After he sent in that report he was suspended.

To Mr. Gayer.—Since the *Sir John Lawrence* was certified to carry passengers, a number of houses, cabins, and lockers were built on deck which, encroached on the main deck curtailing passenger space. Two hundred superficial feet of space was encroached upon. As far as I know there were no deductions made in the number of passengers permitted to be carried by the vessel. There was no condenser on board in my time. There had been one before. I had no pilot's certificate. The Captain was the only man who had a Pilot's certificate, and therefore the Captain had to be on watch all the time

* Witness substituted "condr."

we were on the river. The *Sir John Lawrence*, two years before she came under the supervision of Mr. Young, carried a Captain, 1st, 2nd, and 3rd Officers. She was not generally employed in the Chandbally trade at that time. There would be water enough on board for four days' consumption if the passengers consented to drink it. My letters to the Local Government, which are put in this enquiry, were not acknowledged any way. I was not prosecuted by Messrs. Macneill and Company for defamation. I have the best testimonials from Messrs. Macneill and Company; also from the deceased Captain. His testimonials put in, marked (D) and (E). My letter of discharge was dated the 23rd October and handed to me not till 10 p.m. on the 25th October after the survey was over.

Cross-examination to Mr. Orr.—I should not be surprised to hear that an enquiry was ordered upon the receipt of my complaints, an enquiry by the persons implicated in my strictures. I never heard of any Government Resolution on the results of those enquiries. I should not be surprised to hear that Government made the remarks you allege them

† Witness adds of those people implicated in the negligence.

to have made under the advice of the whole of the people implicated on the negligence I had commented upon. If it was a malicious libel, I am surprised I was not prosecuted

at the time, for the vessel was then afloat to corroborate the truth of my statement. I hold a certificate of Master Mariner since 7th March 1874. I came out to this country in 1861, as an apprentice. I was Chief Officer of the *Gosforth* belonging to W. Smith of London, in 1873-74. I think I next went as Chief Officer in the *Abigail*, a brig. I cannot remember when I left the *Abigail*. I was afterwards in some steamers trading up the Baltic. I came to Bombay in 1878. I came as second officer in a steamer called the *Proponis* to Bombay. I came from England to Bombay. I left her in March 1878. I joined the British India Steam Navigation Company in March 1878. I went up the Persian Gulf; then carried troops to Malta. In April 1882, so far as I can remember, I left the service of the British India Company in London. I left of my own accord most emphatically. When I arrived in Calcutta I discovered that instructions had been sent to the Agents here that I was not to be employed again by the Company. I had previously received a legal discharge certifying to my good conduct and ability—a copy from the ship's log-book. I heard various reasons given for the refusal by the Company to employ me further. I was not aware that I lost six months' seniority while in the service of the British India General Steam Navigation Company in my grade as Chief Officer; my service in the British India Steam Navigation Company was one of constant promotion. I heard a rumour to the effect that I had lost six months' seniority. Before I heard this rumour there had been a sort of frisson between myself and the junior officer on board the *Hansa* at Rangoon or Moulmein. I have no official intimation of my loss of seniority conveyed to me. I left the *Hansa*. I was removed to the *Arabia* because I would not serve on board the *Hansa* without a rise in pay. Captain Flower was my Captain at the time. He told me I would not get an increase of pay for six months, because I had lost my seniority for that period. When I found myself standing in Calcutta without a farthing, I applied to the Agents of the British India Steam Navigation Company for employment. On my arrival at Madras I heard for the first time that I was dismissed. I received a letter from Captain Atkinson, the Marine Superintendent of the British India Steam Navigation Company at Madras. I can best describe its contents by saying it contained almost every possible slander you could address to a nautical man. None of these, however, had been entered in the official log-book. I did not make any attempt to vindicate my character because I was penniless.

Witness adds.—I was about five months sitting out the *S.S. Arabia*, and was after this promoted to Chief Officer of the *S.S. Navarino* and proceeded to Europe. It was when I returned to India as a passenger in the *S.S. Merka* that I found myself without a farthing.

A few days after I got employment in the Eastern Bengal Railway. I was a Flat Commander for about eight months. I then got command of a steamer on Rs. 300 a month. This was in 1884-85. I held that post for a year and six months, as far as I can remember. I had a number of engineers, one more obstreperous than the other—one in particular, whom I informed the Eastern Bengal Railway, if they sent with me, a collision between us must inevitably take place. In spite of my protest the man Gordon was sent on board. In 20 minutes I had to put him off duty, and as he refused to go into his cabin, I had to attempt to put him there. I was not dismissed till about seven months after this occurrence. This was some four or five months after the Government took over the Eastern Bengal Railway. I have, I think, applied for work since to the Eastern Bengal Railway. I next took a return ticket

Witness adds.—Of sufficient importance to be entered in the official log-book.

* Witness adds—Acting as the surveyor did when he received my letter dated 24th October, 1886.

in the P. & O. *Kaiser-i-Hind*. I was in England 20 days, and came back in the same vessel. On my return I was in hospital with a broken leg for some time. I had lots of money when I came back. I had better sense than to try and vindicate my character.* When I got well, I got the post of Chief Officer to the *Sir John Lawrence*. I believe I joined the *Sir John Lawrence* on the 1st September 1886. A few months after I joined the *Sir John Lawrence*, she went into dock. I do not think she was in dock more than two nights and a day. The *Sir John Lawrence* might have been in dock a week on that occasion. I have absolutely forgotten who were the surveyors on that occasion. With the exception of Mr. Bushby and Mr. McKellar, I have seen no other surveyor on board that I can remember. I was on that occasion in attendance upon the surveyors during the time they were investigating the deck department. I attempted to follow them when they continued their investigation on the outside of the vessel, but was told to go and look after a dog. I cannot tell you the name of the person who told me to look after the dog. Mr. Young was in attendance on the surveyors on this occasion, I believe. I remember well it was not Mr. Young; he was away in England at the time. To the best of my belief, Mr. Taylor is the man who accompanied the surveyor on that occasion. I am not quite certain whether the deck survey on that occasion was held when the ship was in dock; it may have been the next day. On that occasion I recollect many things which ought to have been done at the survey, but which were not done—the ceiling of the vessel in the main hold. A large part of the ceiling was in a fearfully rotten condition, although I believe it was supposed to have been new about 18 months before. Just before I left there were some 30 or 40 planks sent down for the purpose of repairing the ceiling. The ceiling is the planking which follows the curve of the vessel, and keeps the cargo from contact with the iron hold of the vessel. The removal of the ceiling would materially tend to weaken the stability of an old vessel like the *Sir John Lawrence*. I would not consider the *Sir John Lawrence* a first class vessel without a ceiling. At the survey of the steamer in October 1886, I suggested that the ceiling should be repaired. The ceiling was not repaired after the first survey: a patch may have been put in here and there. I also complained about the star-board water-tank as not being connected with the deck; also the forward pump. I brought nothing to the notice of the surveyors, because I am not permitted to speak to them on the threat of instant dismissal. I never communicated in any way with the surveyors, because I dared not do so. I was not positively told not to speak to the surveyors, but my own common sense told me what would be the result if I did. I hold this belief on the fact that the condition of the vessel was such in October 1886, that to mention the matter even to Mr. Young or Mr. Taylor would be to court instant dismissal. Mr. Young never paid any attention to my suggestions about nautical repairs. I, at the instance of the Captain, previous to the first survey of the *Sir John Lawrence* in October 1886, drew up a list of required repairs. The list was signed by the Commander and was handed over to Mr. Taylor. The list was, I believe, addressed to Mr. Taylor. I have no copy of that list. The following items were included in that list to the best of my belief.—A bowsprit required the band bobstay and bowsprit shrouds. Next the tanks' lids required repairing. I do not remember any other items. The bowsprit was never repaired, nor were the bobstays and bowsprit shrouds ever refitted. The tank lids were repaired some months afterwards. The next survey of the *Sir John Lawrence* was held six months after April 1886. I do not know whether that was a survey afloat or a dry-dock survey. The last and third survey during my time was held about two days before I left, about 24th or 25th October 1886. The last survey was in dry-dock. Part of the deck survey was completed after we came out of dock. I do not think the intermediate survey was a dry-dock survey. I do not know when Mr. Young returned. I am inclined to think that Mr. Young had returned before the second survey was held. I was in the habit of sending a monthly letter of indent directed to the Superintending Engineer, and in that indent I entered what I required for the ship in the shape of stores. Besides this, a carpenter on behalf of the firm used to come on board often, to take orders. I used to point out to him the nature of the repairs required. His name was Mr. McDougal. There was also an engineer who came on board in the same way about the metal part of the ship. The indents were certainly confined to stores. From time to time I made out repair lists also under the Captain's orders. I made out these repairs certainly once a month—sometimes oftener. The indents I sent in were sometimes complied with. I cannot remember any of the particular stores I asked for being refused; but the impression left on my mind that there were items I was refused. I most emphatically pledge my oath to the statement that one article was refused me. I think I may have included the lip-guards in my indent of stores. This document is in my handwriting. This is a list of repairs calling attention to the materials required to effect those repairs. List put in on behalf of the owners of the *Sir John Lawrence*, marked (1).

This document is in my handwriting. I call it a repair indent. This is one of the leaves of the store indent book. Put in and marked (2). It is dated 25th January 1886. This document is in my handwriting. It is an indent for stores, dated February 1st. To the best of my belief the items mentioned in the indent were all supplied to the ship, except two items—5 gallons of oil and wood for carpenter to work with. Put in and marked (2). These five documents are all in my handwriting. They are indents for stores. As far as I know, the items mentioned in those store indents were supplied. In some instances the amount asked for was cut down, as indicated by the red ink figures. I cannot remember whether Mr. Young had come back at the time of the intermediate survey. My impression is that he had come back. I cannot say whether Mr. Young or Mr. Taylor was present at the intermediate survey. I believe that Mr. Bushby and

Mr. McKellar were the Government Surveyors on that occasion. Mr. Leech was the engineer who gave me the information about the thinness of the plates at the bows. I am perfectly positive as to that, I made the statement about the difficulty involved in putting in a fresh plate where the patch was, because if one plate was removed it would be necessary to move 40, perhaps, on the information derived from Mr. Leech, and the engineers who were working on and belonging to the ship at the time. I believe the other two engineers were Mr. Thorpe and Mr. Sanson, and the second engineer who was drowned. The *Sir John Lawrence* had two boats abreast the mizenmast and two other boats abaft the foremast; the life-boat was abaft the foremast on the starboard side: the other life-boat was on the port side. We have a small boat used for running lines to the shore abreast the mizenmast on the starboard side, which was the jolly-boat; on the port side was a cutter. There was no one of the name of Henderson as an engineer on board the *Sir John Lawrence* during the time I served on the ship. A Mr. Lindsay put on the patch to the steamer bows. The engineer, of the ship assisted, I believe. I say this from hearsay. I deduced that the plates were thin because the frames which I could see were nearly eaten through in many places. I tried the plates by sound. I did not bore them. I deem myself capable of guessing at the thickness of the plate of any iron ship by sound. I can tell whether it is a thin plate or thick plate when it is palpably thin. If you took off one-eighth rust from the inside of one of the iron plates of the *Sir John Lawrence*, and about one-eighth of an inch of paint and rust from the outside, there would be $\frac{1}{8}$ of a healthy plate left; that is the conclusion I arrived at. I should be very much surprised to hear the engineers who were instrumental in placing that patch on to the *Sir John Lawrence* say that the thickness of the plate was above the regular thickness required for ships' plates. By being between wind and water, I mean that part of the vessel which is not continually immersed, and that part which is only occasionally immersed according to the freight carried. Where the ship is very deep, the patch is half under water. If the *Sir John Lawrence* was drawing 13 feet forward, the patch would be almost entirely under water. The patch would be almost continuously under water, whatever the draught of the vessel when she was moving. I should say the patch was below the main deck of the vessel, not much below—about 2 feet 6 inches below the main deck. I think it was below the main deck. I do not know which boat was smashed in the collision. I heard of the collision and damage to a boat, probably the starboard boat forward, but I do not know. When I was on board, I was told that the cutter belonged to the *Medina*. Ultimately I returned the boat. Captain Irvine told me that the cutter belonged to the *Medina*. I am not aware that the boat damaged in the collision was replaced from one taken from the *Medina*. The rotten boat I spoke of was sent on board before the intermediate survey; it passed both the intermediate and the final survey. At the conclusion of the last survey the Captain informed me that it was over, and under his instructions I hoisted up the boats in their places, put down the limbers, and adjusted the ballast, making everything ready for cargo. The rotten boat I lowered down, and it immediately filled with water: it was sent away to the yard. The rotten boat I call the cutter. I do not know whether the cutter passed the last intermediate survey, because I did not hear what the surveyors may have said about it; but this I will swear to, that the rotten boat remained on board for six months after the intermediate survey. The boat was a sinking boat when it was brought alongside. I did say that I made a remark to those on board they want a new bailer for this boat and pass a rotten boat on the other. I perfectly remember making the remark at the time of the intermediate survey, they insist on the trivial thing in respect of one boat, and pass a rotten boat on the other. Remembering this, I am almost prepared to swear that the rotten boat was on board at the time of the second survey. This is a store indent in my handwriting. Marked (27).

W. H. NEUSTEIN.

The Court adjourned till to-morrow.

C. H. REILY.

The 20th July 1887.—Cross-examination continued to Mr. Orr.—There were two tanks on the between-decks for water, capable of containing 400 gallons each; they were placed on the main deck. They were tommed off from the top, and a couple of chocks nailed on each side of them. They did not actually break adrift in my time, but they worked loose, and I had to secure them; the tom frequently fell down and had to be replaced, the nails of the chocks got shifted by the working of the vessel. These loosenings were not the result of ordinary wear and tear. I say this because the loosenings were caused by the abnormal rollings of the vessel caused by the extra top hamper put on her, and the compensating ballast necessary below the rolling of a vessel does cause a certain amount of wear and tear. It was my duty as Chief Officer to see to all defects caused by wear and tear. If I had not been very careful, these tanks would have been carried away. Besides these two tanks on the main deck, there were two tanks below—one on each side of the mainmast in the lower hold of the vessel. Only one of these was connected with the deck; the other one remained unconnected nearly the whole time I was on the vessel. These tanks in the lower hold were each capable of containing 600 gallons, as far as I can remember. I cannot swear they were not tanks capable of holding 1,200 gallons each. These tanks were larger than those on the main deck. I was not asked about these tanks in the lower hold in my examination-in-chief. I was simply asked about the tanks containing the water intended for passengers: the tanks in the lower hold contained water for the ship's people. The two tanks on the main deck were supposed to be filled with Hooghly water by a high caste Brahmin. If there was no other water, the passengers would get water from the tanks in the lower hold. There was a rule given by

Captain Irvine, which prevented the water in the lower hold being given to the passengers. I never knew any passenger demanding water from the tanks in the lower hold. The one which was not connected I kept whitewashed, but it was dry usually. The tank which was not connected was on the starboard side. The tank on the starboard side in the lower hold was not connected for many months after I joined the steamer. There was no pipe from the tank to the between-decks. I indented for that communication. Whether the communication was made, I cannot remember. The tank in the lower hold on the port side was connected by a pipe through both between and main decks; there was no connection between the two tanks in the lower hold by a pipe. I can take my oath to that. If the passengers wanted water, they had to get it themselves, or fee some of the sailors to get it for them. I have frequently seen the lascars tipped with this object. I am sure all the native members of the crew were not Mahomedans only. The Captain had two or three Uriyah factotums. The paneewalla did not supply the passengers when they asked for water; he was the biggest man on board, and could have bought two or three ships of the same sort. I never saw the paneewalla supply any of the passengers with water, and I was on board thirteen months. There were many pumps in the engine-room. I believe there is a donkey pump in the engine-room. That donkey pump would be available in case of fire if the donkey fires were alight. There was also Downton pump on board, a pump worked by four men, a portable one. That could be used for working the main deck and for fire. You could not wash the upper deck with that pump. There was a canvas hose connected with the portable pump. The portable pump was not strong enough to force the water up on to the upper deck with any force. You would get about a bucket of water a minute on the upper deck. It wanted about eight lascars to work the pump effectually. I still adhere to the statement that the pump connection in respect of the forward pump was not made when I joined the ship. The leaden pipe was lying just as it fell on the beams, dented by the cargo. The treble action plunger of the pump was in a totally unserviceable condition and was sent ashore for repairs. The plunger of the forward pump was sent ashore after the first survey. The forward pump led from the main deck to a broken rose box at the bottom of the vessel. The plunger was brought on board, but when it came on board again, duly repaired, I do not know; but it came back within a reasonable time. The connection was made with the forward pump about four weeks after I called the attention of the Superintending Engineer to the matter. The after-pump had its new connection in lieu of the three which had been cut off. That connection was in the centre of the vessel abaft the engine. The two connections which were not replaced led to the bilges. In my opinion the bilge connection was a necessity in a ship like the *Sir John Lawrence*. I did experience inconvenience for the want of these bilge connections when I was on board the *Sir John Lawrence*. Several hundred bags of salt were damaged through the want of these connections. This damage to salt has occurred frequently. Many of the bags came out nearly empty. I should be very much surprised to hear that there have been no claims for damage to cargo, considering that over two hundred bags of cargo I have seen come out damaged from the steamer. I allude to bags containing salt.

The Court adjourned for half-an-hour.

Cross-examination continued.—There were no lip-guards to the scuppers except broken bolts all the time I was on board the *Sir John Lawrence*. I called attention to the state of the scuppers about six weeks after I joined the steamer. I drew Captain Irvine's attention to the scuppers. As far as I know, I did draw Mr. Taylor's attention to the state of the scuppers. I do not remember what reply Mr. Taylor made. I think it very likely that I called the attention of the carpenter visitor to the state of the scuppers more than once; the man's name was McDougal. I think I called Mr. Lindsay's attention to the holes made by boat-hooks on the scupper pipes; he had them soldered up. This was after the last survey on the same day after the surveyors had left. I did not leave the ship on the 25th October. I left on the morning of the 26th. I did not see the holes soldered up myself. The Captain told me the survey was completed on the 25th, and under his orders I put every thing back in its place. I was continually mentioning the state of the scuppers to persons on board—engineers and others. They all told me I better mention the matter to Mr. Young, for they dared not do so. I did not mention the matter to Mr. Young, because the Captain advised me not to do so for peace sake, because all these things were supposed to have been repaired in the repairs of 1884. Several times Captain Irvine told me this; he did so whenever I spoke to him of about any serious repairs necessary in the ship. He advised me in this way shortly after I came on board. He said if I wished to remain on board I had better not apply for these serious repairs, as the ship was supposed to have been thoroughly put to rights in the repairs of 1884. I did mention repairs to Mr. Young. The last time I remember calling the special attention to the danger attending the condition of these scupper pipes, saying that, if the ship were lost, the chances are the pipes would be forced in by the sea and the vessel would be lost like the *Vingoria*. I think it was a day or two after I made out this list No (1), which is dated 17th October 1886. This is the only time I mentioned the state of the scupper pipes to Mr. Young. Mr. Young in reply told me I knew too much about the ship, and that he would get me sacked. This interview took place on board the steamer. It is not usual for scuppers to be protected with cement. Whenever I put fresh cement I mentioned the fact to the Captain. I am prepared to swear that I put cement round some of the scupper pipes more than once, in order to support them in their places. The starboard pipe aft had been stoved in already. There were four scupper pipes on each side of the ship. I applied cement to two of them, both on the after-hold: one on the starboard the other on the port side. The starboard after-scupper pipe had been stoved in. The cement was put inside the vessel round the leaden pipe. I don't think I did mention the state of

the scuppers in any of the repair lists I sent in, except in the list (1), dated the 17th October 1886. I may have sent in a dozen, fifteen, twenty—any number of repair lists before that date. I am quite sure I did send in other lists always before survey and before docking. The Captain signs the repair lists and is responsible for its contents. I wrote the repair lists merely. The list is made in this way: I talk over the matter with the Captain and suggest; those suggestions he does not approve of are cut out. I make a list of those which remain, and he signs that list. I had a copy of list (1) in my hand when I spoke to Mr. Young about the state of the scuppers. I don't know what the sheer strake of a vessel is. The bowsprit was never repaired all the time I was on board. The band is of iron which has three eyes—one at the bottom and one on each side. From the lower one to a shackle on the stern, the bobstay is set up. From the eye on either side the bowsprit shrouds are set up to shackle on either bow. I never measured the bowsprit. I should say about 80 feet. It is not a fact that the bowsprit was about five to seven feet long. I swear it was more than ten feet,—nearer 15 feet. I should say it was much more than 15 feet. As far as I can say, there were 15 feet or more outside the ship before the end was broken. The fracture was at the sheave hole. Knowing that I can form a pretty accurate idea how much of the bowsprit was broken off. I should say that the bowsprit projected about 15 feet beyond the knighthead. Allowing 2½ feet as the length of the piece broken off, the length of the bowsprit as it was when I went on board was 12½ feet. The forestay was fastened to the knighthead. In every steamer I have been in there has always been a bulkhead below the engine-room and the stoke-hole. The dust from the stoke hole damages the brass bearings. A partition bulkhead, it is a bulkhead with door in it. I was never down in the engine-room of the *Sir John Lawrence* before I went on board her as Chief Officer. I am not certain whether there were two coal side pockets or one. There is one athwart ship bunker port in front of the stoke hole; the pockets were probably between the bunker and partition bulkhead which I said had been removed. When I was on board, the side pockets had been removed. I cannot remember whether there was a iron partition at the end of these pockets. The rudder had no rudder chain fitted on to the afterpart of the rudder, as a substitute in case the upper part of the rudder was damaged or broken. I did not bring the absence of these rudder chains to any one but the Captain; he told me not to press for them. As far as I can recollect, I never included the rudder chains in my list of repairs. Mr. Bushby, assisted by Mr. McKellar, made the survey of the vessel in October 1886. The last day only Mr. McKellar was there; that was the 25th, I think. The day we went to the Salt Golahs Mr. McKellar was on board both before and after the vessel left the dock. Mr. Young and Captain Irvine went round with the surveyors. After that survey I wrote to the Surveyor of the Port. I wrote to Mr. McKellar alone, because he was the last to finish the survey on decks, boats, windlasses, and such like gear. They were 10 minutes walking round the deck. After that they went down into the engine-room. I saw them go down below off the upper deck. I did not follow them. This list (1) was made up by the Captain after we consulted on the subject. I wrote out the list; it was signed by Captain Irvine and sent to Mr. Young. The list I sent to the Government was as near as possible a copy of list (1)—perhaps not a verbatim copy; one or two items more or less. With the exception of these four items, viz., Nos. 11, 12, 13, and 19 in the list, I forwarded to the Local Government all the repairs mentioned in that list remained unexecuted for more than a year to my own knowledge, and probably remained unexecuted for several previous years. The vessel had during the year passed three surveys. When in my letter I alluded to the survey as "walk round" occupying only ten to fifteen minutes, I intended to confine that remark to the deck survey alone. I did not call the attention of the Surveyor to these serious defects throughout the year in obedience to the instruction of my Commander, Captain Irvine. I am quite sure I told my Commander I worried the carpenter McDougal and Mr. Lindsay, the Engineer, constantly to see these repairs done. They told me to go to Mr. Young. Mr. Young was very seldom on board. He came on board often just before the survey. Mr. Young did not come on board after or even after nearly every trip. Most emphatically no. Whenever I got hold of Mr. Young disengaged I brought something to his notice; that is how I got into such ill blood with him.

W. H. NEUSTEIN.

Case adjourned till to-morrow.

O. H. BAILY.

The 21st July 1887.—*William Henry Neustein recalled for further cross examination.*—To Mr. Orr:—My authority for asserting that the *Fingoria* was lost through pipes being forced in was the general opinion of the officers with whom I associated. I did not know that the Court of Enquiry failed to come to any definite conclusion how that vessel was lost. I have seen teakwood in very good condition about thirty years after it has been put into the deck. This remark, however, would not in my opinion apply to the covering boards now on board the *Sir John Lawrence*; but with respect to covering boards generally, I do not think there would be any difference in respect of the wood used for them and for deck purposes. The covering board of the *Sir John Lawrence* was raised above the deck, hence the water would not lodge or remain on it, so it was not so liable to deterioration from wet and the action of iron corrosion round the stanchions. I would be very much surprised if it can be shown that the covering boards on the *Sir John Lawrence* were of teakwood even in 1884, except where the new deck had been added in that year. The rails in the wake of the main hatch were unsafe—about twelve feet of railing in the wake of the main hatch and about five feet of railing in the wake of the fore hatch. I mean the gangway on each side of the ship. As a matter

of fact most of the stanchions attached to the covering board had their screws more or less torn out by the weight of the awning stanchions, caused by the contraction of the canvas in wet weather. This applies to the covering board all round the vessel. The covering board was so rotten you could not put a screw into it at all in the wake of the gangway. The covering boards were more rotten in the wake of the gangway than in any other part. In the other parts, however, the screws had been forced out by the strain of the awning. The water had got into the holes; in consequence the wood rotted in the neighbourhood of the screws. I weighed 18 stone more or less a year ago. I have lost a considerable amount of flesh since I never walked on the gangways because I knew a man had fallen overboard doing so; he weighed about 8 stone or 4 stone. On the occasions when the deck was so crowded with passengers that I could not get along in the usual way, I walked along the rails which were supported by the awning stanchions and the permanent part of the awning ridge chain, carefully avoiding the gangways. My feet rested on top of the permanent rails, and my hands holding the ridge chains, till I came to the gangway. The gangway is closed by two iron bars bent at right angles at the end, which fitted into eye bolts attached to wooden stanchions. The top of the rail was iron: there was generally a light at the gangway. I got down on the deck, leaving my shoes on the awning to try if I could find a place to put my feet between the prostrate forms of the passengers; the people were so closely packed, and I was so heavy, I was afraid of doing some damage to body or limb: and if the howling 'Baba! Baba!' was not too acute, I would go to the other side of the gangway; then proceed as before. If the protests and the crowding prevented me, I got on to the awning, and scrambling on my hands and knees got along as well as I could, taking my chance of coming through. We have double awnings, else I could not have done this. My experience has been more in connection with iron than wooden ships. I have scaled and painted a good many iron ships in my time, among them the steamer *Arabia*. The scaling and painting of an iron ship should take place every three or four years. The process should be a thorough one. Any steamer could not have got into the condition which I described the *Sir John Lawrence* to be in in my letter to Government, viz., that "the holds below and above the orlop deck are one mass of rust, the scales can be taken off in large flakes by the fingers, and some of the frames are nearly eaten through for want of paint," except from thorough neglect extending over four or five years. If the *Sir John Lawrence* had been thoroughly scaled and painted in 1884, she could not have been in the condition I described her in when I wrote that letter to Government. The date of the letter is the 28th October 1886. The statement contained in my letter to Government about the state of rust was most emphatically true. When I first joined the *Sir John Lawrence* she was not so rusty; she naturally accumulated rust during the 13 months I was on board. These indents produced are written by me, marked (2_a) to (2₁₃). I did not use one-thirtieth part of the paint I used on the *Arabia* in less than half the time. I made several attempts to have the holds cleaned out, and I painted the between decks, fore and aft. I painted the between decks a few months after I joined the *Sir John Lawrence*. Before each survey I took up the limbers as far as I could in the time allowed with the few men left under my command. I cleaned the dirt out of the limbers and cement-washed them, so that they might have a good appearance from the upper hatchway. This was not eye-work: it simply represented all I could do with the materials afforded me and within the time. What I did, I did thoroughly. While I was in the ship, I had all the ballast shifted at different periods in order to examine the state of the ceiling and remove the tons of coal-dust accumulated round the foot of the main pump, under the ballast, which had apparently remained there for many, many months. I did not mention the rust in the hold in my list of repairs (1) because you could not indent for removal of rust. The *Sir John Lawrence* went on to be docked, to be overhauled, and examined for the half-yearly survey. I called the attention of Captain Irvine and Mr. Young to the state of the holds, and proposed to have the outsides cleaned; but I was only permitted to have the paint scaled off lightly outside with scrapers. Chipping hammers were not allowed to be used. If I had made a proper list, it would have been five times the length of No. (1). As it was, Captain Irvine cut a great many items off No. (1), and even hesitated to sign it in its present form. I did not attempt to suggest the scaling of the inside of the holds, after hearing Captain Irvine say that when he attempted to do so in 1884 he was prevented peremptorily from doing so. I should be very much surprised to hear that the *Sir John Lawrence* was properly scaled and painted, inside and out, in 1884. She may have received coats of paint in the bad places over the rust. She may also have been scaled when it was safe to do so. If scaling had been attempted in some places in the hold, between wind and water in the fore peak, for instance, the hammer used for the purpose would most infallibly have gone through. I could have demonstrated this by an experiment with a chipping hammer at the time when I sent in that letter to the Government in October 1884, when the *Sir John Lawrence* was at the buoy. I am certain I could have put my chipping hammer through the side of the ship in more than one place. I think the hammer would have gone through in some places in the forepeak and between the frames, just before the bunkers. On the port side, at about from 20 to 25 fathoms, there were two or three links of the chain cable bent partially round and some without studs. This occurred when checking the ship round in strong tides in arriving off town in Calcutta. The starboard chain defects existed between the 60 and 75 fathom shackles, which had suffered in the same way, being bent and in many cases links minus of studs. I did not include the state of the chains in the list because Captain Irvine would not permit me to do so. In coming into port we always, when we got there, made fast to the same buoy.

When the tide was against us, we were allowed to proceed and steam right up to the buoy. When the tide was running up, we turned round and dropped our anchor in whatever spot the Captain thought it most judicious to do so. I was not prepared to leave the ship. If I had been so prepared, I should have gone to the Agent and made my complaint as to the state of the ship in opposition to the Captain and Mr. Young. As a matter of fact, I did complain to the Agents—to Mr. Mackenzie—when I landed from the steamer, after I got information of my dismissal. I did not attempt to make any complaints to the Agents before my dismissal from their service. Mr. Young never at any time did anything to deter me going to the Agents with my complaints, had I chosen to do so. Captain Irvine did tell me to address all my complaints to the Superintending Engineer only, and not to the Agents. The Captain went every day when we were in port to the office of the Agents to know as much about the requirements of repairs on board. It was not part of my duty to go to the Agents about the repairs. I did not think it necessary to supplement list (i) with more items when I sent it to Government. List (1) was authenticated by the signature of the Captain, with the exception of the two last items, which were added afterwards by me and a remark made to that effect. I thought there was quite enough in that list to show the extent of the neglect of the vessel. The copy of list (1) which I sent to the Government was, I believe, copied by me from a duplicate list in my possession. I have not that duplicate in my possession. I gave it to a fellow-lodger of mine—a clerk in an insurance office. I don't know his name. I have kept no copies of the other lists I have sent in. I think we came out of dock about the 25th October. I believe the Harbour-Master was Mr. Mathewson. We dropped down to the Salt Golaba. We tried to get up the starboard chain with the windlass, and after much trouble and delay found it impossible to do so in the time required to move the ship. This was on account of the defective state of the windlass. We had to get the chain up from the chain locker down below. We got the whole of the chain for mooring the ship aft on both sides entirely up from the port locker. We had not laid the chain out in lengths on the deck before we left the dock. In this vessel, the *Sir John Lawrence*, it is not necessary to range the chain on the deck. The anchor is let go from the cathead and carries the chain with it over the gipsy of the windlass, to which there is attached a compressed break, which is useful to stop the chain at will. There is no occasion to have any chain lying on deck. As it comes in the windlass pays it down into the locker. The Harbour-Master is not bound under the rules of the port to have the chain laid out in lengths on the deck in a steamer carrying a windlass of the kind I have described. I don't know the Harbour-Masters' rules.

Did you not on the 23rd of October 1886 sign a certificate given to the Harbour Master certifying amongst other things that there were 30 fathoms of chain laid out on deck ready to be paid out?

Answer.—I do not remember whether I or the Captain signed the Harbour-Master's certificate on the occasion you mention. It is a paper which is usually signed without being read: a purely formal affair. I have never read a Harbour-Masters' certificate through yet, and I speak with an experience of 20 years. It was impossible to lay out 30 fathoms of chain before the windlass on the *Sir John Lawrence*. There was no room, and even if I could have done so, it would have proved a source of danger to the lascars.

Cross-examination continued.—This certificate is signed by me. (Certificate put in and marked X) When we left port in the morning, the Captain, acting as Harbour-Master, dropped the vessel under steam down the river. I have known this operation take up two or three hours. The Captain would then turn the ship, and then in his capacity of pilot take the *Sir John Lawrence* down the river; and if the tide were not favourable for entrance into the Western Channel, he would take the ship down the Eastern Channel, and would arrive at the further end, according to the state of the tide, at any time between 8 p.m. and 12 midnight. From the moment the ship turned off towards Chandbally the Captain navigated her as Master. If we left Calcutta at daybreak on Wednesday, and took the Eastern Channel course, we generally arranged matters so that we reached Chandbally on Thursday morning, the entrance of the Dhamra river, the Kanaka buoy. If we went the Western Channel course, and if we made a very favourable voyage, reached the Kanaka buoy about 11 p.m. on Wednesday night. We used the Western Channel most frequently. Starting at daybreak with the wind and tide favourable, we might make Saugor by 1 p.m. Saugor light-house would be about nine miles off. When we had Saugor light-house abeam, we should be through the greater part of the Western Channel. I was Captain of the *Medina*, a vessel in the Chandbally trade. I did not hold a pilot's certificate. My Chief Officer was a tug pilot, and he therefore had command of the vessel. I only made one voyage to Chandbally in the *Medina* as Master. On that occasion I took the ship through the Eastern Channel. I assumed command of the ship just below the Lower Gaspar. Had I gone by the Western Channel, I should have assumed command as Master at the Upper Auckland buoy. We got to Chandbally generally between 10 a.m. and midday. The Captain was the obliged to be up during the whole of that day. The mooring often took one hour or an hour and a half. We lay at Chandbally all Thursday night. I supervised the taking in of cargo during the night.

We never used a Chandbally pilot. Leaving Chandbally (if the tide be favourable) at daybreak we made the Kanaka buoy in 3½ hours; with the tide unfavourable, 4½. In the *Sir John Lawrence* we invariably returned by the Eastern Channel. We got to the Apex buoy between 1 and 2 in the morning. The Captain was obliged to act as pilot from the Kanaka buoy to the Apex buoy, taking the track we usually adopted. We anchored at the Apex buoy and proceeded to Calcutta at daylight on the following morning.

W. H. NEUSTEIN.

Court adjourned till to-morrow.

C. H. BAILY.

*The 22nd July 1887.—Cross-examination continued.—To Mr. Orr—*I wrote the ship's log on board the *Sir John Lawrence*, and the official log when requested by the Captain to do so. Captain Irvine may have made some entries in the official log himself without my knowledge. I may say he invariably asked me to make such entries. If he did make any entries of any importance, they must have been added after I left the ship, or I should have seen them. Every entry of any importance made in the official log while I was there was made by me. The entries related principally to the discharge and shipping of sailors, or death, if it was palpable. I did not enter the fact of six dead bodies being thrown overboard between Diamond Harbour and Garden house. I was not asked to do so by the Captain. I made a note in my own log book for future reference. I made shorthand notes in my log book from time to time. The Captain used to tell me the number of passengers to enter in the ship's log, and I so entered them. That was done in every trip if the Captain happens to tell me the number of passengers. If not, I put down the number I happened to tell the police on their making an enquiry from a boat an hour or two after the passengers had left the vessel. I entered the number of passengers on board in each trip going and returning from Chandbally when the Captain furnished me with the number. The Captain furnished me with this information from a rough pocket-book which he had. Never to my knowledge did the police count the passengers on board prior to starting from Calcutta. During festival times this work, if efficiently carried out, would have taken the police several hours to perform. A lighter would also be necessary to put some of the passengers into, so that they might be divided for the purpose of counting. I heard what Captain Spence said about counting the passengers on board the *Tyrene*. If the same surveyors who surveyed the *Sir John Lawrence* in my time, and passed her in that condition, were consulted by the Government, and the Resolution of the Government is based on their opinion, I am not surprised at any conclusion the Government might come to under their advice. I do not remember any altercation with Mr. Young on the 23rd October 1886, but I remember nearly all the words which passed between us, which were very few. Mr. Young asked me why I was not down below in the tunnel getting the shaft along. I said I was too old in the throat to do that sort of thing. I said there were four of the ship's engineers, three or four extra engineers, all my crew, and all the extra hands, which were supposed to be paid by the deck department, were all below. What should I be doing then, as Chief Officer acting gunner to the engineers. Mr. Young did not order me to go down and lend a hand with the shaft. I did not tell Mr. Young I was a d—d sight too old to do that sort of thing. I did not refuse. Mr. Young had no right to give any such order. I did not continue using bad language. I used no bad language at all; had no quarrel and no words on that day. Captain Irvine told me not to go down into the tunnel, nor did he tell me not to obey Mr. Young's order.

Question.—Did you not, then, ask Mr. Young if he wished you to thrash him?

Answer.—No.

I did not say to Mr. Young "I suppose you want to get me dismissed." I don't remember Mr. Young saying to me that I dismiss you then and there: he had not the power to do that. I had a six months' agreement. After I left the ship, I went to Messrs. Macneill and Company's office. I went there to tell the Agents that Mr. Young was annoyed at my assisting the Commander in making out such an extensive repair list, and calling Mr. Young's attention to these defects mentioned in that list and pressing for their immediate repair. I saw Mr. Mackenzie at that interview. He said that's Mr. Young's business, not yours, or words to that effect. I then said I shall be glad if you give me a testimonial, stating the time I have been on your vessel, as to my conduct and ability during that period, as I think, of going up to pass for the river tug. Mr. Mackenzie gave the order and I got the certificate. Mr. Currie handed it to me.

Did you not ask simply for a certificate of service only, showing the time you had served on board the *Sir John Lawrence*, as you wanted it to enable you to go up and pass for the river?

Answer.—I did nothing of the sort. I did ask for a *bona fide* testimonial which would express the opinion of the firm as to my conduct and ability while I was in their service.

I don't remember the exact words I used. I applied for a testimonial in the ordinary terms a servant would to an employer. I will not pledge my oath to the exact words I used. I don't remember to whom Mr. Mackenzie gave instructions about my certificate. Mr. Mackenzie did not direct Mr. Currie to give me a certificate of service only: he certainly did not do this in my presence. After getting my certificate, I went two or three days after to the Agents to get my wages. I don't remember seeing Mr. Mackenzie on that occasion. I saw him on the date I served him with a summons. I remember presenting Mr. Mackenzie with a letter which formally tendered to him my services as Chief Officer. I did this under the advice of my Solicitor. I cannot remember whether I actually presented the letter to Mr. Mackenzie. I do not remember stating orally. I have come to tender my services as Chief Officer of the *Sir John Lawrence* to Mr. Mackenzie or any one else. I don't remember Mr. Mackenzie or any one else saying having already dismissed you, we do not require your services. My former shipmates, Captain Irvine and Mr. Turner, the second engineer, were the "valued friends" I alluded to whom I had lost through the foundering of the *Sir John Lawrence*. In my opinion the *Sir John Lawrence* having had a lot of heavy extra iron beams, large quantity of deck and houses added to her, about eight feet above a portion

of the vessel where there was none before, it must have considerably altered the stability of the ship with reference to the calculations made on the original construction of her hull. I also knew that large quantities of ballast were thrown overboard at different periods, which, as a matter of fact, were not wholly replaced in my time. I did not cause the ballast to be thrown over board, nor do I know the quantity which was thrown over board.

To Captain deSmidt.—The windlass was on the main deck. It could be worked by steam or by hand from the upper deck. The centre casting of the windlass was broken, and the whole body of the windlass forced over to starboard, so that the starboard gipsy had worn itself deep into the wooden bitts which supported it: it got into a state which made it difficult to work some two or three months before I left the ship. I don't know whether the windlass was ever repaired. I have seen the plates cut out above the upper part of the stern: those plates were in good order. In the fore peak particularly, I think, the thickness of the plates were above $\frac{3}{4}$ of an inch. No rivets were driven out of the vessel during my time in the hull under deep water-mark. If I tried to beat a rivet with a hammer so as to remove the rust between the frame and the plates, in many cases there would be a distance of $\frac{1}{4}$ of an inch between the frame and the plate. The *Sir John Lawrence's* plates were alternately outside and inside above light water-mark. The outer plates have a liner between the frame and the plate. What I allude to was rust, and not liner I could not see the floor plates, the depth between the floors would be about one foot. I can't tell you how high she was cemented in those chambers; she carried ballast then; the ballast was on the ceiling. I have known the *Sir John Lawrence* go away boarded as full as she could hold; at other times not a very great deal. The amount varied considerably between 40 to 50 tons upwards. There was enough water to damage bags of salt. I think the water came through a defective sluice in the engine room. The sluice hole was stopped up with rags. I don't know whether the cargo was insured. On the main deck, besides, the tanks on the starboard side cabins were very much enlarged. Three fresh cabins were added—larger cabins—the older ones being removed. The new cabins occupy very much more space than the older cabins. On the starboard side, nearly abreast the gallery, were the additional places taken up built for the purpose, but never used as latrines. On the port side, just abaft the main hatch, was a cabin built for the carpenter, and about three feet further on a large engineer's stow-room had been built. I do not know how many superficial feet was left on the main deck for the accommodation of passengers. The horse-power was something over 90 and not under 90 for the second engineer could run her. Her speed under steam alone with a moderate head wind was about 7 miles an hour. I saw in the papers that the *Sir John Lawrence* was not classed at Lloyds; this was in 1878. The *Sir John Lawrence* was a very lively boat in bad weather.

To the President.—My acquaintanceship with Captain Irvine led me to consider him a man who placed very little value on his own life. I myself have heard him say I expect to go down in the old *Lawrence* if I stop on her long enough. On one occasion we received peremptory orders signalled to us to return. We obeyed that order; but if it had not been for me, we should never have seen that order, for I prevailed upon Captain Irvine to wait and read the flags. He waited reluctantly, and but for my protest he would have gone on. On one occasion when storm signals were up and large steamers had anchored, Captain Irvine proceeded out to sea in opposition to my advice. The Captain looked upon his passengers as so much living freight, worth so much a head. I do not believe that he would have permitted the question, whether or not his passengers would be inconvenienced or their lives endangered, influence him in any way when he came to decide whether he should return or go out to sea. If Captain Irvine had succeeded in getting to Chandbally before the *Sengul* and the *Tyrone*, he would most assuredly have swept up all the passengers who had not taken tickets for passages in the other ships. As a matter of fact, independently of the passengers who had tickets, Captain Irvine carried a larger number of passengers, who paid their money on board. That money was collected by Captain Irvine. In my opinion Mr. Currie, knew all about it. He was the Agent of Macneill and Company at Chandbally. My belief, induced by what I saw, was that the Captain obtained some pecuniary advantage out of the fares of these passengers. The interest he took in these passengers confirmed this belief. One of the motives which, in my opinion, induced Captain Irvine to venture out to sea was to secure the larger number of these passengers on the return voyage.

Re-examination to Mr. Ghose.—No account to my knowledge was kept of these passengers who took no tickets. If the Captain handed over the money to the agents they would only have the word of the Captain as to the amount. The proceeds which under an amicable arrangement might be the subject of division between the owners of the various steamers plying between Calcutta and Chandbally would only be in respect of money paid on the sale of tickets. The only thing which could be checked would be the money obtained on the sale of tickets. In my opinion this practice of receiving passengers on board without tickets was the chief cause of the crowding of the steamer with numbers beyond the amount the steamer was allowed to carry. In my opinion the person directly associated with the collection of the money from these passengers would be interested in getting as many of these passengers as they could on board. This practice obtains on both sides, more particularly from Chandbally. At Poojah during the Pari festival we carried quite 1,400 passengers. I have known the *Sir John Lawrence* when, during the time of the year and he was only permitted to carry 700 and odd passengers, according to what Captain Irvine told me, carry about a thousand passengers. I emphatically reassert that I have frequently seen the *Sir John Lawrence* overcrowded; and the overcrowded state of the ship interfered with the management of the ship, and in rough weather it would decidedly endanger the vessel.

and all on board. I have never seen the upper awnings blow away; the curtains would go and the rain pelt in. I have seen the passengers wet all through the night. The distance between Calcutta and Chandbally is between 150 to 160 miles. My decided opinion is that it is not possible for one officer performing the treble duties of Captain and Pilot and Harbour Master to get through the accumulation of work efficiently. Captain Irvine was 60 years of age at least, too old in my opinion to discharge these duties efficiently. I have frequently seen him for hours together asleep on the bridge when on duty. On the occasion when we were on shore at the mouth of the Dhamra river, the passengers threatened to throw me over board because they could not get food, and the Brahmins would not take the water from the tank, as that was used by Mahomedans. The two four-hundred gallon tanks had been exhausted. We got up coconuts from the cargo. In scrambling for these the women and children got trodden on. Had not been for Mr. Yakkie, I should have been thrown overboard. On one occasion, when our steamer was dragging her anchor, if one of the defective tanks had given way we should have been in pieces in two or three minutes. We had six or seven hundred passengers on board. When we anchored the Captain said that will do: steam, the fires were banked; finding ourselves slowly dragging, I informed the Captain. I also reminded him that, owing to the defective windlass, we could not let go the second anchor. I then with the consent of the Captain ordered steam to be got up as fast as possible. I have never known a passenger vessel go to sea with such an unsightly patch on her. I have noticed passengers stay behind till after the counters had left, and on leaving Chandbally after the counters had left and the vessel off in the stream underweigh, the pancewalla would bring down some hundred or more passengers who had been concealed in houses, and in spite of the efforts of the native agents to stop them to see whether they had got tickets, force them into boats and bring them off. The pancewalla shipped a large amount of freight on board the steamer; the freight were stowed in the best place; he saw it done, having great influence with the crew. I do not think there is any screw steamer which carries within one third of the amount of passengers as carried by the *Sir John Lawrence*, even if they be of the same tonnage as the *Sir John Lawrence*. The *Medita*, a much better ship, carries nothing like the amount of passengers. I believe the *Makratta* has been running in the place of the *Sir John Lawrence*. We often carried horses, carriages and cows; the space occupied by those encroached upon the space set apart for the passengers. The space set apart for the hospital was not used for the benefit of the passengers, but was a store place for hawsers, ropes and ship's gear. The space occupied by the cows, horses and carriages was part of the space reserved in the survey for passengers. I remember one or two occasions when passengers were refused admittance because the deck was so choked no room could be found for more. The last item in exhibit (3^d) is the most important item in the paper. We had a carpenter at Rs 40 a month, and not enough wood on board to make a boat's rudder. The item of oil was also important; it might have resulted in having to run without side-lights. This item, No. 12 in exhibit (1), is written and understood by me; it refers to the boat which passed its survey in the presence of Mr. Young and Mr. Bushby, and I made the remark particularly to Mr. Leech, the Chief Engineer. They lowered the two new life-boats into the water, and let the rotten one remain hanging at the davit. What sort of a survey do they call that. On the 17th October, when I wrote exhibit (1), I had no prospect of quitting my post. I attribute my discharge intimated to me on the 25th to the fact that I insisted on the repairs mentioned in exhibit (1) being done. Before making out this list, I had often made verbal reports to the carpenter and blacksmith sent on board to look after the repairs, and also to Mr. Young, when opportunity offered. I have known 4 annas taken as a fare for a passenger. I have also known as much as Rs. 5 paid for a single passage.

Case adjourned till Monday, half-past 12 p.m.

W. H. NEUSTEIN.

C. H. REILY.

The 25th July 1887.—William Henry Neustein to Mr. Kilby on re-examination.—It was only our casual conversation in hotels that the *Vingoria* went, through the defective state of her soil pipes. I cannot give you the date or month when the *Sir John Lawrence* proceeded to sea in defiance of the storm signal. I cannot give you the date or the month when we were overtaken by a cyclonic storm; could not use the starboard anchor through our defective windlass. It was about two or three months. It may be four months before I left the ship.

W. H. NEUSTEIN

John Leech—Sworn with to Mr. Kilby.—I was Chief Engineer at one time on board the *Sir John Lawrence* from the 22nd September 1884 up to the 25th September 1886. Mr. Neustein was on board as Chief Officer for part of the time. Whilst I was running to Chandbally, weekly one trip a week, I had six firemen, four coal-trimmers—it may have been two coal-trimmers—a scung, two tuidals, and two oil-men. I had engineers besides myself. When we began to run tri-weekly that is two steamers making three trips a week, I had eight firemen, four coal-trimmers that no extra fire-men, two extra coal-trimmers, and an extra engineer. In my opinion these were a sufficient crew for the work the *Sir John Lawrence* had to do. I cannot tell you anything about the deck crew. When I went on board the *Sir*

Sir John Lawrence, she had been recently repaired. I believe she had a new spar deck from the bridge up to the poop flush deck. I was in the vessel 13 years ago, and can therefore say that the *Sir John Lawrence* had two side bunkers and a bunker athwart ship, also a bulkhead separating the stokehole from the engine-room; the two side bunkers and the bulkhead I have mentioned have been removed. I should say the more bulkheads the ship has the stronger she is; in my opinion the removal of that bulkhead did to a certain degree weaken the vessel. I joined the *Sir John Lawrence* in 1874, and left her in 1877. In 1874 the *Sir John Lawrence* was a staunch vessel; everything good about her. The forepart of the *Sir John Lawrence* was not staunch in my opinion in 1884. The plates down in the fore peak were all encrusted with rust and the frames also. In 1874 she was properly painted in the fore peak and everywhere else, inside and out. In 1885 after the collision occurred with the *Indore*, there was no paint, all rust on the fore peak. I was sent by the Captain to go and have a look at the hole made by the collision on the fore peak on the starboard side; the hole was above water—a good deal above water. When the ship was light she was drawing about 8 feet forward at the time of the collision, the hole was about 4 feet above the water line. I went down to look at it and came back and told the Captain that there was a large hole in the bow, and that he could not go to sea and must take her back to be repaired. The hole may have been about 18 inches to 2 feet square when the ragged parts were cut off. My engineers cut off the ragged parts under my superintendence. Mr. Turner was second engineer, Mr. Thorpe, third engineer, Mr. Sansoni, fourth engineer. The plate was one-eighth of an inch thick. I did not measure it, but I could see by the edges of the plate. The plate when new must have been a quarter of an inch thick: this is merely a guess. The plate looked much corroded. We came back to Calcutta to the workshop at Garden Reach. The collision occurred in the morning between 6 and half past 6 A.M. I cannot give dates. Mr. Taylor, the Superintending Engineer, came on board; he afterwards sent workmen on the same day. They brought a plate off with them, punched holes in the ship's side round the hole, and fixed the patch with putty and made a bolt patch of it: we steamed away the same evening to Chandbally. We had passengers on board when the collision occurred—a large number of passengers—they remained on board all that day, and we took them to Chandbally that evening. When the patch was on, Mr. McKeller, the Assistant Surveyor, came on board and had a look at the patch. I saw Mr. McKeller on deck forward. I did not see him go down below. I think he must have gone down below. Mr. Taylor was on board with him. An engineer of the name of Henderson was sent off with the men to put the plate on. I saw the plate put on. I was there all the time. No Government surveyor was on board when the patch was being put on. You could easily feel the thickness of the plate from the inside after the patch was put on; it was an outside patch. After we came back from that trip, Mr. Taylor came on board the next day. He said if Mr. Bushby ordered the plate to be taken out that there would be no stopping, the plates on both sides of the bow would have to be taken off. By "stopping" I meant that, according to Mr. Taylor if one plate was taken out, the whole affair would be exposed, and a good number of plates; the whole of the fore peak on both sides would have to be renewed. Mr. Taylor further said he would see Mr. Bushby about it, and get him to leave the patch where it was with the exception of the bolts; he would take out the bolts and put in rivet and make a rivet joint of it. The bolts were subsequently taken out and rivets put in. The remaining of the plates on the fore peak would have been an expensive business, it would have taken over a month at the very least to have done. The *Medina* was running in conjunction with us, she had been chartered by Messrs. Macnair and Company. She belonged to the British India Steam Navigation Company. I could not tell the number of passengers the *Sir John Lawrence* certified to carry, or the *Medina*. No other part of the skin of the ship was examined by me. I do not know the condition of the holds or ceiling. I don't know whether the holds were painted. In 1884 the engines were 90 horse-power nominal. They were compound direct acting horizontal engines, so far as the shafting and the cylinders were concerned they were all right. The condenser was pretty much worn. Very much worn, the rest of the machinery were in good order and condition. The boiler was a new one. The donkey boiler was also a new one. It must have been put in the ship on the last repair of 1883-84. There was one unserviceable boat on board, a boat on the port side close to the mizzenmast, the after port boat; there were three other boats in good order. The starboard life-boat was smashed in the collision, and while the patch was being put on a new boat was sent from the yard, and was lashed alongside. In the evening the damaged life-boat was sent ashore in charge of five lascars, it was towed ashore by the jolly-boat. During the day the unserviceable after fore boat had been taken away, and a new boat had been brought in its place and lashed alongside but not hoisted on the davits. We also received a brand new life-boat sent us in exchange for the one which was smashed. The boat which was lashed alongside and not hoisted on to the davits filled with water, and got under the ship, the painter parted and we saw it no more. I could not swear to the fact that the after port boat was unserviceable at that time. On our return trip the after port boat came back to us again and was hung up on the davits. I saw that after port boat come alongside, it was an unserviceable boat, it used to leak very bad. It remained with us for some time till just before the survey when it was taken away and a brand new boat put in its place. After the survey was over we ran a trip or two, and then the new boat was taken away and the old unserviceable boat sent back to us. I saw the unserviceable boat come alongside after the survey, it was in a leaky condition, as it was hove up the plug was taken out and the water ran out of it. I was on board the *Sir John Lawrence* when she went ashore at the mouth of the Chandbally river; we had lots of passengers on board; the

ship was very crowded. The passengers wanted to go ashore to cook in the jungle. The after port boat was let down, it was found to be leaking so much that it would be dangerous to send passengers in it, so it was hoisted up again. When I left the *Sir John Lawrence* the unserviceable boat was still there: I left on the 25th September 1886. The collision I think occurred in May 1885. The unserviceable boat remained on board the *Sir John Lawrence* with the exception of the short time when she was sent ashore from the time of the collision to the time I left the steamer in September 1886. After the occasion when the unserviceable boat was removed to make way for the new boat, there were two additional surveys held in my time. I never saw the Surveyor's order that boat to be put into the water. It passed two surveys so I am wrong. Now I come to think of it the unserviceable boat passed one survey, the surveyor was Mr. Bushby. There were four surveys held while I was on board the ship: they were made by Mr. Bushby and Mr. McKellar; the latter does the engine-room, Mr. Bushby did the first engine-room survey. Mr. Bushby did all the deck surveys. The survey on deck and the survey on the engine-room was going on at the same time. I cannot say whether the Surveyor went down into the hold or not. When Mr. Bushby himself surveyed the engine-room he went into the boiler; he had a look at the cylinder, he looked at the shafting and made me take off the bearings when we went on deck. We looked at the safety valves, the whole affair was finished in half an hour. I did not see the deck survey. We were aground three or four days going to Chandbally, it was very early in the morning. There was a moon but it was clouded, it must have been on account of the darkness. Where we were aground the sand was not visible; the nearest shore from us must have been about six lengths of the steamer off. The passengers were short of food. I have seen the steamer crowded as full as it will hold. The people could not move about; the crew could not have got about through the passengers; the passengers had to cramp their legs up. At night it was utterly impossible for a woman to move towards the water-closets in day time, if she had male friends she might manage to do so. There were two passenger decks, the spar deck and the main deck. The spar deck was flush from the stern to before the foremast, then there was a break where the male closets were. Before the spar deck was the main deck. In 1874 there was no spar deck, there was poop, bridge deck and forecastle. The distance between the old poop and the bridge deck was about 60 feet and 140 feet about from the bridge deck to the forecastle; I cannot say for certain. The only alteration is that the space between the poop and the bridge deck has been decked over; there had been high bulwarks between the poop and the bridge deck. These high bulwarks were done away with altogether; the new spar deck was supported by iron frames; the distance between the main and spar deck is about 7½ feet. The old bulwarks are replaced by new bulwarks about 3½ to 4 feet high; the space between these bulwarks and the spar deck is open. The top of the bulwark was distant between 7 to 8 feet from the water when the *Sir John Lawrence* had a full complement of passengers and full cargo when she had a draught of 13 feet; the bulwarks were seven or eight feet out of the fathom. We did not get any very heavy weather on the last occasion. I was in the *Sir John Lawrence* in ordinary monsoon weather; the seas broke into the main deck—heavy seas. I have seen the passengers waded through. I have seen six inches of water right up to the saloon door and the passengers lying in it. I have never seen passengers injured by the force of the sea. The sea would just douse the passengers and nothing more. If there had been a storm all the passengers on the spar deck would have been sent down on the main deck, and if the main deck had not sufficient room the passengers would have been sent on to the between deck; if they stayed on the spar deck they might roll over board. There was an iron rail, there was strong netting between the rails; these rails were pretty shaky through the lascars walking along them necessitated by the crowded state of the upper deck. I have seen ballast taken out of the ship to lighten her. I found the *Sir John Lawrence* rolled a great deal more on the second occasion I was in her than she did on the first. There was an awning over the spar deck. There were curtains when the weather was unfavourable; the curtains were down there were no curtains or anything else to cover the spaces above the bulwarks on the main deck. Captain Irvine was not always a sober man. I have not seen him the worse for liquor when on duty. I have seen him asleep when on duty. I have not seen him asleep when coming by the James and Mary. There was no counting of passengers when shipped in Calcutta. They would generally start coming on board at 5 p. m. in spite of an order occasionally given by the Captain that they should not come on board till 7 or half-past 7; some used to get on board and others remained in boats, about 50 to 60 boats alongside. There was no showing of tickets when they came on board. Those that did get on board from the boats got in by the ports or up the gangway ladder. The Captain used to collect the tickets while the steamer was going down the river. After we had gone a good way down about 10 or 11 o'clock, a good many of the passengers had no tickets—money was taken, the price fixed for the trip: this price varied in different trips. The Captain issued no tickets. There was no one to check the amount which the Captain took. I never saw any of the European officers of the river police on board the *Sir John Lawrence*. I am not aware of any attempt or pretence made by the police to count the passengers who went on board at Calcutta. In Chandbally the passengers were counted when we got there. Stage planks were placed from the jetty, five or six planks, about a foot broad each, were placed side by side, a policeman stood either at the end of the jetty, sometimes in the steamer a native officer, and counted the passengers as they went ashore. There was no order kept. They were allowed to scramble ashore over these planks in any order. It was difficult for the officer to count them, but I think he was able to count them. I am not aware that Captain Irvine was ever fined for carrying excess passengers. I have myself seen twelve to thirteen hundred passengers on board. The police officer at Chandbally would be able to count them. I believe on

one occasion we did go to sea when the storm signals were up. We thought we would have very bad weather. I did not talk to the Captain about it. We did not think it prudent on the part of the Captain going out to sea on this occasion. I cannot remember whether we had many passengers on board. Mr. Young accompanied by Mr. Bushby or Mr. McKellar when they came into the engine-room for survey. Mr. Young gave me no directions to keep silent when the surveyors were on board. Nor did he even tell me to mention anything that might be wrong with the machinery. It is a practice with all ship engineers to answer any question which may be asked, but to volunteer no information.

JOHN LEECH.

Court adjourned till to-morrow, half-past 12 P.M.

C. H. REILY.

*The 26th July 1887.—Examination of witness John Leech continued to Mr. Kilby.—Mr. McKellar when he used to come down and examine the engine-room used to do it satisfactorily, by that I mean thoroughly, but as regards the condenser Mr. McKellar would not be able to find out what was wrong with the condenser unless he was told. I did not tell him. I heard no one else tell him. The condenser had ram pumps. The chambers in the condenser into which those ram pumps worked were eaten away by galvanic action; we had to put in copper pipes and the rams worked in these copper pipes, the seating of the suction valve of the after circulating pump had no landings to bolt the seatings to the landing. The landing or cast iron flange was all corroded and eaten away, so that we had to fix brass flanges in its place, cutting away what remained of the rusty cast iron flange for that purpose. These defects did not endanger the safety of the ship and was not detrimental to the working of the engines. They gave us a good deal of trouble. We had to keep rectifying it constantly. Mr. Bushby's survey also was a thorough survey. I wish to correct a mistake I made yesterday, the boat which was sent on board the *Sir John Lawrence* on her return from Chandbally after the collision was one belonging to one of the Inland River Steam-boats. I also wish to say that during our bi-weekly service we had four coal trimmers on board and during the tri-weekly service we had six coal trimmers on board. I also omitted to mention a store-keeper.*

*To Captain de Smidt.—I was Chief Engineer on board the *Sir John Lawrence* between 1874 and 1877. When I first joined her we were put on the Chandbally trade. Messrs. Macneill and Company were agents to the ship at that time. She was chartered by the British India Steam Navigation Company; she was afterwards employed and was run between Calcutta, Chittagong, Akyab, Kyauk-Pheon and Sandoway. Throughout the time we were employed in the Bay of Bengal and on the west or Malabar coast. I was Chief Engineer again from 1884 to 1886, I was not in Calcutta in 1883. The *Sir John Lawrence* between 1884 and 1886 was surveyed twice in dock. The *Sir John Lawrence* was not scaled inside on either of these surveys, she was scraped outside. I never went out on the dock and examined the bottom. I have, however, been at the bottom of the dock working at the steamer's propeller, when I could see the bottom looked staunch. I believe the pintles were changed. I cannot say whether at the first or second time we went into dock. I examined the roses of the sea connections, they were all in perfect order. The bolts of our sea connections were all right, I examined them myself. I never examined the cement at the bottom of the boilers. The after scupper on the starboard side leading through the after hold to the side of the ship was leaky. I on one occasion took down a Mr. Gill, the out-door foreman of Messrs. John King & Co to rectify the scupper. When we got down into the hold we found Captain Irvine there with a labourer busy cementing the scupper. Gill looked at the scupper, the cement was on it and said—"If I were you, Captain, I would do nothing more to it, the cement will get as hard as iron." I said the *Sir John Lawrence* was not staunch when I joined her in 1884 because the plates of the fore peak were corroded and thin. Previous to the date of the collision I heard no one speak about the thinness of the fore peak plates. I did not examine the plates of any other part of the steamer. I am aware that our sea connections bolted on to a plate only $\frac{1}{4}$ th of an inch thick would be attended with great danger; knowing this I did not think it necessary to examine the plates to which the sea connections were bolted. The surveyors never examined the sea connections, none of the bolts were taken off in their presence. I never at any time saw the surveyors test or bore any of the plates of the *Sir John Lawrence*. When the surveyor came down into the engine-room he went first to the boiler, everything is open and ready for inspection. He went first into the furnaces and examined the crown of the furnaces, then he goes into the combustion chamber, then he comes out and goes into the boiler through the manhole. The cylinder covers are taken off, we do not disconnect the piston, but the surveyor looks to see whether the cylinder is smooth and not scored. Then he examines the slides, then the journals of the shafting, the condenser doors are open if he wished to look inside. It would not have been possible for the surveyor to have noticed the defects I have mentioned in the condenser unless I took the sealing off. There was no other ventilation except small port holes on the main deck; there are no ventilations whatsoever in the between decks. I heard of no deaths occurring through suffocation or over-crowding on board. I could not tell you whether the upper deck was covered with a double awning. I do not know whether the railings and string netting was strong enough and is sufficient protection to the passengers in bad weather. The railings were loose and the string netting were no doubt rotten though I did not examine them. All the time I was on board I heard of no trouble with the windlass, the messenger*

chain once parted and we had to work the capstan by hand for a short time; it might have been for a trip or two. There was a new gipsy given us, but the messenger chain was bad. I have no knowledge of the scantling employed in building a ship.

To Mr. Trevelyan.—I never had any difficulty about stores as long as Mr. Young was there; whatever I indented for I got.

To the President.—I discovered that the *Sir John Lawrence* was more crank than she was when I first became acquainted with her 1874. Mr. Taylor, the Acting Superintending Engineer to Messrs. Macneill and Company, himself examined the hole in the plate made by the collision, he ordered me to cut the "ragged edges off." There was no conversation between Mr. Taylor and Mr. Bushby in my presence about the condition of the fore peak plates. In my opinion the plates should have been taken out. There was no condenser on board in 1884. During the time I was on board between 1884 and 1886 nothing occurred during our frequent voyages to and from Chandbally which led me to suspect that the ship was not in other respects sound and of a seaworthy condition. As far as I can recollect the port anchor was always used. I do not remember the starboard anchor being used. There were four scupper pipes as far as I can remember. I cannot tell whether the other three scupper pipes had been cemented or not. I cannot tell what the condition of the cast iron lip guard was on the outside of the scupper. I took Mr. Gill to see. Mr. Neustein was on board with me about ten months. Mr. Neustein and I had frequent conversations about the condition of the ship whilst on board. I have had nothing to do with Neustein since I left the ship. Mr. Young indeed gave me to understand that it was through Mr. Neustein I was dismissed. I told Mr. Neustein about the thinness of the plates in the fore peak. I can remember both Captain Irvine and Mr. Neustein speaking to me about the state of one scupper. I can swear that Mr. Neustein never complained to me about the other three scuppers. I can swear Neustein never spoke to me about the band of the bowsprit or the bobstay or the bowsprit shrouds. I do not remember Neustein saying anything to me about the condition of the starboard side of the windlass. On the morning of the survey held in April 1886 Mr. Neustein called my attention to the fact that the two after boats had not been lowered into the water. He said, "Is this what you call a survey?" they lowered the two new life boats into the water and would not lower the other two. The main deck pumps were connected with the sea and the bilge in 1874; in 1884 there was no sea connections. The shaft of the after pump was discovered broken and had been lying in that condition for a long time. Mr. Hannah, the chief officer, discovered this, I sent it ashore about a couple of months after the discovery. A new shaft was made and fitted to the pump. Some portion of the forward pump was also sent ashore for repair by the chief officer, either Mr. McDonnough or Mr. Neustein. I have read the rules attached to Act V 1862, which indicate the nature of the examination to be made by the surveyor of the engine-room and machinery thereon, and I say that with the exception of the condenser the surveyors who surveyed the engine-room and machinery on board the *Sir John Lawrence* on the four occasions, I was there did their duty thoroughly, and quite in accordance with the requirements of those rules. With respect to the condenser, if I had been in their place, I should have insisted upon having all the valves taken out, and also the ram pumps; this was never done on any of the four occasions. I was present at the survey. Mr. Young was aware of the condition of the feed and bilge pump chamber, and the seating and landing. Mr. Young was present at the first, second, and fourth survey. Mr. Taylor was present at the third survey. My repair was only a makeshift, nothing more, the chambers wanted fresh boring, and a proper tube put in. To do these repairs properly the vessel would have to lie up a week or ten days, it might be more. This repair ought to have been done when the steamer was thoroughly repaired before I joined her. During my time the ship was not laid up for repairs. If these makeshift repairs of mine had given way, it might have resulted in the breaking of the pump rod. The engines would have to be stopped long enough to enable that pump to be disconnected. This would take quarter of an hour. I should then have to work with only one pump. This would not have caused any loss of power. I don't know whether the *Sir John Lawrence* is classed at Lloyd's.

Cross-examination to Mr. Orr.—I was dismissed from the service of Macneill & Company. This was the letter which dispensed with my services. Letter put in and marked (4). I had no communication with Mr. Neustein in September or October 1886; he came over to my house in January 1887. Since January 1887 I have had nothing to say to Mr. Neustein, nor has Mr. Neustein said anything to me within the last two months. I have had no conversation with Mr. Neustein about this enquiry on the nature of the evidence to be given here. I have had no communication with Mr. Neustein through others. I have spoken of this enquiry with my relations, but with no one else. The bridging over the space between the poop and the bridge deck are one of the alterations I noticed when I rejoined the *Sir John Lawrence* in 1884. My estimate of the length was a guess. It may be nearer 20 feet than 60 feet. I cannot form any idea as to the added weight given to the vessel by this alteration. Before I joined the *Sir John Lawrence* in 1874, I believe she had been running with pilgrims between Bombay and Jeddah. When I joined the *Sir John Lawrence* first she had a saloon under the poop; apart from the saloon she had houses on the fore part of the main deck, between the fore hatch and the middle hatch; there was one cabin for the Chief Officer, one for the second Officer, one for the Chief Engineer, one for the second Engineer, and one for the third Engineer. These cabins were all on this house. They were so small that in my cabin I could not lie with my legs stretched out. There were no other houses that I remember. Two water-closets

were added by the British India Steam Navigation Company when we were running for them. There were two store-rooms on the starboard and port side, respectively, near the fore-castle.

JOHN LEXEN.

The Court adjourned till to-morrow at 2 P.M.

C. H. REILLY.

*The 27th July 1887.—John Lexen.—Cross examination continued to Mr. Orr.—*The officer's house was on the spar deck, the water-closets were on the main deck, the store-rooms were in their old places when I rejoined the ship in 1884. The water-closets had disappeared; the officer's house on the spar deck has also been removed. I cannot estimate the difference in weight which would be caused by the removal of the officer's house. I cannot estimate what weight would be added to the vessel by bridging the space between the poop and the bridge deck. The donkey boiler was on the port side of the stokehole in 1874. It occupied much the same place—perhaps the difference of a few feet—in 1884. It was on the same platform as the stokehole. I can't say what the weight of that donkey boiler would be. There was on the spar deck under the bridge a small room called the chart room: it was made by the carpenter while I was on board. The steamer in 1874 had a saloon, the same as she had in 1884. The saloon in 1884 was some feet smaller than what it was before. The saloon had one main entrance. The saloon was shorter in length—about five to six feet. There was no other alteration with respect to cabins on the main deck. In 1874 the *Sir John Lawrence* had three masts and yards on the foremast. In 1884 she had no yards on the foremast. I am not a nautical man, but taking down her fore-yards would make her less top-heavy. I can't say what kind of a bowsprit the *Sir John Lawrence* had in 1874 nor in 1884. The new bulkheads in 1884 were not more than four feet high. The cargo ports on the main deck were always shut: they were wedged up by the carpenter. There were scuppers. The coal bunkers were three in number in 1874. They were ranged on the three sides of the boiler. You could walk round them inside. There was a bulkhead between the boiler and the thwart ship bunker. The bulkhead did not extend right across the ship. At the after end of the side bunkers there was a partition bulkhead separating the boiler space from the engine-room. In this partition bulkhead there were doors leading into the stokehole. When I rejoined the ship in 1884 these doors and the side bunkers had disappeared with the bulkhead. The coal bunker bulkheads were extended on each side till it touched the side of the ship. The result was the bulkhead, abaft the boiler was taken away, bodily and the coal bunker bulkhead extended till it reached the side of the steamer. The only occasion when I examined the plates of the ship was the day when I assisted to patch the hole made on the starboard side of the forepeak by the collision with the *Indore*. I was down there the whole day in the forepeak, not the fore-castle. The hole was four feet above the water line; the hole was below the main deck; the crew live in the fore-castle on the main deck; the hole was below the fore-castle. Mr. Bushby came alongside, about the length of the room away from the side of the ship; he was in a steam-launch. I heard Mr. Bushby give no orders. I was on the fore-castle at the time. I don't know what is meant by the superstructure of the vessel. The leak would be up to the main deck. The thick plate which runs along the side of a ship is called the sheer strake. I learnt this lately. The hole must have been below the sheer strake. There were port holes in the saloon. This hole was below the line of those port holes. I saw the steamer that collided with the *Sir John Lawrence*. I saw the collision take place. I was on the main deck standing by the engine-room door. I can't tell you what part struck. I was not forward enough. We went into the *Indore*: she was at anchor. We struck the *Indore* and cannoned or bounced off. The plate put over the hole was a quarter of an inch thick; they had no difficulty in punching the holes. They were punched with a round-nosed chisel; the rat-offet was not used. The plate was too thin for that. I did not measure the thickness of the ship's plate. I don't remember whether I told Mr. Neustein that the ship's plate was so thin it was with the greatest difficulty I got the plate on. I can't swear one way or the other. The statement about the plate made to me by Mr. Taylor was made the day after our return from Chandbully: the rivets were put on, or rather begun to be put on, on that day. I did not supervise the work. It might have taken half a day to a day and-a-half. The frames may have been two feet apart in the forepeak. I did not measure the distance. I did complain to Mr. Young about the condition of the condenser. I showed him the old tube, not fit for use, which was replaced by the new one made by John King and Company. The chambers of all four pumps were in a bad state. They all had pipes in them. It was very nasty for a bilge pump to be discharging condensed water over board through leakage. The pipe would not last long, and had to be constantly renewed. I can't tell you how much coal the *Sir John Lawrence* burnt. It is nine months since I was in her. She used Ranegunge and then Assam coal. She used more coal than she ought to have done for a ship of her class. Mr. Bushby must have done all the deck surveys. I did not take particular notice of the state of the covering boards. The rails on the spar deck, before the Captain's house, right away forward, on both sides were loose. I don't mean the rails on the poop. I can't account for the increased rolling in the ship in 1884. I saw Captain Irvine asleep on duty when we were coming up the river. I have seen him asleep more than once on duty. The Chief Officer on these occasions was on deck—not on the bridge. The Chief Officer was doing nothing in particular; he was walking. I did not count the 1,200 to 1,300 passengers I spoke of. It is not my place to bring the state of the crew-master to the notice of the surveyors. The surveyors never on any

occasion asked me if there was anything in the ship which required their attention. I don't think it was part of my duty to bring the state of the condenser to the notice of the surveyors. The Superintending Engineer answers all questions the surveyor chooses to ask. I am not spoken to. If I am asked, I answer. It is not my business to point out defects. I had never been forbidden by the Superintending Engineer to speak to the surveyors.

Re-examination. To Mr. Kilby.—The letter No. (4) talks about a "false" statement sent in by me as to the quantity. There was an error in the account—an unintentional one. We received a certain amount of coal which lasted us five trips. At the end of five trips I should have had 200 maunds remaining, whereas I only had 80 maunds. I mentioned this to the Captain and also to the Chief Officer. I also told them that I had my bunkers cleaned out and painted. I arranged the coal 30 maunds on each side of the stokehole: it was Assam coal. I was 140 maunds short on Monday morning. I was down the engine-room at work. The Mate came to me and said the Captain had been sent back by the office to bring the coal statement. I immediately came out of the engine-room and went to my cabin and washed my hands and started to make it out on the one column. I put down consumed by engines as much: the remainder I put down in the next column as remaining, whereas I ought to have had another column—deficient. I did not know anything at all about this mistake. The Captain took the coal statement to the office, and I heard nothing more about it till the Tuesday morning, when Mr. Young came on board to see the coal bunker. He found this 60 maunds on each side of the stokehole. He went into the bunker and found it cleaned and painted. I was on shore at the time and did not know that Mr. Young had been on board till my return. It was then told to me by the second engineer who saw that Mr. Young had told him I had made a mistake in my account, and that he had come on board to see how much coal I had on board. I wrote a letter to Mr. Young to explain; when I came back then I received my discharge. I had probably used more coal over the five voyages than I actually put down; the coal was dusty Assam coal, and therefore very hard to judge the daily consumption; the coal was given me as a trial. The real reason of my discharge was not connected with the coal incident—that was only a pretence. Mr. Young told me that Mr. Neustein was the cause of my dismissal; that Neustein had stirred the Captain to go to the office and make much of the mistake. The real reason why I was dismissed was economy. Two months previous to my dismissal there were rumours that Mr. Ogg, second engineer of the *Medina*, was to get my place in the *Lawrence* on Rs. 200 a month. My pay was Rs. 300. This rumour proved true, for Mr. Ogg was appointed in my place: he had just passed as Chief Engineer. I had great trouble to get this certificate. Mr. Young put me off from time to time he eventually told me that he would have given me one long ago, but he was told by the office people not to do so, as they were afraid I would take them to Court. I told Mr. Young I had no intention to take the office people to Court: I never had any such intention, as I knew which side my bread was buttered. I then got this certificate put in and marked (F). I was under articles to serve up to the 31st December. I left on the 25th September. Mr. Young accused me of being in league with Neustein. As a matter of fact I had nothing to do with Neustein. I could see that he meant in respect of the letter Neustein was writing. Mr. Young was pumping me: I could see that. If I had taken upon myself to point out defects on board to the Surveyor, I would not have been one hour on board: I should have been instantly dismissed. This would have been in any Company, the India General for instance; they would not give that as a reason, but I should have been dismissed. Mr. Ogg was appointed in my place on Rs. 200 a month.

To Mr. Orr by permission of the Court. These are my indents, the bundle marked 5.

JOHN LEECH.

Court adjourned till tomorrow, the 28th July.

O. H. REILY.

The 28th July 1887.—James Oliver Thorpe.—Sworn Saith to Mr. Kilby.—I was third engineer on the *Sir John Lawrence* from March 1885 to January 1886. I was on board the *Sir John Lawrence* at the time of the collision with the *Indora*. A hole was knocked into the fore part of the *Sir John Lawrence*. I helped to mend that hole, the hole was in the fore peak below the main deck on the port side: I am not exactly sure. The right hand side is the port side: the hole was on the right hand side of the steamer: the hole was about four feet above the water when I mended the hole; the hole was about 2 feet square. The collision occurred in the morning when we were going out. We came back to Garden Reach to have the hole patched up. I and the second engineer, Mr. Turner, clipped off the ragged edges of the hole. Mr. Turner went down in the *Sir John Lawrence*. The thickness of the plate was between $\frac{1}{4}$ th and $\frac{3}{4}$ th of an inch: a bolt patch was put on. Mr. Handerson, in charge of Messrs. Macneill's workshop, put on the bolt patch. We proceeded to sea the same afternoon for Chandbally. When we came back a rivet patch was put in the place of the bolt patch. The surveyors came on board after we had put on the bolt patch. Mr. McKellar—I do not remember exactly whether Mr. McKellar went down into the fore peak. I can say nothing as to the thickness of the plates in any other part of the skin of the ship; I saw nothing wrong with the tunnel casing. The steamer did not leak in my time. The pumps were never used to pump out the ship to my knowledge. I know nothing about the condition of the ceiling. I remember a boat which would not swim; it was returned to the yard and we got a new one in its place. I do not remember how long that boat that would not swim remained on board.

the steamer. During pongah times there is always a big crowd of passengers on board the *Sir John Lawrence*; during these occasions the passengers walked about and had room to circulate. There was not room to lie at full length. After we had started some of the passengers on the main deck would make their way to the spar deck. To prevent over-crowding and interference with the movement of the crew these passengers were sent down again to the main deck; there was no difference in the fare for passengers on the main and spar deck. I am aware that main deck passengers have a right to stay on the spar deck. I never exactly noticed whether the crowd on the spar deck was too dense to prevent the crew working the ship. On the main deck the passengers occupied space from the foremast to the mizenmast, the main deck was closed up from forward till near the engine-room. There were bulwarks about five feet high, the spar deck was about 10 feet from the main deck, the opening above the bulwarks was about 3 feet. I have been in the *Sir John Lawrence* in monsoon weather; the seas broke in through the open space above the main deck bulwarks once in a way. I have seen the seas break on when there was a big crowd of passengers on the main deck; there were woman and little children among the passengers. I never saw any of the passengers injured by the force of the sea. Captain Irvine was about 60 odd years of age.

To Captain deSmidt—I never saw any of the rivets or bolts leak in my time. I never saw any of the rivets taken out; I never heard any one speak about the plates being very slight; the engines never gave us any trouble during the voyage. We never had to lie to on the way to Chandbally or back on account of a defect in our engines. I do not remember having anything to do with a defective condenser. It is my duty to make myself acquainted with every part of the engines. I saw nothing defective about the condenser. I saw it opened, not exactly in perfect order; it was an old condenser, there were no new tubes put in my time.

Cross examination to Mr. Orr.—I did not measure the thickness of the plate.

To the President.—I do not hold any engineering certificate. The *Sir John Lawrence* was the only steamer I worked on as engineer, before and after that time my duties have been always on shore. I am now an assistant at the water-works. I left because I wanted more pay and they would not give it to me.

JAMES OLIVER THORPE.

Henry Lindsay sworn saith to Mr. Kilby.—I am a foreman, in the Rivers Steam Navigation Company. Messrs. Macneill and Company are Agents of the Company. Mr. Young is the Marine Superintendent. I remember Mr. Young ordering Mr. Neustein to have wooden templates made for the lip-guards to the scuppers; these lip-guards were made of cast-iron, I think at Messrs. Burn and Company. At the second survey Mr. Bushby and Mr. McKellar came on board and examined the scupper pipes, all of them. I was walking round with the surveyors. They said the scupper pipes were all right, and that the new lip-guards need not be put on. Mr. McKellar said this. Mr. Neustein had left the ship. Just before Mr. Neustein left there had been a survey while the ship was in dock. Shortly after Mr. Neustein had left there was a second survey. It was on this occasion Mr. McKellar said the new lip-guards need not be put on. I once put a patch on the *Sir John Lawrence* on the port side: this was in October last; it was a small patch on the port bow. The hole was a slit about 4 to 5 inches long, about an inch and a half wide. The plate was a quarter of an inch thick. I know nothing of the thickness of the plates of the *Sir John Lawrence* except what I have mentioned. I have been in the Rivers Steam Navigation Company's service since 1871.

To the President.—I repaired the windlass; that was after Mr. Neustein had left. It was in October. There was a bracket broken at the bottom, and the whelp was jammed on the shaft I put on a new bracket. I repaired the windhee. I took the windlass to pieces, the whelp was jammed on the starboard side. I took the windlass to pieces while the ship was in dock; the orders were that the vessel should come out of dock, so I put back the windlass as it was before. The ship came opposite Koila Ghat. I then a second time took the windlass to pieces and put it right. I was ordered to mend the windlass the very morning Mr. Neustein left the ship. I put it right that very night. I took it down in the afternoon. The oil hole was jammed, that was all that was wrong with the windlass. This list No. (1) was given to me by Mr. Young when Mr. Neustein was still on board. Mr. Young told me to carry out all the repairs mentioned in list (1). I did the repairs indicated in items (2), (9), (13), (21), (22), (23), (4), (14), (17), (7), the gipsy which works the messenger chain (it purchases the anchor by steam) was worn. A new one was made by Burn and Company, and put in after the first trip the vessel had after the survey. The steamer made one trip with the worn out gipsy. I fitted in the new gipsy myself. I left Messrs. Macneill of my own accord in April for an appointment on board a boat making voyages, there was no vacancy. I then left Messrs. Macneill's service for about two months. Mr. Young took me on in June, on the 9th June, and I am now in their service.

Cross-examination to Mr. Orr.—I first joined the workshop at Garden Reach on the 18th September 1886. I went on board the *Sir John Lawrence* in September and October that year before she went into dock. Once or twice I was sent by Mr. Young on board. He sent me to the Chief Engineer to see if any work was to be done. When I went by myself I saw Mr. Neustein on the poop. Mr. Neustein never spoke to me, never came near. Mr. Neustein never spoke to me about the state of the scupper pipes. Mr. Neustein never drew my attention to holes in the scupper pipes made by boat hooks. In 1885 I was second engineer of the steamer *Behar*. This is the letter which I wrote to Mr. Young, letter put in and marked No. (6). No one had drawn my attention to the state of the windlass before I saw it when the

ship was in dock. It is the Chief Officer's duty to look after the windlass and see that it is kept in order. The windlass was dry; there was no oil at all. The windlass had been neglected, not looked after.

To Captain deSmidt.—I did work at suction valve and seating of the after circulating pump. The cast iron grating was broken; there was a brass grating on. Mr. Young went on board, examined and condemned the old brass grating. He ordered the Chief Engineer to make a tem-plate, one in two halves, and angle iron all round. The grating was broken by pressure of water, not worn. The middle part of the seating was all broken; the side flanges were all right. There was left an inch of metal on the side of the landing; the middle part was broken. All the pumps in the condenser were renewed in dock. I put a copper pipe into the feed pump chamber. A new brass grating was put in. After these repairs the condenser worked all right. Mr. Young sent me on board to enquire if the condenser was working all right. The Chief Engineer said "Yes, no trouble." The landing was left as it was broken. A false brass grating put over the old landing.

HENRY LINDSAY.

Niel Macdonald sworn saith to Mr. Kilby.—I have been on board the *Sir John Lawrence*. I am a foreman carpenter. At that time I was in Macneill & Co.'s service. It was part of my duty to go on board the *Sir John Lawrence*. When sent I saw the ceiling of the ship; it was in very good condition; it required repairs. I was sent by the Superintendent for to repair it the last time the ship was in dock in October 1886. Some of the planks were gone and required replacing. This was in the fore hold. I saw the plates of the ship in the fore hold and the frames; they seemed in fair condition. I noticed no rust. The ship was thoroughly repaired in 1884. The ceiling was repaired in 1884. Most of it was new. I cannot say whether the part I had to renew was old or new ceiling. I put on the covering boards of the spar deck in 1884. I put the ceiling on in 1884. I was then in Macneill & Co.'s service. The covering board planks were all new except a piece round the quarter round the stern of the ship. I did not see any of the stanchions were loose. I did have a look at them. The gangway boards were morticed into the covering boards. I cannot say whether they were slack or not. I saw a boat on board which would not float when the ship was coming out of dock the last time. I do not know whether this was before or after the last survey.

Cross-examination to Mr. Orr.—I went into the fore peak, the last time the ship was in dock I did not examine the plates or the frames. I was working under Mr. Young when the *Sir John Lawrence* was repaired in 1884. I saw the main deck laid and the upper deck laid; the portion from the bows to the cabin was new, the upper deck was all new, the covering boards were of teak-wood. I did not see any of the stanchions loose. The rigging is fastened to chain plates rivetted to the outside of the ship. I cannot remember whether the rigging passes under or over the top rail on the open deck; it went outside a part of the rail. I could lean against the rails with safety. I was not afraid to lean against them. There was a rope netting painted over, that was all done after the ship came out of dock in 1884, the netting was made of new material. I did not see anything wrong with the netting when I was last on board. The covering board and the stanchion ought to last fifteen or twenty years. I cannot say how long the netting would last. That boat which would not float was taken away to the yard, another boat was sent to take its place; this was in October after the ship was in dock. A new boat, a gig, was sent to replace the old boat. I left Macneill and Company's service in January last. Up to that date I did not see the new boat come back to the yard: they were chipping the hull of the *Sir John Lawrence* when I was working on board of her in 1884; the chipping was going on all round the hull of the ship inside; the inside was painted after the chipping. I cannot say whether anything was done to test the thickness of the scantling. I saw some of the ship's plates drilled through; that was in 1884. I have seen this done in the fore-castle when I was putting in the hawse chocks; they were bored for the fastenings of the hawse chocks, the plates were about $\frac{3}{4}$ th of an inch thick to half an inch. I did not measure the thickness.

To Captain deSmidt.—Everything was taken out of the ship amidship at the time of the repair of 1884. I cannot say whether cement in the holes had been removed. I cannot say how many plates were taken out of her and new frames put into her. There were some new plates put in about the engine-room. If water got in between the stanchion and the wood work, the latter would be apt to rot, and then the stanchion would not last so long: the stanchion was driven right through the waterway; the bottoms of the stanchion were fitted to plates which with four screws were screwed down to the waterway; there were two bolts and two screws to each stanchion.

To Mr. Kilby, re-examination.—I could see the men working at the chipping—native men; they scraped and chipped.

N. MACDONALD.

George Adolphus Robertson sworn saith to Mr. Kilby.—I am Superintendent of the Port Police; it is part of my duty to see that passenger ships carrying passengers to Chandbally are inspected. It is the duty of the native officers to go alongside the vessels in their police boats, to remain alongside from the early evening till the vessel leaves port the following morning, to count the passengers embarked, and the following morning after the vessel leaves port to give in their report, the time that each of the steamers left

their mooring, the number of passengers carried, and to report any accident, if any, occurring during the embarkation. The report is made to the Inspector of the division. The Inspector notes the information in his daily register of cases, and it is part of his duty also that during the night immediately to the early morning when the steamers leave their moorings, to see that the native officers of the police are alongside the vessel, and are on the alert. I have never prosecuted any of the steamer captains for having too many passengers on board. The duty of counting passengers falls upon the sergeant of Police on Rs. 85 a month; he, however, can only attend to one ship; the other two passenger ships which start at the same time have their passengers counted by a corporal on Rs. 10 or Rs. 12 a month. During the Dole Jatra and the other three or four festivals in the year, the rush of pilgrims for Juggernath is very great. On several occasions it has been reported to me that the maximum number having been reached, no further passengers were allowed to go on board. There is only one Inspector,* Mr. Driscoll, for that division. There were no extra precautions taken by the police on the occasions when the rush of passengers were great, except that the inspector visited the police boats oftener in the night. When the rush of pilgrims is great, the passengers begin to go on board about 6 p.m. before sunset. They continue going on board till the moment the vessel leaves. The police never go on board the vessel at all. The Inspector may do so; there is a light all night on the gangway; there is only one gangway. A big country-boat is placed alongside the gangway as a landing stage; the passengers coming in smaller boats are embarked on the stage of the big country-boat, the police usually only remain on the big country boat. I have seen this. I have visited the spot at various times throughout the night. I usually found my police officer on the big country boat. The passengers are counted by the dinghy load. Most of the boats carry ten passengers, two boats carry twenty, and four or six fourteen. The passengers in each boat are counted, and then the boat is tallied by a stroke. Those tallies have never been checked or their accuracy tested during the 18 years and seven months I have been Superintendent of the river. I have found that the vessels seldom could get one half the number of their passengers, except on festival days, when they would get about the full complement. I also know that the passengers would have to be checked again at Chandbally, where there is a landing stage, and more easy to count them. I did not test the accuracy of the counting on festival days, when the rush was great for that reason. I had every confidence that my men did their duty accurately. I have never been to Chandbally. On the 25th of May the following entry occurs in the register case book, No. 1356:—The S.S. *Curlew*, *Tyrone* and *Sir John Lawrence* left port at 4-55 a.m., 5 a.m., and 5-10 a.m., with 573, 886, and 735 passengers, respectively, for Chandbally. The *Sir John Lawrence* was licensed to carry on that occasion 735 passengers; she therefore had her full complement on board. The counting officer was Corporal Sahadeo Tewarry; his salary is Rs. 12 a month. All three steamers had their full complement of passengers. It was reported that passengers had been refused admission on all three steamers.

G. A. ROBERTSON.

Case adjourned till tomorrow at 12-30.

C. H. REILY.

The 29th July 1887.—George Adolphus Robertson. Examination continued to Mr. Kirby.—The police officers counting the passengers on board the *Curlew* was Sergeant Ram Golam Singh, and Corporal Mungli Khan counted the passengers on board the *Tyrone*; that is how I understand the report. Ram Golam gets Rs. 35, and Mungli Khan Rs. 16 a month. I cannot say when the large country boat used as a landing stage goes alongside. I have seen it lowered the evening after sunset alongside. The gangway ladder is down all day. There is nothing to prevent native passengers from going aboard before the country boat goes alongside. In former years I used to see a crowd of small boats all round the vessel mostly towards the evening, and when there would be a rush of passengers, men with tickets have come to me on the day following the starting of the steamer, and have shown me their tickets, and have complained to me that they had not been allowed to go on board, although they had these tickets. From this I infer that persons without tickets must have been admitted on board before the passengers with tickets went alongside. People with tickets have an idea that they can go on board up to the moment before the steamers. When they get alongside they are often unpleasantly undeceived. I have known instances when boat loads of passengers have been turned away from the side of the ship between the hours of 3 and 5 p.m. The ship people I believe prevented these boats going alongside. I have seen boat loads of passenger start for Koila Ghat and after a while return in the same boat. Some of them have complained to me that they had not been allowed to go on board, although they had tickets, but had been told to return later on in the evening. I have not known of instances where boats have been allowed to transfer their passengers on board the steamer before the time. During the Gunga Sagar mela passengers go on board the steamer from all points in the port of Calcutta. They even go, hundreds of them, by train to Diamond Harbour to catch the steamer there. These remarks do not apply to the Chandbally steamers.

To Captain de Smidt.—I do not think boats go alongside on their own account while the vessel is in motion. The country-decked boat used as a landing stage has been in use for the past two to three years.

To the President.—There is an order that passengers arriving from Chandbally should be counted before being allowed to disembark. This is done on every occasion. It is recorded

in the same way. The passengers are counted by the boat-load. It would be impossible to count by the heads. We discovered that boat-loads of passengers were landed at Garden Reach. I issued a proclamation forbidding this, and we have prosecuted boat men for breach of the rule. The boats whose duty it is to count the passengers await the arrival of the steamers at Koila ghat. The police at the Hastings thana have orders to arrest any boats attempting to go alongside while the vessel is still in motion. Some passengers may occasionally get ashore before the steamer brings up at her moorings. The matter of counting passengers was considered by Sir Stuart Hogg, at that time Commissioner of Police. Having knowledge, he wrote to Government suggesting the sending a police officer on board each steamer during her voyage to and from Chandbally. At present, I consider, I do the best I can with the materials at my disposal. The labour of counting the passengers can be much more efficiently done, especially if the steamers were compelled to take their passengers on board over a landing stage. When the tide is strong, it is, in my opinion, positively dangerous for passengers to be taken aboard in boats. I can only remember one or two cases where deaths have been reported to me. I have heard that the body of a passenger, if he happens to die on board after the vessel started for Chandbally, would be thrown overboard.

Cross-examination to Mr. Orr:—I don't believe that six bodies could be thrown overboard between Diamond Harbour and the Garden House without the matter being reported to the Port Officer. The crew would talk about such an occurrence if it ever took place. It would not be possible for boats to come alongside and discharge their passengers through the port holes without the police knowing of it if their boat happened to be there. Mr. Neustein came to me in September 1886; he talked to me about the prosecution I had instituted against the *Sir John Lawrence* for starting before daylight in December 1885. Mr. Neustein said to me that he was now prepared to give evidence against the steamer in any future prosecution which I might take in hand. That on the previous occasion he had given evidence on behalf of the steamer, and that he had sworn that it was daylight, and that he could see for miles: he was now prepared to assist the prosecution. I thereupon said how about the log, because in 1885 Neustein had produced the log as written by himself. To this Neustein said that he would make the log all right. His own words were, as far as I can remember—"I will suit the log to the prosecution." I said to Neustein you better clear out of this. You will be getting yourself into trouble. This interview took place about a month before I went on leave, which I did about 3rd October or the 4th October. Neustein came to me in the Police Office. It was some time in the afternoon I warned the Inspector, Mr. Driscoll, at the same time.

G. A. ROBERTSON.

Shahadeh Tewarry solemn affirmation, saith to Mr. Kilby. I am Corporal, Second Division River Police; my pay is Rs 12 a month. I remember the last time the *Sir John Lawrence* went out to sea. I was on duty on that day to count the passengers who boarded that vessel; for the passengers there was only one ladder, there was another ladder on the other side down for the captain's use. I went alongside in my police boat on the starboard side, close to the passenger ladder. I could not see the ladder on the port side; no boat went near the port side ladder, I can swear to this. I went alongside at 6-30 p.m. I stayed till the next morning at 5-10 a.m. I stayed there all the time. I was awake on watch counting passengers all the time. After 3 a.m., no passengers came on board. I cannot say whether there were any first class passengers or not. On the day when the passengers go on board the port ladder is drawn up, so all the passengers go on board by the starboard ladder. Before my boat came alongside there were no passengers on the ship. I went on board when I first arrived and walked around the ship to see whether there were any passengers on board. I went all over the deck. The *Sir John Lawrence* did not begin to take passengers in till half-past 8. I am quite sure no passengers went on board before half-past 8 p.m. It got dark after 7. I did not see any passengers on board before half-past 8. A big country-boat was used as a landing stage; one dinghy comes up at a time; there were a number of dinghies around. I counted the passengers myself throughout the time. I stood in the log boat all the time and counted the passengers. The *Sir John Lawrence* was allowed to carry 730 passengers. By 3 a.m. the complement was reached. Eight or ten dinghy loads of passengers went back to shore; they had been refused admission by me. They went away saying they had got tickets. They were making a noise, but I prevented them going on board the steamer. I told the seacunny when the complement was full, and the Captain ordered the ladder to be lifted up. No boatmen turned away before 3 a.m. It is not true that a boat load of 20 passengers were refused permission to disembark on board the *Sir John Lawrence* by some *sahib* at 9 p.m. It is not true that the *sahib* said at 9 p.m. It is so full that I won't let you come aboard. I did not go on board again before the steamer started. Occasionally a boat brings more passengers from the shore than she is entitled to carry, but this does not happen often. The boatmen would be arrested. When a boat licensed to carry 10 passengers comes alongside, I make a single down stroke; if any boat comes alongside containing more than 10 passengers, I make the down stroke to represent the 10, and then the number in excess to the side of the down stroke; if six passengers come in a boat I write down the six in numbers. There is no accurate account kept of the passengers coming from Chandbally. We approximate the number of passengers who arrive from the boats used. We ask the boatmen how many passengers they have on board. All the passengers come down the ladder; they also come

down any other way. They are in a great hurry to get ashore. Boats are not allowed to go near the steamer till she is fast to her moorings. I am off duty the whole of the next day. When the passenger dies out of port limits the body is thrown overboard, if within port limits it is landed and made over to the police by the Captain. Now and again a small boat brings off passengers from other ghâts, but the bulk of the passengers come on board from Koilah Ghât.

Cross-examination by Mr. Orr.—Before half-past 6 on the last occasion I saw passengers in large numbers collected at Koilah Ghât. I know the *panickalla* of the *Sir John Lawrence*. I did not see him on that day at the ghât. I have seen the *panickalla* of the *Sir John Lawrence* keeping the passengers together on the ghât. We invariably ask the officers on the ship how many passengers they brought two or three hours after the ship comes in. We do this with the double object of comparing the information with our own attempt to count, and to find out how many passengers really came in the steamer.

बहारी लाल पाय,

BEHARY LALL PAUL,

Interpreter.

Bhobun Kishen Ghose solemn affirmation sworn to Mr. Kilby.—I took thirty-three tickets for passengers in the *Sir John Lawrence* for her last voyage. Ten first class and 23 servant tickets. I went to the *Sir John Lawrence* with four women first class passengers, and one native woman servant. I went on board; it was light enough for the Captain to read my tickets. We went from Koilah Ghât, and the Captain lowered the ladder for us on the port side of the steamer and we eventually, 45 of us went up by that ladder. That was my party. They were distributed in various boats; thirty-four went on the steamer, and eleven returned to shore. I did not notice any police boat on the starboard side of the steamer. The port ladder was lowered for us by special arrangement I had made with the Captain on the Tuesday previous. We went to the port side to avoid the rush. We went on the spar deck and then to our reserved cabin in the saloon; we left the women there; I remained on board till gun fire, nine o'clock. I left at gun fire. During the time I was on board I saw many passengers. I was standing on the poop deck. I went forward also into the third class passengers compartment. I saw passengers on the top deck and the lower (main) deck; the passengers were seated so close together there was no room for another person to get between. their bodies were touching, their shoulders rubbing, the passengers were huddled together in no order. I could not get past them, though I tried to do so. I have been describing the state of the passengers in the upper deck. I looked down on to the main, it was as far as I could, quite as densely packed with passenger as was the upper deck. I did not, however, go to see. The Captain was trying to make more room on the upper deck by compelling some of the passengers to go on the main deck. The passengers were unwilling to go, he seized some by the hand and pushed them; the majority of the passengers were, women—three women to two men. I saw no children. The Sobha Bazar Rajas are my relations. When I came away there was a crowd of dinghies still round the starboard ladder. I left by the same ladder I came up. Eleven of us returned in the same boat.

BHOBBUN KISHEN GHOSE.

Lawless Mathieson sworn, sworn to Mr. Kilby.—I am Assistant Harbour Master. I took the *Sir John Lawrence* out of dock in October 1886. I recollect her windlass, the whelp of the starboard side of gipsy of the windlass was jammed and would not work. I wanted to use windlass on the starboard side when moving the vessel; I found I could not do so. It is not usual to have length of the chain cable arranged on deck when the ship has a windlass of the kind possessed by the *Sir John Lawrence*. I cannot tell for certain whether there was room to so arrange the cable before the windlass.

To Captain de Smidt.—I moored the vessel with two hawser chains and two stern chains. I had 25 fathoms on my port chain, and 7 to 10 on the starboard chain. After 30 fathoms and 15 fathoms. I noticed no defect in the cable, none of the links with studs. The cable seemed in good working order not worn out the starboard side of the windlass was workable sufficiently to heave the starboard chain tight. I was doubtful about the starboard side of the windlass, because Mr. Neustein told me not to let go the starboard anchor, because the windlass was jammed on that side. I did not see anything the matter with the bowsprit, the chain was taken out of the port side locker only. I took no chain out of the starboard locker, because I could not heave it up out of the locker by the gipsy. I did not consider that windlass in a fit state for a vessel going to sea.

Cross-examination to Mr. Orr.—I do not know whether the vessel had been surveyed. I do not recollect saying to anyone that for a ship which had been surveyed she was in a rascally condition. I do not recollect making that remark to Mr. Neustein.

LAWLESS MATHIESON.

The 1st August 1887. Bunko Behary Bose on solemn affirmation saith to Mr. Kirby.—I went on board the *Sir John Lawrence* before she started on her last voyage with my brother's eldest daughter, the eldest Ranees of the late Rajah Opuho Krishna Bahadur of Sobha Bazar and some other neighbours, one man servant and three maid servants. My three nephews accompanied me also, but they and one servant returned to shore with me. We went on board about candle light; the steamer was lighted with lamps when I went into the saloon. About 7 p.m. went up the ladder on the port side. The passengers, except the servants and some of the neighbours had first class tickets. At first I tried to get on board by the starboard ladder. I found this impossible through the great crowd of boats and people. I then ordered my boatmen, we had two boats, to go to the port side of the vessel. There was boats placed as a landing stage on the port side. I did not see whether there was a boat placed as a landing stage by the starboard side ladder. I noticed no police boat with policemen in uniform among this crowd of boats. No one tried to prevent us getting on board by the port ladder; I saw no one else except our party go up the port ladder; we came down by the same ladder. I kept on the saloon. I went up above the saloon where the servants were. I could see that the spar deck was full of people. They were packed close to each other, there was no room to move about among them. As I came back to shore the gun fired and it was nine o'clock. We started from Koilia Ghât and returned to the same ghât. I did not see a police boat near the steamer at any time.

Cross-examination to Mr. Henderson.—On the previous day, I arrived with a letter from Mr. Orr, went on board the steamer and I saw the Captain, and it was then arranged that I should bring my party to the steamer on the Tuesday, and that they should go on board by the port ladder. I saw more than 20 boats on the starboard side. I can swear I saw no policemen in uniform.

BUNKO BEHARY BOSE.

Ashutosh Chatterjee on solemn affirmation saith to Mr. Kirby.—I went on board the *Sir John Lawrence* the night before she went on her last voyage; it was a Tuesday, I think, the 21st of June. We started a party of five boats to get on board at half-past 5 p.m. We went alongside the starboard side. We were not allowed to go on board. We were told to go back to the shore and come again when we were called. We went back, our boat remained alongside; my father was in that boat. It was night when the steamer whistled. Most probably 8 p.m., hearing the whistle, the four boats went again towards the steamer. The fifth boat passengers had not gone on board. We all went on board by the starboard side ladder. One party consisted of between 40 and 50 persons, men and women, of these about 30 were intending passengers, four men and the rest women. We tried to get first class tickets, but failing to do had to take deck passages. Our party were on the upper deck grouped round the foremast. I left after gun fire. There were some people on board, not very many, when we went on board. When I left at gun fire the deck was awfully crowded, it was so crowded that each person was struggling for his own place. Those who came on board first were sitting, the later ones were standing. I saw no one lying down. There was no room, so far as I could see, for persons to lie down, the persons sitting were side by side, their bodies touching. This was the state of things from the ladder to the fore mast on the upper deck. I heard frequent cries of distress, all the females were crying. I peeped down into the lower deck and saw that it was full of passengers also; they were less crowded than the people on the upper deck. I can form no idea of the number of passengers on board. The passengers were very cruelly treated by the Captain and lascars. They caught the women by the hand and pushed them along the deck. Some of the women fell during the pushing (this last answer in reply to a question by the Court) I saw no policemen in uniform in or near the ship, either going or coming. I cannot recollect whether the passengers were counted. The Captain was standing in the boat with a whip, it may have been a stick; if anybody tried to come down from the steamer he beat them with the stick. The Captain was standing on a large country-boat; my uncle told me it was the Captain, he was a stout officer.

To the President.—We took up while we were there the space wanted for 40 or 50 passengers, besides the men who accompanied me back to the shore. I did not see any person come away. None of us were stopped from going on board, because we were not going to travel on the steamer; there were only two or three boats left round the vessel when I came away.

Cross-examination to Mr. Henderson.—Only eleven of our party came ashore. More than 20 or 30 of our party went on the steamer. They had tickets. My uncle had the tickets, Jogendro Nath Chatterjee. I do not know how many tickets he had. My uncle in reply to the Captain said I have tickets, he mentioned no number. My uncle held them up in his hand; I was nearly two hours on board. There were lots of dinghies about when I went on board; when I left I only saw three or four dinghies. I did not go to the other side of the ship. I did not see anybody standing alongside the stout captain, he was stout. I was not hurried when I went on board; as cool as I am now. The cries of distress I heard were *Bupre bachen o go; Morria geylam go; Dada colhai gello*. I heard these cries on board the steamer. I did not hear these cries before the passengers got on the steamer. I saw no women fall; I heard that they fell. I did not say that the Captain was counting the passengers.

ASHUTOSH CHATTERJEE.

*Robert Bushby, sworn witness to Mr. Kirby:—*I call myself Engineer-Surveyor to the Port Commissioners. I passed my examination as a Surveyor of steam-ships, to the Board of Trade. I was appointed in 1874 Shipwright and Engineer-Surveyor to the Board of Trade, and I practiced as a Surveyor under the Board of Trade till April 1883 in London, Hull, and the last six years in Liverpool. The Board nominated me as Engineer-Surveyor to the Port Commissioners, I am paid by salary. I get Rs. 1,000 less income-tax. My duties are to inspect steam-ships under Act, VI and VII of 1884, that is, all sea-going and inland steam-vessels which come to the Port of Calcutta. All coolie emigrant ships, under Act XXI of 1883, all ships and steamers applying for register under the Merchant Shipping Act, any ship reported to be unseaworthy within the Merchant Shipping Act of 1880, and any other duty the Commissioners may order me to do. The fees for the performance of these various duties are paid to the Port Commissioners; they amount about Rs. 20,000. I have an assistant, Mr. John McKellar, he is my subordinate, and has to obey my official orders. No one supervises my work. I am responsible to the Government through the Port Commissioners, my immediate superiors. My duties in surveying a ship are to survey hull, the machinery and equipment of both iron and wooden ships. When in England I passed an examination which included such subjects as rigging and gear. If an owner intends building or repairing a ship which he intends to use hereafter as a passenger ship he generally calls upon me to survey the ship before it is launched. Sometimes I am asked to visit the vessel before the building is complete; this is done to save expense in alteration later which I might call for were I not satisfied with the way the ship was built. My interference is limited to seeing that the ship is built strong. I have nothing to do with her shape. It is left entirely to my discretion to decide whether a ship is strong enough to be a passenger ship. The owner can appeal if my requirements are in his opinion too stringent. If it happens that my requirements should not be stringent enough there is no one to call my action into question at all. I have known the *Sir John Lawrence*, I think, since 1884. I came out here in 1882. I first came out under the impression that I should be a surveyor of steamships, the same sort of duties I had been doing in Liverpool, which was confined entirely to passenger steamers, including hull and engines. In the beginning of 1883 I got the survey of emigrant ships added to my duties. I knew the *Sir John Lawrence* before she was repaired when she was lying up in the river here. I was consulted whether she should be repaired or not. I was asked to report on the condition of the vessel by the Port Commissioners. I made a report, and the report went through the Port Commissioners. I think Mr. John Mackinnon consulted me what amount it would take to repair the *Sir John Lawrence*. I did not know whom the ship belonged to at that time, I was not told. I had no conversation with Mr. Mackinnon before the official application as to what was required to be done in regard to the repairs to obtain a certificate. I sent in a written report, it must be filed in the Port Commissioners' office. I cannot tell from memory when the *Sir John Lawrence* was built, she was then about 18 or 19 years old; she was built in 1865. The *Sir Lawrence* was an extra strong ship as originally built; her scantling are above the requirements of Lloyd's A. 100 class, her keel and garboard strake were exceptionally strong and her plating was quite $\frac{1}{4}$ th heavier and the sheer strake was $\frac{1}{4}$ th heavier than ships of her dimensions and tonnage would be built in the present time. Her iron was of ten per cent. better quality than they make iron now for ship plates. The requirements of a ship classed 90 A.1. Lloyds for the garboard strake would be F16 the thickness of the garboard strake of the *Sir John Lawrence* was $\frac{1}{4}$ th. The sheer strake in a ship classed 90 A.1. at Lloyd's should be $\frac{1}{8}$ th; on the *Sir John Lawrence* the sheer strake was originally $\frac{1}{4}$ th or $\frac{1}{2}$ th. The bilge strake on a ship classed 90 A.1. at Lloyd's should be $\frac{1}{8}$ th. The bilge strake of the *Sir John Lawrence* was $\frac{1}{4}$ th. The side plating in a ship classed 90 A.1. Lloyd's would be $\frac{1}{8}$ th, and the same thickness at the flat at the bottom. For the *Sir John Lawrence* they were $\frac{1}{4}$ th respectively. I say this from having bored her in those parts.

ROBERT BUSHBY.

Case adjourned till to-morrow, half-past 12.

C. H. REILY.

*The 2nd August 1887. Examination of Robert Bushby continued to Mr. Kirby:—*These are the plates on the hull proper below the main deck. When I surveyed the *Sir John Lawrence* in 1884, she was then in dry dock and the hull stripped entirely, the boilers taken out, the decks taken up, also the ceiling in the hold. The cement was all taken out of the boiler compartment, all the frames and floors in that compartment were taken out; the engines were not taken out, they were stripped and overhauled generally. The frames and plates were completely exposed. I examined each frame and chalked those which had to be taken out. In doing this I was guided by Lloyd's rules for A.100 class of vessel. Those of the plates which were below the thickness required by Lloyd's rules were doubled in each case, quarter inch plates were rivetted on to the old plates and on to the frames. In the boiler compartment the plates which are mostly liable to deterioration, the frames were taken out altogether, wherever a plate gave indication of having been worn it was bored at the thinnest spot. When the frames were removed, I could tell what the original thickness of the plate must have been. I bored the various plates. I should think I made quite a hundred holes in various places. I cannot say what was the thickness of the plates I bored into. I kept no note of the thickness of each plate, but as I went along I indicated with a chalk what had to be done in respect of each plate. If the chalk mark happened to be rubbed out I would have discovered it in a day or two I would then have been more strict

The 3rd August 1887. Examination of Robert Duffby continued to Mr. Kilby.—The certificate of that survey bears date the 25th October 1886; that is Mr. McKellar's signature; my signature does not appear on this document (G), though, as a matter of fact, I surveyed the bottom and outside of the steamer. The fact that the certificate bears date the 25th October, shows that the survey of her hull, machinery, and equipments were complete, except that after the granting of the certificate the surveyor sees the ship under steam, this is done to save the useless getting up of steam, simply for the purpose of testing the valves when steam would have to be got up later on, in order to test the steamer, get out of port. Mr. McKellar surveyed the hull and equipments on the two occasions I have spoken of. He is quite competent to discharge this duty. After the 25th October 1886 there was no further survey of the deck and equipments held forming part of that survey. Mr. McKellar received a letter from Mr. Neustein and handed it over to me as soon as he got it; this was in the early part of November, it may have been in December. I was out of town for a few days some time after the letter was given to me. As soon as an opportunity offered itself, I went on board. I took with me a memorandum of the points raised in that letter. I made the memorandum myself. I made a careful inspection of all the points raised by Mr. Neustein including the patch in the forecassle, the upper forecassle above the main deck. I went into the forepeak and into the hold. I examined the forepeak; I had a careful look round with a light. I had none of the plates bored. I did not think this necessary. I saw no reason to have this done I saw no material change from my previous survey. I had not been down the forepeak the last time the steamer was in dock. I had not seen the plates in the forepeak since October 1885. It is quite dark in the forepeak. I do not remember whether there was any water in the forepeak, there might have been. I do not remember having it pumped out. In October 1886 when I surveyed the forepeak I did it with an ordinary hand light or a "stick butt", or native torch. Between October 1885 and November 1886, I must have surveyed over a 100 hulls. If there has been previously anything wrong with the forepeak I should have remembered it. I saw the patch in the forecassle from the inside in 1885. The thickness of the plate on to which the patch was rivetted was about a quarter of an inch thick, the plate was painted in the inside I think. I did not measure the patch. I merely looked at it. I ordered the patch to be bolted on first and then ordered the patches to be rivetted on. Afterwards I did not measure the thickness of the plate. I went through the various points of Mr. Neustein's letter and found none of them correct, except as regards two store houses which had been built on the passengers space; even in this case the encroachment of space was less than that stated by Mr. Neustein. I reported the result of my examination to the Port Commissioners, in writing. There is the signature of Mr. Duff Bruce on this letter put in and marked (H) dated 8th December 1886. This letter, put in and marked (J), bears also Mr. Duff Bruce's signature.

Mr. Kilby at this stage asks to interpose the evidence of John Moore, the Master of the *Curlew*, on the ground that his steamer is about to leave Port.

Mr. Handerson, for the owners of the *Sir John Lawrence*, consents.

Application granted.

ROBERT DUFFBY

John Moore, sworn, saith to Mr. Kilby.—I am master of the steamer *Curlew*, and was such master on the 25th of May last. I left Calcutta about 5 in the morning. I first saw the storm signals at Mud Point. I was about 5 miles to 4½ miles off, when I saw the signals. I had to turn the vessel round to see them. The weather at the time was very dirty. I saw the signals in the distance at half-past 10, but did not distinguish them. I turned my vessel round about 11 a.m., then I waited till the rain passed over, then I saw the signal—an inverted cone over a ball. I believe it was No. 8. The weather looked as if the wind was going to increase, heavy rain, Mud Point bore from my steamer S.E. or S.S.E. I was in the Bellary Channel at that time leading into the Western Channel. The Bellary Channel was, where we were, about 500 yards wide. This is the channel Chandbally ships usually go by. The *Sir John Lawrence* was about an hour to an hour and a half behind us. I went on to Kedgerree, and anchored there just abreast of the Kedgerree tidal gates. I anchored about 12 o'clock noon. There was more wind than there had been at 11 o'clock, but up to that time it hung to one quarter. At eleven the wind was N.E., at twelve N.E.; it was blowing strong, not a gale. It had appearance of increasing; but with the wind from the N.E., we had great shelter here. A strong N.E. is indicative of a cyclone in May—a cyclone passing somewhere. My barometer at 11-30 was 29.59". I anchored at 11-45. The *Tyrone* was anchored about three cables to the eastward of me. The Captain of the *Tyrone* talked first by signals, afterwards by black board. All the way to Mud Point we were discussing the weather. Captain Spence said "I think I am going back to Diamond Harbour." I replied "Any when; I am ready." We eventually decided to go on to Kedgerree. I would never go to sea when there is a wind from the N.E. and a low barometer. After I anchored, the *Sir John Lawrence* came up an hour after, or an hour and a half. If anything, there was a little more wind: that was the only difference. When the sun began to set, the glass began to fall. At 6 p.m. the glass was 29.45: it was blowing pretty hard. The barometer fell very gradually. All through the afternoon the weather was very thick. If it had been clear, I should have gone back. After 12 noon the weather became thicker. It was thick all day. At 5 p.m. I would have gone back to Diamond

Harbour if I could have found my way. At 5 p.m. there was every indication of a cyclone. The *Sir John Lawrence* passed us about a mile and a half off. I could not make out her passengers. The steamer was under sail, fore and aft canvas. At 10 p.m. wind blowing very hard, veering towards the East; barometer 29.38; it was falling faster. At midnight wind E. by N., blowing very hard with heavy rain in gusts; barometer 29.30. About 2.45 a.m. the barometer reached its lowest point, 29.23. We had a lull for half an hour with very heavy confused sea. We were pretty well in the heart of the cyclone at that time. At 2.30 a.m. the wind veered round to the S.E. and blew in terrific gusts S.E. and S.S.E., and continued to do so for two and a half hours. My idea is the *Sir John Lawrence* encountered the worst of the storm between the Ridge ship and False Point. I saw no wreckage I could recognise as belonging to the *Sir John Lawrence*. Towards daylight on Thursday morning the 26th the storm began to abate. At noon on Thursday the barometer had risen 29.35, less wind and sea. At 6 p.m. barometer 29.40. Wind still backing to the southward. Friday morning at daylight I went on to Chandbally. It was not very comfortable for my passengers. At one time we had them all below deck. The hatches were not on. We carried 550 on that occasion—our full complement. I went down; then it was pretty warm. There was, however, plenty of ventilation. I know the *Sir John Lawrence*. I imagine most of the passengers must have tried to go below. The awnings must have blown away. I do not think the *Sir John Lawrence* would have shipped heavy seas. She was very light in the water and very buoyant. Any vessel would ship heavy water in a cyclone. All I mean to say is that the *Sir John Lawrence* would not have shipped more water than the best ship in port. In front of the open bulwarks of the main deck, the main deck was protected by sides. There was an ash port on each side fore and aft. It was clear with alley under the deck. The passengers if they crowded there would, in my opinion, be perfectly safe. The hatches of the 'tween deck correspond with the hatches on the main deck, so that there was a continuous open space from the 'tween decks to the upper decks. I do not think it would have been necessary to batten down the hatches. As a sea-boat, the old *Sir John Lawrence* was as good as any boat which came to Calcutta. She was from 450 to 500 tons. I think her 90 horse-power would be enough to enable her to keep her own if everything was in good order. I know nothing of her equipment.

To Captain deSmidt—I did not hail or signalize to the *Sir John Lawrence*. I do not imagine the old man saw the signals. I had to turn round to see them myself. Independently of the signals I would not have gone out. Captain Irvine saw us right enough. That ought to have caused him to stay, if there was nothing else to press him on. At the time the *Sir John Lawrence* was passing us the state of the weather and my barometer told me my place was at anchor where I was. If he had stayed and some other vessel had made the passage, he would not have been Master of that ship very long. I do not mean to say that I have any special reason for saying this, but there are owners who insist on their orders being obeyed. Thank God I do not serve such. I say that eight out of ten masters of ships would have hesitated before attempting to go out to sea in such weather. There is not a ship in port which would have gone out if they had known, what I know, that they had no port to go to. I think it was a very risky thing to do as Captain Irvine did. I have been in a cyclone in 1879 and a hurricane off the Cape in 1864. I have never heard if the *Sir John Lawrence* shipped heavy water. There are as bad seas in the Eastern Channel as any I know of. I have been 33 years at sea. I have known seas breaking over the bridge of big loaded vessels which were driven through in the Eastern Channel.

To the President.—I have never seen Captain Irvine that he was not able to walk and talk with any man on the point of duty. I think he was a humane man, kind to his passengers if it had not been so, he would not have had so many passengers go with him. She was a popular vessel with the natives. I think the passengers on board the *Sir John Lawrence* must have suffered from being kept in a confined space. As to being knocked about, they pack themselves too close for that. No man with any sense would have of his own free will gone to sea. Neustein did the talk, Irvine did the work. Neustein is no sailor in comparison to Irvine. Smith, the Chief Officer, was a tear-away old fellow. He certainly would, in my opinion, have urged the Captain to go on. Smith has been a master on the same line, Smith used to do things which no one else would do. Irvine has never complained to me that his owners were hard task-masters. The only advantage that the *Sir John Lawrence* would have obtained would have been the increased number of passengers he would have secured according to her tonnage. So far as I know, I never knew Captain Irvine carry passengers in excess of the number on his own account. The panniwallas may have smuggled, but I have no reason to say so. Captain Irvine was too honest a man to have smuggled passengers himself. They are very particular in counting passengers at Chandbally. It is done over a landing-stage, one man at a time. There is no rush. I never was handed up for having excess passengers. I don't see how it would be possible for a Captain to land a portion of the passengers before he got to Chandbally without being found out. After the passengers are out the police come on board and search the hold over to see whether there are any passengers left on board. Before we take in passengers at Chandbally the police search the steamers, and then count the passengers as they come on board. In Calcutta the police come on board every ship and count the passengers. Over and over again I have had to turn out excess passengers found on board by the police, just before starting at daybreak.

Chundra Coomar Bhattacharjee, solemnly affirmed, said to Mr. Kilby.—I went alongside the *Sir John Lawrence* in a dinghy about 8 or 8-30 of the evening previous to her starting on her last voyage. I reached the ghât about 8 or 8-30. It took me some time to engage a boat. When I got alongside it was 9 or 9-30. I heard the gun fire when I was in the dinghy on my way to the vessel. I intended to go with my family and some of my neighbours to Chandbally in that steamer. There were altogether two boats which carried my party of twenty people. I saw a European and two or three khalassies standing on the side of the vessel; passengers from a boat were getting on to the steamer. The European said to me you cannot now come on board. I spoke to the European in Hindustani. I said I will be very much disappointed if I am not allowed to go on board the vessel. I begged of him to be good enough to take me on board. He said there is already a large number. I cannot take you on board. I kept on begging the European. I coaxed him to take me. He at last said if you do not listen to me I will give you a good caning. I then said what is to become of these tickets of mine. I hold both kinds of tickets: those for Rs. 3-0-6 and Rs. 5-0-6. He said you will get back your money; then the khalassies pushed my boat from the side of the vessel. I felt sadly disappointed and came back to the ghât. We slept that night in a sort of a godown near the Koila ghât, the ladies refusing to return to their homes as they had started on a pilgrimage. About 6 o'clock the other two steamers for Chandbally left. The *Sir John Lawrence* left the last of the three steamers. I got the money back on those tickets. My friends have got the money for me. I caught a Midnapore steamer that same day and went to Juggernath and Midnapore. I did not notice any police boat when I went alongside the *Sir John Lawrence*; there were none near me. I saw no police in uniform. The two sorts of tickets were for the same class of accommodation—deck accommodation. On Monday the price of tickets was Rs. 3-0-6, on Tuesday I had to pay Rs. 5-0-6. After that the tickets sold for Rs. 6. Many people who bought tickets for Rs. 6 could not go by that steamer. I met these at Juggernath.

Cross-examination to Mr. Henderson.—I bought the tickets at Messrs. Macneill and Company's office. I saw about eight empty boats; only one boat with passengers on board. That is the boat out of which passengers were getting into the steamer. I saw none of these boats return with passengers. I know the uniform of the police on the river: they wear ash-coloured or black uniform. I have seen them. The European looked like a Mr. Brown employed in Thacker, Spink and Company. The police boat is manned with nine oars and has more brass about it. I did not see any brass-mounted boats.

Court adjourned till to-morrow, half-past 12.

C. H. REILY.

The 4th August 1887. Examination of John Moore continued to the President.—We landed our passengers by dinghy on arrival in Calcutta. We try to keep off the dinghies as much as we can before we get to our moorings, but they occasionally get alongside in spite of us, and some of the passengers scramble on to the dinghies before we are moored. The bulk of them remains on board till the steamer is properly moored. I have never seen the police count the passengers who arrive from Chandbally.

Cross-examination to Mr. Henderson.—If there were a good few on board some of the passengers only a few got off into the dinghys before we are moored. Except in poojah season, we seldom get our full complement. I have known Captain Irvine for the past seven years. I knew him intimately during that time. I have a full belief in his integrity and honesty. I believe that Captain Irvine would never have taken extra passengers on board for the purpose of filling his own pockets. The panniwalla in connection with the crew might carry an extra man or two as passenger, but not to any great extent. It would be impossible to smuggle passengers on shore before coming to the counting stage at Chandbally without the Captain knowing of it. I cannot believe that Captain Irvine could ever have connived at any such system. I never saw boats putting off with passengers from the *Sir John Lawrence* when she arrived at Chandbally. I do not believe it possible for passengers to have been kept back until after the visit of the police at Chandbally. The police always searched my vessel for passengers, and, so far as I know, they did the same at Chandbally with the *Sir John Lawrence*. I have often seen the police count my passengers in Calcutta. I go on board about 9 p.m. The police boat always was alongside. I have no reason to suppose that the system of counting passengers in Calcutta by the police was any different on board the *Sir John Lawrence* than it was on my steamer. The night previous to the cyclone the police were alongside my steamer. Some of the police were on the landing stage. They reported no excess to me in Calcutta. The numbers counted out at Chandbally

were not in excess of the number I was permitted to carry. I made no signal when the *Sir John Lawrence* passed me. The *Sir John Lawrence* might have anchored in perfect safety about four miles lower down, this spot would not be in the direction of, but about 16 miles from, the South Channel buoy. I heard that the chest of Captain was picked up at Saugor. I do not think it possible that she pulled up at the place—I mean she went right out to sea. She must have been right out to sea between 5 and 6 p.m. It is quite likely that he did not see the signals. The *Sir John Lawrence* unfortunately was not going to sea; it would probably have been all right with her if she had. I never saw the *Sir John Lawrence* carry her canvas when she ought to have stowed it. I have never heard it rumoured that she was a hot ship. It is very probable that the passengers would have gone between deck during the cyclone, if the vessel had anchored at Kadjera. They would have plenty of room if the passengers had not overcrushed themselves. So far as I know there would be sufficient ventilation. I was never there myself. If the hatches were open on the main deck, there would be enough ventilation. My full complement is about 550 passengers. That complement is calculated on the same basis as the complement of passengers permitted in other vessels on the same line. Having my full complement of passengers would not obstruct in any way whatever the working of the vessel in fair weather or foul. I have had my full complement of passengers often. They have never interfered with the working of my vessel. After we have started and the passengers and their bundles got arranged a bit, I never found any difficulty in moving about my ship, neither I nor my officers. I have seen the *Sir John Lawrence* in very heavy seas in the Eastern Channel. She was a very good sea-boat. I never saw anything that was wrong with the equipment of the *Sir John Lawrence*. I never examined any of her gear. I have never had anything to do with the owners of the *Sir John Lawrence* in business. I had no reason to suppose that Captain Irvine had orders to go to sea irrespective of the weather. Native passengers huddle together, because it is their nature to do so. The space allowed by Government rule is in my opinion sufficient. The proof of this is shown in this particular instance. All my full complement of passengers on the day of the cyclone went into the between decks, which contain only a little over one-third of the space allowed by the rules to the whole number. They were there the whole of one afternoon, the whole night, and part of the next day, and I never heard any complaint. I have frequently seen the passengers squeeze into a much smaller space than allowed them by the rules, and they have done so of their own accord. I have known Smith for some years. My ship is surveyed periodically every six months—sometimes by Mr. Bushby, sometimes by Mr. John Mackellar, his assistant, sometimes by both. I have always found them pretty strict. They always wanted something new, something fresh. Mr. Bushby always surveyed the deck. When Mackellar did the survey alone, Mr. Bushby was either at home or away from Calcutta. I always went round with Mr. Bushby during the surveys. So far as it was possible afloat Mr. Bushby visited all parts of the ship. He examined the plates and frames. Twice we have had the ceiling up. We had 417 new plates put out my ship last year. This was in consequence of Mr. Bushby and Mr. Mackellar's survey. Every old plate was removed from the bottom of the vessel. All new frames were required. A good many of the plates were not very bad. Two years prior we had the ship bored. Mr. Bushby was the surveyor on that occasion. Both surveyors are very particular with our vessel. If the *Sir John Lawrence* were surveyed in the same way as our steamer, she must have been a sound ship. I think a survey certificate signed either by Mr. Bushby or Mr. Mackellar is a perfectly good guarantee. The survey is equally strict throughout the ship and more survey than it is at home. The dock survey takes place every twelve months. Every dock survey the vessel is scraped and cleaned outside ready for inspection. I do not think Mr. Bushby passed a plate so rusty that you could peel off the rust with your fingers. He would have it scraped and sounded. I have noticed the patch on the *Sir John Lawrence*; if it was properly secured, it would not lessen the strength of the ship. Captain Irvine is as good a seaman as they make now-a-days. We anchor at the Kauska buoy some time during the night, reaching Chandbally the next morning. After he gets out to sea after leaving Chandbally, if he had a trustworthy officer on board, he could get three hours' sleep. If he got away early enough, say by 8 a.m., he would anchor at Saugor at 10 p.m., and so get a comfortable sleep. Passengers and their friends get on to the ship together. I never heard an objection being made by persons coming on board to see their friends off. I have not observed any considerable number of persons come on board to see friends off.

Re-examination to Mr. Kilby.—Tickets are looked at as the passengers come on board. When there is a rush of passengers, my seacunny has no orders to object to friends of passengers coming on board. The police do not examine the tickets of the passengers. Whenever there is a large number on board, the police in Calcutta always count the passengers after they are seated on the deck. This is done between 3 and 4 o'clock just prior to our leaving. Unless the 1,038 passengers on board the *Sir John Lawrence* all crowded on to the upper deck, they would not interfere with the working of the ship.

To the President.—I and my Chief Officer are the only seaman officers on board. My Chief Officer does not hold a pilot's certificate. Mr. Smith held a pilot's certificate.

J. MOORE.

Robert Bushby. Examination continued to Mr. Kilby.—Except the enquiry I made, and that made by Mr. McKellar, there was no other enquiry into the charges made by Mr. Neustein.

The space on the main deck reserved for passengers is 2,863 superficial feet, that is, after all deductions having been made, the space between the two open bulwarks for passengers was about 640 feet. Passengers could stay in the alleys during the cyclone, in any weather, except in an overwhelming sea, which should sink the ship. I remember the two 400 gallon tanks; filled, each tank might weigh a ton and 3 quarters. The main deck was a safe place for tanks of that sort. These tanks were lashed to ringholds, from memory I cannot say. I looked at the tanks after receiving Neustein's letter. If they had not been properly secured I should have noticed it. I noticed nothing wrong. I saw the *Sir John Lawrence* on the same morning of the collision with the *Indore*. A collision of that kind would not strain a steamer of the build of the *Sir John Lawrence*. I never ask the officers of the ship if there is anything wrong on board, unless there be some special reason for it. In cases where, like the charges made by Mr. Neustein, I should think it necessary to speak to the Mate and the Captain. I do not remember ever having done so before. I have known an officer volunteer information without being asked. Engineers often and officers often volunteer remarks if they want any special thing done. I have never known any of Macneill's officers speak to me about anything on board. I cannot remember any instance. It is possible they may have done so. The number of passengers to be carried between deck would not be altered by the spar deck being added to the steamer. In this case, adding the spar deck did not interfere with the ventilation of the vessel. This is the certificate of the last survey held on the *Sir John Lawrence*, dated 26th April 1887, put in and marked (K). An iron ship like the *Sir John Lawrence* should last 30 or 40 years with ordinary care. I think the *Sir John Lawrence* was kept up liberally. I produce a copy of letter from Macneill & Co asking for survey of *Sir John Lawrence*, dated 8th September 1882. I also produce copy of letter, dated 29th September 1882, from Secretary, Port Commissioners, to Messrs. Macneill & Co., embodying my reports put in and marked (L) and (M) respectively. There is no official rule binding me as to the scantling of passenger ships either here or in the United Kingdom. I kept no note of the alteration and addition I thought desirable on board the *Sir John Lawrence*. After the repairs are finished, I go round before the paint is put on. I should then see whether the repairs and alterations I had suggested had been carried out. I remember ordering a very large number of plates to be taken out of the curlew. I had to mark each of those plates with a piece of chalk to show they are to come out. The way it was done was to mark a whole line of plates if they had to come out with a line of chalk. I should be able to see at the final survey, before the paint was put on, whether any of the plates I had condemned had been taken out or not. The *Sir John Lawrence* was painted, but not chipped after the big repair in 1884. I say ships are not chipped more than once in four years. Without going the length of removing the frame, it is quite possible to tell whether the plate was sound where it joins the frame. I did test the delivery and suction hoses. I do that in every survey. I invariably ask the engineers in the engine-room, whether the Superintending Engineer be present or not generally whether there is anything wrong. I have never known an instance where the engineer has hesitated to point me out anything he thought defective. If there was anything wrong with the condenser, the engineer in charge ought to have told me. If the Superintending Engineer knew of any defect in the condenser, he ought to have called my attention to it. As a matter of fact, I did examine the condenser in my final survey in April 1887, and found that the repairs to the condenser were sufficient, and I did not find it necessary to order any further alteration. These documents produced are surveyor's certificates in which the A and B certificates under Act VIII of 1876 were issued to the *Sir John Lawrence*; put in and marked (N) to (N5) I never mustered the crew. I took the Master's word for the number. In the big repair of 1884, I ordered my shipwright assistant, Mr. Cowperthwaite, to take the number of equipment out of Lloyd's rules, and to go over and calliper every length of chain on board the *Sir John Lawrence* and test it up to the highest class at Lloyds. He did this. I did not survey the chain the last dry-dock survey. Mr. McKellar did the survey.

To Captain de Smidt.—I was never on board of the *Sir John Lawrence* before. I was called upon to survey her. I do not know whether she was in the market for sale at that time. I never heard of a Mr. Cranston, or that he had declared the *Sir John Lawrence* not to be worth repairing. The *Sir John Lawrence* had to go into dock before I could give my survey report on her. She was not in dock when I gave the report embodied in (M). I had some of the cement in the fore and aft hold taken out in places where I thought it necessary. I bored some of the bottom plates when the ship was in dock. There were more holes bored in the forepeak than anywhere else. The engine and its foundations were perfectly good. All the scuppers on the ship were renewed in the repair of 1884. On the outside they were flanged over on to the plate and screwed in. Iron lips over them were not necessary. They were all in good order. I paid special attention to them. In the big repair the pintles and gudgeons of the rudder were repaired. There was no condenser on board for making fresh water.

ROBERT BUSHEY.

Court adjourned till to-morrow.

C. H. BAILY.

ON THE 5TH AUGUST 1887 THE COURT RE-ASSEMBLED.

Robert Bushby. Examination continued to Mr. Treloar.—I have sometimes done as many as five surveys in a day, that is, a portion of such survey. That is very tedious and hard work in this climate. Sometimes there is pressure put on me to go through with the surveys. I do not, however, for this reason slur the work. It frequently occurs that owners wish the ship to be surveyed in a hurry. I take my own time, and, if necessary, detain the ship.

To the President.—The officer appointed to receive the declaration sent in under section 12 of Act VII of 1884 is the Vice-Chairman to the Port Commissioners. Under section 7 of the Native Passenger Ships Act of 1876, "the officer authorised in this behalf by the Local Government" is by appointment the Port Officer, Captain Stiffe. Captain Stiffe is the officer who, under the Act, has to grant certificates (A) and (B). As a matter of fact, the Port Officer does not himself cause a ship to be surveyed; he sends the notice on to me and I make the survey. These remarks only apply to certificate (A). The notice given under section 7 is always by letter; that letter is sent on to me and I make the survey. Captain Stiffe might send the notice to any surveyor; sending it to me does not involve payment, except in one or two exceptional cases. I make the survey or Mr. McKellar; we sometimes do it both together. The Port Officer has absolute discretion, except in cases which come under section 13, and which are otherwise provided for, to grant and withhold the issue of certificates (A) and (B). There is of course an appeal to the Local Government, provided for in section 16. The Port Officer is the official responsible for the issue of certificates (A) and (B). As regards certificate (A), the Port Officer invariably accepts my report as final. I only know one instance, which happened some years ago, that of the steamer *Commilla*, where I reduced the number of passengers to be carried, and Captain Stiffe called upon me for my reason for doing so. The point raised was one of principle, and I eventually followed the former practice. I had to give way. With this exception, Captain Stiffe has accepted my surveys without demur so far as certificate (A) is concerned. I know nothing of certificate (B). I do not know where the Port Officer gets the materials on which he issues certificate (B). So far as I know, there is no other survey held on behalf of the Port Officer except the one held by me. I never got any directions from Captain Stiffe, after the receipt of Mr. Naustein's report, to hold a survey of the *Sir John Lawrence*. He, however, sent the Port Commissioners the letter. I did have an interview with Captain Stiffe on the subject. Emigrant ships at home have to be surveyed by four surveyors, that is because they make long voyages and have to carry a large number of passengers.

Cross-examination by Mr. Henderson. All I have to do with the Act of 1876 is to furnish materials on which certificate is granted. I supply these materials under a survey which I have to make under another Act, excepting as regards the measurements, which have to be made under the Act of 1876. So far as I am aware, the Port Officer, during my period of service, has never, under section 14 of Act VIII of 1876, caused a ship to be surveyed at the expense of the master or owner while my certificate of survey was in force, and the issue of that (A) certificate in that survey. Mr. McKellar has power to make a survey, and is competent to do so in my absence; he has power to make a survey and grant a declaration on which a certificate is issued even when I am present in Calcutta. The Port Commissioners grant the certificate. The additional duties placed upon me did, before I got Mr. McKellar's assistance, very seriously interfere with my survey work. Since Mr. McKellar's appointment we have been quite competent and capable to carry on the work. I was not present when the plates were bored at the big repairs in 1884. I saw the plates after they were bored. I forget whether I gave the order for the borings; it is very probable I did. I made a thorough investigation of the whole of the hull. I have not the slightest reason to believe that the chalk marks I made were rubbed out; if they had been, I should have found it out, for I thoroughly inspected the vessel before she was painted. I ordered sundry plates to be doubled. I own that my orders were carried out. The surveys made in the thinnest parts of apparently defective plates was done under my directions. I cannot say whether I took out any plates. I found that about 200 plates were supplied to the ship, but whether they were used for the purpose of doubling plates, or in the place of old plates taken out, I cannot say. All plates which were left in her were sufficiently strong to meet the requirements of the law. I saw that every order I gave with regard to the plates was carried out. On my weekly visits I saw whether my orders were carried out; that was the object of my visits. The frames were eighteen inches apart in the *Sir John Lawrence*; that distance is closer than usual in a ship like the *Sir John Lawrence*. The frames would be 20 to 21 inches apart if built in the present day; the closer the frames the stronger the ship. I saw the hole before the patch was put on. I happened to be coming up the river shortly after collision took place. I looked at the hole from my steam-launch. I am certain the plate was strong enough for the place where it was placed. When next I saw the plate it had been rivetted on. The plate was not too thin to bear a patch; it was on the starboard side; it was 11 feet above water. I say this because I identified the part of the *Indors* which caused the damage, and that water measurement was 11 feet out of the water. It could never by any chance be less than eight feet from the water. It is absolutely impossible that the hole should be only four feet above the water when it was mended. It is not true that the hole was below the main deck; it was not in the forepeak; the edges had not been out. When I first saw the hole, it was not more than 15 to 18 inches by 12. I do not think the hole was two feet square after the edges had been out. It is impossible that at the time the patch was put on the frames were nearly eaten through with rust. It is

absolutely impossible that the plate could have been $\frac{1}{2}$ of an inch thick. It is impossible, when the ship is deep, that half the patch should be under water. It is not true that, as she pitched, the patch was almost entirely under water, whatever the draught was. It was not 8 feet below the main deck. The plate was painted. It is not true that the inside of the vessel was one mass of iron rust, and that the scales could be taken off by the fingers. From 1884 till she foundered it could not be said that the ship, as to her hull and scantling, was neglected. It was not possible for a ship which had been scaled and painted like the *Sir John Lawrence* to have got into the state of rust described. Ships I have surveyed have repeatedly been scraped and painted. The scraping and scaling and painting of the plates of the *Sir John Lawrence* were carried out in much the same way as in other ships. I have nothing to do with the painting. I have to see that the painting inside is done. I never noticed, during my surveys of the ship, that the vessel had been specially furnished up to pass such survey; the ship was thoroughly scaled; paint was not laid over rust. It is not true that the *Sir John Lawrence* received a coat of paint over the bad places in and out. During the 13 months previous to Neustein's discharge, it was not true that, if scaling had been attempted in the hold and forepeak, the chipping hammer would infallibly have gone through, nor would the hammer have gone through between the frames just before the bunkers. It is not true that the *Sir John Lawrence* was never scaled at all inside, but only scraped outside. I saw the windlass at the big repairs in 1884. I examined it at that time, it was in proper working order, both starboard and port side. On each of my surveys it came under my notice. I never observed any defects in the windlass, nor was any defect brought to my notice. I know, however, it was under repair in 1886. I examined the windlass after the repair of 1886, and it was then in perfect working order: the Captain and Mate were perfectly satisfied. They said it had got out of order through the carelessness of the previous Mate, Neustein. I examined the state of the windlass on my last survey in April 1887, and also on receipt of Neustein's letter. The repairs of the windlass were being proceeded with at the time he was dismissed. At the last survey I found that the windlass had not deteriorated: it was in thorough working order. In my opinion the windlass would have continued in such thorough order up to the time the ship was lost. I could never have passed the windlass of a survey if it had been useless, or even partially useless. I did not observe that the centre casting was broken. If the casting had been broken, it must have occurred in the interval of October 1886 and my previous survey. I can't remember the state of the starboard gipsys, but if they had worn into the wooden bitt which supported them, they would never have escaped my notice. If the whole body of the windlass had been forced over to starboard, I should have noticed that. Surveying the chain of the ship is part of my duty. I never observed that any of the studs had gone. If the messenger chain had not been there at all, it would not have interfered with the working of the ship. I have no special recollection of the condition of the donkey engine. The hose and the engine which were tried at every one of the surveys held by me, were not defective. It would take two or four men to work the Downton pump. I did notice the hose of the Downton pump. It was not leaky: it would not take eight lascars to work it. There is only handle room for four. I know, as a matter of fact, that the forward pumps are connected with the bottom of the ship. The pumps were tried at every survey I made. Every time I tried the pumps, I found them in satisfactory order. On each survey I made I examined the scupper pipes. The scupper pipes were renewed in the repairs of 1884, and properly so done. The length of the piping was about 15 inches; the thickness of the lead (three-eighths of an inch). No sea that ever rose could have affected that pipe. The mouth of the pipe is flanged over the outer plating. After Neustein's letter, I examined all the scuppers carefully. I am quite satisfied with their condition. None of them would have been packed with cement. It was not necessary to have lip-guards to the scupper pipes, the question raised in Neustein's letter. I left it optional with the owners to put them on or not as they liked. I believe the lip-guards were made. It is not possible for a boat-hook to pierce the scupper pipes. I have never seen an iron-shod boat-hook with a sharp point in any of the boats on the river.

ROBERT BUSHBY,

Court adjourned to 8th August, Monday next, half-past 12.

C. H. REILLY,

*The 8th August 1887.—Robert Bushby.—Cross-examination continued to Mr. Henderson.—*It is usual sometimes to have iron scupper pipes. There is nothing unusual in this class of vessel in having had scupper pipes. Neither lead nor iron scupper pipes are expensive to make or fit in. At the present time lead scupper pipes would be the more expensive of the two. The rudder of the *Sir John Lawrence* was in a good state of efficiency. The steering chains were properly fitted. There was relieving tackle to each side on board. The relieving tackle was surveyed by me on each occasion and found to be in good order. There was a fixed span tiller. I saw that the condenser had been repaired on the occasion of one of my survey visits. I examined these repairs and considered they were sufficient. The scaling for the valves had been repaired. There is no ground whatsoever for

characterising my surveys of the *Sir John Lawrence* as a mere walk round, taking about ten minutes. It is not true that I never went below hatches. I did go below hatches on each occasion I made a survey of the *Sir John Lawrence*. It is not true that I merely looked down the hatches in the main deck. The additional weight of 5 or 6 tons on the main deck by the newly added deck was more than compensated for by the removal of a long set of deck cabins on the upper deck. The iron socket into which the stanchions fitted were secured to the deck by coach screws into the covering board: the stanchions would be screwed down, and would reach right through the covering board and the plate underneath, and were secured by a nut underneath that again. The covering board was new and not rotten in the least: it was sufficient to hold the screws of the stanchions. The ordinary wear of the ship since 1884 could not have rendered the covering board rotten. The bowsprit was very short: a stump bowsprit. The end of the bowsprit was not carried away in the collision with the *Indore*. I do not think the bowsprit, the band, bobstay, and bowsprit shrouds were carried away: the bowsprit shrouds on the star-board side may have been carried away. If they had been carried away, I should have had them replaced: there was no such thing as a bobstay on board. She did not require one. The stump bowsprit had nothing to carry: it is only used when sails are carried over. The bobstay was not the key and support to all the masts. The forestay, which is the support, was not secured to the bowsprit in the *Sir John Lawrence*, and never is in any other ship. In iron ships the forestay is secured to cleats bolted to the covering board. The ceiling of a ship in a new ship is no support to such ship. The rails were iron on the upper deck with rope netting. The two 1200 gallon tanks in the lowerhold were connected by a pipe at the bottom, so that the contents of one tank should run into the other. On the 21st October 1886 I was on board the *Sir John Lawrence*. Mr. Young asked Neustein to go down below and help to get up the shaft. He was sitting in a long chair. His reply was I am too d--d old. This was after Mr. Young had asked him two or three times. Mr. Young said nothing to Neustein further in my presence. Neustein never moved. No one ever wrote to me direct about the defects in the *Sir John Lawrence*. The hatches of the *Sir John Lawrence* were not cased into the upper deck. The large one before the engine was 8'-6" by 6 feet. This hatch leads to the between deck. The other hatch, which led to the forepart of the between decks, was 5 feet square. The combings of the after hatch are about a foot high. The combings were not raised that I know of. The cubical content of the between decks was 16,522 feet (cubic feet). The statement that remnants of the old lip-guards were left adhering to the sides of the vessel were absolutely untrue. The new scuppers could not have been worked into the plate if they had been there. Bilge pipes are not required on board of a modern steamship. They are only used in sailing ships with flat floors to draw the bilge when the ship is hove down by sail. The bilge pipe has nothing to do with the safety of the ship. It is only useful to prevent damage of cargo. It is not true that at the survey of 1st October 1885, at which I was present, the water poured down the forward pump ran through as fast as you poured it in. The sea connection to the after pump was cut off at the repairs of 1884. Doing so made the ship a safer vessel. It is not true that the pipe leading to the hold had not been connected with the forward pump. I am not certain whether the rudder pendants were there. I do not think they were necessary. The inner keelson was not knocked off. The top angle irons, which formed the base of the deck stanchions at the fore hatch, were damaged by ballast being thrown down. They were not damaged in any other part, nor at the stanchions. If these angle irons had not been there at all, there was sufficient section of iron in the keelson plate, and the angle irons worked on below these angle irons to give the required section for a vessel of the class of the *Sir John Lawrence*. I paid special attention to this, as it is the only point which, to a casual observer, might have affected the stability of the ship.

Re-examination to Mr. Kilby.—The patch was rivetted on to the frame and plate. The point of the *Indore* coolie deck, which knocked the hole into the *Sir John Lawrence*, the plate at the point three-eighths of an inch thick. There were two angle irons inside and the end of the deck. The point that struck the *Sir John Lawrence* are perpendicular to the stern. The point was strong enough to pierce a half-inch plate. I had not seen the windlass for eight months immediately preceding the time when Neustein left the *Sir John Lawrence*. I always notice windlasses; particularly as I could have noticed whether the gipsy had worn into the bitts. On looking at a windlass I generally ask the Mate, or whoever is with me, if it is all right. If he says yes and I myself see nothing the matter with the windlass, as I look at I pass it, I should probably have observed if any of the studs had gone from the chain. I look generally along every length of chain. There may be one length on top of another, but it is easy to see each link. You can generally see if a chain is worn. I mean by examining the scupper pipes as part of the hull that I examined each one of the scupper pipes. The scupper pipes could not possibly have worked loose. The bowsprit had no sheave. It was not broken off at the sheave hole. The bowsprit may have been used to put up a light jib to help to bring her round. She never used a jib for sailing purposes.

To the Court.—It is usual. It is not at all unusual to put a permanent patch instead of taking out the plate bodily. The only case in which the new plate is put in is when the ship is under A class and the owner may wish to sell her as a ship of that class. There is absolutely no foundation for the statement that I refrained from having a new plate put

in the place of the old one because I believed that the removal of the damaged plate would necessitate the further removal of 40 or 50 other plates. Neither Mr. Taylor nor Mr. Young spoke to me on the subject of allowing the patch to be permanent. My decision in the matter was not influenced in any way by their wishes or views. I did not know Mr. Young before I came out to this country. I am not more intimate with him than I am with any other Superintendent.

ROBERT BUSHBY.

John Taylor sworn oath to Mr. Kilby.—I was acting Marine Superintendent to Messrs. Macneill and Company for some time from May 1885 to November or December 1885. There was a collision between the *Sir John Lawrence* and the *Indore* about May, the end of May that year. The *Indore* was a river steam-ship belonging also to Macneill. I saw the hole which had been knocked into the starboard bow of the *Sir John Lawrence*. I saw the *Indore* after the accident. I should say it was the bow of the upper deck of the *Indore* which struck the *Sir John Lawrence*. The bow of the *Indore* was injured, the stanchion was smashed, the flagstaff also, and some of the hand rails. The deck and angle irons were not affected. The *Sir John Lawrence* was struck with wood first, afterwards with iron. The covering board over the point was scoured away, and exposed the iron. This point on the *Indore* was eleven to twelve feet from the water. I do not remember whether the *Sir John Lawrence* was deep that day or light. The hole was above the main deck in the forecabin. I am quite certain of this. I noticed the plate where the hole was. I had the barbs or rags cut away, and the hole made as near square as possible, and an outside patch put over it, an iron plate about a quarter of an inch thick. The size of the square hole was about 18 inches. The patch in the first instance was bolted on to the plate only. Subsequently it was rivetted on to both plate and frame. I went round with the surveyor during the surveys of the *Sir John Lawrence*. The first was in June 1885 and the second in October 1885. Neustein was on board at the latter survey. The October survey was a dock survey. Mr. Bushby did the hull survey, Mr. MacKellar the engines. I have been over a good many surveys. I can tell you what was done by Mr. Bushby on that occasion. We went all over the ship both inside and out. I don't remember looking at the scupper pipes. I don't remember the surveyor looking at them. The scupper pipes had no cement on them in my time. Mr. Bushby looked at all our boats; they were lowered down to the level of the deck. None of them were put into the water in my time; this applies to both surveys. Mr. Bushby looked at them inside. He did not test the planking in any way. Mr. Bushby looked at the windlass; it was not tried, simply looked at. No complaint was made to me about the state of the windlass: Neustein never mentioned the state of the windlass to me. The pumps were examined; the leathers drawn and looked at nothing else. The hose was looked at in the October survey. The hose was not tested, that I remember. It was tested in the June survey. Mr. Bushby went down below right to the bottom of the ship into the after hold as well as the fore hold. It was not very dark. We had a light to look at the stringers and the plates. I saw no rust, all the iron-work was painted in the hold. We painted every two or three years or as often as the iron would require it. A Downton pump was connected with the bilge, and the pipes of both fore and aft pumps were continued to the bottom of the ship. I know nothing of a boat being sent from the *Medina* on board the *Sir John Lawrence*. I gave no order about it. The boat could not have been transferred without my order. I never heard of a boat on board the *Sir John Lawrence* that would not float. I went over into the Sunderbunds after giving over charge to Mr. Young. I remember the bowsprit of the *Sir John Lawrence*. I don't remember whether it had a sheave tied to it, it was short bowsprit. It was not broken at the collision. I can't remember whether she had a bobstay. I can't say whether the *Sir John Lawrence* had a broken bowsprit: it looked as if it had been broken. I never heard any complaints that the *Sir John Lawrence* rolled very much after the alteration. I never heard the officers of the ship tell the surveyor of any repairs or alterations they might deem necessary. I have never heard this done on any of our steamers that I can remember. I think the etiquette is that the officer should tell the Superintending Engineer, but if they chose to speak to the surveyor direct, they could do so. No notice would be taken of their having done so. The survey of the hull and equipments took Mr. Bushby about an hour. Mr. MacKellar did the survey of the engine-room. At that time Mr. Leech was the Chief Engineer. The condenser was repaired in my time. The landings were eaten away partly. The seatings were all right, the landings were repaired, we made brass landings in the place of the iron landings eaten away. We had not to lay the ship for that repair. I had no look at the chamber of the condenser nor were they opened out or looked at in the survey. My attention was not called to them. I did not remember the ram pump being opened out—the valves were opened I felt the thickness of the damaged plate on the starboard bow with my fingers. The plate was a quarter of an inch thick.

To Captain de Smidt.—The frame to which the patch was attached was good. I cannot tell you the thickness of the frame. The thickness of the plate I should say originally was not much more than a quarter, perhaps $\frac{1}{8}$ of an inch. I am not a practical ship-builder, I am an engineer. I never said to anybody that if Mr. Bushby ordered the plate out there would be no stopping. In my time I never bored any of the plates to test their thickness. I do not know whether the donkey had any connection with the fore and after hold for the purpose of pumping the fore and after hold out. We were dependent on the two main pumps. I did not notice the plate to be rusty. It had no rust. I felt the plate from the inside. I had heard that the *Sir John Lawrence* made use of her sails.

Cross examination to Mr. Henderson.—The *Sir John Lawrence* had a flat bottom for a sea-going steamer. I cannot say that the donkey engines had no connection with the fore and after hold. I could not have made the statement that taking out the damaged plate would result in no stopping. It would not have been true. I never heard it ever suggested that if that particular plate be removed, it would be necessary to take out other plates in the bow. Mr. Neustein was not present when I examined the damaged plate. I had no doubt then, and I have no doubt now, that the plate and its patch was as strong after the patch was put on as the plate was when it was new. The engineers and officers had to report to me if there was anything wrong in their respective departments. The only complaint made by Leech was about the condenser, and his complaint was seen to, everything was done to repair it that was necessary. None of the officers were discouraged in any way to make suggestions as to any repairs about the ship. I never discouraged any suggestions being made to me. Every time I went on board, I asked both engineers and officers what they required being done on board ship. The suggestions which in my opinion were reasonable were carried out. It never happened in my time that I had to refuse any request for repairs made by officers and engineers. I never gave either the engineers or officers to understand that it would be better for them to keep out of the way of the Surveyor. I never suggested to Neustein that he should go elsewhere during a survey and keep out of the way. It is absolutely untrue that the condition of the ship was such that to draw Mr. Taylor's attention to repairs was to court instant dismissal. Messrs. Macneill and Company never discouraged the bringing to notice the fact that particular repairs were necessary. They never gave me either directly or indirectly to understand that the less that was asked for the better. I never knew Messrs. Macneill and Company do anything which would induce the belief that the less which was asked for the better. In my estimation the brass landings were sufficient for the purpose they were intended. No complaint was made about them. Leech never in my hearing complained that the repairs were insufficient.

JOHN TAYLOR.

†
Court adjourned till tomorrow half-past 12.

O. H. REILLY.

The 9th August 1887.—*Cross examination of John Taylor continued to Mr. Henderson*—In my opinion Mr. Bushby as a Surveyor was very strict, he never hesitated to direct anything he found wrong to be repaired or altered. I never did anything in order to influence any of the surveyors as to what repair or alteration they might direct. A boat was smashed in the collision between the *Sir John Lawrence* and the *Indore*, and a boat was substituted by my order; it came from the yard, whether it was a new boat or not I cannot say. I think the broken boat was given to the *Burmah* after repair. One of the life-boats was smashed and a new life-boat replaced it shortly after the accident. The Captain reported that a boat had been sunk during the voyage, another boat was sent on board the *Sir John Lawrence* to replace the boat which was sunk; it was not a life-boat. The boat which was substituted for the boat which was sunk was never removed from the *Sir John Lawrence* during the time I was a Superintendent. The boat which was substituted was in good condition and repair. In the survey of October 1885, the scraping usually done to a steamer when in dock was done on this occasion to the *Sir John Lawrence*; the ship was also painted. I never noticed any old lip guard bolts adhering to the sides of the ship. I can swear these were not there, I should certainly have seen them. I never had any conversation with Mr. Bushby whether the patch should be left permanent or not, the question was never discussed between us. The plates and frames generally were in good condition, and that I say after having gone through the vessel. I cannot say that I examined the ceiling particularly.

To the Court.—I did not think it necessary to call the attention of the Surveyor to the repairs done to the condenser. The Surveyor could not have seen the landings unless his attention was specially called to them. No boat was ever put on board the *Sir John Lawrence* in my time simply with the object of passing the survey.

JOHN TAYLOR.

Alexander Pedler sworn with to Mr. Kilby.—I am Officiating Meteorological Reporter to the Government of Bengal, and I was so on the 25th May. I issued orders by urgent telegram at 8-25 a.m. on the 25th May to hoist storm signal No. 8 at the river stations, that is, Diamond Harbour, Mud Point, and Saugor Island. I issued these orders to the Telegraph Masters in charge of the stations. This is a copy of the Government notification prescribing the nature of the signals to be put up. Copy put in and marked (O). I based my opinion as to the nature of the storm signal to be put up from meteorological information I had received from the previous five or six days, previous to putting up No. 8 signal. I had been in receipt of such information every two hours from the ports on the West coast of the Bay. Reports from the East coast were coming in every six hours. I knew the storm was moving in a westerly direction, so it was not necessary to get as frequent reports from the East coast; the West coast information was more important. Just at the time of hoisting the signal I had ordered telegrams for Akyab and Diamond Island. The Diamond Island telegram ceased to come after the morning of the 23rd May. I have received no official intimation why Diamond Island telegram ceased after that date. I have been informed that the wire was out of order. In several previous storms Diamond Island telegrams have ceased to come at most critical times. I think that the construction of the line between Diamond Island and the main land must be defective. I have no reason to believe that the fault is due to the man

in charge of the telegraph station. In respect of the origin of cyclones in the Bay, Diamond Island is the most important of all stations which furnish me with information. It is the nearest station in that part of the Bay in which cyclones generally form, though it is about 350 miles away from where I believe the storm of the 25th May actually formed. The usual birth place of cyclones which come to the head of the Bay of Bengal is to the West of the Andaman Islands. We have meteorological stations both at Port Blair, Andamans, and Nancowry in the Nicobar Islands. Reports from Port Blair have come in since by post. I cannot be certain whether there has been any report come in from Nancowry. I received reports from Diamond Island by telegraph some days after the storm of the 25th the observation of which were previously missing. If I had received the reports from Diamond Island and Port Blair in time, I should have been in a position to state more accurately the nature of the storm. It would not have been possible to state with absolute precision the precise intensity. As a matter of fact, the storm was a very small one, but very intense. It is always possible to mistake a large storm with less intensity for a small storm with great intensity. It must be remembered that the observations on which the conclusion is based are obtained from stations which are generally some hundreds of miles from the storm itself. It is of the utmost importance that there should be telegraphic communication between Port Blair and the main land. This has been reported on several occasions to Government. On the 20th I came to the conclusion a cyclone was forming to the South-West of Diamond Island. Subsequent information confirmed that impression, and showed that the cyclone was increasing in force and moving in a north-westerly direction. This was notified day by day in the meteorological report published every afternoon. As in other cases, the Diamond Island telegram while the storm was in progress ceased to come in at the most critical moment. The West coast stations appeared to be affected by the approach of the cyclone on the morning of the 24th. From the indication on the morning of the 24th received from the West coast, it appeared probable that the storm would cross the coast some where near Vizagapatam, as barometric pressure was falling most rapidly along that part of the Bay, and wind directions appeared to show that the centre of the storm was to the South of Vizagapatam. The observation I received in the evening of the 24th showed me that the storm was proceeding in a more northerly direction than was shown by the position fixed by me in the morning, and at 1 A.M. on the 25th, the wind suddenly went round at Vizagapatam to North-West it was calm at Gopalpore, and at False Point wind was N.-N.E., and very light. It being calm and winds light along the West coast, it appeared to show that the storm was not a very large and intense one. At 3-40 A.M. wind at False Point was North and blowing at 14 miles an hour, which is a very light wind indeed. Pressure had risen at False Point within the previous twelve hours. This telegram reached me at 8-15 A.M., and taking this in conjunction with other telegrams I received, I hoisted the storm signal No. 8. Up till receiving this telegram from False Point, it was quite uncertain at what part of the coast the storm would strike. There was no other signal in the Code which applies to the storm. Whatever my information had been I should have hoisted No. 8. The only other signal which might have been used was No. 3. This has reference to very large cyclones, whereas the storm in question was a very small one. It might be desirable to have one or two more general signals. In other respects, I should have the signals, as far as meteorology is concerned, as they are now. I have already suggested a modification of one of the signals in most cases of storms of unknown intensity. At 1 P.M. on the 25th the centre of the storm was, in my opinion, about 100 to 110 miles South of Saugor Island. The diameter of the storm was about 100 miles. At the time the *Sir John Lawrence* passed Mud Point and Saugor, both telegraph masters at these stations saw the *Sir John Lawrence*.

To Captain de Saund. The storm was small in diameter, but great in intensity.

Cross-examination to Mr. Henderson.—It would not be particularly rough at Saugor at 1 P.M. on the 25th in the proximity of the light-house. The indications at Saugor Island at 1 P.M. on the 25th were very different from indications given in ordinary monsoon weather. A strong N-E wind is always an indication of a storm at that time of year.

ALEXANDER PROLIER.

Eduard Henry Palmer sworn oath to Mr. Kilby. I am Port officer at Chandbally. I have to do with passenger ships on the voyage from Chandbally to Calcutta. I have to give them their (B) form certificates and check any excess of passengers they may happen to have on board. I am subordinate to the Calcutta Port Officer. The Inspector and police staff at Chandbally thana are subordinate to me in that they have to carry out any orders I give them in respect of counting passengers arriving and departing in the passenger ship. I exercise this power under the Native Passenger Act 1876. I am an Honorary Magistrate at Chandbally, and by virtue of that office and in accordance with the orders of the District Magistrate I exercise authority over the police. The police make no written reports to me, they make oral reports if there happen to be any excess passengers. When the ships come in I do not myself count passengers, but when there is a great pressure of passengers during poojah trips, I generally go on board one and all three of the steamers. I have seen the passengers counted by the police, it is done by the inspector, sub-inspector and head constable, followed by two or three other constables attached to each of these officers. Nine or ten constables altogether. There are ten constables in the thana, the ships come one at a time, the difference varies from intervals of half an hour to three hours. The system of counting

passengers disembarking is that either the inspector or sub-inspector or head constable take the first vessel that arrives; she comes in at the jetty appointed to her. She put out passengers at her stage, which is made of four or six or seven planks, the steamer side is apart from the jetty about 12 to 15 feet, the police stand sometimes on the jetty and sometimes on board the steamer's gangway. There is only one stage. The passengers pass out one at a time as a rule, and they are counted as they pass. The counting is registered in a little tally book the police have. I have very often seen the passengers counted when there is a big crowd. The counting of passengers on board the *Sir John Lawrence* when she was full would take from three-fourths of an hour to an hour and a quarter; sometimes there is struggling to get through but the police and the ship's people and the agents people on shore prevent the rush. It is possible for the police to make a mistake of four or five or ten passengers. But it is quite within the power of the police to count accurately. The Captains of the steamers have been handed up for carrying excess passengers and been fined. The Divisional Officer at Bhadruck tries such cases. I have no power to try such cases. The Captain of the *Sir John Lawrence* has not been fined within the last five years. I think the Master of the *Curtis* was fined four or five years ago. I have been Port Officer at Chandbally for nine years. The system of counting as I have described has been so carried on ever since I have been Port Officer. When passengers go on board bound for Calcutta they are counted in just the same way, they go on board over the same stage. The passenger ships stay at their respective jetties the whole of Thursday and portion of Friday. The thanna is distant from the jetties four or five hundred yards. The ships can be seen for an hour and a quarter before they come to the jetty. I have seen a police go on board the ships to see if there are any passengers left on board. I have seen them do this. The police remain on the jetty and prevent excess passengers going on board till the steamer starts. The steamer suits themselves to the state of the tide. There is no particular time fixed for the passengers to go on board. Passengers do not go on board on Thursday. They are not allowed to do so. The police search the vessel before allowing her to embark passengers. I know Mr. Augier in business; he was Sub-Deputy Collector and Customs Officer, and he has nothing to do with the counting of the passengers. I remember he did make a report to the Collector about something connected with the passengers. He used to go on board the steamers till warned off.

Cross-examination to Mr. Henderson.—Mr. Augier is not in Government employ now. He was dismissed for withholding Government money. I was not called upon for any explanation. I am responsible for the counting of the passengers. I live in Chandbally itself. I go down to the jetties almost every time the steamers come in. There is no ground for saying that the counting at Chandbally is a mere farce. It is not true that it was impossible to count the living stream of passengers as they rushed past. I never found after the counting that people were concealed in the cabin and about the deck. There is no river police at Chandbally. The passengers were not allowed to scramble down the planks as they liked. There is a village before you get to Chandbally seven or eight miles off where passengers might be landed, but I have never heard of passengers being landed there. I have never heard of passengers being landed on boats before the ship comes alongside the jetty. I have never known of passengers being taken aboard from boats to evade the counting. There has never been any permission given to the Captains to carry passengers in excess of the fixed number. I knew Captain Irvine, in my opinion was a humane man. He treated the passengers kindly; he was popular amongst the natives. He was a sober man. I have known him nine years. I have known cases when tickets were not sold because the full number of that voyage had been reached. I have no doubt that my orders as to counting passengers were carried out and I had full opportunity of judging that they were so. We have had cases of one or more pilgrims on their way from Jagermuth dying on the bank of the river before they disembarked. These cases were very few and far between.

EDWARD H. PALMER.

John MacKellar sworn with to Mr. Kirby. I am Assistant Engineer Surveyor to the Port Commissioners. I was appointed January 1885 by the Port Commissioners. I was examined before my appointment was confirmed. I had questions to answer set me by Mr. Bushby. It was not a competitive examination. I saw the post advertised. I applied for it and sent in my testimonials. I was not acquainted with Mr. Bushby at that time. Mr. Bushby handed me the papers, I filled them up, and afterwards I saw that my appointment was confirmed. I asked no questions about it. I had not been a surveyor before this. I had been an engineer in the Mercantile Marine. I first went to sea in 1873 as fourth Engineer. I gradually rose to First Engineer, and was First Engineer for seven years. I was in the British India service at the time. I began my service in the British India. I was in that service for five years. Then I went over to the British and African service about a year and a-half. Then I rejoined the British India, and I passed the rest of my service in the British India till I took up my present appointment. I served an apprenticeship as an engineer for five years at home. I received no other authority from Government or official body to practice the duties of surveyor except my letter of appointment. I either myself, or assisting Mr. Bushby, have surveyed the *Sir John Lawrence* ten times. On the 18th and 21st April 1886 I visited the *Sir John Lawrence* when she was in the river. On the 19th I surveyed the boilers and machinery. On the 21st I finished the steam survey. In April I did not examine the hull and deck equipments, Mr. Bushby did so I believe. On

October 23rd, I examined engine and boiler. On the 25th I saw the equipments on deck and also completed the steam survey. On the 23rd and 25th I was alone. I saw the ship under steam on the 26th. I was on board and saw her work through the bridge. I was alone in my survey on the 25th and the 26th. I cannot remember whether Mr. Bushby was with me on the 23rd. On the 31st January and 1st February 1887 I went on board the *Sir John Lawrence* because of a report sent to me about the condition of the vessel. I examined the hull of the *Sir John Lawrence* inside while she was in the river on 6th June 1886. Except on these two occasions, viz., the 6th June 1886 and 25th October 1887, I made no other survey of hull and equipments on board the *Sir John Lawrence*. When I made a survey in the year 12 ships were surveyed out of Calcutta. I have not been further than Naraingunge surveying vessels. When we go outside Calcutta to survey vessels either I or Mr. Bushby go. We do not go together. I survey vessels in Calcutta myself without Mr. Bushby going on board. I survey a fair proportion of the vessels alone. I believe I surveyed a little less than half of the 377 vessels I mentioned. I did these surveys entirely alone. Invariably when Mr. Bushby and I go together I do the engine department and he does the deck and equipments. We survey about a hundred vessels together. That is a rough estimate. Mr. Bushby does the emigration vessels entirely alone. He does most of the British India vessels by himself. We divide the work between us to get through it as expeditiously as possible, so as to cause as little detention of the ship as possible. I cannot tell with certainty, I make a report to Mr. Bushby in writing if I find anything defective. If I don't find anything defective I let Mr. Bushby understand orally that a certificate may be issued. I have my own private diary, in which I noted what I did on the 6th June 1886. I keep my diary regularly. I don't note down everything, but I note down everything of importance.

JOHN MACKELLAR.

Court adjourned till to-morrow half past 12.

C. H. REILY.

The 10th August 1887.—Examination of John MacKellar continued.—I have looked for my diary containing the rough notes of my surveys of June 1886, I can't find it. They are only my private diary not office records. 377 vessels were surveyed by Mr. Bushby and myself, or by one of us from the 30th March 1886 to 1st April 1887. Most of the surveys are held in Calcutta. I do not remember with any particular minuteness what I did on each survey. As I do so many vessels, I cannot remember what had been done by me two and a half years ago on any particular vessel I surveyed. I examined the hull of the *Sir John Lawrence* in June 1886. I say everything was correct. If it had not been I should not have granted or rather got the certificate granted. The boats must have been in good condition or I should have condemned them. I feel sure I should have detected a rotten boat or a leaky boat if it had been on board. I should have noticed if the frames and plates had been rusty. I should have examined the frames to ascertain the condition of the iron, and if found defective, I should have ordered them to be strengthened or renewed. I always go down into the forepeak of every ship when I make an internal survey. I go into every compartment of the ship. Chandeliers are not pretty rusty generally. The holds of the *Sir John Lawrence* were in thoroughly good condition and without scales. The plate on which the patch was put was also in good condition and painted. I never heard it stated that the hole in the fore-castle was done by the *Sir John Lawrence's* anchor.

JOHN MACKELLAR.

Arthur William Stiffe, sworn, sworn to Mr. Kilby.—I am the Port Officer of Calcutta. I received from Government some letters sent to the Government by Mr. Neustein. I received the letters from Government on the 23rd November last. I also received a letter from Mr. Neustein direct. I was requested to report on those letters. This is the Government letter put in and marked (P). I also received a subsequent letter in June 1887 from Government, forwarding me the same set of letters from Neustein. I was asked to report a second time on those letters, put in and marked (Q). On receipt of the letter (P), I sent the enclosure to the Port Commissioners to deal with, and reported to Government that I had done so. I made no enquiry myself, and I made no report to Government. I then left the Port Commissioners to correspond direct with the Government. I am the officer referred to in section 7, Act VIII of 1876. I am at liberty to enter and inspect a ship under section 7. I may authorise any one else to do so. I am the person who grants certificates (A) and (B) under the Act. I am required to cause the ship to be surveyed before granting certificate (A) under the express direction of section 14 of the Act. Up to Mr. Bushby's arrival in 1882, I think, I appointed a surveyor myself and was responsible for the survey. Since Mr. Bushby's arrival I am not responsible for the character of the survey. My responsibility is limited now to the fact that a survey is held. I received official instructions from Government to apply to the Port Commissioners to order Mr. Bushby to make the survey necessary under the Act of 1876, and receive his report whether the requirements of the Act are complied with. From the nature of the Government instructions, I consider myself authorised to accept the report of Mr. Bushby; but if the owners or agents raised any objection to the report, I then should refer the matter back to Mr. Bushby or to Government. If the case was urgent, and the information given me was *prima facie* credible I might satisfy myself by a personal inspection of the ship, or through a survey of independent surveyors, as to whether the ship was seaworthy and properly equipped, fitted and ventilated.

By "urgent," I mean if the ship were on the point of going to sea; if the case were not urgent I should simply write to the Port Commissioners, sending the information I had received on to them. I should take no further action; they would not report to me. In Neustein's case, although he brought grave and serious charges against the way in which the surveys on board the *Sir John Lawrence* were conducted, I thought it lay solely within the province of the Port Commissioners to investigate into the action of their subordinates. Since the receipt of Government letter, dated 16th January 1884, I consider I have no responsibility in respect of surveys. Letter put in and marked (R). My view of my duty in respect of the (A) certificate is to make out and hand it over to the owner or agents on receipt of Mr. Bushby's certificate of the survey of the ship. Practically, therefore, the officer authorised under section 13 of the Act of 1876 is Mr. Bushby, and not myself. Under section 8, I consider I have the authority myself to enter and inspect the ship. As regards certificate (B), I should conceive it part of my duty to take action under section (8) when circumstances demand it. Section (8) I consider does not apply to me, in that the Government have directed Mr. Bushby to be the person authorised under the section. I follow the Government direction and consider myself absolved from all responsibility. Act VIII of 1876 directs that the surveys on which (A) and (B) certificates are granted should be by surveyors. Mr. Bushby has been appointed both Engineer and shipwright Surveyor. On the authority of the Government letter, I consider I am sufficiently complying with the requirements of the Act in accepting the certificate of one surveyor, Mr. Bushby. I do not recognize Mr. McKellar. As to (B) certificate, when asked for in respect of ships about to make a long voyage, I go on board myself; as to ships going short voyages there is less trouble. The requirements are mentioned in section 11, Act VIII of 1876. Occasionally I go on board; generally I accept the agent's statement in writing—a detailed statement that the requirements of section 11 have been complied with. I have been on board the *Sir John Lawrence* several times. She had an awning deck from stem to stern. She carried passengers on this deck. If there had not been substantial bulwarks or netting or other sufficient protection against the weather, I should have noticed it, and should have seen that the law was complied with. I consider that railings with rope netting combined with curtains are a sufficient protection against the weather within the meaning of the Act. The Local Government has appointed the Engineer and Shipwright Surveyor for the Port of Calcutta under section 9 of Act VII of 1884. The Vice-Chairman of the Port Commissioners is appointed the officer to whom the declaration of surveyors should be sent under section 12. At present there are no rules in existence made under section 24 of the Act of 1884; they have been under consideration for the past 2 or 3 years. The surveys are made under the rules made under the previous Act (Act V of 1882).

To the President.—The Board of Trade refused to recognise a Calcutta survey certificate, unless the survey was made by one of their own surveyors, or one nominated by them. This is what I have heard. The Board of Trade accept Mr. Bushby's certificates. Before Mr. Bushby's arrival the survey was held by two surveyors, a shipwright and engineer surveyor. At that time also I employed an additional and independent surveyor under the Act of 1876; a fourth surveyor was employed by the Protector of Emigrants. I am quite satisfied with the way Mr. Bushby performs his work. I consider him an absolutely trustworthy officer, if anything overscrupulous. Even if Mr. Bushby had never been near the ship, and yet signed the survey, I should be satisfied with that survey and accept its contents as absolutely correct. Mr. McKellar is not a legally qualified ship's surveyor. I was not aware that Mr. McKellar conducted surveys alone in the absence of Mr. Bushby, except on occasions when Mr. Bushby was away on leave. An engineer-surveyor has not to pass any examination that I know of; anybody nominated by Government could be an engineer-surveyor. I wish to correct the statement I made as to Mr. McKellar not being legally qualified; he may have been specially exempted from examination under section 69, Act VII of 1880.

Cross-examination to Mr. Henderson.—I accepted the certificates signed by John McKellar regularly in 1885. I accepted his certificates because he was gazetted as Assistant Engineer-Surveyor. I considered Neustein's charges, on the face of them, false and frivolous. If I had thought there was any foundation in any of the charges, I should have caused an independent enquiry to be made. I am authorised under section 14 to order a survey to be made upon an application for a (B) certificate while an (A) certificate is still running. I have no recollection of having ordered a survey for the purposes of a (B) certificate while an (A) certificate is running.

ARTHUR W. STIFF.

George Pointon, sworn, to Mr. Henderson.—I am Commander of the *Barrin*. Formerly I was employed as Chief Officer on the *Sir John Lawrence*. I knew Captain Irvine intimately. I sailed with him about four years and a half; previous to that time I did not know him. I have, since I left the *Sir John Lawrence*, been to visit Captain Irvine very frequently. When I sailed with Captain Irvine he was employed in the Chandbally trade. In my opinion Captain Irvine was not a foulhardy man; he certainly would not have risked the lives of his passengers unnecessarily. He treated his native passengers with exceeding kindness. I do not think there was any commander who sailed out of Calcutta who was kinder or more humane to his passengers. He was decidedly an honest man. He was decidedly not the kind of person who would smuggle excess

passengers with the object of putting money into his own pocket; nor was he likely to connive at any one else on board doing the same thing. I have been in the service of Macneill and Company. No Captain of any of the boats belonging to Macneill and Company have to my knowledge ever been driven to make a voyage irrespective of the risk of loss of life. I left the *Sir John Lawrence* before 1882. Up to that time I believe the *Sir John Lawrence* to be a staunch vessel and a good sea-boat. I should not have remained in her if she had not been seaworthy and staunch. I did not leave her because she was not staunch and seaworthy. Captain Irvine was a very sober man. We got everything we indented for.

G. POINTON.

Case adjourned till 1 p.m. on Friday next.

C. H. REILLY.

The 12th August 1887. John MacKellar examination continued.—Some of the passenger declarations which are sent to the Port Office are signed by me alone. I was gazetted to act as engineer-surveyor for Bushby during his absence in England. During that interval, I alone surveyed the ships and signed the certificate. I was assisted by D. MacKellar of Lloyd's, who did the hulls and equipments of sea-going vessels. Mr. Bushby was absent during the months of July, August, and September 1885. During Mr. Bushby's absence out of Calcutta, when he is engaged in business elsewhere, I alone sign the certificates, otherwise he always signs whether he surveys the vessel or not. During Mr. Bushby's absence from Calcutta I do the whole of the survey myself. I was passed as a Shipwright Surveyor by Mr. Bushby. Mr. D. MacKellar was Gazetted a Shipwright Surveyor simply to assist me, because the work was so heavy for one man, not because I was not a qualified Shipwright Surveyor myself. To my knowledge I have only been gazetted once, and that as an Assistant Engineer Surveyor only. I have not been gazetted as a Shipwright Surveyor. Before I passed Mr. Bushby's examination I had no previous experience as a Shipwright Surveyor. The details of the surveys held by me upon the *Sir John Lawrence* in June 1885, April 1886 and October of the same year did not impress themselves on my mind beyond an impression that everything on board was all right. Before getting Neustein's letter, I remember noticing how the scuppers were fitted. I saw them from the main deck and from the between deck, not from the outside. I think there were about three scuppers on each side of the ship. I only observed some of them previous to Neustein's letter. I cannot say which of the scuppers I observed. I may have seen them all, but I did not look at them particularly. I never noticed any cement in connection with these scupper pipes. In the between decks there was enough light to see the scupper pipes. There were two hatches on the between decks—one on the fore and the other on the after hold. The between deck is one compartment. I do not remember seeing the after scupper pipes. I remember examining the soil pipes. I am not sure whether the scupper pipes were in the engine-room or in the after hold. It is quite easy to work along the stringer plate in the after hold. In ships as large as the *Sir John Lawrence* there would always be stringer plates. You cannot make a minute inspection of the inside of the hull from the bottom of the vessel. So when I can, I walk along the stringer plate. When I survey a ship I get into every corner of the ship it is possible to get into. Mr. Bushby is very particular in his surveys, and gets into every compartment of the ship he can. In October 1886, when the ship was coming out of dock, the windlass I noticed was under repair. I did not see the *Sir John Lawrence* in dock, I went on board on the 23rd as she was coming out. I examined the engine and boilers on the 23rd. Mr. Young pointed out to me the part of the windlass which was defective, I think Mr. Bushby saw the windlass on the 23rd. The 24th was a Sunday. On the 25th I again saw the windlass: they were finishing repairs. On the 26th I saw it again. The repairs were finished. I saw the windlass working. I believe, both port and starboard were in working order. It would be quite right to grant a certificate even when the windlass is not in proper working order. It is never, however, done in this port. I remember seeing Neustein on board the *Sir John Lawrence*. I remember his being dismissed. On the last two occasions to 25th and 26th October. I do not remember seeing Neustein on board, on the 23rd I saw Neustein on board. These dates are all written down in our order book. I examined the chain while the steamer was lying at the Salt Golahs on the 25th October 1886. I never examined the chains before that date. It is usual to examine chains in dock; I suppose I could not get the chains out of the locker through the windlass being defective. I presume that was the reason I did not examine the chain when the ship was in dock. It is not more inconvenient examining the chain when the ship is afloat than when she is in dock. It is not more inconvenient for the Surveyors but may be more inconvenient for the crew and officers. It all depends on the facilities which exist for getting the chain out of the locker. I saw as much of it as there was on deck. The rest I could not see through some misunderstanding between some of the ship's crew. Mr. Neustein was the responsible man. I passed the chain nevertheless. I saw 60 to 80 fathoms of each chain of the working part. The ship was moored fore and aft I suppose by her own chains. I could not examine that part of the chain which was under water, so do not know whether it was defective or not. After the vessel was unmoored I went in her through the bridge at that time, I saw the part of the chain which had been under water. I do not think 120 fathoms of chain were out taking both ends when the vessel was moored. I thought half of that would be enough. I watched the

windlass working taking in the chain as it went down into the chain locker. The chain was at once paid into the locker. It was not laid out for my inspection. I was looking at the windlass most of the time it was working. They were not ready with the steam for me to begin my survey. A ship could be painted over the rust, but the process would not last long; the scales would drop. It is quite as easy for a surveyor to detect rust underneath paint as rust without a dash of paint put over it. When ships are surveyed for the first time, there is a form in the office which has to be filled up with particulars. Where ships are surveyed over and over again, we do not fill up any form of the subsequent surveys. There is no diary in the office as to what was done by me in surveys held by me on the *Sir John Lawrence*. No diaries either of surveys held by Mr. Bushby. I do not know anything of any diaries of survey in our office. If everything is all right, we make no report to the owners. The diary book referred to in this blank form. Forms of this kind are applications put in by owners or agents of vessels, they are filed in the office, but never signed either by Mr. Bushby or myself; put in and marked (S). The document is only filed in the office, therefore it is unnecessary to sign it. We sign the declaration and we consider that sufficient. I remember that the patch on the starboard was above the main deck. I did not see any broken bunks or chest. I did not see any in that part of the fore-castle. The hole was four or five feet above the main deck. The awning deck extended to the fore-castle. The height of the fore-castle was six feet six. I never observed the deck was rotten near the chain locker pipes. I did not notice a chock of wood put there. We test the pumps on the occasion of every survey. We put water down the bilge pump to see whether the buckets and valves are in good order. When you pour water down, if the pump be in good order, you can see the water it would remain above the pump. If it ran away it would show that the pump was leaky or the valve out of order. I remember the *Sir John Lawrence* had a stump bowsprit. I did not notice that it was broken. There must have been a band at the end of the bowsprit, that is to say there ought to have been. I did not observe whether there was one or not. The *Sir John Lawrence* had no bobstay that I know of. She had shrouds; they were all right. When a vessel is in good order it takes from one to two hours to survey thoroughly, hull and equipments. I am alluding to the *Sir John Lawrence* class of ships. Mr. Young or Mr. Taylor were invariably present at surveys. The application for survey specifies a particular day, if it is possible for us to go on board on that day, we do so, without any further notice to the Superintendent. If we cannot go, we write and tell him so. There is no time fixed for our survey. The Superintendent awaits our arrival on board till we come. The Marine Superintendent has the responsibility of keeping the vessels in order. The captain and engineers can do everything necessary to assist us in our survey, but it is better that the Superintendent should be on board. I ask questions of the captain and chief engineer. I am in the habit of doing this. I ask them whether there is anything they would like my attention drawn to if there is anything defective in any way. I have asked questions of the captain and engineer direct. These officers have drawn my attention to defects when the Marine Superintendent was present. I cannot remember whether this has been done on board any of Messrs. Macneill's ships. We accept the original measurement of passenger space. Unless there has been any alteration we do not measure. No encroachment on passenger space can be made except under penalties. We trust to this proving a sufficient deterrent. We could generally tell if there had been an encroachment without measuring the space again. After receiving Neustein's letter I measured the vessel and found there had been an encroachment on passenger space. On receiving Neustein's letter I laid it before Mr. Bushby. There was a delay of a month or two before we went on board the *Sir John Lawrence*. When we did go on board we found everything all right. We went on board on the 30th or 31st January 1887. I got Neustein's letter about the 28th of October. I showed Mr. Bushby that letter within a week after I got it from Neustein. Our first visit on board the *Sir John Lawrence* in respect of the charges brought by Neustein was on the 31st January 1887. That was on receipt of the Government letter. If Government had never sent that letter, we should never have gone on board the *Sir John Lawrence* on 31st January. We were both quite satisfied with the condition of the vessel even before that visit.

To Captain de Smidt.—During my apprenticeship I was taught nothing but engineering. I was eleven years at sea before I was appointed assistant to Mr. Bushby. I used to look after the machinery of the vessels. I had to make ports tight, superintend the iron work on board the vessel. I was for three months superintending the construction of one of the Cape Mail Steamers. I superintended the building of a vessel 80 feet long of my own design—a screw vessel. I superintended the fitting of one of the British India vessels—the finishing. I know nothing about the general equipment of sailing ships. The survey of pilgrim ships are done under the authority of the Port Commissioners. I have measured the Chundabally passenger ships myself. I know all that is necessary for ships' boats. I was present when the patch was being fitted. I saw it finished. I looked at the thickness of the old plate, but did not measure the thickness. I should say the plates in the forepeak were at least $\frac{1}{8}$ thick. I did not see them bored. If I had any doubt about the thickness of the plates in the forepeak I should have bored them. I had no doubt. I went by the thickness of the landing and the condition of the plate generally. I allude to plates in her hull, and on her poop and topgallant fore-castle. You find the thickness of the plate by boring it. There are also a small patch on the port bow; I did not put it on. None of the plates in the ship were tested after the complaint of Mr. Neustein. The end of the scupper outside is flanged over and beaten down on to the plate. There was no occasion from the way they were constructed to put an iron flange over the lead flange and bolted through with screw bolts. The leaden scupper would last as long as the ship. I think now

that there must have been 120 fathoms of chain out when the *Sir John Lawrence* was moored at the Salt Golahs. There may have been four or five or six boilers in one ship.

Cross Examination to Mr. Henderson.—It is ridiculous to think that a boatman's bamboo could push in the scupper pipe. I know the *Arco* was in the river. Her scuppers are exactly the same as those on board the *Sir John Lawrence*. They do not show scars made by boats hooks. The *Arco* has these scuppers since she was built and she passed her survey at Home under the Board of Trade ten years ago. The flanges of the *Sir John Lawrence*, scupper pipes were not rivetted. I know what lip-guards are, they do not add anything to the strength of the outer part of the scupper. There is no topgallant forecastle on the *Sir John Lawrence*. I at the time was quite satisfied that the plate on which the patch was placed was thick enough. I was supposed to be competent when I was at sea to put a new plate on a vessel. I could have gone on board at any time the vessel was on the river after receiving Neustein's letter, and yet I considered it was unnecessary to do so; that was the reason I never went aboard till I got Government instructions. The encroachment I spoke of was on the forepart of the main deck by the erection of two cabins. The number of passengers allowed to be carried was reduced by fifteen as far as I remember. All passenger vessels require to be measured for space—all Indian passenger vessels. The more frequently I go on board, the less likely it is that there should be an encroachment. I did not notice. It is quite possible that the stump bowsprit owed its origin to the fact that on some former occasion it had been broken. I do not think it a fact that there was no band to the bowsprit would have escaped my notice. There is a separate receipt granted for payment of fees than appears in (S). I saw no paint put over rust in the *Sir John Lawrence*. I could see the chain passing over the windlass and going into the locker. I could see every link of the chain as it came up. I was watching the chain for the purpose of survey, because we had not seen it in dock. I should have noticed any broken links or missing studs or bent links. I examined the scuppers particularly after getting the Government letter. I looked out every part mentioned in Neustein's letter. Apart from the encroachment of space already mentioned, I found nothing wrong with the ship. The charge as to the encroachment have been greatly exaggerated. I examined the scuppers thoroughly, and I am now in a position to say, that none of them were cemented. There is no ground, whatsoever in my opinion for the suggestion that new scupper pipes had been put in, in the interval between the writing of Neustein's letter and our visit to the ship on the 31st January 1887. I got no certificate from Mr. Bushby when I passed my examination, a report was made to the Port Commissioners; the result was that I was confirmed in my appointment. There are no other Engineer-Surveyors besides Mr. Bushby and myself. I have seen the condenser of the *Sir John Lawrence* opened out nearly every time I surveyed the ship, the condenser was in good order, it was not a new condenser, but it was in perfectly good order.

Re-examination to Mr. Kirby. I do not think the mouth of the scupper has been repaired previous to our survey of January 1887.

JOHN. MACKEILLAR.

Court adjourned till 15th instant.

C. H. REILLY.

The 15th August 1887.—Robert Lindsay Young, sworn, saith to Mr. Kirby.—I am Superintending Engineer to the Rivers Steam Navigation Company, combined with marine duties. I am also Superintendent of the *Sir John Lawrence* employed by the owners. I do not know who the owners were. I had to look after the hull and the equipment of the vessel. I am an engineer by profession. I served my apprenticeship in the engine shop of A. and J. Inglis on the *Clyde*. I have had to do with boring the stern posts of screw steamers which was done in the yard, and the fitting of machinery and sea cocks of ships, and one thing or another. Before the time I became Marine Superintendent, I had no further experience in ship building and in the gear and equipment of ships. I have, however, been to sea for many years, either as junior or chief engineer, about nine years. I know the *Sir John Lawrence* first in 1879. She was then running to Chandbally. Macneill and Company were the agents. I do not know who the owners were at that time. I have a general idea who the owners were. I cannot tell you whether the ship at that time was running in the interests of Macneill and Company. It was laid up in October 1881 as far as I remember; repairs were begun upon her about the end of July 1883. There were various reasons: the boiler was defective; the deck, the main deck, was bad, and part of the upper portion of the bulwarks were bad; the frames below the boiler were bad, and several other frames round the ship wanted repairs; the plates were in a fair condition. I did not advise Macneill and Company that she was not in a fit condition to run. We could not get a certificate for the vessel from the surveyors—Mr. Walker and Mr. Mitchell—Mr. Walker refused it. I cannot tell you whether they were surveyors under the Native Passenger Ships Act, 1876. The *Medina* was substituted for the *Sir John Lawrence* when she was taken off. There were, I think, fifty-one all told on board excluding the commander; but I am not positive about this. I am positive the number was fifty-one. The *Sir John Lawrence* at the time she was lying off was advertised for sale. There was one offer made to buy her. I think Rs. 20,000 to Rs. 25,000 were offered for her by an Eurasian. Mr. Bushby surveyed her about in October or November 1882. I was present; no one else was present. This was under instructions from the Port Commissioners. After that survey she was docked in February 1883. Under my orders holes were bored in her bottom. She had been docked in one of the British India docks: the examination was satisfactory. Mr. Bushby saw the ship when she was in dock after the boring; he said one visit. I reported myself to

Messrs. Macneill and Company after the boring. I found the plates satisfactory. The vessel was some time after that taken down to the yard, 23, Garden Reach. The repairs were begun on the 1st August 1883. The vessel did not run again till June 1884. The repairs occupied till that time. We began by sealing the hull inside throughout. This I did on my own responsibility. There were a few plates taken out below the sheer strake. No other plates were taken out below the main deck. No plates were taken out under the boiler. About 200 plates were supplied. A great portion of them was used on the upper framework of the vessel for renewing bad plates in place of plates which were taken out; the rest were used for doubling thin plates. About ten per cent. of the plates were used for the doubling. Mr. Bushby came on board about once a week. He saw the vessel after it was sealed inside. All the repairs to the iron work of the hull were done under his orders. All the bad frames which were above the water line, and which were defective, were repaired by putting on wherever required new reverse angles. We arranged for the putting up of the 25 feet of additional deck. We stripped the main deck, leaving only sufficient fore and aft to work the ship, so that she could be docked. We did the same thing to the awning deck, removing all the steam winches, deck hawsers and covering boards. We lifted the boiler out—both boilers; took the engines all to pieces, leaving on board only the condenser, cylinder and bed plate. That is about the extent of the repairs done at Garden Reach during this period. Mr. Bushby was on board six to eight times. We happened to be building new vessels there, and Mr. Bushby had to be there very often. We arranged for docking her at the Caledonian dock. This was done for the purpose of renewing the frames below the boilers and repairing the propeller shaft and sea cocks, as well as sealing the bottom outside and painting her. Not more than four or five plates were put on her when she was in the Caledonian dock, and about 8 to 10 frames. There was also the half of a plate doubled in her bottom. The coiling in the boiler room was all renewed, the working men still working on the different parts of the vessel. She was in the Caledonian dock about two months. Mr. Bushby visited her at least once a week during that time. On leaving the Caledonian dock she was taken back to No. 23, Garden Reach. The work was still carried on, the new boiler put on board, and the engines put together. Repairs were finished at No. 23, Garden Reach. The price of the 200 plates would be about Rs. 3,300. There were about 4,000 feet of running feet of angle iron used; the cost of the angle iron would be about Rs. 2,100, rivets Rs. 840, labour Rs. 4,898-10-3. Besides there is the cost of coals, tools, and supervision. This is the expense we were put to in respect of the iron work alone. The cost of stores and materials supplied daily to the *Sir John Lawrence* from the stores of the Rivers steam workshops, 23, Garden Reach, from the month of September 1883 till June 1884 comes to Rs. 12,303 7-10. The items making up this sum are contained in the book I now produce. Part of the iron work and rivets, already mentioned, forms items in this book also. Besides these materials supplied from the work, there were materials also supplied by the Agents from other sources. The value of these materials so supplied comes to Rs. 11,262-13-9. The cost for the iron work, including labour and the materials supplied, both from the workshop and other sources by the Agents, amounted to about Rs. 28,361-15-10. This sum does not include deck woodwork, main boiler, donkey boiler and new crank shaft. There was spent in respect of laying decks, repairing engines, and fitting new boiler on board, and also fitting new crank shaft and caulking the deck—crew's wages, a sum of Rs. 20,191-6-2—making altogether a sum of Rs. 48,555-0-7. I put the repairs as a whole, including everything, at a lakh of rupees. Rupees 50,000 of this sum was spent on the new boilers and engine-room repairs and rigging. Mr. Bushby made about 15 official visits to the vessel when she was under repairs, and perhaps the same number of unofficial visits. The vessel was lying alongside other vessels which he had to visit in his official capacity. The fee paid for these official visits was, I think, three times thirty—Rs. 90 to the Port Commissioners. There must have been a fee paid to Mr. Bushby for his first official visit in October 1882. I cannot find the receipt for that. In February 1883 the vessel was docked, and Mr. Bushby was paid a fee for that survey. I have got the receipt. When the *Sir John Lawrence* was docked in January 1884, Mr. Bushby was paid a third fee. I have that receipt. There was a final survey in May, and a fee was paid for Mr. Bushby's attendance. I have that receipt. We paid the Commissioners four times 30 rupees. Rupees 30 is the survey fee for a vessel of the tonnage of the *Sir John Lawrence*. Over and above this nothing was paid, that I know of, to Mr. Bushby for the additional visits he paid the ship. I have not a plan of the *Sir John Lawrence*. Since the repairs of 1884 no plates have been taken out or put into the *Sir John Lawrence*. She was not docked in Rankin's dock to my knowledge. She may have been. The height between the main deck and between deck is 7 feet, but I never measured the distance. No report, whether official, or non-official was made to, or by, Mr. Bushby after the final survey, after the conclusion of the great repairs of 1884. There was absolutely no report of any kind made to us. I was present at the survey held in April 1886 and October 1886. I was not present at the survey held in September 1885. Mr. McKellar surveyed the hull and equipment in April 1886. He surveyed the vessel in the usual way. He looked at the boats, I cannot say whether he looked at the scuppers. He generally looked at the windlasses, so I conclude he did on that occasion. He went down below into the holds. I went with him to each of the holds. I saw no rusty frames, stringers, or plates. I suppose he did look at the boats because he generally did so. I never remember a survey when he did not look at the boats. In October 1886 Mr. McKellar did the deck and equipments. He looked at the boats. I say this because he always does so. He passed all the boats. He looked at the windlass. He passed the windlass after the final survey. The windlass I believe was passed on the 26th. The only explanation I can give of the fact that the certificate for that survey bears date the 25th, and that the survey was not concluded till

the 26th, is that the certificate may have been prepared on that date, but not issued. The pumps were examined and passed on that October survey. Some of the pumps were repaired before the 26th October. The tonnage of the *Indore* was about 650 tons. I can't be positive. The *Indore* is a substantially constructed ship. I remember seeing a patch on the starboard bow. I looked at it from the inside in looking round the fore-castle: it was in the fore-castle. We were putting a patch on the port side, and I then noticed the patch on the starboard side. No one called my attention to it. I did not measure the thickness of the plate on which the patch was placed: the plate on the starboard side was quarter of an inch thick. I measured that plate. I therefore presume the plate on the starboard side was about the same thickness. The plates above the main deck were all the same thickness. I remember Captain Irvine very well. Whenever he applied for stores, I invariably supplied all he asked for. I never refused him anything he asked for. He never asked for anything he ought not to have asked for. He was a man upon whose indents I could rely. With the exception of the item relating to lip-guards and the gipsy, everything was provided as asked for before she sailed on the 27th October. The gipsy was being cast, and was, as a matter of fact, supplied on the following voyage. I did not have the pumps connected to the side bilges either. I myself did not think this necessary. A new boat was supplied. A port after boat was taken away, and a serviceable one supplied in its place. This was done in the morning of the 26th: it must have been. It was there—the new boat—before the survey took place. I dismissed Neustein the morning the *Sir John Lawrence* came out of dock. That was the morning of the 28th. He left when Captain Smith joined two days after; about the 25th or 26th. I swear that the new boat was sent on board before the survey. The defective boat only wanted caulking: it had hung on the davits close to the funnel. I remember Mr. Leech being dismissed in September 1886. I gave him a certificate of competency (it was the first certificate I gave him after he was dismissed) to enable him to get a Government appointment. I had given him no certificate, except that one, since the time he was dismissed from the *Sir John Lawrence*. Some time after his dismissal he asked me to give him a certificate—about a month after. I did not give it him. I said I could not very well give him a certificate considering the reasons for which he had been dismissed, but I said I would not stand in his way if an opening offered. I gave him the certificate in March. He came to me and said he could get an appointment if I gave him a certificate, so I gave it him. He was dismissed about a mistake about coal—shortness of coal. There was no dishonesty about the transaction. He got Rs. 300 a month when in the *Sir John Lawrence*. His successor got Rs. 200 only: he was a second class engineer. We did not send a first class engineer with the ship on her last voyage. We sent him in connection with business in Cuttack. His being sent has nothing to do with the working of the *Sir John Lawrence*. It was a very serious matter, sending in a short account of coal. It might have resulted in sending the ship to sea short of coal. There is no etiquette that I know of which prevents either the Chief Engineer, Captain, or Chief Officer speaking direct to the Surveyor about defects or requirements on board, even in cases where the information given by the Chief Engineer might have the consequence of taking the ship off the trade in a busy time for a fortnight. I certainly would not resent his giving the information. I have known many occasions when the Chief Engineer and Captain have mentioned defects direct to the Surveyor, without having been mentioned to me at first—even in cases where I and the officer might differ. As to the necessity for making the alteration or repair, I should certainly not resent such officer appealing against my judgment to the surveyor. Neustein was very insolent. I dismissed him. Mr. McKellar told me of the letter he had received from Neustein. This was before the despatch of the letter by Messrs. Macneill and Company to the Port Officer recalling the certificate granted to Neustein.

To Captain deSmidt.—The *Sir John Lawrence* had compound horizontal engines. The new boiler was of the same size as the old boiler. The thinnest boring I got was, I think, $\frac{1}{8}$ in. These were the plates we doubled. Her rig was not much altered in the great repairs of 1884. We took down one yard. I don't think she had a topsail yard. The topmast and foremast were all one spar. The foretopmaststay we set up to the end of the bowsprit. The bowsprit itself had been shortened considerably. There was six feet of bowsprit outside the ship.

To Mr. Trelawny.—There is no truth in the report that I withheld the certificate ultimately granted to Mr. Leech, because he was supposed to be about to bring a suit against Macneill and Company, or that he was in league with Neustein.

To the President.—Mr. Walker withheld the certificate mainly on the ground that the boiler was defective. His objection had nothing to do with the plates of the ship. If I was commissioned to build a ship of the size and tonnage of the *Sir John Lawrence*, I should put plates into her which would be required under Lloyd's rules.

Cross-examination to Mr. Henderson.—I have planned and built a number of vessels in the port. I have supervised the building of about 30 vessels—inland vessels, iron vessels. Very few of them were actually built out here; they were built at home and erected out here. I have planned and built two vessels out here. I have planned many vessels which have been built at home. This has been part of my duty since I was appointed Superintendent. During the big repairs there was a contract made with one Behari Lall Seal. This is the contract; the work mentioned in this contract was done to my satisfaction. I supervised the work. I saw that the ship was thoroughly scaled, scraped, and cleaned (contract put in and marked (7).) and the various pieces of work stipulated for on the contract carried out; the ship was at Garden Reach and in the Caledonian docks, while the work mentioned in this contract (7) was going on. The contract bears no date, but I can say that the work was begun on the 1st August 1883. This is a bill for the work done under that contract,

put in and marked (8). Mr. Hutcheson was Chief Engineer on the *Sir John Lawrence* when the repairs mentioned in (7) were being carried out; he held a first class certificate; he was a competent man; he gave a certificate as to the carrying out of the work. This is in the handwriting of Mr. Hutcheson—I mean his signature. The red ink writing is in the handwriting of my Baboo, put in and marked (9). There was a dispute about the amount demanded Rs. 1,200 odd in (8).

R. L. YOUNG.

Court adjourned till to-morrow half past twelve.

C. H. REILY.

The 16th August 1887—Robert Lindsay Young Cross examination to Mr. Henderson continued.—Mr. Hutcheson left the service of the Rivers Steam Company. This certificate (8) must have been given before he left. Looking at (8), I say that the chipping and scaling on the *Sir John Lawrence* was begun on the 1st August 1883 and finished on the 1st May 1884. The word scaling is the proper word to use in describing the action necessary to knock off the rust from the plates of a ship. Some people talk of chipping; it means the same thing. In the October survey, 1880, the *Sir John Lawrence* had gone into dock, on that occasion she was not scaled inside. Mr. Neustein did not in that occasion propose to have the outside of the vessel scaled. It is not true that when Neustein proposed to have the outside scaled, he was only permitted to have the paint lightly tapped off with scrapers. It is not true that Captain Irvine was peremptorily forbidden in 1884 to have the inside of the hold scaled. It is not true that in 1885 the *Sir John Lawrence* only received coats of paint over the rust in bad places inside and out. It is not true that the *Sir John Lawrence* was scaled only in places where it was safe to do so. It is not true that in any time after 1883, if the hammer had been used in the forepeak for scaling, it would infallibly have gone through the plate even before 1883. After the big repairs of 1884 we supplied paint to the officers on board, and they painted down the vessel, so I cannot say how many times she was repainted. I had nothing particularly to do with the supervision of the painting after she was painted in 1884. I went on board at the various surveys held after 1884. I observed that the ship was painted both in and out. If the ship had not been properly painted, I would have objected to it. One ton of paint was supplied to the *Sir John Lawrence* in one year 1885 to 1886, October to October, also 152 gallons of paint oil. I got this statement out of the items which may be examined in this indent book which I produce in Court. The amount supplied would be more than sufficient to paint down the *Sir John Lawrence* in and out with two coats of paint; this painting does not include the bottom of the vessel, which is painted in dock. The bottom was painted in the different docks she was in, or the British India dock. The oil and paint for painting the bottom were supplied by the dock people. Whenever a ship is docked her bottom is painted. The *Sir John Lawrence* was scaled both inside and outside in 1884. It is not true that the windlass at any time was utterly useless. I never observed that the gipsy on the starboard side had worn into the board. The first complaint, either verbal or in writing, made in respect of that windlass was contained in that document No. (1). The windlass, however, had been repaired before more than once. I was alluding to the repair made in October 1886; before that date for a whole year no complaint had been made about it. After No. (1) was handed to me, I took steps at once to have the windlass seen to and put right. After the repairs I saw the windlass; it was in thoroughly good working order. A small cast-iron bracket that takes the upright spindle was cracked; the starboard gipsy was set fast on to the spindle; this had gone wrong from the want of attention and the want of oil. The last time I paid particular attention to the windlass was in the survey of April 1887. I have had occasion to examine the chain. It was the Chief Officer and carpenter's duty to look after the windlass. The *Sir John Lawrence* in 1884 was supplied with chains in proper working order. The chains in 1884 were overhauled; if there had been defective links discovered, they would have been put right. Neustein never indented for new chains without getting them. In the October survey of 1886 I saw part of the chain. Between 1880 and 1886 chains were twice or thrice supplied to the *Sir John Lawrence*. If holes had been knocked in the scupper pipes outside the ship by boat hooks or any other instrument, I think I should certainly have noticed it. Previous to the date of document (1) no complaint was even made by Neustein or any one else about the state of the scupper pipes. During the time the vessel was under repairs for the purposes of the survey in October 1886, Neustein did not, except what is stated in No. 1, make any further complaint about the state of the scupper pipes. When (1) was sent in I examined the scupper pipes to see if anything was necessary. There had been lip guards at one time, but the holes have been filled up; there were no old bolts sticking on the outside. We had lip guards cast, but they were found not to be necessary. I never observed that the scupper pipes had been cemented in any way. I do not believe they were. The after scupper leading from the main deck through the hold on the starboard side was not leaking that I know of. Leech did not complain to me about the state of the scupper. I know Gil of King and Company. No bill was ever sent in by King and Company for repairs done to the scuppers. The sending in of the indent (1) had nothing to do with the discharge of Neustein, and in no way influenced me personally. I never told Neustein not to go near the surveyor, because he knew too much about the ship. I never told him that I would get him sacked if he went near a surveyor. I never in any way gave Neustein to understand that if he spoke to the surveyors about the repairs of the ship, it would be the worse for him. A day or two after the 17th October 1886 Neustein did not draw my attention to the dangerous condition of the scupper pipes. He never mentioned the *Vingoris* to me in connection

with these scupper pipes. That is an entire fabrication. It is not true that Neustein whenever he got a chance drove these complaints into my ears; nor in consequence of his having done so did he get into ill-blood with me. Neustein was not dismissed the first day. I had words with him on the 19th. About the 19th October they were taking the propeller shaft out of the hold. I asked him to rig up the necessary locker and to lend a hand to get it over the side. He refused. He said he was a d—d sight too old for this sort of thing. I did not discharge him on that day. I, however, spoke to Captain Irvine who ordered Neustein and then he went to work with a very bad grace. On the 23rd Neustein came to me and wanted the cooking stove repaired. Instead of repairing it I ordered a new one; but during the time the vessel was in dock, he had without orders sent the old one down to the shop, and the new one had not been supplied. On that morning he came to me using very abusive language about it he said: A d—d fine ship this, I have got to build a brick fire to cook my breakfast with. I discharged him. Previous to this nothing had occurred between Neustein and myself to cause ill-blood between us. It is not true that I never paid any attention to Neustein's suggestion about repairs. I paid every attention to them. It is not true that my idea is that nothing nautical has anything to do with the safety of a vessel. I have had to do with the removing of plates from other ships. Plates are tested by boring. That is the method I adopted in the repairs of other ships. Boring is a proper test. I went round with Mr. Bushby when he went round to see what repairs were necessary to the plates of the ship, both at the time when the ship was afloat and in dry dock. The borings came under Mr. Bushby's observation. I was present when he directed what was to be done. His directions were carried out to the letter. It was my duty to see that those directions were carried out. All the orders he gave in respect of repairs connected with other portions of the ship were carried out under my supervision. I have had experience of Mr. Bushby's method of survey since he came here. He and Mr. MacKellar and sometimes he and sometimes Mr. MacKellar survey all our inland steam ships. In my opinion the surveys done by Mr. Bushby and Mr. MacKellar are thorough and satisfactory surveys, the same as I have seen surveys carried on at home. Previous to Mr. Bushby's arrival in Calcutta, I have had no ships surveyed by other surveyors. I do not think there is much difference between the nature of the survey performed by Messrs. Bushby and MacKellar and that done by other surveyors of whom I have had experience. They are not stricter than other surveyors are. It would not be correct to characterise the surveys made by Messrs. Bushby and MacKellar as a "mere walk round." There is not the slightest ground for suggesting that such surveys are mere walks round. If a ship had passed the survey of Messrs. Bushby or MacKellar, I should be perfectly sure that such ship was seaworthy and well fitted and found. To my knowledge nothing has been passed by either of these gentlemen which ought not to have been passed. At no one of the surveys held on the *Sir John Lawrence* was any part of the ship unvisited which could be got at; at a dry dock survey every part of the ship can be got at and examined. On each survey as a matter of fact the plates were examined on all parts of the ship except where the cabins were. The plates were looked at during the surveys. Mr. Bushby always took a light down. After receiving Neustein's letter I looked at, but never measured the thickness of the plate on which the patch was placed. From long experience as an engineer I can make a very accurate guess as to the thickness of a plate by looking at the edge. Had the plate been of insufficient thickness the fact would have forced itself on my notice when I looked at. In my opinion a quarter of an inch would be a sufficient thickness of plate for that portion of the ship, $\frac{3}{4}$ th inches must be sufficient on that portion of the ship; the patch was eleven feet above the water I dare say. It was not possible that the plate on which the patch was put was only $\frac{1}{4}$ th of an inch thick. When I went round with Bushby and MacKellar. I also turned my attention to the plates. It is not true that you could pick flakes of rust off any part of the sides and bottom of the ship. Never during the time I have been holding my appointment of Marine Superintendent was there ever a sound boat supplied in the place of an unsound boat with the object of enabling the *Sir John Lawrence* to pass his survey. During my time no boat was borrowed from the *Medina* to put on board the *Sir John Lawrence*. I was present at two surveys in 1886. Previous to the survey of April 1886, I did not see an utterly useless boat on board the *Sir John Lawrence*. An utterly useless boat did not pass the two surveys of April and October 1886. After the survey of 1886 no rotten boat was returned to the yard. During my time there never was a rotten boat on board the *Sir John Lawrence*. The jolly boat was never patched up with pitch just to bring it alongside. In October 1886 a sound boat was taken on board the *Sir John Lawrence*. I can't say whether that was the only boat which was changed on board the *Sir John Lawrence*. During the surveys boats were put into the water. I have seen this done myself. I have no doubt of this. Sometimes all the boats, at others not all the boats, were put into the water. The jolly boat was not often put into the water at surveys. When a boat was not put into the water, it was nevertheless examined by the surveyor to see if it be in good order. He always looked at the boat and its fittings. The canvas hose I know was changed from time to time on board the *Sir John Lawrence*. I have seen the port after boat; it was the port after boat which was changed in the survey of 1886 (October). I saw the rails examined on the awning deck. The awning stanchion was secured by bolts and coach screws. The screws were not torn out by the weight of the awning. It was not possible in ordinary wear and tear for the screws to be torn out. It is not true that the covering boards were rotten; they were new in 1884; they were made of teak; teak could not rot in three years. The rails in the wake of the main hatch were not unsafe. Nor the rails on each side of the gangway opposite the main hatch, the gangway stanchion properly secured. It is not true that in consequence of the screw of the stanchion having been torn out, the

water got into the holes. No complaint was ever made by Neustein about the state of the stanchion and the rails of the awning deck. It is not true that the rails in the spar deck were all loose. It was not in my opinion necessary to have the pumps connected with the side bilges. I would have heard if any complaints were made of damaged cargo; there were none that I heard of. In 1884, 25 feet deck was added. The 25 feet of deck was compensated for by taking down the deck house. The repairs and alterations left the ship in my opinion very much where she was as to stability. Captain Irvine never complained of her being top heavy or crank; he had been in command of her before the repairs of 1884; he never complained of an increase of rolling, so far as I know he was perfectly satisfied with the ship. It is not true, beyond the ordinary cleaning up, that eye wash was used previous to the surveyor coming on board. None of the paint was used to brush away defects in the ship. Covering up rust or anything of that kind, you cannot hide a rusty plate by putting paint on it—paint on the contrary only makes the rusty plate more liable to detection. I remember the condenser. All tubes were drawn in the repairs of 1883-84. The condenser cleaned out, the tubes were tested with water pressure and the defective ones renewed. If the condenser were defective, the consumption of coal would be greater. It is not to the interest of owners to have defective condensers. When the *Sir John Lawrence* went to sea last the condenser was in thorough working order. It is not true that Bushby never went down the hatches or that he merely looked down the hatches in making a survey. Both these statements are false. I was present at the survey made by the direction of the Port Commissioners in consequence of Neustein's letter to Government. That survey was made with special reference to the strictures made in Neustein's letters on the condition of the *Sir John Lawrence*. Each matter referred to in Neustein's letter was separately examined. Except the encroachment on the passenger space, none of Neustein's charges were correct. As to the encroachment his statements were exaggerated. The frames on the *Sir John Lawrence* were closer than ordinary. They were about 18 inches apart. The usual distance might be 21 inches. I never induced or endeavoured to induce either Mr. Bushby or Mr. MacKellar to pass over anything that ought not to have been passed over while making surveys of the *Sir John Lawrence*. I never endeavoured to induce them to withdraw recommendations for repairs which they may have been inclined to make. I remember the pumps being tried by Mr. Bushby by water being poured down. I do not remember any occasion when the pumps would not work when so tested. The pumps were in proper working order in the April survey. I have every reason to believe they were in perfect working order on her last voyage. When the cement was taken out below the boiler, the bloom was still on the iron we bored the plates all the same. There are store bills of materials supplied to the *Sir John Lawrence* from 12th July 1886 to 9th December of same year, put in the bundle marked (10). These indents date from 5th May 1885 to 31st December 1885. Every item mentioned in these indents was supplied except those scrubbed out with blue pencil, put in and marked (11). There are similar indents some for 1886 and some for 1887, to which the same remark applies, put in and marked (12). Looking at this bill I can say that 45 fathoms of $1\frac{1}{2}$ inch chain cable was sent on board the *Sir John Lawrence* on the 16th November 1886. This was sent to supply the place of another length of chain. There are bills for materials supplied by Burn and Company to the *Sir John Lawrence*, October, November and December 1886, put in and marked (13). These are Howrah docking bills for October and November 1886, marked (14). These are bills for docking and other charges and for materials supplied from England for the *Sir John Lawrence* from February 1883 to February 1884, marked (15). This is a bill from John King & Co., for work done on board the *Sir John Lawrence* after the collision in 1886, put in and marked (16).

R. L. YOUNG.

Court adjourned till Thursday next, the 18th instant.

C. H. REILLY.

The 18th August 1887—Robert Lindsay Young. Cross examination continued to Mr. Henderson. I dismissed Leech. At the time I dismissed him there was intention in my mind to put Mr. Ogg in his place or a man on a reduced salary. No consideration of that kind had anything to do with dismissing Leech. There was no suggestion here made to me by Macneill and Company or any one to get rid of Leech, or order to get a cheaper man. I had known Captain Irvine from 1879. He treated his passengers well.

Re-examination to Mr. Kilby.—The ton of paint and 52 gallons of oil were supplied on twelve different occasions throughout the year October 1885 to October 1886. The bulk of that supply was not supplied in October 1886. The indent put in will show the approximate time when this paint and oil was supplied. Such part of the chain I saw was all right. The part I did not see I never heard to be defective. The 45 fathoms of chain supplied on 16th November 1886 was to the best of my belief to take the place of an anchor and part of a chain lost at Chandbally. The anchor and chain must have been lost after Neustein left. I did not think the lip-guards necessary, except for throwing the water off. Both the surveyor and I always examined the sea connections of the engines. I do not remember how long the after port boat had been on board the *Sir John Lawrence* before I had it taken away in October 1886. It must have been on board when I came back in 1885. The boat which replaced the after port boat was an inland steamer boat. I have never built a sea-going steamer. I would not like to risk the steamers I build in a voyage to Chandbally during the monsoon. I do not know how Mr. Bushby got his information about the thickness of the plates on the *Sir John Lawrence*. He went on board with me after the plates had been

bored. I cannot say how he remembered the details. I kept no memorandum of the thickness of the plates. The hull of the *Inders* projects from 8 to 9 inches beyond the stringer plates of the upper deck. The *Inders*, at her stern, when loaded would be about 4 feet out of the water.

To Mr. Henderson.—It is quite possible, judging from the build of the *Sir John Lawrence*, for the upper deck of the *Inders* to have struck the *Sir John Lawrence*, while the hull never touched her at all. The forepeak of the awning deck on the *Inders* ended in a sharp point—a triangular plate to which the two angle-irons on the sides are rivetted.

R. L. YOUNG.

Duncan McKellar—Sworn oath to Mr. Kilby. I am Lloyd's surveyor to this port. If I were surveying a ship either for the purpose of classing or to see whether she were worth repairing or not, I would first have her placed in dry dock. I would have stages made outside and inside all round the ship, and have all ballast and cargo removed and the holds cleared. I would have a portion of the ceiling removed. I would have the plates and angles scaled of all rust and oxidation, outside and inside. I would then examine the plates and angles, try them with a hammer, and when I thought the plates were thin, I would have holes drilled through to ascertain the thickness. I would examine the cement in the bottom to see whether it were sound or broken and whether it was adhering to the iron. I would examine the decks, if wooden decks and appeared to be worn. I would have holes bored through to ascertain thickness. I would examine her windlass, and her rudder and steering gear. I would have her engines, if a steamer, examined by an Engineer-Surveyor, I myself doing the equipments. I would keep a note of the condition of the plates and angles, deck and equipment. If I was surveying the vessel for classification, I would report all those particulars to Lloyd's. If I was surveying for another party to see whether the ship was worth repairing or not, I would report to them what I thought was the condition of the ship in writing. Unless I was asked to do so, I would not set out particulars of any survey. If the owners decided to repair the ship, then I should recommend what repairs should be done in detail. I should say so many plates or angles—specifying them—are to be changed. In that way I would specify everything that was to be done to the vessel. You must have stages to examine the outside of a ship. I should say the class at Lloyd's A 90 would be quite sufficient for a vessel engaged on the Chaudbally passenger trade. The plates for a ship of 460 tons net should, according to Lloyd's rules, be $\frac{7}{16}$ of an inch thick amidship and $\frac{1}{2}$ forward and aft. This is when the ship is new. The scantling 20 years ago was a good deal heavier. Unless one-fourth of the thickness was worn away, it would not be necessary to change the plate. If the vessel was taken care of and the plates protected, the plates here and there would want renewing. It is a proper procedure to double instead of renewing a plate. I often do so myself. The plates used for poop and fore-castle might be one-fourth thinner. The gar-board strake ought to be $\frac{7}{8}$ when the ship is new to satisfy Lloyd's requirements for class 90A; the sheer strake $\frac{1}{2}$, the bilge strake $\frac{3}{4}$. From the gar-board strake to the sheer strake $\frac{7}{8}$. I never surveyed the *Sir John Lawrence*. I measured her holds in May last in order to ascertain her carrying capacity. The holds seemed to me in good condition, properly painted. I did not notice any rust. I was on ten or twelve occasions on board the *Sir John Lawrence* in May last. I do not remember being on board in any other time. When I saw the ship in May she seemed a sound good ship. I took my last measurements on the day before she started on her last trip. I was down between decks and in the lower hold. As far as I can remember, she was closed in from the engine-room right forward, so as to be protected from the weather in case of a cyclone. I think a thousand people in a cyclone could take refuge in the main and between decks. I did not look at her equipments, but she did not seem to be in bad order anywhere. She did not strike me as being skimpy in any way. The Mate was with me most of the time I was making my measurements.

To Captain de Smidt.—The poop and topgallant fore-castle plates might be one-fourth of an inch quite safely. A plate between the guard-room and sheer strake, I should say, should be $\frac{7}{8}$ when the vessel is new.

To the President.—I knew Captain Irvine, but not intimately. My impression was that he was a steady, careful man, who did not drink and was a good commander. I had known him ten or fifteen years.

Cross-examination to Mr. Henderson.—I was down in the hold of the *Sir John Lawrence* on each occasion I visited her. If the plates had been rusty, I must have noticed it. If the angle-iron frames had been worn, I would have noticed it. I did not notice either that the plates were rusty or the angle-iron worn. In surveying for measurement as to capacity you do not take into consideration the strength of the ship. When I survey for class at Lloyd's it is for four years. The *Sir John Lawrence* at one time was classed at Lloyd's. Originally she was classed *A.A. the star means that the vessel was built with heavier plating than that required by the rules at the time she was built in 1865. The plating required in 1865 was heavier than now required by Lloyd's rules for the same class of vessel. The *Sir John Lawrence* continued till 1879 in the class *A.A. She was taken off her class in 1879 at the request of her owners—Messrs. Macneill and Company. This letter is a copy of one preserved in my office. I have compared this letter (Put in, marked 17). In 1877 Mr. Stewart was Lloyd's Surveyor. I produce the survey of 19th October 1877 held by Mr. Stewart. I produce the copy kept in our office. This is Mr. Stewart's signature. (Put in certificate marked (18) and report marked (18¹). Taking into consideration

the general condition of the *Sir John Lawrence* as specified in report (18¹) of 1877 and the thickness of the plates at that time, I do not think it likely that the same plates in 1887 in the fore part of the vessel could be under one-fourth of an inch below the main deck. The borings specified in (18¹) were made below the main deck. Sometimes we bore the fore-castle head plates I knew Mr. Stewart. He was a careful surveyor, and a man thoroughly competent for the post. In 1865, when the *Sir John Lawrence* was built, in order to comply with the rules applicable to the class in which she was fixed, she should have 18 garboard strake, from garboard strake to upper part of the bilge, and the sheer strake & from the upper part of the bilge to the steer strake $\frac{1}{8}$. The star shows that the *Sir John Lawrence* must have been built with heavier plating than the figures I have given. While I was on board the *Sir John Lawrence* neither the Ma'e nor any one else made any complaint to me about anything being wrong. I have been associated with Mr. Bushby in making surveys more than once. In my opinion Mr. Bushby carried out the surveys in a proper and efficient manner. I had no reason to believe that he conducted the surveys in which he was associated with me in a perfunctory manner—quite the contrary. I have no reason to believe that Mr. Bushby does conduct surveys in this port in a perfunctory manner. I don't think making notes have anything to do with the efficiency of a survey: they only serve for future reference. I have had to do with surveying ships under the Native Passenger Act. I have granted declarations under the Act. These declarations can only be granted after a proper survey, and should be a record that proper survey had been made. If I were called upon to survey a passenger steamer under the Native Passenger Act, 1876, for the purpose of seeing whether a certificate should be granted, all I should do, if I found her in proper order and seaworthy, would be to sign the declaration required by Act. I should deem it necessary to send a report of a survey held by me on the direction of the Port Officer under the Native Passenger Act to the owners of the vessel. If directed by the Port Officer to make a survey, I should report that survey to the Port Officer alone and not to the owner.

D. McKENZIE.

Robert Bushby.—Recalled by Mr. Kilbey.—I have no memoranda of the details of the thickness of the various plates. I am trusting to my memory alone in giving those details. You must remember I made a very careful survey of the *Sir John Lawrence*—the last survey of all, shortly before she went down. I did not bore any of her plates on that occasion.

To Mr. Henderson.—When I bore plates, I do so to ascertain whether they are thick enough. When I pass the plates as thick enough, I do so with reference to some standard, and I would not pass the plates unless they came up to that standard. In regulating the standard, I take into consideration the service for which the ship is intended. By this means I am in a position to say that plates on a certain ship I have passed are not in certain places below a certain thickness. That is how I am in a position to state that the plates in the *Sir John Lawrence* were of the particular thickness in the different parts of that ship as stated by me.

ROBERT BUSHBY.

Court adjourned till to-morrow.

C. H. REILY.

The 10th August 1887. John Simpson sworn, oath to Mr. Henderson.—I am Foreman to Messrs. John King and Company, Shipbuilders and Iron Founders. I remember the *Sir John Lawrence*. I have been many times on board the *Lawrence*. I think it was in June 1885, I went on board her after a collision. We fastened a patch on the starboard side just above the main deck in the forepart of the ship in the fore-castle. The "rage" had been cut when I saw it; it was about 16 inches square; the patch had been previously bolted on. We rivetted the patch. I thought the plate was quite thick enough to put a patch on. I have had experience in putting plates on. I have thirty years experience as shipwright and apprentice. I have no doubt the plate was thick enough for that patch. The plate was not less than $\frac{1}{4}$; it may have been a quarter of an inch. The plate was in a good state of preservation. Rivets were put through the frames as well as the plate. In my opinion after that patch was rivetted the plate was perfectly safe, and the ship, so far as that patch was concerned, seaworthy. I think the space between the frames were between 20 inches to two feet, I cannot say. I never measured them.

Cross-examination to Mr. Kilbey.—The patch was over two feet. The plate was rivetted to one frame not to two frames, the plate was two feet to two feet six, square. It was such a long time ago, I do not remember exactly. I am not sure whether the plate was rivetted to both frames. What I think was that it was rivetted to one frame, and to the plate on the other side with a strap at the back to take the rivet. I remember using a strap. The ship was painted red below and black above, the patch was on the black. I am sure of that. The scaffolding hung from the ship's side. I used to go in my own boat and get on to the stage from the top of my boat's cabin. The stage was a permanent stage, I had a considerable distance to step up from the top of my boat to the

stage. The ship was not very deep. I cannot say the depth of water she was drawing. She was in the usual trim. She was sufficiently trimmed to go to sea. She was a little heavier than ballast trim. The scaffold was about my middle, as I stood on the cabin. The top of the cabin was about four to six from the water. The hole was eighteen inches or so above the scaffolding. I am quite sure the patch was in the fore-castle. I am positive I did not go below the fore-castle into the fore-speak. I remember there was the ordinary coating of paint on that plate. The *Lawrence* was kept just like an ordinary vessel in the trade.

Re-examination.—She was as well kept as any other vessel.

JOHN SIMPSON.

19th August 1887.

Minden Augier, sworn oath to Mr. Kilby.—I was appointed to a post in Chandbally, Sub-Deputy Collector, Customs Officer, with powers of a Deputy Collector under Act of 1878. In addition to this, my predecessor, Mr. Chapman, was Inspector of Chandbally Police. I was nominated to the duties of Inspector by the Magistrate, Mr. Trevor Grant. I took over my Chandbally appointment at Chandbally on the 18th March 1886. I took over temporarily the charge of the Inspectorship of Police from Mr. Chapman on the same day. Mr. Chapman held all the other appointments also. At the end of May 1886, Mr. Grant asked me to submit the usual application to him to be appointed Inspector. I never ceased doing the work of the Inspector. I was obliged to do this, as there was no other officer to do it. From the 18th March the same Inspector under my direct supervision counted the Chandbally passengers as they came and went. I left Chandbally on the 30th July on sick leave. During the interval between the 18th March 1886 and 3rd July of the same year Mr. Palmer had nothing to do with the counting of the passengers to the best of my knowledge. I was in no way subordinate to Mr. Palmer; they were two distinct departments. Mr. Palmer was Honorary Magistrate. As such Magistrate he did have a certain control over the police in respect to cases which happened on land; he had no control over them in regard to passenger counting. I received verbal instructions pending the ratification of my appointment by the Inspector-General of Police, both from the Magistrate of the district and the Commissioner to carry out the duties of Inspector of Police with regard to the counting of passengers only. I endeavoured to carry out these duties to the best of my ability always. Soon after I returned from Balasore, after seeing Mr. Trevor Grant, my suspicions being aroused, I determined to do the counting myself. On the 21st June the first vessel which came in was the *Curlew*. I boarded her and found she had excess passengers. I found she had 610 passengers on board; she was allowed to carry 560. She had therefore 50 excess passengers; but the Captain challenged this counting. I had no means to test the accuracy of the Captain's statement, as the passengers had disembarked, and as he admitted to having 23 excess passengers on board I reported him to Mr. Trevor Grant, my immediate superior. Mr. Trevor did nothing to my knowledge on that report. The next vessel was the *Sir John Lawrence*; she came on the 24th June. On the morning of the 24th, as I looked down the river, the *Sir John Lawrence* not having come in, I noticed about two and a half miles from her mooring place the masts of the vessel evidently at anchor. The whole day passed (I had noticed this about 7 A.M.) till 3 o'clock P.M., when I saw Captain Bulloch's launch, called the *Jack*, leave her moorings and silently floating down the stream. She did not blow her whistle. She ought to have done so, and had always done so previously. In the course of about two hours the *Jack* returned with a crowd of passengers. I immediately sent two constables to count her passengers, while I went with two others on board the *Lawrence*, which had followed the *Jack* up the river. I met the *Lawrence* and went on board at the jetty. The two constables I had sent I saw board the *Jack* at her usual mooring place. I went on board and sent for Captain Irvine and also the Agent, Juggobundhu Baboo. I then asked Captain Irvine to keep tally with me. Captain Irvine and the Agent as well said it was useless giving this trouble, for there were no excess passengers on board. I insisted upon the Captain keeping tally with me. We counted the passengers, and our tally agreed; there were 561 passengers on board the *Lawrence*, whereupon both the Agent and the Captain declared that I had given them unnecessary trouble. By this time the counting of the passengers on the launch *Jack* was reported to me.

Question.—Was any report made to you on that day or at that time by the police you had deputed to count the passengers on board the *Jack*?

Answer.—Yes.

Question.—Did they report to you at the time the number of passengers they had found on the *Jack*?

Mr. Henderson objects.

I think under the circumstances of Mr. Henderson's objection I must disallow this question.

Examination continued.—After getting that report I spoke to Captain Irvine on the subject.

Question.—What did he say?

Mr. Henderson objects.

Objection overruled.

Answer.—He merely said to me that he was obliged to get the assistance of the launch in consequence of her having run on the sand bank to lighten her weight by removing a certain amount of her passengers, and he admitted the counting on the launch. He said the counting on the launch was about right. I had told him the number on the launch reported to me.

Examination continued.—I reported the matter to my official superior, Mr. Trevor Grant. I have a copy of the letter I sent to Mr. Trevor Grant with me. I produce it. I made that copy at Chandbally from the original on the same day that I despatched the original. I compared this copy with the original after I made it. It is a correct copy.

Mr. Kilby tenders the copy.

Mr. Henderson objects.

Objection upheld.

Examination continued.—Shortly after this report had gone in, I received a copy of a letter. I have the letter by me. On the occasion of last year's cyclone, the 17th or 18th of June, I was standing on the wharf at Chandbally with the Commissioner Mr. Metcalfe. At that moment the *Laurence* was coming into Chandbally. Mr. Metcalfe's son was a passenger by that vessel. The *Laurence* appeared to me overcrowded. I got instructions from the Commissioner. I superintended the counting of the passengers, which was done by Sub-Inspector and head constable. I asked for the usual report and got it in writing. I doubted the statement I received. I went over to the Agent's office; then Juggobundhu Babu showed me a letter.

Question by the President.—From your experience gained as an Inspector of Police at Chandbally, and officially responsible for the counting of passengers arriving and departing in the steamers at that port, give me the conclusions you have arrived at as to the nature of the manner in which that counting is done.

Answer.—I have no hesitation in saying that there is no reliance to be placed upon the report of the subordinate police staff, and from the nature of the system it can never be satisfactory.

Examination continued.—When the ship arrives very often at midnight, passengers may escape from all sides of the vessel without being detected. The Sub-Inspector, head constable or policemen keeping tally are very likely to make a mistake. When passengers disembark they do so over a stage erected between the vessel and the wharf. The stage is six feet wide and there is a general rush—sometimes one, sometimes six abreast, all pushing to get ashore. The counting is done by a single man, and at the conclusion of the counting he reports what he likes. There is no means of either checking his counting or establishing a prosecution against the Captain. In the case of departure from Chandbally it is a common practice for passengers to go aboard when the vessel has left the wharf and is in mid-stream; the police having returned after the final counting. I have also noticed passengers go aboard when the vessel has proceeded about 500 yards down from its mooring place, and I have drawn the attention of my superior to the fact. I have documents now in my possession here, on which I base the allegation I have made as to the manner in which the counting is performed at Chandbally. I have been backwards and forwards to Chandbally about ten times. I returned the last time in the *Laurence*. There was not as many pilgrims as usual. When I went aboard it was in the slack time in November. In the *Sea Gull*, on one occasion, it took one half an hour to get a distance of sixty feet on the lower deck, it was so crowded. The passengers were closely packed, jammed so close together, there was no lying down room. Not a single passenger on that deck could have laid down. The *Sea Gull* generally does the passage in 14 or 16 hours. In the foul weather season she could not do the passage in that time. On dark nights the steamers have to anchor in the river; then she would take 28 hours. I have noticed very many cases of passengers, after disembarking from all the ships, die from exhaustion caused by sea-sickness, or whatever else, half an hour after they landed. Last year, between June and July, in one day I counted as many as 18 dead bodies; these included dead bodies of persons who had been brought from Puri to the *Laurence*. During the pilgrim season, which begins about the middle of May and lasts till about the end of September at least, that was the last year, I saw at least 100 dead pilgrims a month; this was the case from the beginning of June to the end of July. These pilgrims include those which came from Puri and those which came off the ships. A good number of pilgrims die who come off the ships. There is no inquest held on these dead bodies; the police I believe make the usual report. I was not dismissed from the Government service for withholding Government money. I have not been dismissed. I was removed from the service at Chandbally. On the 30th July I left Chandbally on sick leave. At the time I had in my possession a sum of Rs. 300 entrusted to me; about this sum. Not having received any orders what to do with this money, and being too ill to transmit it from a treasury 45 miles off, I sent for a native assistant and told him that I would take this money with me to hospital. I did so. I brought the money to Calcutta. I got 10 days' casual leave. Eventually I paid Mr. Trevor Grant the money. I had previously informed Mr. Grant I had the money by me. I put in two certificates I have received from the Government. (T) and (V).

Cross-examination by Mr. Henderson.—I was removed; my services were dispensed with. If an officer is dismissed the Government service he has no hope ever to regain admission. I was only "removed." The letter telling me that I was to cease serving Government as Sub-Deputy Collector of Chandbally is at Serampore. I could produce it by Monday. I am suffering from pleurisy. I obtained casual leave from the Commissioner through Mr. Grant. I went to Balasore on the 27th August. I had been 10 days in

Calcutta when I got a doctor's certificate from Mr. Orenbie for a month. I got no further certificate. I was not in hospital. I was an out-door patient. I visited the hospital daily. I was not arrested when I got to Balasore. I have never been arrested by the police. My account books were at Chandbally; pending their arrival I had to find bail in the sum of Rs. 500. When the books arrived, and when done with, I was told I might go back to Calcutta. Mr. Trevor Grant made the order directing bail in Court. I went direct to Court from the ship. I signed no bond. Mr. LePatourel of the steamer pilot, stood bail. He is still my friend. The sum was Rs. 318. I handed that sum to Mr. Trevor Grant. According to Mr. Grant's reckoning my accounts were about Rs. 282 short, but there was a difference of opinion between us. Captain LePatourel lent me the Rs. 282. I handed it in under protest. This Rs. 282 was not a part of the Rs. 300 I paid to Mr. Trevor Grant. I have repaid Mr. LePatourel the sum of Rs. 282 which he lent me to pay Mr. Trevor Grant. I appealed to Government, and the Government refunded me Rs. 282. Before appealing to Government I never applied to Mr. Trevor Grant for the return of that money. I gave LePatourel a piano for the Rs. 282 he lent me. When I said that I had repaid Mr. LePatourel in money, I meant that I had repaid him the full equivalent of the Rs. 282 by the piano which he wanted. I paid two sums to Mr. Grant—Rs. 318 on one day and Rs. 282 on another day. Captain LePatourel was in Calcutta the day before yesterday. The piano transaction was an out and out sale. I swear it was not handed over to Captain LePatourel as security, a *bond-fide* sale. He has never either written or spoken to me on the subject. I served the Government originally as Assistant Sub-Deputy Opium Agent. I was on the supernumerary list. My services were not dispensed with in that department. I never served Hoare, Miller and Company, nor the Calcutta Steam Navigation Company. I cannot say whether I did apply to Hoare, Miller and Company for work. I was never in the service of the East Indian Railway Company. The native I told about my taking the money with me is named Baboo Jan. Mr. Grant admitted that he had seen that letter. I know Captain Palmer. I never saw Captain Palmer interfere in any way with the counting of the passengers. It is not true that the police have to report any excess to him, and have done so right through. I made two reports to Mr. Trevor Grant about the counting of passengers. I insisted on the removal of the Sub-Inspector because I reported him. He was removed in consequence of my report; no other policeman was removed on that report. I only reported against the Sub-Inspector. I emphatically deny that I had nothing to do with the counting the passengers at Chandbally. I certainly did not clear out of Chandbally because the place was made too hot for me. I got Sunday and holiday fees. I never drew the extra salary of Rs. 50 a month, though the appointment comes to that sum. It was never notified to me that I should get that sum. I did apply for that sum. Juggobundhu Babu did not tell me that neither he nor Captain Irvine were allowed to pass excess passengers. I swear that he never told me that there were orders of the Agents against carrying excess passengers. The Babu never mentioned the Agents to me at all. I have not the faintest recollection of having either verbally or in writing stated that the Agents prohibited the carrying of excess passengers. I did not wear uniform as a policeman. If I had stated it in any report that would be true. The Sub-Inspectors were never charged with bribery in any court that I know of. I was supposed to keep a diary, but I do not do so, because I had not a copy of it. I kept the written reports; filed them in my office. The documents I have with me I did not take to hospital; it was in my office in Chandbally. My office is my bungalow. I removed those papers from my office. I removed nothing that had been filed as part of the records of the office. The papers I have with me are mine. I have seen a ship arrive at midnight I should say about fifty times from the 18th of March to the 18th November. When I was strong I went down to meet these midnight arrivals. When I was ill, I depended upon the Sub-Inspector. I first took ill about the beginning of May. I applied for leave immediately but did not get sanction. The suggestion was from Mr. Grant that I should perform the duties of Inspector. On the 18th June as reported by the Sub-Inspector the *Sir John Lawrence* carried 618 passengers, on the following week 24th June 678 passengers, on the week following the 24th June I cannot give you the number. I kept special note of the 18th and 24th June, because I had doubts at the time of the reports made me by the Sub-Inspector. I saw two dead bodies thrown out of the *Cocnada* on one occasion. I saw a body also on board the *Sea Gull*. I made no report of the dead-bodies I saw.

MINDEN J. W. AUGIER.

Case adjourned till Monday next.

C. H. BAILY.

The 22nd August 1887 Minden Augier—Cross-examination continued to Mr. Henderson. I produce the letter of Government directing my removal dated 19th October 1886, put in and marked (19). There was a Deputy Collector and Magistrate named Davidson at Bhadrach, 45 miles away. Deputy Collector Davidson was not my immediate superior. When I took sick leave I received no instructions from Mr. Davidson to await his arrival; I can swear that no instruction reached me which I saw telling me to await the arrival of Mr. Davidson. I understand that Mr. Davidson arrived the day after I left Chandbally. The piano was not under hire from Harold and Company or from any other Company. I bought the piano from Greenwood and Company about May 1886. The price was Rs. 450. I agreed to pay

Ra. 50 a month. I paid two instalments when my trouble came upon me. I still owed Greenwood Ra. 850. I did borrow money from a man named Mohamed Bhoj Badamjee, he holds; a hand note of mine. I did not borrow money from Golam Mohammad; I did receive Ra. 100 as a deposit from the sirdar of the Chandbally hat, and I credited it to Government; that Ra. 100 was part of the Ra. 318, I delivered to Grant. I did not ask Juggobundhu Baboo to get up a memorial on my behalf I asked no body to do this. When I came back from sick leave the Sub-Inspector I had reported against was gone. This letter was sent me for my information by the Sub-Inspector of Police at Chandbally, put in and marked (20) After the receipt of this letter I ceased to act as Police Inspector as far as counting passengers was concerned, the letter got to me some time between the 10th and 12th July. I never heard of any decrees for execution sent to Chandbally against me or even to Balasore.

MUNDEN J. W. AUGIER.

Donald Fraser Mackenzie sworn saith to Mr. Kilby. I am a partner in the firm of Messrs. Macneill and Company. My firm were proprietors of $\frac{1}{2}$ of the *Sir John Lawrence* at the time she foundered. Mr. William Mackinnon was proprietor of $\frac{1}{2}$ and Duncan Macneill and Company were proprietors of $\frac{1}{4}$, that propriety was for September 1884 to date. From November 1875 to July 1881, Macneill and Company of Calcutta were proprietors of $\frac{1}{4}$, British India Steam Company $\frac{1}{4}$, Duncan Macneill and Company $\frac{1}{4}$. From August 1881 to August 1884, Macneill and Company, Calcutta, were proprietors of $\frac{1}{4}$, British India Company $\frac{1}{4}$, Duncan Macneill and Company $\frac{1}{4}$. We bought the *Sir John Lawrence* from Mr. Shepherd of Bombay. I cannot tell you what William Mackinnon and we paid the British India for their share. The transfer was done at home. The price of the $\frac{1}{2}$ we bought was also arranged at home. I cannot tell you what we paid. According to my calculation from documents in the possession of my firm, we spent Ra. 95,000 on the repairs of the *Sir John Lawrence* in 1883-84. The *Sir John Lawrence* was insured at the time of her loss for £5,000 at home. I am not aware of any survey being held on the *Sir John Lawrence* for the purpose of this insurance, nor am I aware of their being any necessity for such survey. I produce the pay sheet and postage bill from it. I can say that in the month of March 1887, that the *Sir John Lawrence* carried 31 deck crew and 22 engine-room crew, the April pay bill went down in the ship; I believe there was no material variation in the number of the crew mentioned in the March and April pay bill. The deck crew consisted of the master, mate, clerk, Chinaman carpenter, butler, two cuddy servants, one cook and cookmate, one saloon topaz, one deck serang, one tindal, ten lascars, two deck topazes, three seacunnies, one leadman, one bhundari, or sailor's cook, and one pannewalla. I was not in Calcutta when the great repairs of 1883-84 were undertaken. I do not know therefore what the negotiation were which preceded the decision that she should be repaired. A sum of money was paid to Mr. Bushby by our firm for his professional advice as to the requirements of the Board of Trade in regard to the alteration on the hull of the vessel. Mr. Young was Superintending Engineer, who carried out the repairs not being cognisant what those requirements were. The honorarium paid to Mr. Bushby was Ra. 1,000. All fees were paid to the Port Commissioners. The tickets sold on the last voyage made by the *Sir John Lawrence* were as follows:—

For accommodation in after saloon (zenanah)	10
Second class passenger or saloon	1
Third class Nos. 5836 to 5837	2
5840 to 5857	718
5765 $\frac{1}{2}$ ticket	$\frac{1}{2}$
			731 $\frac{1}{2}$
Less No. 5316	$\frac{1}{2}$
			731
Deduct refunded ticket—			
6125 to 6135	11
6356	1
6431 to 6433	3
6357 to 6361	5
One ticket torn up	1
			21
			21
			710

Of the 710, some 30 or 40 passengers were allowed to proceed by the *Mahratta*. No note was kept of the number of these tickets. The license number was 735. She was therefore short of 25 passengers apart from those which went by the *Mahratta*. The Captain would report to Mr. Currie the money collected on board from passengers without tickets. Commanders have instructions not to leave port with an excess number of passengers on board, and as a natural consequence of those instructions, the Commander would not lift anchor so long as he had an excess number on board. I should not myself necessarily be aware what the sum would be the Captain might pay in as received from passengers who had gone on board without tickets. We continue selling tickets till the evening of Tuesday. Before closing the office we advise the Captain as to the number sold, and if there be a margin, the Captain is authorized to receive passengers on board without tickets till the number representing the margin is exhausted. The money paid into the office by the Captain through Mr. Currie would be entered, or received, "from Captain Irvine deck freight account *Sir John Lawrence*," there are such entries I believe. I have not looked specially for them.

The court rose for lunch.

* *Donald Frazer Mackenzie Examination continued.*—By reference to our cash sheets during the interval when the court rose, I have ascertained that the entries are made as above. These cash sheets do not refer solely to the *Sir John Lawrence*, but to the above cash transaction of our firm. My head book-keeper showed me these entries. I saw two entries, one in the subsidiary book and one in the cash sheet. I did not observe the amounts particularly, it was a small amount. I would not necessarily be likely to know the fact if the Captain at any time did receive moneys from passengers who did not buy tickets. We keep a register of tickets issued for each voyage. I produce the register. The register dates from 5th January 1885 to 6th July 1887. During this time, in my belief, no instances occur when tickets were issued by my firm in excess of the maximum license number at each season of the year of passengers on board the *Sir John Lawrence*. It has never come to my knowledge that passengers in excess of the authorized licensed number were carried by the *Sir John Lawrence*. On the 18th of May 715½ tickets were sold to passengers for the *Sir John Lawrence*. The Captain collected about Rs. 100, but I won't swear to the actual amount. I only looked at the entry casually. I could not tell you how many or if any passengers paid money to the Captain, it is quite possible that the sum mentioned was obtained on freight alone. The Captain would have nothing to do with cargo charges excepting deck freight. The Captain would pay his collections to us in Calcutta. Not so far as I know have we as owners nor Captain Irvine been fined for carrying excess passengers. Except the Captains tally we kept no check on the number of the passengers actually landed at Chandbally or in Calcutta. Absolutely no commission was paid to the Captain in respect of passengers who went on board without tickets or for anything else. These documents are signed by Mr. Currie on behalf of the firm, put in and marked (V). These two documents are also signed by Mr. Currie on behalf of my firm, put in and marked (W).

To Captain deSmidt.—The *Sir John Lawrence* was insured at home, but how the knowledge of the risk was obtained, I am unable to say. As far as I know no report was sent from Calcutta of the condition of the vessel with the object of effecting that insurance. I do not know what suggestion Mr. Bushby made as to the proposed alteration in the hull. Our boats are surveyed under the Indian Passengers Act, I believe.

To Mr. Treloany.—Captain Irvine stood very well with our firm. I have made several voyages with him and never saw him drink anything stronger than gingerada. I most certainly never saw him under the influence of liquor at any time, and I believe him to be thoroughly kind and considerate to his passengers, he was a regular typical old sailor.

To the President.—The price of tickets sometimes rose, according to the demand. On the last voyage the prices rose from Rs. 3 to Rs. 6. We refunded money on 21 tickets, 11 of them at Rs. 3 and the remainder at Rs. 5. Speaking from the sale of tickets in our office and deducting those allowed to proceed per *Mahratta*, she had 670 passengers. Our maximum number is 735 passengers in foul weather. If the police evidence be correct that she left with 735 passengers on board, there must have been 65 without tickets. I can give no explanation, because I was not there how it came about that some of the persons who bought tickets for that voyage were not received on board. The captain would be aware of the variation in the price of tickets. I can give you no reason why the number of passengers is not filled in our application for (B) certificate marked (W). On getting information of Mr. Neustein's charges, I referred the particulars of those charges to Mr. Young for report, and on hearing what he had to say, I consulted my Solicitors as to the advisability of prosecuting Mr. Neustein for defamation. The fair season is from the 18th November to the 31st March and 18th August to 30th September. The foul season is from 1st April to 15th August and 1st October to 15th November.

Cross-examination to Mr. Henderson.—The notice has to be given at least 24 hours before the vessel sails; the application is sent in at least 24 hours before the vessel sails, passengers are granted tickets right up to the end of the day before the ship sails. It would be impossible to state on that application the number of passengers she was to carry in any particular voyage. The application was drawn under Mr. Currie's directions. I do not know why the prices were increased on the 24th May. At that time the Chandbally steamers were running under an arrangement with a common price, the increased price of the tickets would go with the common price. No instructions were given

to Captain Irvine or anybody on board to turn away people with tickets, or order to take passengers on board without tickets and charge them the highest price for which tickets were sold. I trusted entirely to Captain Irvine. I have had no reason to doubt Captain Irvine in reference to his dealings with passengers and passenger money. There was a clerk on board. He had been on board for six or seven months. His duties were to collect the tickets and the deck freight, and make out the manifest. It was his duty to count the passengers and to report if there was any excess. He never reported any excess passengers on board the *Sir John Lawrence*. At the time the *Sir John Lawrence* was lost there was no competition between the *Sir John Lawrence* and the other steamers in the same trade. No inducement was held out to Captain Irvine by our firm to make quick passages, or to get to Chundabally before the other boats. About the time the *Sir John Lawrence* was lost, there was every probability of the steamer coming back comparatively empty on the return voyage.

D. F. MACKENZIE.

Court adjourned till to-morrow, half-past 12.

C. H. REILLY.

The 23rd August 1887.—Donald Fraser Mackenzie cross-examination continued to Mr. Henderson.—Neustein applied for a certificate. I did not write out the certificate myself. I said to Neustein, when he came to the office, well Mr. Neustein I have nothing to say to you. According to your own story, you are too old for your work, and I have no intention of keeping officers of that description about me. Neustein replied: That was not the reason of my dismissal. I was dismissed for pressing upon Mr. Young repairs which were necessary to be done to the vessel. I replied that I was quite satisfied that Mr. Young was competent to decide what repairs were necessary or otherwise, and that that story would not do. Neustein said—Well I do not ask to be kept on, but as I wish to apply for permission to attend the examination for the river, I want a certificate of the time I have been in the employ. I rang my bell and told the peon to call Mr. Currie. On Mr. Currie coming in, I asked him, saying, give this man a certificate of the time he has been in our employ. The certificate came in initialled by Mr. Currie along with several other letters similarly initialled in a basket, and I signed it without reading it. It is not true that several days elapsed between the date of the certificate and the date it was handed to Neustein. It was given him on the same day of his application. I swear he never asked for a certificate which should embrace either character or ability; otherwise I should have refused it flatly at the time. There is no ghât serang in our employ in respect of the *Sir John Lawrence*. We never paid a claim for damaged cargo yet on board the *Sir John Lawrence*, and so far as I know none were made. Leech was also dismissed from our service. So far as I know there was no connection between the dismissal of Leech and the engagement of Ogg. The surveyors were never at any time influenced or attempted to be influenced in any way by Macneill and Company as to the nature of the report which they should make. The Rs. 1,000 paid to Mr. Bushby was paid, I believe, some time in 1880. As far as I know there was no arrangement made with him that he should be paid the Rs. 1,000 at the time of the repairs. So far as I know I have no reason to believe that Bushby expected to get anything.

Re examination to Mr. Kilby.—I believe the payment of Rs. 1,000 was by a cheque; I am almost certain, but I cannot swear the payment was by cheque. I cannot say whether the money was handed to Bushby direct or sent him through some one else. I have no doubt it was debited in the *Sir John Lawrence* accounts. I have no reason to suppose that Mr. Young knew of the payment of the Rs. 1,000. There is no reason why he should. I was not in the country when the arrangements were made about the big repairs done to the *Sir John Lawrence*. I made the payment; if it was a cheque, I signed the cheque. The chances are it was sent with a note asking him to accept it. I have certainly no recollection of Mr. Bushby asking for payment, or for any sum of money. I have absolutely no recollection of Mr. Young suggesting to me that I should give Mr. Bushby any sum of money. The joint purse arrangement had been in force some time before the *Sir John Lawrence* left here on her last voyage. How long exactly, I cannot say.

D. F. MACKENZIE.

Barry LePatourel, sworn oath to Mr. Henderson.—I am in command of the steamer *Pilot* at Balasore. My steamer runs between Balasore and Calcutta. I carry native passengers. I am supposed to carry a particular number. A check on the number is kept by the police at Balasore. I know Mr. Augier; he was never a friend of mine, an acquaintance.

Mr. Kilby objects to any further questions being put to this witness.

Objection allowed.

BARRY LEPATOUREL.

Joseph DeSilva, sworn, saith to Mr. Killy.—This (B) certificate, dated 10th May 1887, is signed by me for the Port Officer. I usually sign these (B) certificates for the Port Officer. (B) certificates are generally issued a day before the vessel starts; they are issued in the afternoon, put in and marked (VI). This certificate (B), dated 21st September 1886, is signed by me for Port Officer. The two documents appended to the certificate is signed by the Agents (Mr. Henderson admits the signature to be that of Macneill and Company), put in and marked X. This (B) certificate, dated the 4th January 1887, is signed by me for Port Officer, put in and marked (Y).

J. DESILVA.

Phillip Arden, sworn, saith to Mr. Henderson.—I am Commander of the Steam-tug *Hunsdon*. I remember something about the cyclone of the 23rd of May last. On the morning of the 25th, 7 A.M. I was below Saugor, anchored near the Long Sand light. Between 9 and 10 A.M. I moved up between 6 or 7 miles. I anchored then until the following morning till 10 A.M., when the chain parted. At noon I came to Diamond Harbour. I had a very good opportunity of judging the strength of the cyclone. I know the channel taken by the Chandbally steamers. It was possible, but not probable, that a ship of the *Sir John Lawrence's* size could have lived through that cyclone. Even a brand new ship of the *Sir John Lawrence* would not, in my opinion, have returned to port.

Cross-examination to Mr. Killy.—This cyclone was not only intense, but irregular. The sea was the worst I have seen at Saugor. A perfectly new ship of the highest class at Lloyd's would have very little chance in that cyclone.

P. ARDEN.

Juggabandhu Chatterjee, solemnly affirmed, saith to Mr. Henderson.—I am Agent to Messrs. Macneill and Company at Chandbally. I have been there 4 years and 3 months. I have kept the account of passengers booked from Chandbally to Calcutta; the number of tickets sold. The police keep a tally and also the Captain kept a tally of passengers who went on board at Chandbally. Similar tallies are kept in respect of passengers landed from the ship at Chandbally. I know Mr. Palmer; he is Port Officer there; he sometimes comes and watches the landing of the passengers there. I cannot say whether he has anything officially to do with the landing and embarking of passengers. I know Mr. Chapman; he was Inspector of Police at Chandbally up to May 1886. He was succeeded by Mr. Augier. I remember on one occasion Mr. Augier counted passengers. I sometimes, when it is necessary, used to go and meet the steamers on arrival. I was in the habit of going. I did not go every time when there was a rush of passengers. I almost always went on board; that was during the pilgrim season. Last year I did not go on board every time passengers were landed during the rush. I cannot recollect whether he went and counted passengers on any other occasion. While Augier was at Chandbally during the busy season, I went to meet the steamer more than once. During these occasions I did not see Augier have anything to do with counting passengers. I saw Mr. Augier count the passengers only once as I have said, and I think that was in June. I cannot remember the day in June. I remember the occasion when the *Sir John Lawrence* stranded some little distance from Chandbally, the *Jack* went to the assistance of the *Sir John Lawrence*. On that occasion Augier took part in the counting of the passengers. I was not present at the counting. I could see Augier counting from my office; just at the landing stage. Augier told me there were a few passengers in excess. I took steps to see whether that was so or not; there was no excess. I have verbal orders from Macneill and Company not to sell tickets in excess of the licensed number. On that occasion passengers were landed on the *Jack*. The police keep proper tally at Chandbally. I had opportunities of seeing how the police did their duty, sometimes there has been a discrepancy discovered between the number of tickets sold and the number counted. The discrepancy was between 5 to 10, sometimes more, sometimes less than the number of tickets sold.

So far as I can judge the police did their duty in connection with counting the passengers properly. During the four years I was at Chandbally it never came to my knowledge that more than the licensed number of passengers were ever carried by the *Sir John Lawrence*. I was never present at any conversation between Captain Irvine and Augier. Augier gave us to understand that he had some power to count passengers. Afterwards a Sub-Inspector told us Mr. Augier had no power to count passengers, that was while Augier was in Chandbally. Augier left Chandbally for Calcutta on a plea of sickness in July 1886, that was before Mr. Davidson arrived. If excess passengers had been carried and I discovered it I should have reported the matter to Macneill and Company. I have never known passengers landed before the steamer got to Chandbally in order to evade the counting by the police. I believe the *Jack* whistled when she left her moorings to go to the help of the *Sir John Lawrence*. I was sent for by Augier on that day. I have never known the passengers on board the *Sir John Lawrence* so closely packed that they could not lie down.

Cross examination to Mr. Kilby.—On the occasion when Mr. Augier told me there were excess passengers I enquired of the Captain what tally he kept. He said he kept tally of 170 passengers landed in the *Jack*, and 561 on the *Sir John Lawrence*, he had a total of 731. Mr. Augier came to my office, I showed him the letter of advice received from Macneill and Company, it showed a less number than 735, how much less I do not know. The police do not report to me the numbers show by their tally. We enquire from them, they are not bound to report. We invariably enquire both in respect of passengers arriving and those departing; we ask for the number given by the tally of disembarking passengers in order to see if the number shown in our advice note agrees with that tallied by the police. The advice note only shows the passengers who are ticket-holders; when the tally does not agree with the advice note, we enquire of the discrepancy from the Captain. The Captain is not subordinate, nor does he have to report to me about any of the passengers he brings from Calcutta. I do not see his accounts, nor do I supervise them. I go on board when I am wanted, otherwise I do not go on. I may pay the steamer ten visits in the 24 hours.

Re-examination to Mr. Henderson.—I have never known the number given by the police exceed the number the ship was licensed to carry. I have never known the advice note give a number above the number the ship was licensed to carry. So far as I know there was never any occasion when Captain Irvine smuggled passengers on board.

JOGGENDHU CHATTERJEE.

Daniel Currie sworn oath to Mr. Henderson:—I am an assistant to the firm of Messrs. Macneill and Company off and on for about five years. I was agent to that firm at Chandbally. I came up here in July 1881. At that time an account of the passengers landing and embarking was kept by the police. It was properly kept. During these four years I never saw dead bodies taken off the steamers. I remember Neustein coming to the office for a certificate. He came to me first. I refused him a certificate and told him he might go to Mr. Mackenzie. Mr. Mackenzie called me in and told me to make out a certificate for Neustein. At the time I wrote out the certificate I put in it what I considered was the instructions Mr. Mackenzie gave me. I was afterwards told I had exceeded those instructions. I heard afterwards that Captain Irvine gave a certificate to Neustein. As far as I can remember now Mr. Mackenzie told me to give Neustein a certificate for service. On those instructions I wrote what I did. Captain Irvine told me that he gave Neustein a certificate. When I asked Irvine about that certificate, he said he did not want to take the bread out of Neustein's mouth. Neustein wrote to the Lieutenant-Governor and others and backed it up by stating that he held a certificate from Macneill and Company and the Captain. Neustein left the service in October. I spoke to Captain Irvine after the 20th October. Captain Irvine said he was a lazy good-for-nothing fellow. That was that all was said. I have had to do with the Chandbally line. I am positive that excess passengers are not carried. I have no reason to doubt Captain Irvine's honesty.

Cross-examination to Mr. Kilby.—As Agent for five years at Chandbally, I made trips about once a month between Chandbally and Calcutta, and have every opportunity of judging. As a rule, I had sold the tickets previously; so on getting on board then I knew how many people ought to be on board. I invariably asked the police what was the number of passengers they counted: this applies both to passengers arriving and departing. I did this to know how we compared with other companies running steamers there. I am sure the other companies did not carry excess passengers, because if the fare is Rs. 2 and the fine Rs. 20, it does not pay. I have, when there was occasion to do so, assisted the police to count passengers. I was acting in Macneill and Company's interests and assisting the Captain. I am now speaking of passengers embarking merely. I assisted the police in every way possible by giving men to keep back the rush in order that they might keep a proper tally. I assisted the Captain in counting. I have counted every passenger at times, in order to see that the whole of the ticket-holders went on board. I am speaking of what I used to do six years ago. Baboo Juggobundhu Chatterjee performs that duty now at Chandbally. I have not been down to Chandbally since October last year. We had a fair number on the voyage down. Juggobundhu did not tally the passengers out on that occasion. We had only 300 on board—about. The Captain, every Saturday on his return from Chandbally, paid me all sums he had received as deck collections. He had no orders to pay it to me, but I being in charge of the department, he did pay it in to me. He has paid the money in to me since 1881. The payments were generally small sums, varying from Rs. 5 to 20. Now and again I may have received as much as Rs. 100. In competition times the deck collections were infinitesimal, because passengers could get tickets for 4 annas, and they could not go on board without them, when they would have to pay Rs. 2. The nominal fare was Rs. 2, if they did not take out tickets. Competition lasted up to about March this year. The pilgrim rush began in June and sometimes in July. The morning of the 26th May was the first big rush of the season. There had been a pretty good number of tickets sold in the previous week.

Re-examination to Mr. Henderson.—On the 24th May the other steamers had got their full complement. I once personally telegraphed to Captain Irvine to return—that was indirectly through a cyclone in the Bay, a tidal wave at False Point, and also because the *Medina* had not been sighted at Saugor, and therefore would not have been in time to start again on Wednesday.

D. M. CURRIE.

John Henderson sworn saith to Mr. Henderson.—I am Chief Engineer to the Rivers Steam Navigation Company. I have been Chief Engineer for twenty years in that service. I remember the collision between the *Indore* and the *Sir John Lawrence*. I put the patch on the starboard plate on board the *Lawrence*. The plate was in the fore-castle; it was not in the forepeak. The patch was bolted on; it was not rivetted. Red lead packing was used. I saw the plate both before and after the jagged edges were cut. I was present when they were cut. I was present when part of the cutting of the jagged edges was done. The plate was a quarter inch thick. I went inside the fore-castle. The plate was in a very fair state. There was paint on it, both inside and outside. No suggestion was made to me that the plate was too thin to put a patch on. I saw Leach on board. He made no suggestion about the plate being thin. Neither he nor any one else. When I went into the fore-castle, I observed the frames. I went on purpose to observe frames: they were in a good state. It is not true to say they were nearly eaten through: they were about $\frac{3}{4}$ th inch thick. I have had a good deal of experience in putting plates on to inland vessels. I have no doubt in my mind that the plate on which patch was put was thick enough. The repairs I made was temporary, as far as the bolts were concerned. At the time it was fully understood that later the bolts would have to be taken out and rivets put in. The patch was a perfectly safe patch, as I made it. After being rivetted on the plate it would, in my opinion, be perfectly safe as a permanent repair.

Cross-examination to Mr. Kilby.—I did not see the collision occur. I know the damage which was done to the *Lawrence*. The starboard boat smashed and the two davits on which it hung bent. There was a slight indentation near the knight head. There was the hole which was patched also. Besides this there was no other damage. I understood that the *Lawrence* ran into the *Indore* from Mr. Leach. The plate was put on in May 1885. I have had to do with the repairs of a good many ships, but we have to put on patches as engineers. I have put on a good many patches on inland vessels. It is hardly a thing to forget that the patch was put on. The circumstances that impressed the position of the plate in my mind was that it was the plate just above the sheer strake. I remember admiring the thickness of the sheer strake, it was of such unusual thickness. The hole was in one plate. the breadth of the plate was about 2'6, it may have been more. It was an irregular hole after it was cut; I should say after it was cut it was between 15 inches and 16 inches square. The hole was in the centre of the plate; it must have been in the centre of the plate. I don't remember distinctly, but my strong impression was, it was in the centre of the plate. I am quite positive the plate immediately below was the sheer strake plate. I could stand upright in the fore-castle. The hole was about 15 inches above the main deck. The deck was not injured in any kind of way. The hole was about 8, 9 or 10 feet above the water as she was when I saw her.

Re-examination to Mr. Henderson.—I did not observe how close the frames were. I had not repaired a sea-going ship before.

J. HENDERSON.

Case adjourned to Thursday the 25th instant.

C. H. REILLY.

The 25th August 1887 Huttaman Singh sworn saith to Mr. Henderson.—I am an assistant to Messrs. Macneill & Co.

Cross-examination to Mr. Kilby.—I look after and issue and sell tickets for the passage on the *Sir John Lawrence*. I have sold tickets since last November, before that a Bahu sold tickets. The maximum licensed number is 1,038 in fair-weather and 735 in foul weather, I believe. I know what is the fair weather season and what is the foul weather season. I have never known a single instance where more than the authorised number of tickets were sold. I have nothing to do with the deck collections or with money received from passengers who go on board without tickets.

Re-examination to Mr. Henderson.—I worked under Mr. Currie's supervision.

HUTTEMAN SINGH.

MATRICULATION REGULATIONS OF THE UNIVERSITY OF LONDON.

NOTIFICATION.

The 6th October 1887.—The Regulations for Matriculation in the University of London are published for general information.

P. NOLAN,

Secretary to the Govt. of Bengal.

REGULATIONS FOR MATRICULATION IN THE UNIVERSITY OF LONDON.

EXAMINATIONS IN 1887-88.

The following are the dates at which the several Examinations in the University of London for the year 1887-88 will commence:—

MATRICULATION.—Monday, June 13, 1887 and Monday, January 8, 1888.

BACHELOR OF ARTS.—Intermediate, Monday, July 18; B.A., Monday, October 24.

MASTERS OF ARTS.—Branch I, Monday, June 6; Branch II, Monday, June 13; Branch III, Monday, June 13; Branch IV, Monday, June 27.

DOCTOR OF LITERATURE.—Tuesday, December 6.

SCRIPTURAL EXAMINATIONS.—Tuesday, November 29.

BACHELOR OF SCIENCE.—Intermediate, Monday, July 18; B.Sc., Monday, October 17.

DOCTOR OF SCIENCE.—Within the first twenty-one days of June.

BACHELOR OF LAWS.—Intermediate and LL.B., Monday, January 2, 1888.

DOCTOR OF LAWS.—Tuesday, January 17, 1888.

BACHELOR OF MEDICINE.—Preliminary Scientific, Monday, July 13, 1887 and Monday, January 16, 1888; Intermediate, Monday, July 11, 1887 and Monday, January 10, 1888; M.D., Monday, October 31.

BACHELOR OF SURGERY.—Tuesday, December 6.

MASTER IN SURGERY.—Monday, December 6.

DOCTOR OF MEDICINE.—Monday, December 6.

SUBJECTS RELATING TO PUBLIC HEALTH.—Monday, December 12.

BACHELOR OF MUSIC.—Intermediate, Monday, December 12; B.Mus., Monday, December 12.

DOCTOR OF MUSIC.—Intermediate, Monday, December 12; D.Mus., Monday, December 12.

ART, &c., OF TEACHING.—Tuesday, March 1.

REGULATIONS.

MATRICULATION.

[Candidates for any Degree in this University must have passed the MATRICULATION EXAMINATION. No exemption from this rule is allowed on account of Degrees obtained or Examinations passed at any other University.]

[This Examination is accepted (a) by the College of Surgeons, (b) by the Incorporated Law Society, in lieu of their Preliminary Examinations. It also exempts candidates for admission to the Royal Military College from the Preliminary Test, except in Geometrical drawing. And it is among those Examinations of which some one must be passed (1) by every Medical Student on commencing his professional studies; and (2) by every person entering upon articles of clerkship to a solicitor,—any such person who may have Matriculated in the Honours or in the First Division being entitled to exemption from one year's service.]

[This and all other Examinations of the University, together with the Prizes, Exhibitions, Scholarships, and Medals depending upon them, are open to women upon exactly the same conditions as to men.]

THERE shall be two Examinations for MATRICULATION in each year; one commencing on the second Monday in January, and the other on the third Monday in June.¹

No candidate shall be admitted to the MATRICULATION EXAMINATION unless he have produced a certificate showing that he has completed his sixteenth year.² This certificate shall be transmitted to the Registrar at least *one calendar month* before the commencement of the Examination.

A fee of two pounds shall be paid at Matriculation. No candidates shall be admitted to the Examination unless he have previously paid this fee to the Registrar.³ If, after payment of his fee, a candidate withdraws his name, or fails to present himself at the Examination, or fails to pass it, the fee shall not be returned to him, but he shall be allowed to enter for any subsequent MATRICULATION EXAMINATION upon payment, at every such entry, of an additional fee of one pound, provided that he give notice to the Registrar at least *one calendar month* before the commencement of the Examination.

The Examination shall be conducted by means of printed papers; but the Examiners shall not be precluded from putting, for the purpose of ascertaining the competence of the candidates to pass, *vis-à-vis* questions to any candidate in the subjects in which they are appointed to examine.

¹ These Examinations may be held not only at the University of London, but also, under special arrangement (see Appendix I.), in other parts of the United Kingdom, or in the colonies.

² A certificate from the Registrar General in London or from the Superintendent Registrar of the district, or a certified copy of the Baptismal Register, is required in every case in which it can possibly be obtained. In other cases a declaration of the candidate's age, and that he is unable to procure his certificate of Birth or Baptism, made before a Magistrate by his parent or guardian, or by himself if of full age, will be accepted.—Every such document will be returned to the candidate on or before registration (see Note 1 on page 64).

³ Fees must be paid when candidates inscribe their names on the Register of the University, and should not be sent in advance. Information respecting the time and place of Registration will be sent to candidates with the acknowledgment of their certificates of age or their notices.

Candidates shall not be approved by the Examiners unless they have shown a competent knowledge in each of the following subjects, according to the details specified under the several heads—

1. Latin;
2. One¹ of the following Languages—Greek, French, German, Sanskrit, Arabic²;
3. The English Language; and English History, with the Geography relating thereto;
4. Mathematics;
5. Mechanics;
6. One³ of the following Branches of Experimental Science:—Chemistry; Heat and Light; Magnetism and Electricity.

The following are the particulars of the foregoing subjects of Examination—
LANGUAGES.

LATIN.

One Latin subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors:—⁴

Virgil.—Two Books of the *Æneid*.

Horace.—Two Books of the *Odes*.

Sallust.—The Conspiracy of Catiline, or the War with Jugurtha.

Cæsar.—One of the longer or Two of the shorter Books of the Gallic War.

Livy.—One Book.

Cicero.—De Senectute or De Amicitia, with One of the following Orations:—Pro Lege Manilia. One of the four Catilinarian Orations, Pro Archia, Pro Balbo, Pro M. Marcello.

Ovid.—One Book of the *Metamorphoses* (or Selections from Two Books) and One Book of the *Epistles* or of the *Tristia*; or Six of the *Heroides*; or Two Books of the *Tristia*.

The Paper in Latin shall contain passages to be translated into English, with questions arising out of the book or books selected. Short and easy passages shall also be set for translation from other books not so selected. A separate Paper shall be set containing questions in Latin Grammar, with simple and easy sentences of English to be translated into Latin.⁵

GREEK.

One Greek subject, to be settled by the Senate one year and a half previously from the works of the undermentioned authors:—⁶

Homer.—One Book.

Xenophon.—One Book.

Æschylus.—The *Perseus*.

Euripides.—*Hecuba*; *Andromache*; *Heracles Furens*; *Medea*; *Alceste*; *Electra*; *Heracles*. (One Play.)

The Paper in Greek shall contain passages to be translated into English, with questions arising out of the book selected, and with general questions in Grammar.⁷ Short and easy passages shall also be set for translation from other books not so selected.

FRENCH.

The Paper in French shall contain passages for translation into English, and questions in Grammar, limited to the *Accidence*.

GERMAN.

The Paper in German shall contain passages for translation into English, and questions in Grammar, limited to the *Accidence*.

SANSKRIT.⁸

Sanskrit Subjects, to be selected by the Senate one year and a half previously from the undermentioned works.⁹

Hitopadeśa, Books II to IV.

Pañchatantra, Books II to V.

Sāhityaparichaya, Parts I and II, pp. 1-83.

Rāmāyaṇa, Book I.

Mahābhārata (Story of Nala, Story of Sāvitrī, Bakavadhaparvan, Sakuntalopākhyāna).

Manu, Books II to VII.

[N.B.—Special stress is laid on correct spelling and grammar in the answers to the questions.]

¹ No credit will be given for more than one of these subjects.

² Candidates desiring to be examined in either Sanskrit or Arabic must give at least Two Calendar Months' notice to the Registrar.

³ The Latin Subjects for 1888 and 1889 will be—

For June 1888:—*Cæsar*, Gallic War, Book VII.

For January 1889:—*Sallust*, Conspiracy of Catiline.

For June 1889:—*Virgil*, *Æneid*, Books I and V.

⁴ Special stress is laid on accuracy in the answers to the Grammar questions, and on the correct rendering of English into Latin.

⁵ The Greek Subjects for 1-88 and 1889 will be—

For June 1888:—*Xenophon*, *Cyropædia*, Book I.

For January 1889:—*Homer*, *Iliad*, Book VI.

For June 1889:—*Xenophon*, *Cyropædia*, Book V.

⁶ Special stress is laid on accuracy in the answers to the questions in Greek Grammar.

⁷ See the third Note on page 64.

⁸ The Sanskrit Subjects for 1888 and 1889 will be—

For June 1888:—*Pañchatantra*, Book III.; *Mahābhārata*, Story of Sāvitrī; *Manu* IV., 128-257.

For January 1889:—*Hitopadeśa*, Book III.; *Mahābhārata*, *Bakavadhaparvan*; *Manu*, VI 1 to VII 63.

For June 1889:—*Pañchatantra*, Book IV.; *Mahābhārata*, *Bakavadhaparvan*; *Manu*, VII 64-225.

The Paper in Sanskrit shall contain passages from the books selected, to be translated into English, with questions in Grammar. A passage or short passages shall also be set for translation from other books not so selected.

ARABIC.

The Paper in Arabic shall contain passages for translation into English, and questions in Grammar.

ENGLISH.

The General History and Grammatical Structure of the Language.
History of England to the end of the Seventeenth Century, with Geography relating thereto.

MATHEMATICS.

ARITHMETIC.

The ordinary Rules and Processes of Arithmetic, including—
Proportion.
Vulgar and Decimal Fractions.
Extraction of the Square Root.

ALGEBRA.

Addition, Subtraction, Multiplication, and Division of Algebraical Quantities.
Reduction and manipulation of Algebraical Fractions.
Arithmetical and Geometrical Progression.
Simple Equations and easy Quadratic Equations, with questions involving their use.

GEOMETRY.

The subjects of the First Four Books of Euclid, and simple deductions.

MECHANICS.

Elementary notions as to Velocity, Acceleration Force, Mass, Momentum, Work, and Energy.
Composition and Resolution of Velocities, Accelerations and Forces, in one plane.
Moments and Couples, in one plane.
Centre of Gravity, or Mass-centre.
Transmission of Pressure in Liquids; Variation with depth of the pressure due to weight of liquids.
Specific Gravity, and modes of determining it. Pressure of gases and laws relating thereto.
Atmospheric pressure.
Common instruments and apparatus whose action depends upon the pressure of liquids, or of the atmosphere, or of both.

EXPERIMENTAL SCIENCE.

One of the three following subjects, at the option of the candidate:—

I. CHEMISTRY.

The following elements, and their compounds as enumerated below; their chief physical and chemical characters; their preparation; and their characteristic tests:—
Oxygen, Hydrogen, Carbon, Nitrogen. Chlorine, Bromine, Iodine, Fluorine. Sulphur
Phosphorus, Silicon.
Combining Proportions by weight and by volume. General nature of Acids, Bases, and Salts. Symbols and Nomenclature.
The Atmosphere—its constitution; effects of Animal and Vegetable life upon its composition.
Combustion. Structure and properties of Flame. Nature and composition of ordinary Fuel.
Water. Chemical peculiarities of Natural Waters, such as rain-water, river-water, spring-water, sea-water.
Carbon Monoxide. Carbon dioxide. Oxides and Acids of Nitrogen. Ammonia.
Olefiant Gas, Marsh Gas, Sulphur Dioxide, Sulphuric Acid, Sulphuretted Hydrogen.
Hydrochloric Acid. Phosphoric Anhydride and common Phosphoric Acid.

II. HEAT AND LIGHT.

Heat.

Expansion of Solids, Liquids, and Gases accompanying rise of Temperature: Laws relating thereto. Thermometry. Calorimetry. Specific heat. Liquefaction and Solidification. Vaporization and condensation; ebullition; properties of vapours, saturated or unsaturated. Latent heat.
Transmission of heat by conduction and convection.

Light.

Propagation of light in straight lines in uniform media. Velocity of light and modes of determining it. Intensity of light, its variation with distance. Shadows. Photometry. Reflection and Refraction at plane or spherical surfaces. Formation of Images by plane and spherical mirrors, and by simple lenses (excluding aberration). Decomposition of white light by a prism. The prismatic Spectrum.

III. MAGNETISM AND ELECTRICITY.

Magnetism.

Simple experimental properties of Magnets. Effect of a magnet on a neighbouring piece of soft iron or of hard steel. Terrestrial magnetism: behaviour of a declination needle and of a dipping needle at different parts of the earth's surface.

Electricity.

The two Electrical States and their mutual relations. Attraction and Repulsion. Conduction and Insulation. Electrostatic Induction. The common plate and cylinder electrical machines. Electrical condensers. Distribution of electricity upon conductors.

Current electricity. Common forms of battery. Ohm's law and its simple applications. Heating chemical, and magnetic effects of electric currents.

Simple experimental methods of generating currents by relative motion of conductors and magnets. The simple laws of magneto-electric induction.

The Examinations shall be conducted in the following order:—

MONDAY.

Afternoon, 2 to 4. Latin.

4 to 6. Latin. Grammar and Composition.

TUESDAY.

Morning, 10 to 1. Greek, French, German, Sanskrit, or Arabic.

Afternoon, 2 to 5. Arithmetic and Algebra.

WEDNESDAY.

Morning, 10 to 1. Geometry.

Afternoon, 2 to 5. Chemistry; or Heat and Light; or Magnetism and Electricity.

THURSDAY.

Morning, 10 to 1. English Language.

Afternoon, 2 to 5. English History, with the Geography relating thereto.

FRIDAY.

Morning, 10 to 1. Mechanics.

At 2 o'clock on Monday in the week next but two after the Examination, the Examiners shall publish a List of the Candidates who have passed. And at 2 o'clock on the Monday next following the Examiners shall publish a List of the Candidates who have passed, arranged in Three Divisions—in the Honours Division in the order of proficiency¹; in the First and Second Divisions in alphabetical order.

A Pass Certificate signed by the Registrar shall be delivered to each candidate after the Report of the Examiners shall have been approved by the Senate.*

If, in the opinion of the Examiners, any Candidates in the Honours Division of not more than 20 years of age at the commencement of the Examination shall possess sufficient merit, the First among such Candidates shall receive an Exhibition of Thirty Pounds per annum for the next two years; the Second among such Candidates shall receive an Exhibition of Twenty Pounds per annum for the next Two Years; and the Third shall receive an Exhibition of Fifteen Pounds per annum for the next Two Years; such Exhibitions to be payable in quarterly instalments, provided that on receiving each instalment the Exhibitioner shall declare his intention of presenting himself either at the two Examinations for B.A., or at the two Examinations for B.Sc., or at the INTERMEDIATE EXAMINATION IN LAWS, or at the PRELIMINARY SCIENTIFIC and INTERMEDIATE EXAMINATIONS IN MEDICINE, within three Academical Years² from the time of his passing the MATRICULATION EXAMINATION.

Under the same circumstances, the Fourth among such Candidates shall receive a Prize to the value of Ten Pounds in Books, Philosophical Instruments, or Money; and the Fifth and Sixth shall each receive a Prize to the value of Five Pounds in Books, Philosophical Instruments, or Money.

Any Candidates who may obtain a place in the Honours Division at the MATRICULATION EXAMINATION in January shall be admissible to the INTERMEDIATE EXAMINATION either in Arts or in Science in the following July.

¹ The places of candidates in the Honours Division are determined by their respective degrees of proficiency in the subject of the Examination taken collectively.

* Certificates are generally ready for issue about a month after the publication of the classified list of such examination; and, in the absence of any request to the contrary, they will be posted to the addresses given by the Candidates on their Schedules of Entry.

² By the term "Academical Year" is ordinarily meant the period intervening between any Examination and an Examination of a higher grade in the following year; which period may be either more or less than a Calendar year. Thus the interval between the *Intermediate Examinations* in Arts, Science, and Medicine, and the *Degree Examinations* of the next year in those Faculties respectively is about sixteen months; whilst the interval between the B. A. Examination and the M. A. Examination of the next year, or between the B.Sc. Examination and the D.Sc. Examination of the next year, is less than eight months. Nevertheless, each of these intervals is counted as an "Academical Year."

APPENDIX.

I.

PROVINCIAL EXAMINATIONS.

These Examinations are appointed by the Senate from time to time, upon the application of any City, Institution, or College desiring to be named as a local centre for one or more examinations; and are carried on simultaneously with the examinations in London, under the supervision of Sub-Examiners also appointed by the Senate.

Candidates wishing to be examined at any Provincial centre must give notice of entry (naming the centre they select, and inclosing their certificate) to the Registrar of the University of London, who will make all necessary arrangements.

A fee usually varying from 1*l*. to 2*l*. is charged by the local authorities, in addition to the University fee.

Both fees are payable on Registration, which takes place at the Provincial centres at a time of which due notice will be sent to candidates.

The answers of the Candidates at the Provincial Examinations are reviewed by the Examiners at the same time with the answers of the Candidates examined in London; and a List of the Candidates who have passed at each Provincial Examination is published, at the time fixed by the Regulations, at the place where such examination has been held.

The MATRICULATION EXAMINATION of JUNE 1887 was held at—

Aberystwith :—University College;
Bangor :—University College;
Birmingham :—Queen's College;
Bristol :—University College;
Cardiff :—University College;
Cheltenham (for Ladies only) :—The Ladies' College;
Downside :—St. Gregory's College;
Eastbourne :—New College;
Edinburgh :—The Literary Institute;
Epsom :—The Royal Medical College;
Leeds :—The Yorkshire College;
Liverpool :—University College;
Manchester :—The Owen's College;
Newcastle-on-Tyne :—The School of Science and Art;
Nottingham :—University College;
Oswestry :—The High School;
Sheffield :—Firth College;
Stonyhurst :—Stonyhurst College;
Ushaw :—St. Cuthbert's College;
Ware :—St. Edmund's College.

The MATRICULATION EXAMINATION of JANUARY 1888 will be held at—

Birmingham :—Queen's College;
Cardiff :—University College;
Glasgow :—The Training College, New City Road;
Leeds :—The Yorkshire College.

The MATRICULATION EXAMINATION of JUNE 1888 will be held at—

Birmingham :—Queen's College;
Bristol :—University College;
Edinburgh :—The Harriot-Watt College;
Leeds :—The Yorkshire College;
Liverpool :—University College;
Nottingham :—University College;
Oswestry :—The High School;
Sheffield :—Firth College.

The INTERMEDIATE EXAMINATION IN ARTS, 1887, was held at—

Aberystwith :—University College;
Birmingham :—The Mason Science College;
Cardiff :—University College;
Cheltenham (for Ladies only) :—The Ladies' College;
Liverpool :—University College;
Manchester :—The Owen's College;
Newcastle-on-Tyne :—The School of Science and Art;
Ushaw :—St. Cuthbert's College;
Ware :—St. Edmund's College.

The INTERMEDIATE EXAMINATION IN SCIENCE¹ and the PRELIMINARY SCIENTIFIC (M.B.) EXAMINATION,² 1887, were held at—

Birmingham :—The Mason Science College;
Cardiff :—University College;
Cheltenham (for Ladies only) :—The Ladies' College;

¹ With the exception of the Practical Examination in Biology, which must be carried on at the University.

Liverpool :—University College ;
Manchester :—The Owen's College ;
Newcastle-on Tyne :—The School of Science and Art.

The B.A. Examination, 1887, will be held at—

Liverpool :—University College ;
Manchester :—The Owen's College.

II.

SCHOLARSHIPS, &c.

[*Note*.—The undermentioned Gilchrist and other Scholarships and Prizes are announced at the request and on the authority of the respective Educational Bodies by whom they are offered for competition. They are awarded upon the result of the University Examination; but the University cannot guarantee or be responsible for the award, over which it has otherwise no control.]

GILCHRIST SCHOLARSHIPS, EXHIBITIONS, AND PRIZES.

1. BRITISH SCHOLARSHIPS, &c.

(a) For Male Candidates.

1. A Scholarship of the value of Fifty Pounds per annum, tenable for three years, is biennially offered to Candidates intending to pursue, at OWEN'S COLLEGE, MANCHESTER, their studies for Graduation in one of the Faculties of the University of London; a single Scholarship of Fifty Pounds per annum for three years being awarded to the highest of those Candidates at the June Matriculation Examination who shall have been previously approved by the Principal of Owen's College, provided that he pass in the Honours Division, or, in case no Candidate should so pass, two Scholarships each of Twenty-five Pounds per annum, being awarded to the two Candidates as aforesaid who shall stand highest in the First Division. Particulars may be obtained on application to the Principal of Owen's College, Manchester.

2. A Scholarship of Fifty Pounds per annum, tenable for three years, is annually awarded to that Candidate in the Honours Division at the June Matriculation Examination who shall stand highest of the Candidates previously approved by the Principal of UNIVERSITY COLLEGE, BRISTOL; and who intends to study at that College with a view to Graduation in one of the Faculties of the University of London. [*N.B.*—This Scholarship is open to Women.] Further particulars may be obtained on application to the Principal of University College, Bristol.

(b) For Female Candidates.

1. Two Exhibitions, one of Thirty Pounds, the other of Twenty Pounds per annum, tenable for two years, are annually awarded at the June Matriculation Examination to the two Female Candidates of not more than Twenty years of age at the commencement of the Examination, who pass highest in the Honours Division, to assist them in pursuing their studies at some Collegiate Institution approved by the Gilchrist Trustees.

2. Two Exhibitions, one of Forty Pounds, the other of Thirty Pounds per annum, tenable for two years, are annually awarded to the two Female Candidates who pass highest at the Intermediate Examination in Arts (provided that they obtain in the one case at least two-thirds, and in the other at least three-fifths, of the total number of marks), to assist them in pursuing their studies at some Collegiate Institution approved by the Gilchrist Trustees.

3. A Book Prize of the value of Ten Pounds is annually awarded to the Female Candidate who passes highest at the B.A. Examination, provided she obtain not less than two-thirds of the total number of marks.

[See also the BRISTOL Scholarship above.]

Further particulars may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S.W.

II. INDIAN SCHOLARSHIPS.

A Scholarship of the value of One Hundred and Fifty Pounds per annum, and tenable for four years, will be awarded to the Native Candidate who passes highest in the January Matriculation Examination, 1888, carried on at CALCUTTA, BOMBAY, MADRAS and COLOMBO; provided that such Candidate passes either in the Honours or in the First Division, is not more than 22 years of age, and is desirous of prosecuting his studies, either at the University of Edinburgh or at University College, London, with a view to Graduation in one of the Faculties of the University of London.

Further particulars of this *Indian Scholarship* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S.W.

III. COLONIAL SCHOLARSHIPS.

1. A Scholarship of the value of One Hundred Pounds per annum, and tenable for three years, is annually awarded to the highest among those Candidates at the January Matriculation Examination carried on at MELBOURNE, SYDNEY, ADELAIDE, and HOBARTON, who passes either in the Honours or in the First Division, is not more than 22 years of age, and is desirous of prosecuting his studies either at the University of Edinburgh, or at University College, London, with a view to Graduation in one of the Faculties of the University of London.

*2. A similar Scholarship, under the same conditions, is biennially awarded to the Candidate who passes highest at the January Matriculation Examination carried on in New Zealand.

3. A similar Scholarship under the same conditions is triennially awarded to the Candidate who passes highest at the June Matriculation Examination carried on at FREDERICTON (New Brunswick), HALIFAX (Nova Scotia), and CHARLOTTETOWN (Prince Edward's Island).

(Note.—Every Candidate for a Colonial Scholarship must either be a Native of the Colony in which he presents himself, or have resided therein for the five years immediately preceding).

Further particulars of the Colonial Scholarships may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S.W.

WEST SCHOLARSHIP.

This Scholarship, of the value of Thirty Pounds, and tenable for one year, is awarded by the Council of University College, London, to that Candidate at the June Matriculation Examination who distinguishes himself the most in English. Further particulars may be obtained of the Secretary of University College, Gower Street, London, W.C.

TUFFNELL SCHOLARSHIPS.

Two Scholarships, of the value of about 100*l.* each, and tenable for two years, are awarded by the Council of University College for distinction in Analytical and Practical Chemistry, and in General Chemistry, alternately, to that Student of the College, *being an Undergraduate of the University of London of not more than three years' standing*, who shall have passed the most distinguished Examination in the subjects for which the Scholarship is to be conferred, and shall have evinced sufficient merit to entitle him to the Scholarship. Further particulars may be obtained of the Secretary of University College, Gower Street, London, W.C.

REID STUDENTSHIPS FOR WOMEN.

A Free Studentship at Bedford College, value 80 guineas per annum, tenable for two years, will be awarded to the Woman taking the highest place in the Honours Division of the January Matriculation Examination, and to the Woman taking a similar place at the June Matriculation Examination.

A Free Studentship at Bedford College, value forty pounds per annum, tenable for two years, will be awarded to the Woman taking the highest place in the Intermediate Examination in Arts.

For further particulars application should be made to "The Reid Trustees," Bedford College, York Place, Portman Square, London, W.

III.

INSTRUCTIONS TO CANDIDATES FOR MATRICULATION.

All applications for admission to the Examination must be made *by letter only*. No special form of application is necessary. Care must be taken to give a correct postal address, and the Candidate's name must be written in full.

Every application, if made for the first time, must be supported by the requisite document giving proof of age. No Candidate, whatever his age, is admitted to the Examination on his first application without the production of such a document.

Candidates who have previously presented themselves at the Examination must state that fact upon again applying for admission, but need not produce their Certificates of Age a second time.

Applications should not be made earlier than eight weeks, and must not be made later than a month, before the commencement of the Examination.

The age of a Candidate with regard to entry is reckoned up to and inclusive of the first day of the several Examinations, that day being computed to fall as late as the Regulations will possibly allow. The two dates, in the case of the Matriculation Examinations, are January 14th and June 21st. Only those Candidates therefore who shall have completed their sixteenth year on or before either of those dates will be admissible to the January or the June Examination, as the case may be; and not those who shall complete such age after those dates.

Fees must be paid on Registration, and not before.

The full marks obtainable at the Matriculation Examination are 2,500. Of these 1,900 qualify for a Prize, 1,700 for Honours, and 1,300 for the First Division. There is no regulation fixing the minimum number of marks required for the Second Division. No further details as to the marking at this or other Examinations can be furnished.

The Alphabetical Pass-List is sent, when ready, to every College or School from which any Candidate (whether successful or not) has immediately proceeded to the Matriculation Examination.

The Classified List is sent, when ready, to every College or School from which a successful Candidate has immediately proceeded. It is also widely circulated among the leading Newspapers of the United Kingdom.

Lists cannot be supplied to individual Candidates or their friends.

The Examination papers of past Examinations are not published separately; but the papers of the previous academical year are printed in the University Calendar of the current year; which is issued annually at the beginning of April, and is to be obtained (price 4*s.*) of the publishers, Messrs. Eyre and Spottiswoode, East Harding Street, E.C.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 8th October 1887.

No.	District and date of return.	Rainfall at Sadler Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
<i>Western Districts.</i>			
Rangpur Divn.	1 Bardwan, Oct. 8, '87	Nil	Weather—hot and dry. Rain urgently wanted for winter rice, which is beginning to wither in parts. Prices rising. Cholera died out. Fever prevalent.
	2 Bankura „ 8, '87	Nil	Weather—hot and dry. Aus and kolas paddy are being gathered. Ausa plants are suffering for want of rain in the Bishenpur sub-division, and have begun to wither in almost all the thanas in the Sadar. If it does not rain soon a very poor crop will be reaped, and scarcity may ensue. Prices have risen. Fever in a mild form is reported to be prevalent in the sub-division.
	3 Beerbhoom „ 8, '87	Nil	Weather—unseasonably warm. No rain since 27th ultimo, and ausa paddy suffering most severely. In the absence of a timely downpour within the next ten days, a partial failure is apprehended. Aus paddy is being harvested. It is an insignificant crop in this district. Sugarcane looks well. Public health very indifferent. Fever prevalent to a very unusual degree.
	4 Midnapur „ 8, '87	0.80	Weather—oppressive except in early morning. State and prospects of crops good.
	5 Hooghly „ 8, „	0.02	Weather—very hot. Prospects of winter rice affected by absence of rain, especially to the west. Aus harvest nearly over with good outturn. Public health good for time of year.
	Howrah „ 8, '87	0.05	Weather—sultry with prospect of showers. Prospects of winter rice in the north of the district improved by late rain; no change in the south. Harvesting of aus ausa completed with fair results. Jute harvest almost finished. Public health good.
	Up to 8th October 1887.	Nil	
<i>Central Districts.</i>			
Patna Divn.	6 24 Parghs. „ „	Report not received.
	7 Nadia „ 8, „	0.34	Weather—sultry. More rain wanted for ausa rice in places. Prospects of crops on the ground fair. Fever prevalent.
	8 Khoulna „ 8, '87	0.11	Weather—very hot, with slight rain. Prospects of ausa crop favourable. Ploughing for winter crops has commenced. Some fever prevails, but general health fair.
	9 Jessore „ 8, „	Nil	Weather—very hot, but mornings getting cool. Early ausa in ear. Prospects good. Lands are being prepared for winter crops. Public health fair.
	10 Moorsheebad „ 8, '87	2.12	Weather—seasonable. Prospects of ausa good. Sowing of <i>til</i> and <i>halai</i> going on. Sugarcane promising. Fever as usual in this season prevails.
Rajshahi Divn.	11 Dinagepur „ 8, '87	Nil	Weather—seasonable. State and prospects of <i>haiwai</i> paddy and sugarcane good. Rice selling at from 20 to 28 annas per rupee.
	12 Rajshahi „ 8, '87	0.08	Weather—seasonable. Aus harvest completed with an outturn of ten annas. Prospects of ausa paddy and other standing crops continue good. Public health fair.
	13 Raigpur „ 8, „	Nil	Particulars not furnished.
	14 Bogra „ 8, '87	Nil	Weather—very warm for this time of the year. State and prospects of crops continue satisfactory on the whole. Public health fair.
	15 Pabna „ 8, '87	0.04	Weather—hot. Public health and prospects of crops good.
	Serajunga „ „	0.09	
	Darjeeling „ 8, '87	0.02	Weather—fine. State and prospects of crops fair.
	Jalpigore „ 8, „	Nil	Weather—seasonable. Prospects of crops fair. Lands are being prepared for winter crops. Cattle-disease prevalent in places. Public health good.
<i>Eastern Districts.</i>			
Dacca Division.	18 Dacca, Oct. 8, '87	0.16	Weather—fine and hot. <i>Ashai</i> paddy is being harvested. <i>Boekia</i> and ausa paddy thriving, but some damage anticipated for want of rain. Ploughing for winter crops going on. On the whole prospects of crops good. Public health good.
	Manickgunge „ „	Nil	
	Munshigunge „ „	0.8	
	Naraingunge „ „	Nil	
	19 Furroodpur „ 8, '87	0.83	Weather—hot. State of ausa good. Jute harvest nearly completed with good outturn. Public health good.
	20 Backergunge „ 7, '87	Nil	Weather—seasonable. Prospects of crops good. General health fair, except at Ferozepur and Mathoria, where fever is prevalent.
	21 Mymensingh „ 7, '87	0.08	Weather—very hot and sultry. State and prospects of crops good.
	Jamulpur „ „	0.83	
	Kishoregunge „ „	0.11	
	Atira „ „	Nil	
	Netrokona „ „	4.25	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
<i>Eastern Districts—contd.</i>			
CHITTAGONG DIV.	23 Chittagong, Oct. 11, '87	2.14	Weather—hot. Prospects of standing crops fair. Transplantation of amma nearly over. Prices stationary. Public health good.
	24 Nalkholy " 7, "	0.07	Weather—sultry and close. Prospects of amma crop fair. A few heavy showers needed. New cut 27 to 28 seers per rupee. Public health fair.
	25 Tipperah " 8, "	Nil	Weather—abnormally dry and very hot. In a large portion of the district the crops are perishing for want of moisture. There is no water in the fields. Where the Megna inundates the lands, as in the south and extreme west of the district, the crops are flourishing, but they are very bad elsewhere. [Daily Weather Report shows rainfall at Comilla 2.50 on the 9th.]
	Brahmanbariah " " "	Nil	
	Chandpur " " "	0.13	
CHITTAGONG HILL TRACTS.	Chittagong Hill Tracts, " 4, "	0.07	Weather—hot with foggy mornings. Gathering of jum paddy still continues. Cotton doing well and beginning to pod. Lands are being ploughed for mustard. Paddy in low lands progressing. Rain wanted.
	25 Hill Tipperah " 5, "	Nil	Weather—days hot, mornings cool. Amma paddy doing well. Prospects of jum crops fair. Public health good.
BEHAR.			
PATNA DIV.	26 Patna Oct. 8, '87	Nil	Weather—hot. Sowing of rabi crops is being pushed on. Rain badly wanted for paddy crop. Masur, cotton and sugarcane continue to look well. Public health good.
	27 Gaya " 7, "	Nil	Weather—dry and hot. Paddy suffering much for want of rain. Prospects of rabi crop will become gloomy if it does not rain within the next three or four days. A few cases of fever reported.
	28 Shahabad " 8, "	Nil	Weather—hot for the season. State of paddy crop continues satisfactory, but more rain urgently wanted both for this crop and for sowing of rabi, which has commenced. Some fever and cholera reported from Buxar and Sasaram, otherwise public health good. Prices stationary.
	29 Darbhanga " 8, "	Nil	Weather—mornings cool and days hot. Prospects of rice continue favourable, though rain is urgently needed to secure a good crop. Lands are being prepared for rabi sowings. Price of rice averages 12 seers per rupee. Public health generally good.
	Muzafferpur " 8, "	Nil	Weather—very close, hot and calm. Rabi lands are being ploughed. Rice crop is still in good condition, but rain is much wanted. Public health good.
BAGHPORE DIV.	30 Bara " 8, "	Nil	Weather—westerly wind; sultry, rather hot and oppressive for this season of the year. Rain very badly wanted for aghasi. Much anxiety is felt as kharif is slipping off. Prices rising. Public health good.
	31 Champaran " 8, "	Nil	Weather—hot. Early morning cloudy. Bhabul crops are being harvested; yield is good. Rain very much needed for rice crop throughout the district. Prospects good as yet. Sowing of rabi commenced in the Bettiah sub-division. Public health fair.
	32 Monghyr " 8, "	Nil	Weather—hot during the day, cool in the morning. Rain very much wanted for rice crop. Rabi sowings badly going on. Public health generally good. Prices stationary.
	33 Bhagalpur " 8, "	Nil	Weather—sultry and oppressive. Rain urgently wanted for late rice which has already suffered on high lands. Kharif doing well. Preparation for rabi sowings forward. Public health much better.
	34 Patna " 8, "	Nil	Weather—clear and not for the time of year. Aghasi rice doing well. Kharif sown. Lands are being prepared for mustard and tobacco. Millets maturing.
	35 Mehdah " 8, "	Nil	Weather—very hot and fine. No rain except in the extreme north-west on two days. All crops suffering for want of rain, but will still be good if moderate showers soon fall. There are now signs of rain, and a little has fallen to-day (8th) in the middle of the district. Common rice selling at an average of 21 seers per rupee. Fever prevalent.
	36 Sonchal Pargah " 8, "	Nil	Weather—growing hotter. Thunder and lightning on the 7th, but no rain. State of crops good up to date, but prospects critical. Rain urgently wanted. Some loss has already taken place on higher lands in west and north.
ORISSA.			
CUTTACK DIV.	37 Cuttack Oct. 7, '87	Nil	Weather—hot, mornings cool. Clouds appearing. Very slight rain fell on 6th in some places in the interior. Logha sand coming into use. High land sown suffering for want of rain, and will be greatly injured if the drought continues. Prices of foodgrains rising. Common rice sells at 18 seers per rupee in town. Public health generally good.
	38 Poonch " 6, "	Nil	Weather—very hot with light west wind and almost cloudless skies. The continued absence of rain seriously endangers the sown crop, especially in parts where irrigation is impossible. Common rice 31 seers 14 chittacks per rupee in the Sudder sub-division and 20 seers 4 chittacks in the Khumsa sub-division. Cholera has re-appeared in the town and in the interior of the district.
	39 Balasore " 7, "	Nil	Weather—hot. Prospects of crops generally good, but more rain is wanted. Harvesting of kharif paddy is going on and weeding of sown is approaching completion. Public health good, except a few cases of fever.
CHOTA NAGPORE.			
<i>South-West Frontier Agency.</i>			
CHOTA NAGPORE.	41 Hazaribagh Oct. 7, '87	Nil	Weather—bright, clear and rainless, and unusually warm. Paddy on uplands has suffered seriously for want of rain, and damage to low land rice also apprehended. Bhabul has generally yielded fairly. Rabi promising so far. General health good.
	42 Lohardugga " 8, "	Nil	Weather—hot and cloudy. No rain during the week. It is urgently wanted for standing crops throughout the district. Prices fluctuating. Cholera abating, but fever prevalent in Palamou.
	43 Singhbhum " 7, "	Nil	Weather—signs of early cold weather. Hot during the day. Want of rain is being seriously felt in all parts of district and complaints are general. A thrushy fall would do immense good. Outturn will not be more than 8 annas if drought continues. Gora dhan being harvested. General health good. Price of rice has risen.
	44 Manbhum " 8, "	2.24	Weather—hot. Heavy rain on 7th did much good to paddy. More rain still required in all parts of district. High land paddy prospects not good. Public health fair.

changes. The storm was on the day apparent. The storm was on the day apparent. The storm was on the day apparent.

**SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY THE 14TH OF
DECEMBER 1887.**

THE meteorology of the present week has been extremely important, probably more important to the province than any period since the commencement of the rainy season. At the close of the previous week the conditions in Bengal were those of the transition period between the rainy season and the setting in of the cold weather monsoon. Light northerly winds, with low humidity, but rather high temperature, and with almost cloudless skies, obtained over almost the whole province. In the centre and south of the Bay the south-west monsoon was still blowing, and for the last day or two of the previous week conditions became somewhat disturbed as evidenced by the strengthening of the winds at Galle. On Friday, the 7th, in addition to moderately strong winds, which were blowing at Galle and at Diamond Island, there was a well marked cyclonic circulation of winds over the centre and south of the Bay, though there was still no distinct evidence to show that any cyclonic storm had formed. On Saturday, the 8th, or the first day of the present week pressure fell slightly at Madras, though it was rising at all other stations in the south of the Bay; the cyclonic circulation of winds over this area became more strongly marked, and winds strengthened considerably, particularly at Diamond Island.

It was therefore evident that a small cyclonic storm had formed to the west of the centre of the Bay, and immediately on receipt of the 10 A.M. observations on this day, the following telegram was despatched to the Port Officers at Madras and Masulipatam, and to all the important coast stations as far north as Gopaspore—"Barometric depression formed west of centre of Bay, probably off Masulipatam and Madras coasts. It may develop, or may only bring heavy rain and squally weather to west coast. Please telegraph any important changes." The storm was on this day apparently not very far from the coast to the east of Madras, and early on Sunday morning, the 9th instant, the centre crossing the coast probably at 7 or 8 A.M., about 50 or 60 miles to the north of Madras and between this station and Masulipatam, and at 10 A.M. of the same day the centre was well inland and about this distance to the north-west of Madras. So far as the observations which have been received up to the present time show, the least pressure recorded at Madras by the Port Officer during the passage of the storm was about 29.4 inches. The storm was not a very violent one, though it gave strong winds, or perhaps a gale of wind at Madras and as far north as Cocanada and perhaps Nagapatam, and it also gave heavy rain along the coast, Madras receiving 8.23 inches on the morning of the 9th.

As the storm was evidently crossing the Peninsula the following telegram was sent off on receipt of the 10 A.M. observations of the 9th to the Meteorological Reporter to the Government of Bombay to the following effect—"Small cyclonic storm crossed coast near Madras, movement westerly," and the Port Officers at the stations previously named, except Madras, were informed that the storm was passing inland north of Madras.

The storm then travelled slowly in a northerly or west-north-westerly direction, and on the morning of the 10th it had almost crossed the peninsula, and the centre of the cyclonic wind circulation was a little to the east of Belgaum. The storm therefore advanced along almost precisely the same track that of the storm of the second week of November 1886, which passed over the Western Ghats and advanced by a curved track over the Arabian Sea to the Heluchistan coast, and the 11th the storm had crossed the coast and had passed into the Arabian Sea, and it had actually ceased to affect the land area.

As stated previously, the storm gave heavy rain to the Madras coast as it passed over the land, and with the indraught towards the retreating storm rather strong humid winds set in along the west coast of the Bay. From the reports received on the morning of the 10th, the area of heavy rainfall then appeared to extend along the coast from Gopalpore down to Madras, but on the following day the humid winds advanced somewhat in a northerly direction, and on the morning of the 11th the reports showed that the area of heavy rainfall had advanced, False Point, while the southern limit was at Cocanada. On the 12th the reports again showed that the moisture laden current had advanced further northward, and the area of heavy rain extended from Sangor Island down to Cocanada. The moist current having reached South Bengal, it then commenced to spread slowly over the interior of the province. The wind system blowing over Bengal became first strongly easterly, and then the northerly element gradually disappeared. On the 12th winds had become easterly and south-easterly over the greater part of the province, and by the close of the week scarcely any steady reported northerly winds.

The effect of the formation and movement of the cyclonic storm above described has therefore been to cause the south-west monsoon to again temporarily establish themselves over the whole of Bengal, and thus good general rain has again been reported over the whole of the province. During the formation and advance of the storm conditions in Bengal, as usual became somewhat disturbed, and rain showed more or less local, were reported from many districts, but the actual monsoon current came up later, and the heavy rainfall commenced in the Orissa Division from about the 10th; in South-West Bengal and Chutia Nagpur the general rain commenced on the 11th and 12th, and finally in East and North Bengal, and in Behar, the general heavy fall usually commenced on the 13th and 14th instant.

Pressure.—At the commencement of the week pressure was above the normal in all districts. For the first two days pressure continued to increase rather largely, until the excess pressure was considerably more than a pound of an inch over a large part of the province; a moderate fall of pressure then took place, which lasted for about four days, and which was contemporaneous with the advance of the disturbed conditions over Bengal, and finally on the last day of the week pressure again commenced to rise

rather rapidly. The mean pressure for the whole week has therefore been in excess of the normal; and taking only those stations into consideration from which observations have been received for many years, and which therefore yield reliable averages, the mean pressure of the province has been in excess of the normal by 0.078 inch. The excess pressures are largest at the eastern stations, where Chittagong reports an excess of 0.104 inch, and smallest at the western stations, where Hissarbagh records an excess of only 0.044 inch.

Temperature.—Owing to the considerable rainfall during the week, temperature fell rather rapidly. During the earlier part of the week it was generally in excess of the normal, but for the second half it has been in defect. The mean temperature for the week has been lower than the normal in Orissa and in South-West, East and North Bengal and in Assam while it has been in excess in Behar and Chittia Nagpur. Both excess and defective temperatures are usually about one degree in amount. For the whole of Bengal, therefore, the mean temperature has been about $0^{\circ} 2'$ in defect of the normal, while in Assam the defect has been $0^{\circ} 8'$.

Rainfall.—The causes which brought about the rainfall of the week and the period of commencement have already been described, and it therefore only remains to state its amount. The heaviest falls have taken place in North Behar, which shows an average rainfall of 3.29 inches. In all other districts, except Chittia Nagpur, the average falls have ranged from 2 to about $2\frac{1}{2}$ inches, but in Chittia Nagpur the fall has only equalled 1.10 inches. The number of rainy days during the week has also been decidedly large, and in most districts rain has fallen on three or in some cases four days. The actual falls of rain have far exceeded the normal amount for the week, and in most districts they have been so heavy that, though there was practically no rain in the earlier part of October, the falls now recorded almost bring up the rainfall to the middle of October. Compared with the normal fall for the week, and expressed as a percentage of that amount, the actual rainfall during the past week in each of the large meteorological districts have equalled—in North Behar 317 per cent.; in East Bengal 174 per cent., or taking each of these districts the rainfall of the province may be said to have equalled 234 per cent.; in South-West Bengal 240 per cent.; in North Bengal 240 per cent.; in Behar 251 per cent.; and in Chittia Nagpur 121 per cent., or having an equal value in the calculation, equalled 207 per cent.

Taking up the rainfall rather more in detail, the following appear to have been the average rainfalls during the week in each of the smaller districts into which the province is divided so far as the reports have been received, but the returns from Orissa and some of the districts of East Bengal are not complete and five inches part of the Shahabad, Buxar, and Saran, between three and four inches Farredpore, Mymensingh, Bogra, Dinagepore, and three inches Midnapore, 24-Pargannas, Patna, Rajshahye, Malda, Purneah and North Behar, Burdwan, Beerbhoom and West Bengal, Durrkhanga, Patna South Bhagalpur, the following districts the average rainfall falls have only averaged from half to one inch Lehardugga and Manbhoom, and last, where it is in Singhbhum. Out of about two hundred and thirty stations which reports to have received no rain during the week is Sheikh.

The following table gives the summary of the seven meteorological divisions of the province for the week ending Friday, the 14th

of the temperature and rainfall data of each province for the week ending Friday, the 14th

METEOROLOGICAL DIVISION.	TEMPERATURE					
	Highest observed during week.	Lowest observed during week.	Averages for week.			Variation from normal of week above or below normal mean of week.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 26, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, t thunder, a dew.

A. PEDLER,

for Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA ;
Calcutta. the 17th October 1887.

MEMORANDUM.

During the week ending 24th September 1887, births and deaths were registered in the principal Municipalities in Bengal (excluding Howrah, from which return has not yet been received) at the rates respectively of 19 and 23·6 per 1,000 of population, against 19·9 and 25·8 per 1,000, respectively, in the preceding week ending 17th September, indicating a falling off in the registration of both the events, particularly of deaths.

2. The highest proportions of births and deaths were returned from the following Municipalities :—

Births.			Deaths.		
		Ratio per mille.			Ratio per mille.
Gya	...	47·6	Serampore	...	58·0
Monghyr	...	35·3	Gya	...	45·0
			Puri	...	44·1
			Beaulash	...	39·4
			Suburbs of Calcutta	...	36·2
			Monghyr	...	35·8

3. The following table denotes that, as compared with the results of the preceding week, there was a sensible diminution of mortality from fever, but no important differences in the casualty rates from the other diseases, *vide* figures given below :—

Ratio per mille during the weeks ending—					
			24th September 1887.	17th September 1887.	
Cholera	1·4	1·8	
Small-pox	1	
Fever	9·7	11·4	
Bowel-complaints	4·0	3·9	
Injury	4	6	
Other causes	8·1	8·1	

4. Eliminating small-pox, from which no death was reported to have occurred, fever and bowel-complaints which proved notably fatal, the former only in the Beaulash town, viz., at the rate of 26·2 per 1,000 of population, and the latter in the Serampore Municipality, viz., 26·5 per 1,000, and injury, the casualties from which were nowhere large, cholera and the maladies coming under the head of " Other causes " caused the greatest loss of life in the following Municipalities :—

Cholera.			Other Causes.		
		Ratio per mille.			Ratio per mille.
Arrah	...	6·0	Gya	...	23·9
Patna	...	2·6	Puri	...	23·1
Suburbs of Calcutta	...	3·3	Naraingunge	...	16·5
			Serampore	...	15·7
			Suburbs of Calcutta	...	13·6

5. That the death-rates under the heads of *Sex*, *Class* and *Age* stood as noted below :—

According to Sex.			According to Class.			According to Age.		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Males	...	23·8	Christians	...	36·1	Under 1 year	...	133·2
Females	...	33·3	Hindus	...	25·2	1 and under 5 years	...	41·9
Ratio of male deaths to every 100 female deaths	113		Mahomedans	...	19·7	5 " " 10 "	...	15·0
						10 " " 15 "	...	19·6
						15 " " 20 "	...	13·5
						20 " " 30 "	...	14·9
						30 " " 40 "	...	12·9
						40 " " 50 "	...	15·0
						50 " " 60 "	...	23·2

Total		51,80,700	14,82,190	64,79,110	20,02,180	4,05,480	1,10,000	10,80,777

General remarks on the fluctuation of principal staples carried over the East Indian Railway during the month ended 27th August 1887.

INCREASES.

Jute, raw.—This increase is due to the new traffic booked *via* Nalhati to Howrah and the neighbourhood.

Rice (shooked and unshooked).—This increase is in continuation of that reported throughout the year.

Other grains.—This was chiefly in despatches from Meja road, Allahabad, Jaura, and Aligarh to Indore, Agra, Dholpur, Bharatpur and Gwalior to supplement poor crops.

Oil.—Due to improved despatches in kerosine oil from Howrah.

DECREASES.

Coal and coke.—There was an increase in the downward despatches and decrease in the upward traffic, resulting in a net increase in the weight carried and a slight decrease in the earnings.

Cotton.—Due to the period being always a dull one for this traffic.

Piece-goods, European.—This decrease is reported to be due to agents and third hands being unable to dispose of their stocks up-country.

Permanis.—This was entirely in the despatches from Howrah.

Gunny.—This decrease follows that in the export traffic.

Wheat.—This was owing to partial exhaustion of stocks up-country and to the small quantities available being either damaged by the early rains when lying in the open, or to Calcutta merchants being unable to give the prices asked by sellers.

Grain and Pulses.—There was an increase in the weight carried attended with a decrease in the earnings; the increases were in the despatches from Cawnpore and Munhar to Dholpur and the neighbourhood, while the traffic of the corresponding period of 1886 was of much longer lead, resulting in the decrease in the freight earned.

Government stores.—The decrease was chiefly in despatches from Howrah.

Hides.—Due to the Calcutta market being dull and to the supplies up-country being shorter than in 1886.

Railway Materials, Foreign.—Following the busy month of July, there was a fall in the despatches of railway materials both from Howrah and Bombay.

Salt.—The decrease in this commodity was chiefly in the despatches *via* Agra, due to diversion of the staple by the Bombay, Agra and Central India Railway from Agra to Unwaspore.

Seeds.—The decrease was almost entirely in linseed and poppy-seed, and was due to the very weak state of the market; the drop in poppy-seed was a partial failure.

Sugar, refined and unrefined.—Due to scanty supplies from the Oudh and Rohilkhand Railway and our stations in the Dinapore district having continued to show the decreases of previous months.

Tobacco.—Due to poor crops.

ALLEN MURRAY, Dy. Traffic Manager.

TRAFFIC MANAGERS'S OFFICE, CALCUTTA, the 18th October 1887.

INCREASE.

Coal and Coke	354 Tons.
For Railway and Florida purposes.	
Jute	344 "
There has been a steady increase in the jute traffic in the Central Section.	
Grain and Pulse	540 "
Good crops and a favourable market.	
Railway materials	34 "
For repairs and renewals. Also return of old material to Calcutta for sale.	
Seeds	204 "
Improvement in Home market after an extended period of depression.	

DECREASE.

The decreases under cotton, raw, husked rice, hides, salt, and tobacco are insignificant, and attributable only to ordinary fluctuations.

CALCUTTA, the 13th August 1887.

F. P. QUINLAN, Examiner of Accounts.

XXXIII.—All other articles of merchandises								
Total	783	74	269	300	901	1,380	217	14

INCREASE.

Coal	Tons.
This increase is due partly to steamer service and partly to silk factories being worked by steam-power to greater extent.	256
Cotton piece-goods (European)	13
The increase in this staple is due to greater demands for Doorga Poojals.	10
Gunny bags and cloths	
The increase in this traffic is due to increased grain traffic.	198
Grains—(2).—Rice	23
The increase in this commodity is due to greater dispatch from intermediate stations owing to good crops this year.	23
Iron	15
This increase is due to more building materials purchased by the merchants.	15
Railway plant and rolling-stock	
This increase is due to more materials carried during the month.	

DECREASE.

Salt	Tons.
The decrease is due to this being carried by river this year.	20
Mustard and rape	
The decrease in this traffic is due to less import on account of bazar being dull this year.	16
Sugar—Undrained	
The decrease in this traffic is due to less import on account of bazar being dull this year.

J. WARE EDGAR,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th October 1887.—Whereas it is provided by section 74 of Act XII. of 1876 (the Indian Ports Act) that any Magistrate, upon an application being made to him by the Consul of any Foreign Power to which the Foreign Deserters' Act, 1852, has, by an order of Her Majesty in Council, been, or shall hereafter be, declared to be applicable, or by the representative of such Consul, and upon complaint on oath of the desertion of any seaman, not being a slave, from any ship of such Foreign Power, may, until revocation of such Order in Council has been publicly notified, issue his warrant for the apprehension of any such deserter, and may take the further proceedings provided by the Act: and whereas Her Majesty in Council has been pleased to issue orders in Council, dated the 12th day of July 1887, making the Foreign Deserters' Act applicable to the Kingdom of the Hellenes, and the Governor-General in Council has been pleased to direct the publication of the orders, the Lieutenant-Governor directs the publication of the orders in Council in the *Calcutta Gazette*, for the information and guidance of the Magistrates within the Presidency of Bengal, as follows.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

AT THE COURT AT WINDSOR.

The 12th day of July 1887.

PRESENT:

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by the "Foreign Deserters' Act, 1852," it is provided that, whenever it is made to appear to Her Majesty that due facilities are or will be given for recovering and apprehending seamen who desert from British merchant ships in the territories of any

foreign power, Her Majesty may by Order in Council, stating that such facilities are or will be given, declare that seamen, not being slaves, who desert from merchant ships belonging to a subject of such power, when within Her Majesty's dominions, shall be liable to be apprehended and carried on board their respective ships, and may limit the operation of such order, and may render the operation thereof subject to such conditions and qualifications, if any, as may be deemed expedient:

And whereas it has been made to appear to Her Majesty that due facilities will be given for recovering and apprehending seamen who desert from British merchant ships in the dominions and possessions of His Majesty the King of the Hellenes:

Now, ~~whereas~~ Her Majesty, by virtue of the power vested in Her by the said "Foreign Deserters' Act, 1852," and by and with the advice of Her Privy Council, is pleased to order and declare, and it is hereby ordered and declared, that from and after the publication hereof in the London Gazette, seamen, not being slaves, and not being British subjects, who, within Her Majesty's dominions, desert from merchant ships belonging to subjects of His Majesty the King of the Hellenes, shall be liable to be apprehended and carried on board their respective ships: Provided always that if any such deserter has committed any crime in Her Majesty's dominions, he may be detained till he has been tried by a competent court, and until his sentence, if any, has been carried into effect.

And the Secretary of State for the Home Department, the Secretary of State for the Colonies, and the Secretary of State for India in Council, are to give the necessary directions herein accordingly.

C. L. PEEL.

[First Publication.]

NOTIFICATION.

The 24th October 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 63).

ZEILA—GULF OF ADEN.

Changes in positions of Buoys.

The following information has been received from the Resident at Aden, through Commander A. Carpenter, R. N., in charge Marine Survey of India.

Eilat Buoy (red with black cage) has been replaced 7 cables N. $\frac{1}{2}$ E. (True) of its old position on Admiralty Chart No. 919, Obokh, Berbera and Zeila. It now lies in 8 fathoms water.

Channel Reef Buoy (red with black cage) has been replaced one cable N. E. $\frac{1}{2}$ E., true, of its old position on the same chart. It now lies in 7 fathoms water.

These buoys are exactly alike. It is to be hoped that one will soon be painted another colour, or given a different cage.

Caution is necessary in using the passage between Channel Reef and Shab Fildel, not to pass near the buoy, as the Reef appears to extend more to the southward than shown on the chart. See Admiralty Chart 919.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, Captain, I.M.,
Port Officer of Calcutta.

Post Office, Calcutta, the 19th October 1887.

[Second Publication.]

NOTIFICATION.

The 18th October 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 57).

BAY OF BENGAL—EAST COAST.

Chittagong Buoyage.

The Port Officer of Chittagong reports that, owing to the extension of Potanga flat, the outer Red bar buoy has been shifted 600 feet S.S.E. Magnetic from its old position, and is now in 8 feet water reduced.

A third class conical buoy has been put on the end of the old mooring chain to mark the position of mooring.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, Captain, I.M.,
Port Officer of Calcutta.

Post Office, Calcutta, the 11th October 1887.

[Second Publication.]

NOTIFICATION.

The 18th October 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 58).

RED SEA—WESTERN SHORE.

SAWAKIN APPROACH.

Shoal southward of Tellah Tellah Kebir.

The following information has been received by the Admiralty from Commander E. Rooke, H. M. S. *Falcon* of the existence of a shoal lying about $3\frac{1}{2}$ miles southward of Tellah Tellah Kebir, southern approach to Sawákin.

On 2nd August 1887 the *Falcon*, about an hour after leaving an anchorage Eastward of Tellah Tellah Kebir, passed over this shoal; soundings of $6\frac{1}{2}$ to 7 fathoms were obtained for the distance of half a mile; bearings of the land could not be taken on account of thick weather.

Approximate position as given, latitude $18^{\circ} 44\frac{1}{2}'$ N.; longitude $38^{\circ} 11'$ E.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, *Captain, L.M.,*
Port Officer of Calcutta.

PORT OFFICE, Calcutta, the 14th October 1887.

[Second Publication.]

NOTIFICATION.

The 18th October 1887.—The following Notice to Mariners is published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 59).

BAY OF BENGAL.

Madras Harbour.

It is notified by the Port Officer of Madras that the use of flags as bad weather signals has been discontinued at the ports of the Madras Presidency, and that the following storm signals have been adopted in lieu at Madras and the outports. When there is reason to apprehend the advent of dangerous weather, the officer in charge of the port will—

(1) if during daylight, direct the hoisting of a ball ;

(2) if at night, three lamps suspended on the same line, one above the other (in a vertical series);

(3) if a cyclone is likely to approach the port, a drum by day ; and

(4) two lamps similarly suspended by night.

If it is decided that the shipping shall be ordered to sea, the following signals will be hoisted at the flag-staff of the port signifying "out or slip"—

(1) a cone by day, apex upwards ;

(2) three good lights suspended triangularly, one at the mast head and one at each yard arm, by night.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, *Captain, L.M.,*
Port Officer of Calcutta.

PORT OFFICE, Calcutta, the 14th October 1887.

[Second Publication.]

NOTIFICATION.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, FINANCIAL DEPARTMENT.

NOTICE TO MARINERS—(No. 62).

BAY OF BENGAL.

COROMANDEL COAST.

Notice is given by the Port Officer of Madras on the 10th October that the Brig *Moolookumeraswamy Peasay*, of 114 tons register, was abandoned on the 9th instant in

Latitude 11°36' North

Longitude 80°38' East

and is a floating danger to vessels navigating in that locality.

The wind having held from the south since the abandonment, the derelict must have drifted northwards.

By direction of the Government of Bengal,

ARTHUR W. STIFFE, Captain I.M.,
Port Officer of Calcutta.

Port Office, Calcutta, the 18th October 1887.

J. WARE EDGAR,

Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 21st October 1887.—It is hereby notified for general information, that the Lieutenant-Governor intends, in the exercise of the powers conferred on him by section 3, Act IV (B.C.) of 1865 (an Act for the prohibition of the practice of inoculation), to extend

Jahanabad.	Dandnuggur.
Arwal.	Kowadab.
Uth.	Tikari.

the provisions of the above Act to the thanas named in the margin, situated in the district of Gya, unless good

reasons are shown to the contrary, within one month from the date of the publication of this notification, within the places to be affected by these orders.

J. WARE EDGAR,

Offg. Chief Secy. to the Govt. of Bengal.

DECLARATION.

The 17th October 1887.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a police station in the village of Lalbagh, pergunnah Laskarpur, zillah Rajshahye, it is hereby declared that for the above purpose a piece of land measuring, more or less, 10 cottahs of standard measurement, is required within the aforesaid village of Lalbagh. The land is bounded on the north by Kashi Shunder Ray's house and Lok Nath Ray's new house; east by a branch road leading to Baboo Anand Chandra Maitra's house; south by municipal pucca road; and west by Rajah Jogendra Nath Ray's waste lands, on which there are one banian-tree and one savatha-tree, and further west of which is the shrine of goddess Joykali.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern,

J. WARE EDGAR,

Offg. Chief Secy. to the Govt. of Bengal.

EDUCATION DEPARTMENT, BENGAL,

NOTICE.

In accordance with the Government of Bengal notification, dated the 16th September 1887, it is hereby notified, in supersession of the notice, dated the 1st idem, published on page 799, Part I of the *Calcutta Gazette* of the 7th September 1887, that the next Half-yearly Departmental Examination of Assistant Magistrates, Deputy Magistrates, and others, serving in the districts of the Bhagulpore Division, will be held at Bhagulpore, on Monday, the 14th November 1887, and following days.

The examination will be held in the Commissioner's office.

JOHN BEAMES, Commissioner.

COMMR.'S OFFICE, BHAGULPORE, the 14th October 1887.

NOTICE.

It is hereby notified that at the next Half-yearly Departmental Examination of Junior Civilians, Deputy Magistrates, &c., which is to commence on Monday, the 14th November 1887, four Local Committees will be convened in this Division, viz., (1) at No. 14, Bore Street, Calcutta, for officers stationed at the Presidency or employed in the 24-Pergunnahs, (2) at Kishnaghat for officers employed in the Nadua district, (3) at Jessore Sadar station for officers employed in that district and in Khoolna, and (4) at Berhampore for officers employed in the Moorshedabad district.

A. N. BHATTACHARJEE, *Personal Assistant, for Commissioner.*

COMM.'s OFFICE, PRESIDENCY DIVISION, the 14th October 1887.

BEHAR CIRCLE.

ENTRANCE EXAMINATION, 1888.

THE attention of those who wish to appear at the Entrance Examination of 1888, as teachers or as private students, is called to the following:—

I. By "teacher" is meant one who has been employed as such since 1st January 1887, and is a *bona fide* teacher, in receipt of a salary at the time of the examination. Satisfactory evidence of this will be required of those who wish to appear as teachers for the Entrance, F. A., or B. A. examinations.

II. Private students will have to produce evidence that they have not read in any school since May 1887, and send, together with their application, a certificate from the head-master of the last school they read in showing that they have observed the Inter-school Rules.

III. Teachers and private students will have to appear at the test examination of the nearest zillah school and pay a fee of two rupees.

IV. The application forms, when sent for the signature of the undersigned, must be accompanied by a statement signed by the head-master showing that there is a reasonable probability of the applicant's passing.

V. No applications to be allowed to appear at the test examination will be received later than 31st December 1887 from either teachers or private students.

VI. Head-masters of the zillah schools are informed that the standard of marking for the test examination is to be just that of the University. If candidates, whether pupils of the school, teachers or private students, fail to pass in more than two subjects, or fail very badly in two, their marks must be submitted to the undersigned, to decide whether they shall be sent up or not. Care must be taken to submit the marks in time.

JOHN VAN SOMEREN POPE,

Inspector of Schools, Behar Circle.

BANKIPORE, the 6th October 1887.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1316B.

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 19th October 1887.—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Sasseram Local Board, in the district of Shahabad, under section 25 of Act III (B.C.) of 1885, of Mr. H. E. Ransom, c.s., Sub-divisional Officer, to be their Chairman.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 19th October 1887.—It is hereby notified that the members of the Buxar Local Board, in the district of Shahabad, having at a meeting, under section 25 of Act III (B.C.) of 1885, requested the Lieutenant-Governor to appoint a Chairman, the Lieutenant-Governor is pleased under the said section to appoint Mr. E. F. Growse, c.s., Sub-divisional Officer, to be Chairman of that Local Board.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 21st October 1887.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the powers vested in the Local Government by section 351 of Act III (B.C.) of 1884, to confirm the following bye-laws which have been framed by the Commissioners of the City Moorshedabad Municipality, under section 860 of the said Act, unless good reasons are shown to the contrary within one month from this date.

ADDITIONAL BYE-LAWS FOR THE CITY MOORSHEDABAD MUNICIPALITY.

For regulating the conduct of business at meetings of the Commissioners.

1. All meetings should be convened by a notice, signed by the Chairman or Vice-Chairman, sent round to each Commissioner not less than five days before the date of meeting.

2. At all meetings the proceedings shall be commenced by reading the minutes of the last meeting, which shall show the names of the President and the Commissioners present, and the words of every resolution or amendment; and in cases where votes have been taken, the number of voters for and against, with a view to ascertain if the same have been correctly recorded, and if any Commissioner is of opinion that the minutes have not been so recorded, the Commissioners shall decide whether or not they have been so recorded, and shall make corrections, if necessary.

3. Subjects shall be discussed in the order in which they stand in the list of business.

4. A subject, once finally disposed of by a resolution duly passed at a meeting, shall not be re-opened at any subsequent meeting, unless at least two-thirds of the Commissioners, who happen to be present at a meeting, of which due notice has been given, consent that such subject shall be re-opened and re-considered, provided that resolutions adjourning the consideration of a subject may be re-considered at any meeting after the usual notice.

For regulating the conduct of persons employed by the Commissioners.

5. All persons employed by the Commissioners, whose services may no longer be required, shall be liable to discharge after receipt of previous notice, or pay in advance for the period of one month, and no such person shall withdraw from the duties of his office without having given previous notice for the period of one month, on pain of forfeiture of two months' salary.

For the regulation and management of privies.

6. No nightman, sweeper, or other person carrying night-soil through the streets shall loiter, or deposit any vessel containing night-soil, on or by the side of any public road or street except for ordinary relief.

The penalty for infringement shall be a fine not exceeding Rs. 5.

For regulating burning-ghats and burial-grounds.

7. No person shall remove or sell any clothes or other articles appertaining to a corpse which may have been left at any burial-ground or burning-ghat.

The penalty for infringement shall be a fine not exceeding Rs. 30.

8. No person, while conveying any corpse, or part of a corpse, shall, except for the purpose of ordinary relief, deposit it on or near any public highway.

The penalty for infringement shall be a fine not exceeding Rs. 10.

General bye laws.

9. No person shall make a shop over any public drain, or in any way occupy any culvert, bridge or platform which may have been placed over any public drain.

The penalty for infringement shall be a fine not exceeding Rs. 10.

10. The Commissioners may give notice in writing to the owner or occupier of any land within three days to trim or prune any hedges, and to cut and trim any trees overhanging any public drain, or any drain which is connected with any public drain. Any person, who shall fail to comply with such requisition, shall be liable to a fine not exceeding Rs. 10, and to a fine of Rs. 2 per day until the requisition be complied with.

11. Any person who shall, in contravention of any order passed under section 236 of the Act, make, renew, or thoroughly repair with grass, leaves, mats or other inflammable materials the external roofs and walls of any hut or other building, may be liable to a fine not exceeding Rs. 20, and the Commissioners may order any such hut or building to be demolished by giving notice in writing to such effect to the owner thereof, and any person who shall fail to comply with such notice within twenty days may be liable to a fine of Rs. 2 for each day during which he shall fail to comply with such requisition.

12. No person suffering from any contagious disease shall bathe in any bathing place belonging to the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

13. No person shall steep in any tank, khal, or ditch, or in the river within municipal limits any jute, hemp or other noxious vegetable matter.

The penalty for infringement shall be a fine not exceeding Rs. 20; penalty for continued infringement after notice a fine of Rs. 2 daily.

14. No one shall let off any fireballons, fireworks, firearms or any missiles in or near a public street without the written consent of the Municipal Commissioners previously obtained.

The penalty for infringement shall be a fine not exceeding Rs. 10.

For regulating the disposal of offensive matter, rubbish, and dead bodies of animals.

15. The Commissioners may, from time to time, order to be closed, and appoint places for the deposit of the carcasses of animals; and any person who shall deposit, or cause to be deposited, the carcass of any animal in any place other than that appointed by the Commissioners, or in any place which they may have ordered to be closed, shall be liable to a fine not exceeding Rs. 30.

16. No owner or occupier of land shall allow the same to be made filthy by the systematic deposit thereon of any dirt, dung, bones, night-soil or other offensive matter: provided that no prosecution under this bye-law shall be instituted against an absentee owner or occupier until notice giving 14 days to clean the land has been served on him.

The penalty for infringement shall be a fine not exceeding Rs. 10; for continued infringement a fine of Rs. 5 daily.

For regulating traffic in the streets.

17. The person in charge of an elephant or camel shall cause the same to move out of any public road or street, whenever any horse, which is being ridden or driven, is approaching, in such a way as to avoid frightening any such horse. Elephants in passing by a public road to carry bells, for omission the person in charge shall be liable.

The penalty for infringement shall be a fine not exceeding Rs. 20.

18. No person shall fly kites on any public road.

The penalty for infringement shall be a fine not exceeding Rs. 5.

19. No owner or occupier or farmer of a market or of any shop shall keep it in a filthy state.

The penalty for infringement shall be a fine not exceeding Rs. 20.

20. No cart laden with bamboos or long planks or any such materials, over 12 feet in length, shall traverse the public streets, except with a person in attendance in front in addition to the driver.

The penalty for infringement shall be a fine not exceeding Rs. 10.

Miscellaneous bye-laws.

21. No owner or occupier or farmer or vendor in any market or shop shall obstruct any person appointed by the Commissioners for that purpose from entering and inspecting any such premises at any time between sunrise and sunset.

The penalty for infringement shall be a fine not exceeding Rs. 30.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

On the GORE AND ROHILKHAND RAILWAY.

FROM this date the prices of all beams and scantlings supplied from this depot will be as follows:—

Beams.—21 feet length, at Rs. 2-10 per cubic foot.

22 " " 2-13 "

23 " " 2-14 "

24 " " 3 "

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

Scantlings.—From 12 to 30 feet, at Rs. 1-8 per c. ft.

Under 12 and over 7, at " 2-4 "

Under 7 feet at " 2 "

The above prices are for ordinary building purposes. For Plankings, Sleepers, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KARNYA LAL,

Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1886.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking twenty pounds and upwards at a time, from the Superintendent, Royal Botanic Garden, Seepore, near Calcutta, for cash only, at the following rates:—Per four ounces tin Rs. 6 annas 8, per eight ounces tin Rs. 12 annas 8, per pound tin Rs. 24. The general public can be supplied by the Superintendent, Royal Botanic Garden, for cash only, at the under-noted rates:—Per four ounces tin Rs. 8 annas 8, per eight ounces tin Rs. 16 annas 8, per pound tin Rs. 32. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking twenty pounds at a time, from the Superintendent, Botanical Garden, Calcutta, for cash only, at the following rates:—per four ounces tin, Rs. 4 annas 8; per eight ounces tin, Rs. 8 annas 8; per pound tin, Rs. 16 annas 8. The general public can be supplied by the Superintendent, Botanical Garden, for cash only, at the under-noted rates:—per four ounces tin, Rs. 5 annas 8; per eight ounces tin, Rs. 10 annas 8; per pound tin, Rs. 20. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

A table of the average monthly and annual rainfall at 98 Stations in Northern India

Report of the Midnapore and Burdwan cyclone of the 15th and 16th October 1874.

The above are also to be obtained at the same prices at Messrs. Thacker, Spink & Co., No. 4, Government Place.

JOHN ELIOT, M.A., Meteorological Reporter

to the Govt. of Bengal.

Calcutta, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by post in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PRATER.

Offg. Meteorological Reporter to the Govt. of Bengal, Meteorological Office, Bengal, the 17th March 1886.

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	Rs. 30	Rs. 14	Rs. 8
" three issues	" 85	" 36	" 24
" six "	" 100	" 58	" 45
" nine "	" 145	" 86	" 64
" twelve "	" 180	" 120	" 80

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the Calcutta Gazette of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1886, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 32-8.

Without postage. With postage.

For the Calcutta Series ... Rs. 10 0 Rs. 12 8

" each of the Madras, Bombay, and Allahabad Series ... " 6 0 " 7 0

" a part of the Calcutta Series purchased separately (inclusive of postage in India) ... " 3 0

" a part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ... " 1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

" Thacker & Co., Bombay.

" Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

" Director of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1886 should be at once remitted.

Notification.

In modification of the Notice, dated the 7th November 1882, published in Part II, page 1688 of the *Calcutta Gazette*, the following notice is published for information:—

Notice is hereby given, that the terms for the purchase of publications from, and for all work done in, the Bengal Secretariat Press for other than Government offices, or offices under the control of Government Officers, are strictly cash.

In future no publication will be supplied, or advertisement notice, &c., inserted in either of the *Gazettes*, except for the offices mentioned above, unless the cost thereof has been remitted to the Accountant, Bengal Secretariat. In the case of insolvency notices, cash must be sent with such notices, when forwarded by Mofussil

judges or officers, and for those forwarded by the Official Assignee, cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

R. H. WILSON,

Offg. Secy. to the Govt. of Bengal.

The 24th February 1886.

NOTE.—Rate for advertisements in the *Calcutta Gazette*:—

	Rs.
Full page, per issue	20
Half " " "	10
Casual advertisements, 4 annas per line.	

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, office of the Legislative Department, Government of Bengal, situated at No. 5 on the top floor of the Government Offices, Writers' Buildings, Calcutta.

Copies are available for purchase at MESSRS. THACKER, SPINK AND Co., Government Place, Calcutta.

Notice

The 20th March 1886.—The subscription to, and postage for, the *Calcutta Gazette* will henceforth be at the following rates, payable in advance:—

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1886.

RESOLUTION.

POLICE.

Darjeeling, the 24th October 1887.

Read—

The Report on the Administration of the Police Department for the year 1886.

Read also—

The Reports for the years 1884 and 1885, and the orders of Government recorded thereon.

GENERAL.

Cost and numbers of Police Force.—The actual expenditure for the financial year 1886-87 was Rs. 40,33,058 against Rs. 41,95,793 in 1885-86. The total strength of the police (including Railway police) was 23,312. The cost of the force employed on purely police work is estimated at Rs. 26,00,711, or 7-5 pies per head of population, the cost in England and Wales being 2s. 8-11d. per head. The proportion of police to area and population is shown in the following table:—

Provinces.	Number of police.	Area in square miles.	Population.	Proportion of police to square miles.	Proportion of police to population.
Bengal	11,991	70,956	34,821,378	1 to 5-9	1 to 2,903
Bihar	5,914	44,130	23,127,104	1 to 7-4	1 to 3,810
Oissa	1,418	9,762	3,789,094	1 to 6-8	1 to 2,672
Chota Nagpore	1,384	26,966	4,225,989	1 to 19-4	1 to 3,058
Total	20,707	151,813	65,964,160	1 to 7-3	1 to 3,154

In England and Wales there was one constable for every 772 of the estimated population for 1885 (one for 750-5 in boroughs, one for 1,199-6 in counties, and one for every 396-5 in the metropolitan police district).

2. *Town Police*.—The working of the town police is not altogether satisfactory. Many municipalities are made up of widely scattered rural areas, and are ill able to afford an expensive system of police. For instance, the Commissioner of Dacca points out that the so-called town of Gosalundo covers six square miles of country, while Perozepore includes hamlets and rice fields four or five miles away from the small bazar forming the nucleus of the municipality. Again, the Inspector-General remarks that Purneah and Kissengunge are striking examples of the way in which municipalities include purely rural areas. These facts raise a reasonable doubt whether the provisions of section 10 of Act III (B.C.) of 1884 have been strictly adhered to. A copy of paragraph 12 of the Report, and also of paragraph 13, dealing with the subject of street-lighting, will be sent to the Municipal Department of this Government. The Commissioners of the Presidency and Chittagong Divisions consider that the chowkidari system should be reverted to in the rural parts of municipalities; and the question of a partial or total return to a system of local or village police in such areas is one which, in Sir Stuart Bayley's opinion, deserves early consideration. He will, however, await the result of the enquiries which the Inspector-General states he is making into this subject.

3. *Rural Police*.—The Inspector-General apparently does not consider that the amending Act I (B.C.) of 1886 effected much improvement in the working of the village police; but this Act only came into force in June 1886, and, as the Commissioner of Chittagong observed, it is too early yet to write with any finality regarding its effects. It was pointed out in the order of this Government, Nos. 1032-39J, dated the 30th June 1886, that the Magistrate can now appoint any person (including police officers) he thinks fit to pay the chowkidars, but that it is not desirable that police officers should be indiscriminately and invariably employed in every instance. Mr. Veasey states that, so far as he had ascertained up to the date of writing his Report, the police had been employed in disbursement of the chowkidars' pay as a matter of course in Burdwan, Khulna, Midnapore, Mozufferpore, and the districts of the Chittagong Division, and that in these districts they are responsible for the money disbursed. In some other districts they are employed when occasion requires, but not in regular manner. The Inspector-General of Police objects to the responsibility thrown on the force in the first-named districts by requiring them to receive and hold large sums of money until they can be made over to the chowkidars concerned, and the Lieutenant-Governor is inclined to think that the employment of the police as custodians of the money collected has been carried too far in these districts. With regard to the general question of the relation between the regular police and the chowkidars, the Lieutenant-Governor fully agrees in the desirability, if possible, of making the village police, so to speak, the foundation of the regular body; but he is not prepared to undertake any radical change in the law at present, especially as the alterations made by the amending Act of 1886 have avowedly not yet received a fair trial.

4. *Miscellaneous*.—The remaining paragraphs of the first portion of the Report (paragraphs 25-52) are principally devoted to matters of a departmental nature, and only call for a few remarks. The percentage of educated men in the police force is as follows:—

Inspectors	99.4
Sub-Inspectors	97.7
Head-constables	78.6
Constables	24.9

In regard to head-constables the Inspector-General observes that "experience shows that for night-work, and guard or escort duty, an illiterate head-constable is much more to be depended on than one who can read or write."

There were four cases of beating or ill-treatment by the police, but none were, strictly speaking, cases of torture. In the first both the head-constable and the constable accused were acquitted; in the second a constable was convicted, but the Sub-Inspector, who was also sent up for trial, was acquitted; in the third a constable and two other men concerned were sentenced to transportation for life; and in the fourth a Sub-Inspector, with 18 years' service, was fined Rs. 120 for ill-using two bad characters in order to compel them to give information. The Inspector-General remarks that, as regards

the rough treatment of bad characters, "we are not only in advance of public opinion, but that even the courts are not disposed to be more than lukewarm." In the case referred to, the Sub-Inspector was allowed to return to duty, and, having regard to the remarks of the Sessions Judge, before whom the case went on appeal, and to the fact that only a fine was inflicted, the Inspector-General did not think it necessary to interfere. It was urged before the Sessions Judge that, when there were repeated thefts in a locality, the public opinion of the place demanded that the bad characters of the neighbourhood should be intimidated. The Judge remarks in his decision: "There is some practical common sense in these views, and I am prepared to say that, having regard to the actual condition of this country, courts should not be disposed to look with too curious eyes on every small excess committed by an investigating officer of police." Sir, Rivers Thompson remarked, in his Resolution on the Report for 1885, that he feared such ill-treatment was by no means confined to the police, but was an ingrained habit of the people. The Lieutenant-Governor recognizes the fact that charges of violence are readily brought against police officers, and that they are sometimes false or grossly exaggerated. He is further inclined to think that, in most parts of Bengal proper, at least, the people are well able to protect themselves against police oppression. At the same time, he thinks it would be most dangerous to show undue leniency in any well-established case of torture. The provisions of the Penal Code may, in point of severity, be in advance of public opinion; but morality has a tendency to follow, however slowly, in the wake of legislation, and if public opinion sympathises with the beating of thieves and rough treatment of known bad characters, it should be the endeavour of Government officers to educate and raise it to a higher level. The withdrawal during the year of the orders requiring outlying stations and outposts to be inspected quarterly, should enable District Superintendents to give more time to the scrutiny of C Forms and examination of special diaries and reports. The system of co-operation between neighbouring districts promises to produce excellent results.

CRIME.

5. *Criminal statistics.*—The proportion of crime to population and police in various provinces of India is shown in the following statement:—

PROVINCE.	Police.	Population.	Crime (cognizable).	Proportion of police to population.	Proportion of police to crime (cognizable).	Proportion of crime (cognizable) to population.
				Police-man.	Cases.	Cases. Persons.
North-Western Provinces and Oudh ..	32,528	43,268,599	153,277	1 to 1,330	1 to 4.7	1 to 283
Punjab ..	20,196	18,812,464	69,502	1 " 932	1 " 5.3	1 " 273
Central Provinces ..	8,744	9,893,791	21,555	1 " 1,125	1 " 2.4	1 " 456
Bombay, including Sind ..	19,110	11,077,458	40,890	1 " 830	1 " 2.1	1 " 83
Madras ..	22,200	9,805,504	129,886*	1 " 1,300	1 " 5.8	1 " 257
Assam including Hill Districts† ..	4,458	5,909,918	10,091	1 " 1,830	1 " 2.2	1 " 585
Bengal ..	24,020	5,964,161	107,410	1 " 2,745	1 " 4.4	1 " 614

* Special and local laws were not included in the table for the last year.
† Hill Districts were not included in the table for the last year.

These figures show that Bengal employs fewer policemen, and has less serious crime in proportion to its population, than any other part of India, for which statistics are available.

6. *Crime of the Province.*—The following figures show the amount of cognizable and non-cognizable crime as compared with the previous year:—

	1885.	1886.
Cognizable ..	107,410	105,793
Non-cognizable ..	106,996	112,684
Total ..	213,406	218,467
Decrease in cognizable cases	1,617
Increase in non-cognizable cases	5,808
Net increase	4,191

The Burdwan, Chittagong, and Dacca Divisions account for the large increase in non-cognizable offences. The percentage of non-cognizable crime for the whole Province is 51·6, the percentage varying from 23·8 in Darjeeling to 82·7 in Noakhally. The attention of the Commissioner of Chittagong will be called to the amount of frivolous and vexatious litigation in that Division. It is probable that the system, which was found to prevail in the district of Tipperah in 1885, of referring most non-cognizable petitions to panchayets for inquiry, was due to a desire on the part of the District Magistrate to check and repress the institution of petty cases. Sir Stuart Bayley considers it to be somewhat remarkable that in a jungly and backward district, such as the Chittagong Hill Tracts, the percentage of non-cognizable cases should be as high as 58·7.

7. *False cases.*—The percentage of false cases has decreased from 6·0 to 5·5. The steady decrease from 13·4 in 1877 is possibly due to the greater attention now paid to prosecutions for false charges, but Sir Stuart Bayley is not satisfied of this. He considers it equally likely that the orders of Government regarding the disposal of C Forms may have induced a greater hesitation, or at least the exercise of extreme care and caution, in declaring a case false. The orders of this Government that complainants are to have the benefit of any doubt, and that doubtful cases are to be entered as true, may have tended to diminish the number of cases shown as false. But it should be borne in mind by magisterial officers that, if they consider a case to be false, they should not hesitate to show it as false, even though there may not be sufficient grounds for the institution of a prosecution under section 211 of the Penal Code; it is obvious that any other procedure would lead to fictitious entries and give a very false impression as to the real percentage of false cases. From the police and magisterial reports quoted by the Inspector General, there would appear to be some grounds for thinking that the police are beginning to send up more cases in C True Form, knowing that they will not be declared false without the strongest evidence. This certainly gives a very novel aspect to an extremely difficult question, and it furnishes an additional reason why Magistrates should not hesitate to declare a case false, when there are reasonable grounds for believing it to be so. No orders have ever been issued directing a prosecution in *all* cases declared false, but only when the Magistrate considers both that a case is intentionally and maliciously false, and that there is sufficient evidence to bring home to the complainant a charge under section 211, Indian Penal Code. The great variations in the percentages of cases declared false in different districts of the same Division,—for instance, 10·6 and 10·2 in Beerbhoom and Midnapore respectively against 2·7 and 2·1 in Burdwan and Howrah respectively,—indicate that the causes must be sought to some extent, at any rate, in differences of procedure; but the real difficulty appears to the Lieutenant-Governor to be involved in the fact that Magistrates are called upon in every instance to record definitely the brief opinion that a case is either false or true. As regards complaints at the basis of which are disputes of a purely civil nature, there can be no doubt but that a little more care on the part of Magistrates in making preliminary enquiries under section 202 of the Criminal Procedure Code would result in the summary dismissal and elimination of a number of cases which are now reported in an arbitrary manner, and frequently after protracted trials, as false through mistake of law or fact.

8. *Prosecutions for false charges.*—Out of a total of 5,852 cases declared false, prosecutions were instituted in 1,384, and convictions obtained in 412 cases. The percentage of false cases prosecuted was 23·6 against 21·7 in 1885, and that of convictions 29·7 against 25·1. The suggestion is put forward that false charges might, to a great extent, be suppressed by the extension to warrant cases of the power which is given in summons cases by section 250, Criminal Procedure Code, to award compensation for a frivolous or vexatious charge to the accused, and it appears that the Commissioner of Chittagong goes so far as to think that a man who has a true charge of assault to prefer is tempted to add theft to it, as by doing so he escapes all liability to the action of section 250 in case the Court should disbelieve his case. Both the proposal and the conjecture are worthy of consideration, but the Lieutenant-Governor is not prepared to advocate special legislation in this direction, though the point will be brought to the notice of the Government of India in case of any general amendment of the Act being brought forward.

9. *Refusal of inquiry.*—Out of a grand total of 105,798 cases, only 523, or 4 per cent., were not inquired into under the proviso to section 157 of the Code of Criminal Procedure. This extremely low percentage indicates either that the returns are fictitious, or that the provisions of section 157 are not understood. Sir Steuart Bayley would call particular attention to the remarks made on this head by his predecessor in paragraph 14 of the Resolution of last year which are reproduced in the margin. It would appear that much of the time of the police is now wasted in inquiring into extremely petty cases to the detriment of more important work. Moreover, the

The Lieutenant-Governor agrees with the Inspector-General that attempts to commit house-breaking are often cases of some importance, but he does not think that all cases should be enquired into; the police must use their judgment in the exercise of the discretion which section 157 gives them. Private persons are not bound to give information in cases of theft or attempts to commit house-breaking, and to make enquiry in very petty cases may cause much harassment and hardship to individuals, as well as occupy time which might be more advantageously used by the police in other directions. The law clearly enacts that an officer need not investigate on the spot, if the case is not of a serious nature and some particular person is named; and that he shall not investigate if, in his opinion, there is no sufficient ground for entering on an investigation. Abstention from investigation in very petty cases admits of more attention being given to more important cases, and enquiry might properly be refused in cases of petty theft of grain, or of some unidentifiable article of little value. Moreover, there are other sorts of petty cognizable crime, in which the people are quite ready enough to resort to the police, and such tendency should not be unduly encouraged."

Inspector-General should take care to disabuse his subordinates of the impression which is said to prevail on the subject of refusal to inquire. "The truth is," says Mr. Veasey, "that, as long as refusals are looked on as something suspicious and to be apologized for, they will continue to be as rare as at present, and their place will be taken by ambiguous entries in the station diary." The Lieutenant-Governor cannot understand why a police officer should be reluctant to record a refusal in cases where he is not bound by law to make an investigation, and he looks to the Inspector-General to make known to his subordinates the views of Government on this question.

10. *Sessions trials.*—The percentage of convictions to the number of persons tried at Sessions trials was 57·8. Having regard to the fact that every case had stood the test of a preliminary inquiry, there can be no doubt that the figures must represent a certain number of failures of justice. In Hooghly the Judge disagreed with several verdicts, but referred only two to the High Court, a conviction following in each instance. As regards the percentages of acquittals in Sessions cases, it is evident to Sir Steuart Bayley, from a comparison of the percentages in the 24-Pergunnahs and Howrah (18·4 and 19·3) with those in Burdwan and Hooghly (68·7 and 41·0) that, even in jury districts, much still depends on the presiding Judge.

11. *Analysis of crime by classes.*—The annexed statement shows the number of true cognizable cases in 1879 and during the past five years:—

	1879.	1882.	1885.	1894.	1895.	1896.
Class I.—Offences against the State and public tranquillity.	2,840	2,508	2,639	2,769	2,802	2,891
" II.—Serious offences against the person.	3,976	4,267	4,694	4,613	4,484	4,542
" III.—Serious offences against the person and property or against property only.	20,602	18,520	19,609	24,921	24,109	22,903
" IV.—Minor offences against the person.	9,608	12,450	2,813	2,580	2,532	2,882
" V.—Minor offences against property.	42,442	35,301	37,690	43,630	42,206	40,099
" VI.—Other offences not specified above.	18,594	27,181	20,554	23,477	24,819	27,002

There is a marked decrease in offences against property, and the Inspector-General thinks that the actual decrease was even larger than appears from

the figures, as crime was better reported last year than heretofore. Class VI is made up for the most part of petty cases of nuisance.

12. *Class I—Offences against the State and public tranquillity.*—There was an increase of 89 cases in this class, the variations calling for no particular notice. Offences relating to coin should not be allowed to make any headway, and in every case in which bad coins are passed, or attempted to be passed, an endeavour should be made to trace the coins to their source, and to bring the coiners to justice. The Lieutenant-Governor notes that a small colony of coiners has been discovered on the borders of Khulna and the 24-Pargunnahs, and this case discloses the absolute necessity for a more cordial co-operation between the police of adjoining districts. The Inspector-General remarks that the police ought to have known about this colony, and probably some of them did, but jealousy between the two districts stopped the way, and could not be beaten down until the matter had been reported to his office. Seven coining cases occurred in the Monghyr district, and in only two were convictions obtained.

There was an increase of 73 cases under the head of rioting, the district of Bogra alone showing an increase from 29 to 92, or 63 cases. The Inspector-General is unable to accept the explanation that these cases partook more of the nature of affrays than of serious riots. It is probable that, as he remarks, either the sentences inflicted are too light, or that preventive measures are not sufficiently resorted to, only 11 persons having been bound over to keep the peace. Bogra, a district without any sub-divisions, now occupies the remarkable position of having more true cases of rioting and unlawful assembly than either Backergunge or Dacca. Further inquiry will have to be made regarding this matter. The delay in deciding disputes concerning possession is said to increase very greatly the difficulties of the police. But the Lieutenant-Governor does not see why there should be any delay in their decision, as such proceedings are to be regarded as summons cases, in which the parties must ordinarily produce their own witnesses, though assistance should not be arbitrarily refused. It has been ruled by the High Court in several cases that, in proceedings under this section, a Magistrate should not hold a lengthened and protracted investigation, but should make a speedy and summary inquiry into the fact of possession, and pass orders with as little delay as possible. The same remarks apply with even greater force to proceedings under section 107 of the Code, and this is well illustrated by a case mentioned by the Inspector-General. On the 26th June the police applied to the Sub-divisional Officer of Perozepore to have certain disputants bound down to keep the peace, and the latter officer fixed the 6th August as the earliest date on which he would take it up. "A delay of six weeks of course overshot the mark, and the result was a fight, which need never have happened." The number of riots attended with loss of life is one of the worst features of the year's administration, being greater in every district than it has been in any year since 1878. Statement A appended to the Report does not show separately the number of proceedings under section 107, Criminal Procedure Code. It was remarked in the Resolution of last year that a serious riot may often be prevented by a judicious resort to the provisions of this section, and Sir Stuart Bayley has no doubt that, had Magistrates resorted to this section in all cases of clear necessity, some of these homicidal riots would not have taken place. On the other hand, there is too much reason to fear that people are bound over to keep the peace in the district of Backergunge wholesale and without discrimination. This is the opinion of the Commissioner, in which the Inspector-General concurs. It is clear that the whole subject needs inquiry, and a return will be called for from all District Magistrates showing the number of proceedings under section 107, Criminal Procedure Code, during the year 1886. The attention of the Commissioner of Bhagulpore will also be called to the serious rioting which has taken place in the districts of Monghyr, Bhagulpore and Purneah. Two cases in Bhagulpore and three in Purneah were attended with loss of life. In one of the Purneah cases, which was a fight about a fishery, one man was shot dead, and four or five others were badly wounded. In another case in the same district, a number of up-country *latifials*, described as notorious fighting men and bullies in the employ of one Chunder Narain Singh, a zemindar,

set upon and beat a European indigo-planter. Fourteen of them were ultimately sentenced to two months' imprisonment each.

13. *Class II.—Serious offences against the person.*—There were 278 murders against 288 in the previous year. Of these, five were committed by dacoits, and 17 were cases of poisoning. The Chota Nagpore Division returns as many as 41 cases, there being "a deep-rooted belief in the necessity for removing persons for practising witchcraft." The percentage of convictions for murder to persons arrested shows a further decrease from 14.4 to 12.1, and that to persons actually tried was only 17.1 against 20.7. The percentage in 1880 was 34.9 and in 1883, 24.4. This steady decrease in the percentage of convictions for murder constitutes a somewhat alarming feature in the police administration, though it is a matter for congratulation that the chances of impunity have not so far resulted in an increase in the number of reported murders. The action of the police can as a rule have little effect in diminishing the ordinary class of murders, that is, those committed in the heat and frenzy of passion; and the larger or smaller number of such murders is no safe criterion of a good or bad police administration. But there can be no doubt that the number of premeditated murders may be directly affected by a sense of impunity, or a feeling of comparative security from conviction; and the remarkable feature in the present report is the number of deliberate and cold-blooded murders as compared with those committed in the heat of passion. Some of these are marked by features of a most unusual, if not an altogether novel, character. In a case which occurred in Midnapore, the deceased was a notorious litigant. "He pleaded hard for his life, but was told that he must die, as he had given offence by his litigious propensities." In the same district "a suspected thief, whose prosecution as a budmash had been applied for, was called out of doors at night and quietly murdered, evidently a piece of lynch law." The body was, moreover, mutilated, in recognition of the fact that the deceased was a man of licentious habits. Much the same fate was met by a "torney," or mukhtar's tout, who had made himself intolerable to his neighbours. In another case an old woman money-lender, who had been pressing her debtors, was murdered. These and other cases evince so deliberate a disregard of, and contempt for, the law, that Sir Stuart Bayley cannot but think that the large percentage of acquittals (82.9) in cases of murder must to some extent account for crimes of this character, which are by no means in harmony with the ordinarily patient and law-abiding character of the people. The Lieutenant-Governor proposes to deal with this subject separately after further consideration and inquiry, but in the meantime Commissioners and Magistrates should carefully study every murder case ending in acquittal with a view to discovering the circumstances leading to this result. At present it is to be feared there is a tendency to accept an acquittal in a murder case as something which, when once reported, need have no further attention paid to it, without regard to the fact that there is no legitimate reason why the law should not be as fully vindicated and justice done in murder cases as it is in offences against property, which are not as a rule in any degree easier of proof.

14. *Cases of murder in different Divisions.*—Mr. Vessey gives a summary of the principal murders in each division and Sir Stuart Bayley would refer to the following cases, some of which bear on the remarks made in the previous paragraph:—In Nuddea, as the result of a drunken squabble about a prostitute, a man was severely beaten, and then placed on the railway line, where a passing train cut off one of his feet. A ryot in arrears with his rent cut down and killed the zemindar's peon who had come to take him before the zemindar. A boy of 12 or 13 was charged with strangling a little girl of seven, who had threatened to report him for indecently assaulting her. As regards this case, the Inspector-General states that the boy was acquitted, although he confessed his guilt and produced the child's ornaments. The District Magistrate will be asked to report why no application was made for an appeal on behalf of Government. A creditor assisted his debtor to murder the latter's brother-in-law, as it was intended that the murdered man's wife should be given in satisfaction of the debt. In Julpaiguri a woman was accused of having poisoned her husband. The Commissioner states that she fully confessed her crime, and her statements were borne out by her neighbours; but she was acquitted by the Sessions Court.

This case also was not reported to Government. In two cases women poisoned their husbands at the instigation of their paramours. In Rungpore, a young girl poisoned her husband at the instigation of her brother-in-law. In Dinagepore, a man who had cut down a tree belonging to his zemindar, and knew the zemindar's gomasta was about to proceed against him, locked the latter inside his master's cutcherry, and then set fire to it. Two men beat a married woman to death, as they suspected her of having corrupted their wives. In Dacca a zemindar's naib was murdered by discontented ryots. A village mukhtar was murdered by some *lathials* he was engaged in prosecuting for rioting. In Furreedpore, the headman of a faction was murdered by the opposite faction for giving adverse evidence in a case between them. In Tipperah a loose character was beaten and burnt to death. There were ten murders reported in the Chittagong Division, and in only one was a conviction obtained. In Patna an old man was poisoned by his servant at the instigation of his opponent in some civil suits. In Saran a woman was poisoned by her paramour, who had reason to suspect her fidelity. In Champaran a woman was poisoned by her husband to clear the way for an intrigue he had with his brother's widow. In Saran the murder of Chuni Lal, a well known Chuprah banker, by a hired Rajput ruffian named Moti Singh, attracted much attention at the time. In Durbhanga a zemindar's gomasta was murdered, and his body mutilated by the neighbours of a girl he had seduced. In Monghyr a woman, whose husband was away, had her throat cut by five men, who were offended with her for rejecting their advances. In Singbhoon a husband hired an assassin to kill a man who had an intrigue with his wife. In another case a procuress was murdered while asleep. These and other cases clearly demonstrate the necessity for taking some steps with a view to bring about better results than those attained during the year under report.

15. *Class III—Serious offences against the person and property, or against property only.*—There were 22,803 true cases against 24,103 in 1885. The annexed statement shows the number of cases under the principal heads of this class—

	1885.	1886.
Dacoity	164	103
Robbery	176	156
Serious mischief and cognate offences	703	700
Mischief by killing, &c., any animal	794	633
Lurking house-trespass or house-breaking, &c.	22,023	20,941
House-trespass, &c.	235	264

Almost the whole of the decrease of 1,300 cases is under the head of burglary. That the number is still in advance of the figures for 1883 is no doubt due to the extra pressure put on chowkidars to report. There has been a decrease of as much as 37·2 per cent. in the number of cases of dacoity, and there can be no doubt that the new system of co-operation tends to suppress this crime. The number of true cases of mischief by fire increased from 267 to 374. The difficulty of detection in these cases is manifest from the fact that only 15 persons were convicted, while 144 were discharged or acquitted. The charges at any rate enable the police to find out the names of reputed incendiaries. The Commissioner of Chittagong would proceed against such men under section 110 of the Code of Criminal Procedure. But the present law omits the words "dangerous character," which were in the corresponding section of the Code of 1872. These words would cover professional incendiaries as well as professional cattle poisoners, but it would be now necessary to show the habitual commission of criminal intimidation or extortion, or an attempt to extort.

16. *Class IV—Minor offences against the person.*—This class of offences calls for no remarks.

17. *Class V—Minor offences against property.*—There were 40,020 offences under this class against 42,208 in 1885. The following table shows the increase or decrease under the principal heads:—

Description of offence.	1885.	1886.
Lurking house-trespass or house-breaking	692	689
Theft of cattle	2,055	1,798
Ordinary theft	27,376	25,063
Criminal breach of trust	1,614	1,547
Receiving stolen property	1,874	1,672
Criminal and house-trespass	2,562	2,218

The only increase is under the heads of criminal trespass and house trespass, which, as the Inspector-General remarks, are not important crimes from a police point of view. The remarks made by Mr. Veasey in paragraph 254 of his Report, regarding the employment of Domes as municipal mehters in the town of Patna will be referred to the Commissioner for any remarks he may have to make.

18. *Class VI.—Other offences not specified above.*—There were 27,003 cases under this class against 24,819 in 1885. The following table shows the figures for the last two years under the principal heads of this class :—

	1885.	1886.
Vagrancy and bad character	1,117	1,210
Offences against Excise Laws	2,404	2,536
" Opium Act	571	390
" Railway Laws	348	350
" Salt and Customs Laws	353	359
" Arms Act	938	1,061
Public and local nuisances	18,053	19,316
Other special and local nuisances cognizable by police	905	1,338

Out of the total increase of 2,184 cases, as many as 1,696 are accounted for by prosecutions for nuisances of various sorts. It is always difficult to know whether an increase in the number of prosecutions for petty infractions of municipal and conservancy regulations is due to the greater frequency of such delinquencies, or to an increased vigilance and austerity on the part of municipal authorities and the guardians of the peace. The matter is one that depends a good deal from district to district on individual idiosyncrasies, and an increase or a decrease from year to year may be entirely accounted for by a change in the local authorities. As regards those nuisances and offences under special laws, which are cognizable by the police, Sir Steuart Bayley looks to the Inspector-General to discourage any tendency he may observe to award praise or the reverse solely in accordance with figures and returns.

19. *Cases of bad livelihood*—Adjoining districts as usual show remarkable variations in the number of prosecutions for bad livelihood. There was again great delay in disposing of cases in some districts, but the Resolution for 1885 was issued so late in 1886 that it has naturally not had any great effect in putting a stop to delays during the latter year. Sir Steuart Bayley trusts that the report for the present year will exhibit a marked improvement in this respect. It is far better that a case should be taken up at once in Court than that men should have charges hanging over their heads for months and months, because it is not found convenient to depute an officer to the spot. As was remarked in last year's Resolution, there are many cases in which it is no kindness to the suspected person to make the enquiry in his village, and in which no advantage can accrue from such a procedure. When not more than one person in half a lakh of the population is proceeded against for bad behaviour, obviously doubts must arise as to whether a sufficient resort is had to these sections in some districts. The average number of cases during the four years from 1874 to 1877 was 3,426. In the last-mentioned year the attention of Sir Ashley Eden was directed to the abuse of these provisions of the law in some districts and the reaction that ensued on the orders then issued has brought the number down to a very low level. Statistics prove that in Bengal the police have not the same acquaintance with the criminal classes, or the same familiarity with their haunts and movements, as is possessed by the police in England, and the number of persons proceeded against on suspicion in that country, under Vagrancy Acts and the Prevention of Crime Act, is about fifty times as many as those proceeded against in Bengal under sections 109 and 110 of the Code of Criminal Procedure. Sir Steuart Bayley does not advocate a return to the policy which existed prior to 1876; but at the same time he would not have these sections altogether lost sight of, as appears to have been the case in some districts, and those not the least criminal. Some of the Behar districts swarm with criminal castes and unconvicted burglars, and if Saran had as many as 82 cases, it is not easy to see why there should have been only 16 in Darbhunga, 12 in Mozufferpore, and 9 in Champaran.

20. *Non-cognisable crimes.*—Non-cognisable offences have increased by 6,668, as will be seen from the following table :—

	1885.	1886.
Abetment	2
Class I	7,587	8,063
" II	60	72
" III	1,126	1,028
" IV	54,731	58,945
" V	10,629	10,666
" VI	10,017	10,877
Special laws	21,644	23,014
Total	106,996	112,664

The increase under class I is chiefly under offences against public justice (227) and false evidence (239); but this does not make up for the decrease of 701 cases in 1885.

Classes IV and V.—The increase under criminal force is 3,394, and under hurt 856. This large increase in trivial charges, and the fact that they were not settled out of Court, is not a satisfactory feature. There were 7,999 cases of mischief, an increase of only 26 on 1885, but that year showed an increase of 1,086 on the year before.

Class VI.—Offences relating to marriage increased from 3,434 to 4,050, proceedings for taking security to keep the peace from 1,562 to 2,109, while possession cases decreased from 388 to 307. Under "Special laws" there has been an increase of 350 in railway cases, of 242 in stamp cases, and of 293 for non-registration of births and deaths; while pound cases have decreased by 3,516 and salt cases by 271. Out of 4,050 complaints of offences relating to marriage, process was issued in 2,284 cases. Only 1,686 persons appeared before the Court, of whom 455 were discharged after appearance, 903 were acquitted, and 244 convicted; 4,050 institutions and 244 convictions. The number of murders, due to jealousy and illicit intrigues, has been remarked on above, and a number of serious offences against the person have been due to the same causes. There can be no doubt that a judicious enforcement of the provisions of Chapter XX of the Penal Code in *bond fide* cases must tend, in an oriental country, to the prevention of much serious and violent crime. The very small percentage of non-cognizable cases in which the police were employed to investigate (4.3 against 4.5 in 1885) indicates that in some districts the police are not sufficiently made use of.

21. *Proceedings under the Code of Criminal Procedure.*—Considering the area and population of the Province, the small number of proceedings under Chapters X and XII of the Criminal Procedure Code (597 and 307) is remarkable. Magistrates should bear in mind that, when a certain state of facts is made out to their satisfaction, action under section 145 of the Procedure Code is obligatory and not optional. Judicious action under this section and under section 107 directly tends to the prevention of unlawful assemblies and homicidal riots. Orders for security on conviction under section 106 are shown under this head, while proceedings under section 107 are lumped together with bad livelihood proceedings under class VI of cognizable crime. In future, the Lieutenant-Governor would like to know the exact number of proceedings under section 107. Serious riots are often prevented by the institution of judicious proceedings, and their speedy disposal under this section. Magistrates should avail themselves of every legal means for the repression of crimes of violence; but it is evident, from the remarks of the Inspector-General, that some Magistrates have shown remissness in this respect. Attention is again directed to this important subject, and officers in whose districts rioting occurs, and who, after this warning, are found to have failed in this respect, will be considered to have incurred a very serious responsibility.

22. *Remands.*—Altogether 37,500 A forms were sent up. They were disposed of as follows:—

				Percentage
At first hearing	13,882	37.01
Remanded once	7,882	21.0
Ditto twice	5,149	13.7
Ditto thrice	3,318	8.8
Ditto four times	2,117	5.9
Ditto five times	1,408	3.7
Ditto six times	1,041	2.7
Ditto more than six times	1,824	4.8

This is slightly better than the results for 1885. Balasore, Backergunge, Manbhoom, and Pubna are again among the worst districts. The very worst is Bogra, where the percentage of cases decided at the first two hearings was only 15.05. This district also, as has been remarked above, shows the largest number of riots, and these facts together point to laxity on the part of the District Magistrate. Further enquiry will be made on this point. The Inspector-General says that it is his experience that these delays do not occur where Magistrates send for the case registers regularly. As the duty of looking at the registers of their subordinates and scrutinizing their work is imposed on District Magistrates, not only by the orders of Government, but by the High Court circulars and orders, the Lieutenant-Governor will accept no excuse for its non-performance. The attention of Commissioners will be directed to this important matter, and they will be instructed to bring to the notice of Government all cases of neglect on the part of District Magistrates.

23. *Reconvictions.*—The total number of persons reconvicted during the year was 1,442 against 1,577 in 1885 and 1,482 in 1884. Steps are now being taken to index all conviction registers, and to supply all Sub-divisional Officers with copies. When these are complete, the number of reconvictions is likely to increase.

24. The Lieutenant-Governor has to thank Mr. Veasey for his interesting and valuable report. The reports, figures, and returns from different divisions have been dealt with in an intelligent manner, and it is evident that they have been scrutinized with great care. Attention to mere figures has been discouraged, and sustained and steady work is singled out for praise. Sir Stuart Bayley has no doubt that all branches of the police administration have benefited by the interest evinced in it and by the searching supervision exercised by him. The names of the officers favourably mentioned by the Inspector-General in paragraphs 50 and 52 of his Report will be noted in the Appointment Department.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Inspector-General of Police and the Commissioner of Police, Calcutta.

Ordered also that a copy of the Resolution be forwarded to all Commissioners of Divisions for information.

Ordered also that a copy of the Resolution, and extract paragraphs 50 and 52 from the Report, be forwarded to the Appointment Department of this Office, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Offg. Chief Secretary to the Govt. of Bengal.

QUARTERLY INSPECTIONS OF THE KIDDERPORE DOCK WORKS.

The sub-joined report is published for general information.

W. B. BESTIC,
Under-Secretary to the Govt of Bengal,
P. W. Dept.

TO THE SECRETARY TO THE GOVERNMENT OF BENGAL,
PUBLIC WORKS DEPARTMENT.

SIR,

We have the honour to report that in compliance with the instructions contained in Public Works Department letter No. 1223M.P.I., dated 3rd August last, we made the first inspection of the works in progress at the Kidderpore Docks on the 14th instant.

The delay that has occurred in submitting this report is due to the recent serious illness of one of us (Mr. J. C. Vertannes).

We understand the Kidderpore Dock scheme as at present authorised to be proceeded with to comprise:—(1) the acquisition of all land required for the construction of both Docks Nos. 1 and 2, and for the boat canal to Tolly's Nullah and the construction of the following works:— 2) sixty-foot lock, (3) eighty-foot entrance to tidal basin, (4) tidal basin with 60-ton shears, (5) double passage from basin to Dock No. 1, (6) Dock No. 1 with width of 600 feet, (7) boat canal from docks to Tolly's Nullah, (8) Graving Dock, (9) boat wharves, tramway with lifting bridge over Tolly's Nullah, and (10) the removal and re-construction of the buildings in the Government Dockyard.

The revised estimates relating to these works being under preparation, Mr. Apjohn, the Superintending Engineer in charge of the Dock Works, has not been able to give us definite information regarding the principal items of works which those estimates provide for; he has, however, submitted the accompanying index map and statement, which show the progress made on such works as have been taken in hand up to the end of the quarter under report. The condition of the works on 30th June may be described as below:—

TEMPORARY WORKS AND PLANT.

We understand that a want of locomotive power was felt, but that more engines and trucks for the removal of spoil were shortly expected, on the arrival of which work would proceed with greater facility.

It must be borne in mind, however, that in starting works of the nature of these under report, a considerable length of time must pass in making preliminary arrangements, collecting plant, &c., before a fair rate of actual progress can be attained. The season up to 30th June was a favourable one, and more work was executed than it was anticipated could have been done. The tramway to Akra, being 5.5 miles in length, was completed and opened for carriage of material in February last. Tramway lines, 9.4 miles in length, have been laid in the vicinity of the docks for the removal of earth, and are in use.

PERMANENT WORKS.

Acquisition of Land.—The land required for Docks Nos. 1 and 2, and for railways to Tolly's Nullah and Akra, had been acquired, but considerable delay to the work had been caused by some of the land required for the boat canal not having been handed over, and some inconvenience has been felt on account of all the buildings in the Government docks not having been vacated.

Tidal Basin.—Work of excavation in the foundations for the walls of this work was begun in January 1887, and brickwork started in March. By 30th June 88 lakhs of cubic feet of earthwork had been moved, and 418,000 cubic feet of brickwork executed in a length of 320 running feet of walling on either side of the basin.

Dock No. 1.—The diversions of the Garden Reach Road and of some minor roads on this dock site had been made. Of earthwork 202 lakhs of cubic feet had been done, and 1,241 running feet of walls had been founded and raised to a height of 10 feet. In this walling 721,370 cubic feet of brickwork had been executed.

Boat Canal and Dock.—The excavation of 18 per cent. of the estimated quantity of earth in the canal had been carried out, and the excavation of the boat dock, comprising 50 lakhs of cubic feet of earth, had been completed. More work in the boat canal could, we understand, have been done, but for the fact that all the land required for this work had not been handed over.

Boat Wharves, Tramway and Lifting Bridge.—The Strand Tramway between Calcutta and the docks, a length of 2.70 miles, had been completed, and the lifting bridge over Tolly's Nullah at Hastings constructed and was open.

Expenditure.—Up to end of June a total sum of Rs. 55,42,508 had been expended on the works connected with the dock scheme. It should be noticed, however, that Rs. 21,59,000 of this, or 38.9 per cent., represents the cost of acquiring land.

As the works executed during 1886 in connection with the dock scheme were merely of an experimental nature, the month of January 1887 should be taken as the time in which the works were started.

Taking this into consideration, we are of opinion that the progress made up to 30th June 1887 has on the whole been satisfactory, and we have every reason to believe that the character of the work and of the quality of the materials used are of the best description.

We have the honour to be,

SIR,

Your most obedient servants,

J. C. VERTANNES.

H. CLOETE.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 22nd October 1937.

No.	District and date of return.	Rainfall at Sadar Stations in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
<i>Western Districts.</i>			
Burdwan Divn.	1 Burdwan, Oct. 23, '37	0.50	Weather—fine and dry for most part of week; getting cool. Prospects of rice crop now fair, but more rain would benefit it much. Kharri preparations in progress. Sugarcane good. Price of rice slightly lower in Cutwa and higher in Ransegunge and Burdwan. Fever prevalent.
	Colna	1.11	
	Cutwa	0.20	
	Ransegunge	0.17	Weather—mornings and evenings cool and cloudy. Last week's rainfall, though light, was almost general, and has considerably improved the prospects of amma rice in the Nishanpur sub-division, but has been of very little benefit in the Burdwan. Plants have begun to flower. Kharri rice has been gathered. Amma is ripening. Prices continue stationary. Public health good.
	2 Bankoora, " 23, '37	0.90	
	3 Bombehoom	0.43	Weather—unseasonably warm in the day time with cool nights. More rain is needed for amma paddy on uplands. The crop in other localities is fast ripening and promising well. Every effort is being used to induce the ryots to irrigate this crop where necessary. Prices have fallen slightly. Public health is extremely bad, and fever is rife to a degree unknown since the epidemic years.
	Rampur Hant	1.72	
	4 Midnapur, " 23, '37	NH	Weather—rather warm for the time of year. Crops generally doing well. Prospects in Ghatal improved by recent rain.
	5 Houghly	0.16	Weather—getting cooler at night; hot and bright during day. Prospects of winter rice fair. A 10 to 12-anna crop may be expected. More rain wanted. Other crops doing well. Fever generally prevalent.
	Saranpur	1.24	
Paschim Divn.	Jehanabad	0.07	Weather—bright sun with cool mornings and evenings. Preparation for kharri going on. Prospect of sugarcane good. Amma looks well, but more rain wanted in the south. Public health fair.
	Howrah	NH	
	<i>Central Districts.</i>		Weather—cool and fine. Prospect of amma paddy fair since the recent rain. Sugarcane continues favourable. Public health generally good, but fever prevalent as usual in this season.
	6 24-Pargahs, " 23, '37	0.26	
	7 Naddea	0.03	Weather—seasonable. State and prospects of amma and sugarcane good. Cultivation for cold-weather crops in progress. Fever prevalent, also some cow-pox.
	Kushia	1.34	
	Mahespur	1.34	Weather—seasonable. Prospects of amma favourable. Ploughing for winter crops going on. Some fever prevails. General health good.
	Chandkhanga	1.22	
	Rungghat	0.11	Weather—hot and dry. Prospects of amma good. Winter crops hopeful, though some will have to be re-sown. Public health generally good.
	8 Khoolna, " 23, '37	NH	
Rajshahi Divn.	9 Jessore	0.44	Weather—hot during the day and cool at end of night. Amma paddy in ear. Prospects good. Kharri and moony are still being sown. Tif and rahar progressing. Fever reported from Lalbagh.
	Jhenidah	3.03	
	Mazurah	0.83	Weather—seasonable. State and prospects of Ammasati paddy good. Rice 24 annas per rupee.
	Narail	0.66	
	Bongong	1.29	Weather—fine; getting cool. State and prospects of crops excellent.
	Moorshedabad	1.04	
	Lalbagh	2.34	Weather—fine and clear. Prospects of amma crop favourable. Public health good.
	Kandi	1.10	
	Jangipur	0.05	Weather—clear and cool. State and prospects of crops very satisfactory. Public health fair.
	11 Dinajpur	3.41	
Dacca Division.	Thakurgaon	1.35	Weather—still warm and cloudy. Prospects of crops good.
	Rajshahi	0.25	
	Nattora	2.15	Weather—seasonable. State and prospects of crops good.
	Nawgaon	2.00	
	13 Rangpur	1.60	Weather—seasonable. Prospects of winter rice generally good. Land is being prepared for cold-weather crops. Fever, as usual at this time of year, is making its appearance.
	Nilphamari	NH	
	Kurigram	1.42	Weather—days hot, nights cool. Recent rain has done much good to standing crops. Pulses being sown on high lands. Prospects of crops and public health good.
	Gaibanda	3.00	
	14 Bogra	1.03	Weather—seasonable. State of all crops satisfactory. A certain amount of fever prevalent; otherwise public health good.
	Nawkhilla	2.24	
Dacca Division.	15 Pubna	1.18	Weather—days hot; nights a little cold with occasional rain. Prospects of crops promising, but rain wanted in Gaurnadi station. General health good.
	Serajeungu	2.00	
	16 Darjeeling	0.27	Weather—hot. State and prospects of crops good. Rain has done much good.
	Jalpigora	1.42	
	17		
	<i>Eastern Districts.</i>		
	18 Dacca, Oct. 23, '37	0.47	Weather—seasonable. State and prospects of crops good. Rain has done much good.
	Manickganga	2.21	
	Munshiganga	2.71	Weather—days hot; nights a little cold with occasional rain. Prospects of crops promising, but rain wanted in Gaurnadi station. General health good.
	Narsingganga	3.3	
	19 Furruckpur	1.52	Weather—hot. State and prospects of crops good. Rain has done much good.
	Gualkunda	0.40	
	Madaripore	1.17	Weather—hot. State and prospects of crops good. Rain has done much good.
	20 Backergunge	2.44	
	21 Myrmensingh	4.23	
	Jamulpur	4.10	
	Kishoreganga	4.11	
	Atta	4.01	
	Natorekone	6.22	

No.	District and date of return.	Rainfall at Sadler Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—contd.			
Eastern Districts—contd.			
CARRIGANNE DIV.	22 Chittagong, Oct. 25, '87	Nil	Weather—seasonable. <i>Larus</i> in ear. Sugarcane doing well. Prospects fair. Lands being prepared for winter crop. Cholera still reported. Public health good. Prices steady.
	23 Noakhally „ 25, „	0.14	Weather—seasonable. Prospects of sown crop very fair. Public health fair.
	Feungy „ „	5.25	
	24 Tipperah „ 20, „	4.49	Weather—seasonable. The late rain has saved the paddy, and a fair average crop of winter rice may now be expected throughout the district.
	Brahmanbariah „ „	2.77	
Chandpur „ „	2.70		
Chittagong Hill „ 18, „	0.14	Weather—cloudy during the latter part of the week. Harvesting of jute paddy nearly over. Cotton doing well and in pod. Lands are being ploughed for mustard and other cold-weather crops. Plough-paddy doing well.	
25 Hill Tipperah „ 19, „	3.05	Weather—nights and mornings cool; days not so hot as before. Prospects of sown and sugarcane fair. Tobacco and chillies being transplanted. Public health good.	
BEHAR.			
PATNA DIV.	26 Patna Oct. 22, '87	0.52	Weather—cool. Recent rain has improved prospects of paddy. <i>Rabbi</i> sowings are being pushed on. Public health good.
	27 Gya „ 22, „	0.03	Weather—seasonable. Paddy crop has suffered much for want of rain. It is still withering in uplands. <i>Rabbi</i> being sown. Fever reported from several thannas.
	28 Shahabad „ 22, „	Nil	Weather—seasonable. Paddy crop continues to promise well. <i>Rabbi</i> sowings have commenced. Public health fair; some fever reported from Sasaram.
	29 Buxar „ 22, „	1.35	Weather—mornings cold; days still hot. Prospects of rice crop very favourable. <i>Rabbi</i> sowings commenced. Tobacco coming up well. Prices remain stationary. Public health generally good.
	30 Mozafferpur „ 22, „	0.78	Weather—rains on 15th; since then rainless, but sky cloudy and weather seems uncertain. Prospects of all crops good. <i>Rabbi</i> cultivation in progress.
BAGHPORE DIV.	Hajipur „ „	1.84	Public health fair for the season.
	Siwan „ „	2.20	
	31 Saran „ 22, „	1.02	Weather—fine. Prospects of crops very much improved. Public health good.
	Sevan „ „	5.62	
	Gopalgunge „ „	1.65	Weather—nights cool. <i>Rabbi</i> sowings progressing but slowly on account of recent rain. Prospects of rice favourable. Prices stationary. Public health good.
	32 Champaran „ 22, „	2.50	
	Hettiah „ „	1.18	Weather—days hot; nights and mornings tolerably cool. Recent rain has much benefited winter rice. <i>Rabbi</i> sowings going on and prospects generally improved. Public health good. Prices show a downward tendency.
	33 Munger „ 22, „	2.00	
	Begusseri „ „	2.40	Weather—clear and fair. Mornings and evenings cool. <i>Rabbi</i> sowings going on. Prospects of <i>aghami</i> paddy much improved by recent rain.
	34 Jamui „ 22, „	2.07	
35 Bhagalpur „ 22, „	Nil	Weather—hot for the time of year. <i>Aghami</i> crops doing well. <i>Rabbi</i> crops being planted. Tori sowings in progress. Kerti doing well.	
36 Patna „ 22, „	2.37		
Kiraungunge „ „	2.45	Weather—fine and warm latterly. Prospects of crops generally favourable. Common rice selling at an average of 23 seers per rupee. Fever prevalent.	
37 Arrah „ 22, „	1.98		
38 Malah „ 22, „	0.33	Weather—still warm. Sky slightly clouded. Prospects of rice crop materially improved by the rain of last two weeks. More rain wanted in Godda. Public health fair.	
Chunehal „ „	2.17		
Shitgunge „ „	2.11		
Osani „ „	1.0		
39 South Pargna „ 22, „	Nil		
Daghar „ „	1.71		
Godda „ „	0.86		
Hajmehal „ „	1.08		
Pakour „ „	2.28		
ORISSA.			
ORISSA DIV.	38 Cuttack „ 21, „	0.80	Nights cool. Sky cloudy to-day (21st). <i>Leghe sarad</i> flowering and in some places ripening. <i>Gara sarad</i> coming into ear. Prospects continue good. Prices remain unchanged. Fever prevalent; public health otherwise good.
	39 Poonch „ 20, „	1.18	Weather—seasonable. Second weeding of <i>sarad</i> crop in progress. <i>Rabbi</i> being sown. Common rice 20 seers 13 chittacks per rupee in the Sadler sub-division and 20 seers in the Kucorda sub-division. Cases of cholera reported from the interior of the district.
	40 Kucorda „ „	2.11	
40 Bilarore „ 21, „	0.74	Weather—seasonable. <i>Sarad</i> paddy coming into ear. Prospects of crops generally good; but a little more rain is wanted in some parts. Public health generally good except some cases of fever.	
CHOTA NAGPORE.			
South-West Frontier Agency.			
CHOTA NAGPORE.	41 Hamaibari, Oct. 21, '87	1.06	Weather—fine. Cloudy again to-day (21st). Recent rain has improved prospects, but more would do good. Up land rice has suffered considerably. General health good.
	42 Laherdun „ 22, „	0.63	Weather—cool. Rain has fallen throughout the Palamow sub-division, but very slightly at head-quarters. More rain urgently wanted at head-quarters, where the prospects of crops are not favourable. Prices stationary. Public health good.
	Palamow „ „	2.19	
	43 Singhbhum „ 22, „	Nil	Cold weather seems to have set in; occasionally cloudy with promises of rain. Rain has fallen in some places, but more rain is wanted. Prospects not absolutely bad. Moderate outturn expected. General health good.
44 Manbhum „ 22, „	0.65	Weather—cool at night, warm by day; clouds still hanging about. Early cessation of the rains has greatly injured the upland paddy, the outturn of which is reported to be from 4 to 6 sausa. Prospects of winter paddy on low lands and <i>rabbi</i> crops are excellent. Public health good.

Calcutta, the 25th October 1887.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 21st OF OCTOBER 1887.

THE meteorology of the previous week ending 14th October had been very important from the fact that a small cyclonic storm had formed in the south of the Bay, which crossed the coast a little to the north of Madras and travelled across the Peninsula into the Arabian sea: The indraught following in the path of the storm caused the humid south-west monsoon winds to again advance over the northern half of the Bay, and they then slowly spread over the whole of Bengal. Rain had therefore been general in Bengal in the previous week, and particularly during the last two days, very general and decidedly heavy rain was received in all districts of the Province. It was, however, evident at the close of that week, that this burst of monsoon winds and rain was rapidly diminishing in strength and retreating, for on Friday, the 14th, winds were becoming decidedly irregular in direction over the northern districts of the Province. On Saturday, 15th October, or the first day of the present week, wind directions over the north of the Province continued decidedly irregular, and at some of the western stations winds had become westerly; so that it was clear the wind systems were changing, and that the moist south-easterly and easterly current was being driven back by a dry westerly and north-westerly current. On the 16th of October the easterly element in the wind directions had almost disappeared, and winds had become northerly and north-westerly at many stations. These conditions developed further on the following day, and for the greater part of the remainder of the week a light northerly wind current has obtained over the Province, though there were slight oscillations during which southerly winds were reported at some stations, but only to be again driven back by the northerly current. The moist monsoon current therefore only affected the Province during the first day or two of the present week, and thus rainfall was only general on the 15th. On the 16th a considerable number of showers were reported in South-West, East and North Bengal, but for the remainder of the week the Province has been practically rainless, and at the close of the week conditions appeared to be becoming decidedly favourable for the setting in of the north-east monsoon or the cold-weather conditions in Bengal.

Pressure.—The retreat of the humid monsoon winds from the Province during the early part of the week was accompanied by a diminution of the air pressure. The falling barometer continued during the first-half of the week, and it was then succeeded by an equally steady rise. In the previous week pressure was rather considerably in excess of the normal; but as at the present season it is normal for pressure to increase, the general effect of the changes during the week has been to reduce the excess pressure. During the previous week pressure was in excess by 0.073 inch, and during the present week, taking into consideration only those stations which have recorded observations for many years, and which therefore furnish reliable averages, the mean pressure has been only 0.042 inch in excess of the normal. This excess pressure has been very equally divided over the whole Province of Bengal. In Assam also pressure has been in excess of the normal by 0.044 inch.

Temperature.—With the effects of the rather heavy rain of the previous week, and with the setting in of a cool northerly wind current during the present week, temperature has been below the normal over the whole of Bengal. The mean temperature for the week has been between 1° and 2° below the normal in each of the districts of Orissa, South-West, East and North Bengal; while in North and South Behar and in Chutia Nagpur the defect has been from 2° to 3°. The general mean temperature of the whole of Bengal has been 1.7° below the normal for the period. In Assam temperature has also been in defect by 0.7°.

Rainfall.—The only days on which rain was at all general were the 15th and 16th, but in many districts the falls were rather heavy. Thus, on the 15th, Bagaha in the Chumpran district reported 7.30 inches of rain, Netrokona in the Mymensingh district received 4.10 inches, Dinagore 3.41 inches, and Monghyr three inches; while the following stations received between two and three inches:—In South-West Bengal, Bolpore (Bardhaman district); in East Bengal, Mymensingh and Jamalpore (Mymensingh district); in North Bengal, Bhowanigunge, and Bagdogra in the Rangpoor district and Debignage in the Jalpigaroo district; in North Behar, Furruckabad, Madhubani (Darrbhanga district), Sitamarhi (Muzaffarpore district) and Motihari; and in South Behar, Arrah, Barh (Patna district), Sheikhpura (Monghyr district), and Pakour (Sonthal Pergunnahs district). The number of stations reporting amounts between one and two inches is rather considerable, and about 50 stations in addition to those abovenamed have thus received heavy falls. The average rainfall over the whole of East Bengal, North Bengal, and North Behar has averaged from one to one and a third inches; in South Behar the fall has averaged 0.88 inch; in South-West Bengal it has been 0.45 inch; and in Orissa and Chutia Nagpur it has equalled about a fifth of an inch. Compared with the normal fall for the period, and expressed as a percentage of that amount, the actual average falls received in the seven large meteorological districts became in Orissa 16 per cent., South-West Bengal 40 per cent., East Bengal 111 per cent., North Bengal 100 per cent., North Behar 471 per cent., South Behar 200 per cent., and in Chutia Nagpur 40 per cent. Taking each of these divisions as having an equal value in the calculation, the average rainfall over the whole Province for the week has equalled 140 per cent. of the normal.

In Assam the following rainfalls have been recorded during the week.—Dhubri 1.82 inches, Sibsagar 0.43 inch, and Silchar 0.17 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 21st of October 1887:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The mean pressure of the seven days

The average pressure of the corresponding period for 24 years, S. G.'s Office.

The total number of hours of bright sunshine

The maximum possible number of hours of sunshine

The mean temperature of the seven days

The average temperature of the corresponding period for 24 years, S. G.'s Office

The extreme variation of temperature

The maximum temperature

The highest velocity of the wind in one hour

The highest pressure of wind on one square foot

The mean relative humidity

The average relative humidity of the corresponding period for 24 years, S. G.'s Office

The total fall of rain from 16th to 22nd October 1887

The average fall of the corresponding period for 24 years, S. G.'s Office

The total fall from 1st January to 22nd October 1887

The average fall of the corresponding period for 24 years, S. G.'s Office

The mean pressure, temperature, &c., are deduced from the traces of the barograph and thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newcomen's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, = fog, dew.

A. PEDLER,
